The settling for the Derby and Oaks has passed off comparatively well; and the Ring, with the exception of two leading speculators, have kept their ground. Mr. Popham originally stood to win £10,000, to £150 on his horse, but had allowed several of his friends to go shares with him in it; while the jockey is said to have won £1400, and another of the fraternity who rode in the trial more than twice that amount. The balance against Mr. Davis on both these races was £15,000, so that he has escaped better than he usually does. The field for the Oaks was as moderate as it always is; and the winner, who had been coughing, was very lightly thought of both by trainer and owner. Neville looked pretty well, and the way in which she and Marlow fell over the ropes seems quite unexplained. A subscription of £400 has already been raised for the latter, who, although he has been in the saddle for a quarter of a century, and won a Derby, Oaks, and St. Leger, besides several other great races, during the last seven years, had scarcely anything to fall back upon. It is not yet known what the chances are of his riding again next year, and it is a strange turn of fortune which takes so good a jockey off the list, as soon after Lord Robinson. The Jockey Club lost another member last week in the aged Lord Charles Manners, who was faithful to Newmarket Heath as long as he could sit on a horse. He was always a keen sportsman, and in his early Peninsular days only equalled by a mounted French picket by the daring style in which he rode at a brook. They had not been trained in the Vale of Belvoir or been wont to cross the Whissendine Brook, with the Quorn.

Racing men will have a busy week of it. On Monday, Mr. Greville's two two-year-olds will be sold at Hampton, but although the highest blood in England comes in their veins, prices are not at all likely to come up to what they were last year. A brother to Re. Reginald, a sister to Adine, and a colt by Orlando out of Industry are among the number. Ascot will occupy us from Tuesday till Friday, when I find, although the bidding at some coal-yards under the Quadrant is only about 1 per Ton, from giving her usual race tonight at Windsor, the Royal cortège will proceed on Tuesday and Thursday, from Buckingham Palace, by railway to Datchet, and meet their carriages there. Tuesday has eight events on its list. Rifleman (of whose Derby withdrawal quaint things are told) is in the Welcome Stakes, along with Para and Flatterer; while the Ascot Derby has a very weak entry with Paguator, Second, Hazel, &c. The Ascot Stakes is likely to produce a good race, and Hungerford, 8st. 8lb.; Vandal, 8st.; Blasheard, 7st. 7lb.; Mortimer, 7st. 4lb.; Vandal, 8st. 4lb.; and Hospodar, 7st. 8lb., are all backed. The acceptance of the latter has rather surprised turfites, as he was thought to be only a mile-and-a-half horse. We are told that Pantomime, 6st. 12lb., is not likely to be far off. Rebecca, Bonnie Morn, Shoreham, Dirk Hatteraick, Cocrebus, and Claret are all in the Three year-old Triennial; and Victoria, Fly-by-Night, Bird in Hand, Fazzoletto, Polmoodie, and Sugarcane in the Two year-old. The Vase has nine entries, among which we find Ratapian, Pandango, Tumbler, Habena, Oulston, and Relay. On Wednesday the Fernhill entry (half a mile) includes Para, King Chat, Sugar-cane, Flyaway, Flatterer, and Queen's Head; and Jetty Treffz, Star of Surrey, Bridecy, and Punchbox will probably be ready to oppose Mentor's winning of the "Fifth Ascot Triennial" three seasons in succession. The Coronation Stakes has a very inferior lot of fillies in it; but the Hunt Cup includes some of the quickest horses of the day in its fifty-two, among whom Foxhunter, 6st. 11lb., is very lightly weighted.

The Gold Cup will be the great feature of Thursday. Battle is not in it, as he is specially reserved for the Goodwood Cup, and there is an impression that Virago is below the mark, and will not go. Andover's appearance over such a long course seems problematical; we expect the field to be confined to Pandango, Ratapian, Tumbler, and Orestes, or Hungerford, and we should not be surprised to see them run home in that order. Nettle is in it, but is not backed as yet. Bonnie Morn and Cavalier seem likely to have a struggle of it in the St. James's Palace Stakes; Habena (4 lb. allowed) has [illegible] nothing to meet in the Ascot Stakes, and Fly-by Night, The Czar, Queen's Head, Warlock, Polmoodie, Wandering Willie, Sugarcane, and Dramatist (several of them with 5 lb. penalties) form a strong phalanx in the New Stakes. Friday's racing has at present no interesting feature, and the meeting would be quite as strong without it.

The "All England" cricketers have regularly taken the field, and will be at Neath, in South Wales, on Monday, and at Clrencester on Thursday. At Lord's, on Monday, the Marylebone Club and ground will play the gentlemen of the Surrey Club and county—each side to have two players allowed; and, on Thursday, the first-named, without their two players, will go to Oxford to play the Undergraduates.

Aquatic Clubs are also beginning to be more active. On Monday the Nelcus Club have pair-oared races at Mortlake, and on Thursday the London Model Yacht Club will have a first-class match on the Thames. Friday will also be a field-day among yachters, both on the Thames and Mersey as both the Royal London and Royal Mersey have sailing matches for first and second-class yachts.

MANCHESTER RACES.—WEDNESDAY.

Trafford Handicap.—Dame Judith, 1. Mystic, 2.
Produce Stakes.—Ellermire, 1. Vandal, 2.
Union Cup.—The Easy Bird, 1. Orestes, 2.
Sapling Stakes.—Heir of Lynne, 1. St. Dunstan, 2.
City Plate.—Dear Me, 1. Bourgeoise, 2.

THURSDAY.

Corporation Stakes.—Ellermire walked over.
Two-year-old Stakes.—Rowena filly, 1. Van Dunck, 2.
Trades-men's Cup.—Sancelox, 1. St. Andrew, 2.

FRIDAY.

Wilton Stakes.—Rowena filly walked over.
Salford Borough Cup.—Ry-stone, 1. Eulogist, 2.
Grand Stand Plate.—Syren, 1. Bourgeois, 2.
Two-Year-Old selling Stakes.—Rowena f, 1. Swaddiffe, 2

THE RUSSIAN LOAN.—The *Hamburg Correspondent* contains a letter from Warsaw, of the 23rd, which says:—"The very slight hopes entertained of the re-establishment of peace have been very disadvantageous to the quotations of the Russian loan of fifty millions. Yesterday it fell from 92 to 91, and to-day it is still lower, without finding purchasers."

METROPOLITAN NEWS.

RESULTS OF METEOROLOGICAL OBSERVATIONS TAKEN DURING THE WEEK ENDING THURSDAY, MAY 31.

Month and Day.	Corrected Reading of Barom. at 9 A.M.	Thermometer. Higher Reading.	Thermometer. Lower Reading.	Mean Temperature of Day.	Departure of Temperature from Average.	Degree of Humidity.	Direction of Wind.	Rain in Inches.

NOTE. The sign + denotes above the average and the sign — below the average.

The reading of the barometer has varied but little during the week. The highest reading was 29.88 inches, on the 30th; and the lowest 29.44 inches, on the 31st. The mean for the week, at the height of 82 feet above the level of the sea, was 29.759 inches.

The mean daily temperatures during the first part of the week were 7·6° in excess, and during the latter half were 9·6° in defect. The range during the week was 21·7°.

The mean temperature of the week was 5·2°, being 2½° below the average value.

The range of temperature during the week was 44°, being the difference between the highest readings on the 26th (83°) and the lowest on the 30th (39°.

The mean daily range of temperature during the week was 20·1°. The greatest was 35° on the 31st, and the least 8·2° on the 31st.

Rain fell almost continuously on Thursday, to the depth of 0.7 inches, and during the week to the depth of an inch nearly.

The weather during the first three days of the week was fine, and the sky tolerably free from cloud; the rest of the week was dull and showery, and the sky almost overcast

For the month of May the mean reading of the barometer at the level of the sea was 29.861 inches; and the range 0.770 inches. The mean of all the highest readings of the thermometer by day was 69·2°, and of all the lowest by night was 39·7°; the mean daily range of temperature during the month was therefore 29·5°. The highest reading during the month was 83°, on the 26th; the lowest, 28·5°, on the 3rd; the range of temperature during the month was therefore 56 8°. The mean temperature of the month was 48·6°, being 4·6° below the average value. The mean temperature of evaporation for the month was 47·2°. The mean temperature of the dew point was 43·9°. The mean degree of humidity was 84 (complete saturation being represented by 100). And the fall of rain for the month was nearly two inches.

Lewisham, June 1, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—Within the week ending May 26 the births of 856 boys and 767 girls, in all 1622 children, were registered within the metropolitan districts. The average number for the 21st week of the year, for the previous ten years, was 1399. The number of deaths registered within the same interval of time and space were ... under twenty years of age; 154 at twenty and under forty; 206 at forty and less than sixty; 109 at sixty and under eighty; and 35 at ages exceeding eighty years: in all 1187 deaths —660 were males, and 587 females. The average number of deaths for this week, from the corresponding records, and increased proportionately to the increase of population, is 1046. It appears, therefore, that 141 persons died last week more than would have died according to the ordinary mortality in the 21st week of the same year. There is no decrease in the high rate of mortality which has lately prevailed in London, and which seems to be mostly owing to the long continuance of cold weather, accompanied with the harsh and east winds.

THE BRITISH BENEFICENT INSTITUTION.—The sixth annual festival of this institution was celebrated on Wednesday at the London Tavern: His Royal Highness the Duke of Cambridge was in the chair. The amount collected was about £580.

ADMINISTRATIVE REFORM.—A numerous meeting was held on Tuesday night at the Horns Tavern, Kennington, with the view of establishing a branch association for the purpose of co-operating with the Central Reform Association. Mr. Billington accepted the chair, and the meeting was addressed by that gentleman, Mr. Murough, M.P., Mr. Webber, and others.

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL, CHARING-CROSS.—The performances at the Haymarket Theatre on Friday next, the 8th inst., are announced for the sole benefit of the above excellent charity. The bill includes the play of "As You Like It," with Miss Helen Faucit as *Rosalind*, and Mr. Barry Sullivan as *Jaques*; to be followed by the new farce of "Only a Halfpenny," a ballet, and the "Two Savoyard" castles. With such attractions, the result will, doubtless, be highly beneficial to the funds of the Ophthalmic Institution, which is much in need of peculiary assistance.

MAINE LIQUOR LAW.—On Monday night a public meeting, respectably attended, was held at St. Martin's-hall, convened by the United Kingdom Alliance for the Total Suppression of the Traffic in Intoxicating Liquors throughout the United Kingdom," in aid of their movement. Alderman Sir R. Carden occupied the chair. The Rev. J. Ranscme, the Rev. Jabez Burns, D.D., and other gentlemen, having addressed the meeting, a resolution in furtherance of the objects of the meeting was adopted, and also a petition to both Houses of Parliament, praying for the enactment of the absolutely prohibitive the sale of intoxicating liquors in this country. On Wednesday night the "Maine Law" held a public meeting in Exeter-hall, the body of which was well filled, in aid of their movement. Sir Walter C. Trevelyan occupied the chair; and, with the Earl of Harrington, Alderman Harrison (of Wakefield), and Sir R. W. Carden, addressed the meeting in support of the principles of the association. A resolution, declaring "that the traffic in intoxicating liquors, as common beverages, is inimical to the true interests of individuals, and destructive of the order and welfare of society, and ought therefore to be prohibited," was carried by a large majority. In preference to an amendment moved by Mr. Forster declaring the attempt to enforce temperance by prohibitory enactments to be unwise, and an unjust interference with sacred individual liberty.

INSTITUTION OF CIVIL ENGINEERS.—On Tuesday, Mr. Simpson, as president of the institution, gave his annual *conversazione* in Great George-street. Notwithstanding the powerful competition of the French Exposition, Mr. Charles Manby, the indefatigable secretary, succeeded admirably in assembling a large collection of mechanical novelties of the most striking character; and a very interesting collection of paintings and sculpture—among them Mr. Lucas's portraits of the engineers at the raising of the Britannia tube, and a fine marble bust of Professor Faraday, by Noble. The theatre of the institution was newly arranged for the occasion, the working models being placed upon successive stages, or wide steps, rising from the area. The ventilation was also more successfully accomplished than in any former year. Among the more attractive novelties was an adaptation of Foucault's method of illustrating the rotation of the earth. A working set of Mather's earth-boring machines, and the American invention of Dr. Brown were exhibited; as were also Mr. William Smith's new arrangement for laying down submarine telegraphs, Siemen's regenerative steam-engine, Mr. Edmond's balance, Burleigh's patent switch, Hansen's water-meter, How's stutter for keeping time. Symons's magneto apparatus, the Atlantic telegraph plan, M'Adam's numbering-machine, Colonel Colt's inventions, a large working model of a double basin, Berdan's quartz-crushing machine as now arranged for Australia, and many accessories. Berthon's patent collapsing life-boat, Clifford's plan for unlashing and lowering ships' boats, Ogilby and Moore's invention for iron launches in compartments of the West African coast, Goddard's patent duplex gas-burner, Hoare's engineer's slide-rule, Norton's distance-indicator, How's sailing carriage, Swiss drawing instruments, remarkable for their beautiful workmanship and economy of price, exhibited by Mr. Harlow, &c. The company was extremely numerous throughout the evening, and included the representatives of science, art, and literature; and the *conversazione* was one of the most brilliant meetings of the institution.

THE SUNDAY TRADING BILL.—A meeting of the inhabitants of the parish of St. Clement Danes was held in the Vestry-hall, Fleet-street, on Wednesday evening, for the purpose of taking into consideration the bill now before Parliament for the suppression of Sunday trading; Mr. Churchwarden Child in the chair. Mr. Gannon, in moving the first resolution, observed, never would be abated until the closing of shops was rendered compulsory. He moved the following resolution:—"That this meeting is of opinion that the bill now before Parliament for the suppression of unnecessary Sunday trading is calculated to prevent to a great extent the employment of persons engaged in shops and otherwise on the Sunday, and thereby to secure to them opportunities for both mental and bodily relaxation, and will, if passed into a law, contribute to the promotion of good order and social comfort throughout the metropolis." Mr. Tomlinson seconded the resolution. Mr. Biggett, while he supported the bill, would very much like to see the British museum and the Crystal Palace open on the Sunday. Mr. Oliphant approved of what had fallen from the last speaker, and moved the following amendment:—"That this meeting expresses its satisfaction that a bill has been introduced into Parliament to prevent trading on Sunday within the metropolitan police district; and is of opinion that such legislation is calculated to improve the moral, social, and religious condition of the people." The amendment was negatived by 40 votes to 26. An amendment deprecating legislative interference was also lost. The original motion was agreed to; and, after adopting a petition to Parliament, the proceedings terminated.

SHIPWRECKED MARINERS' SOCIETY. The sixteenth annual meeting of this benevolent institution was held at Willis's Rooms on Wednesday. The Right Hon. Lord Henry Cholmondeley, M.P., who presided, expressed his warm attachment to the society, and avowed his assurance that the interest was as much thought of the length and breadth of the land, the more universally it would be appreciated. The report stated that during the first three months of the past eventful year the storms that swept the coasts of the United Kingdom were truly appalling, and exceeded in violence any that had been known in the memory of man. The disastrous consequences to shipwrecks to have been lost on the shores and in the seas of the United Kingdom. Relief had been afforded to 3546 shipwrecked persons, including mariners and fishermen, shipowners, to assist in replacing their clothes and boats; and to 2306 widows, orphans, and aged parents; making together a total of 5852 persons relieved between the 1st January and 31st December. The number of mariners and fishermen subscribing quarterly from 5s. 6d. to 3s. per annum now exceeded 40,000; while 2804 vessels carried its distinguishing flag. The society had during the past year handed over all its lifeboat establishment to the Royal National Life-boat Institution, as they hoped thereby that the work would be better carried out by one institution in London devoted to the object, and working energetically under the patronage of the Government; and it had been gratifying to find the work of encouraging exertions to save life on the high seas or coasts of our Colonies should be carried on by the Shipwrecked Mariners' Society, which during the past year had awarded fourteen silver medals and £53 in pecuniary rewards for heroic exertions in saving life, making a total of five gold, forty silver medals, and £562 10s. given since 1851, for assisting at the saving of 1060 lives.

ROYAL GEOGRAPHICAL SOCIETY. The annual dinner of the society was held at Willis's Rooms on Monday, when the chair was taken by Sir Roderick I. Murchison, in the absence of the Earl of Ellesmere, the retiring President, and of Admiral Beechey, the President Elect, both of whom were unhappily unwell. Upwards of a hundred of the members and their friends supported the chair, among whom were several distinguished travellers and men of science.

ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS.—Tuesday (Friday) morning the annual meeting of the members of this society, which has effected so much good, especially during the last few years, in bringing to justice persons of various classes and stations in life who have been guilty of unnecessary torture to animals was held at the Queen's Concert Room, Hanover-square; the Marquis of Westminster presiding. The noble Chairman, in opening the proceedings, alluded to a very brilliant and enthusiastic meeting recently held in Paris under the presidency of the Vicomte de Valmer, in aid of the objects of the society, and mentioned several cases of cruelty which had been successfully prosecuted during the past year—amongst others, one at Wakefield, where a man invegled a cat into his house and bit off its nose; one at Brighton, where the proprietor of the baths was convicted for working a horse in a terrible condition; and another at Ashby, where an unfortunate cock was pinned down and most cruelly tortured. The noble Lord passed a high eulogium on Mr. Middleton, the secretary, as well as upon Mr. H. R. Forster, who conducted the general affairs of the society. The appointment of this gentleman had produced the most invaluable results. The powers entrusted to him had been wielded with great judgment, and to the same time, with great humanity, and he had no hesitation in saying that the society had been a great gainer by that gentleman's accession to office.

WORKING-MEN'S COLLEGE. A general meeting of the members of the Workin.g-men's College was held at the Hall of Association, Castle-street, on Thursday evening, being a kind of réunion at the close of the third term. The attendance was very numerous. The Rev. F. D. Maurice, Principal of the College, presided, and observed that the largeness of the attendance on so bad an evening proved the interest which the pupils took in the institution. The accounts he received of the progress of the different classes were satisfactory. The number of pupils remained about the same as at the close of the previous term, but the attendance at class was steady. The idea of a similar institution for working women had been considered, and resolved that nothing of that larger than was originally contemplated would be wrought out of it. He was glad to find that they (the working men) entertained higher and better notions about the education of women than many above them in position. The Principal called on the several teachers who were present to state the condition and progress of their several classes, which they did in very approving terms. Mr. Ludlow then read a paper on the Co-operative Stores of Working Men's Institutions, which he said sprung up about the same time, and from the same necessity, as the new Administrative Reform Association. He considered the tendency of the new association wrong in decrying as it had done birth and ancestry, and paying too exclusive a regard to mere success in the pursuits of wealth, whilst the aristocracy were equally wrong in regarding merit as a mere question of opinion. It was the duty of the working men to remain spectators for the present, and meanwhile to educate themselves to the level of those above them.

LOSS OF LIFE AT SOUTH LAMBETH WATERWORKS.—Shortly before eight o'clock, on Wednesday, an appalling accident took place at the reservoirs of the South Lambeth Waterworks, adjoining the old House of Correction on Brixton-hill. The reservoirs, four in number, occupy an area of nearly four acres, and are some 22 feet in depth, 700 feet long, and 200 feet broad, the water being supplied by pipes of large dimensions from Thames Ditton. While about thirty men were engaged shifting the centres from the completed arches, removing the scaffolding, &c., almost without any warning, about twelve or fourteen of the arches gave way and fell to the bottom of the reservoir with a loud crash, burying beneath them the men who were at work; some twenty labourers, who were levelling the earth outside on the top of the reservoir, also falling with the mass. The shock occasioned by the fall alarmed the whole neighbourhood; and the most prompt measures were taken to extricate the sufferers. Although nearly 200 labourers were engaged in the task, it was eleven o'clock before the whole of the parties were got out. Four of them, unhappily, had been crushed to death; seven others were found to be severely injured, and were at once sent to Guy's Hospital.

THE ROYAL COLLEGE OF CHEMISTRY.—At a meeting of the special committee appointed by the College of Chemistry to close its affairs, on account of its transfer to the department of Science and Art at the Board of Trade, Lord Ashburton presented a testimonial from the Council to Dr. Hoffman, and also a piece of plate, as a personal testimonial from some of Dr. Hoffman's friends.

ART-CONTRIBUTIONS.—BURLINGTON-HOUSE, PICCADILLY.—Within the last few days the committee have paid £1000 as a further instalment to the Burlington Fund—making in all £3220. On Saturday last the committee were favoured with the gratuitous services of the band of the Scots Fusiliers, and upwards of 1200 persons paid for admission. The "New Zealander," owing to some very interesting drawings which it contains, proves very Mathers' exhibition here. A lady has kindly promised the gratuitous services of the bands of the Blues on the 9th inst., and of the 2nd Life Guards on the 12th.

CITY BUSINESS ON SATURDAYS.—The movement in favour of terminating business hours on Saturdays at two o'clock, continues to meet with additional supporters, and promises finally to include every class of traders. Tuesday last it definitely received the sanction of the Stock Exchange, the committee, in accordance with the wishes of the members, having resolved last week, that from and after Saturday, the 16th June, business shall officially terminate at two o'clock, and that the house be peremptorily closed at two o'clock (being two hours earlier than on other days of the week). A notice to this effect was posted on the Stock Exchange on Tuesday afternoon.

ENGLISH PRISONERS AT BALACLAVA.—Mr. Upton leaves for England with his wife and family in the course of the week. He is the son of the Mr. Upton who fortified Sebastopol. At the taking of Balaclava he remained quietly, and gave himself up as a prisoner to the English. It is a purely nominal thing, as he goes about everywhere, accompanied generally by his three sweetly pretty girls. These little things, who are constantly about, dressed in round hats and little pink frocks, with two pet dogs, put one more in mind of England and home than anything I have seen out here. A rather amusing anecdote is told of them. They were the other day out for a walk, when a soldier, who did not know them, met them; in astonishment at seeing three prettily-dressed English-looking children, he stopped and asked them who they were, when the eldest replied, with the greatest gravity, "Please, sir, we're prisoners."—*Letter from the Camp, May 10.*

NEW GUN CARRIAGE.—Letters from Munich, of the 26th, give an account of the experimental lately made at Augsburg, in the presence of the King and the whole of his staff, on a new gun-carriage, invented by Duke William of Wurtemberg, which were considered perfectly satisfactory. Although the carriage is constructed entirely of forged iron, it weighs two cwt. less than the common 6-pounder gun-carriage, and therefore requires less manual labour to detach it from the tumbrel, and can be placed in position with greater celerity. But the chief feature of the invention is that the gun is placed beneath the axle, by which means the chances of upsetting the gun, from the inequalities of the field, are greatly reduced, as the centre of gravity is placed much lower than in the gun-carriages at present used in the artillery. The last experiments are to be made in the presence of Prince Luitpold, the head of the Bavarian artillery, on his return from Italy in a few days, and the invention will then be introduced generally.

OBITUARY OF EMINENT PERSONS.

VISCOUNT STRANGFORD.

PERCY CLINTON SYDNEY SMYTHE, sixth Viscount Strangford in the Peerage of Ireland, and first Baron Penshurst in that of the United Kingdom, was the eldest son of Lionel, fifth Viscount Strangford, by his wife, Maria Eliza, eldest daughter of Frederick Philipse, Esq., of Philipsebury, New York. He was born the 31st August, 1780, and was educated at Trinity College, Dublin, where he graduated, and obtained the gold medal in 1800. He succeeded his father in 1801 as sixth Viscount, and became attached to the diplomatic service of his country in 1803, and displayed in it much ability. He was successively British Minister in Brazil and at Stockholm, and Ambassador at Constantinople and at St. Petersburg, and, in 1823, he was again in Brazil on a special mission. The Viscount was, however, not only distinguished as a diplomatist, but also as an author and a poet. His interesting biography, and spirited verse translations of Camoens have made that great Portuguese hard gracefully and agreeably familiar to the English public. Lord Strangford's work has enjoyed deserved popularity, and now fairly ranks among our classic versions of foreign authors. Viscount Strangford obtained his British peerage by creation in 1825. He was also a Privy Councillor, a G.C.B., a G.C.H., a Grandee of Portugal, and a Knight of the Portuguese Order of the Tower and Sword. His Lordship married, the 17th July, 1817, Ellen, youngest daughter of Sir Thomas Burke, Bart., and widow of Nicholas Browne, Esq., of Mount Hazel, co. Galway, by whom (who died the 26th May, 1826) he had issue three sons—of whom two survive—and two daughters, viz., the Marchioness of Clanricarde (who died in 1852) and Mrs. Baillie. Viscount Strangford died on the 29th ult., at his residence, 68, Harley-street, Cavendish-square. He is succeeded by his elder son, now the seventh Viscount; who, as the Hon. George Sydney Smythe, is well and creditably known in Ministerial and Parliamentary circles, and in literature, also, as the author of "Historic Fancies," and other works.

GENERAL LORD C. S. MANNERS

LORD CHARLES SOMERSET MANNERS, a General in the British Army, was the second son of Charles, fourth Duke of Rutland, by his wife, the Lady Mary Isabella, fifth daughter of Charles, fourth Duke of Beaufort. He was born on the 24th of October, 1780. His military career began very early in life, for he entered the Army before he was nineteen years of age, as a Cornet in the 10th Dragoons. He served during the Spanish campaign of 1808, in which occurred the cavalry engagement at Benavente. He accompanied the expedition under the Earl of Chatham, to whom he acted as Aide-de-Camp, to Walcheren, and he assisted at the siege of Flushing. In 1811 Manners was appointed Aide-de-Camp to the Duke of Wellington, and was on the staff until the battle of Salamanca, inclusive. He was entrusted with the command of the 3rd Dragoons, which he held till the war closed in 1814. Manners won much fame at the battles of Salamanca, Vittoria, and Toulouse. The medal and two clasps he received bear testimony to his gallant conduct in those glorious engagements. Lord Charles was, in 1817, appointed Aide-de-Camp to George IV; and for a short time he was Colonel-in-Chief of the 11th Hussars; but he returned to his favourite corps, the 3rd Dragoons, as Colonel in 1839, and he retained that command till his death. In politics Lord Charles Manners was a Conservative. He represented Cambridgeshire in two Parliaments previous to 1835; and since that he sat for North Leicestershire uninterruptedly up to the last general election, when his declining health caused him to retire. He was succeeded in the representation by his nephew, the Marquis of Granby. Lord Charles, in recognition of his military services, was nominated, in 1838, a Knight Commander of the Bath. He had from the Cornetcy, which he obtained in 1798, risen through all the intermediate grades to that of General, which he attained in 1854.

General Lord Charles Somerset Manners died on the 26th ult., in London, shortly after arriving from the Duke of Rutland's seat, Belvoir Castle, Leicestershire. He was never married

GENERAL SIR WILLIAM MACBEAN, K.C.B.

THIS distinguished officer, Colonel of the 92nd Foot, died at Brompton, on the 25th ult. He was born in 1782, the son of the late Colonel Macbean, of the 6th regiment, and grandson of Lieut.-General Macbean, R.A. He had been sixty years in the Army, and during that long period saw much service. In 1798 he was engaged against the Irish rebels, and was present at the battle of Vinegar-hill and the capture of Wexford. In 1808 he landed in Portugal, and thenceforward took an active part in the Peninsular campaign, having received a cross for his services in command of the 19th and 24th at Busaco, Salamanca, St. Sebastian, and Nive.

Sir William was successively on the Staff at the Cape of Good Hope, in the East Indies, and in Ireland. In 1830 he was created a Knight Commander of the Bath, and in 1843 was appointed Colonel of the 92nd. He was one of the General Officers having rewards for distinguished services.

LIEUT.-GENERAL SIR GEORGE CHARLES D'AGUILAR.

THE death of this gallant officer occurred on the 21st ult., in Lower Brook-street. Sir George was born in 1785, the son of S. D'Aguilar, Esq., of Liverpool, and entered the Army in 1799. For eight years he served in India during the wars of Scindiah and Holkar, and was wounded at the last assault on Bhurtpore in 1806. Subsequently he took part in the Walcheren expedition; and was in Sicily, in the Greek Islands, and on the east coast of Spain. In 1815 he joined the Duke of Wellington's army in the Netherlands, and was present at the occupation of Paris. He was for eight years Assistant-Adjutant-General at the Horse Guards, and for twelve Adjutant-General of the Army in Canada. At one period he was employed in China. He received the insignia of a Knight Commander of the Bath in 1825, and was given the Colonelcy of the 23rd Foot in 1851.

He married, in 1809, Eliza, second daughter of the late Peter Drinkwater, Esq., of Irwell-house, co. Lancaster, and had issue.

JOHN HEATON, ESQ., OF PLAS HEATON, CO. OF DENBIGH.

THIS respected gentleman, who died on the 14th ult., within two days of his sixty-eighth birthday, was the representative of an ancient family long seated in the Vale of Clwyd, Denbighshire. The first of the house who settled in Wales was a follower of Henry Lacy, the great Earl of Lincoln, Constable of Chester, and had a grant of the Lordships of Rhos and Rhyvoniog from Edward I. Mr. Heaton, the subject of this notice was Chairman of Quarter Sessions for the county of Denbigh during the last twenty years. In 1854 he received from the magistrates and inhabitants of that county a handsome testimonial, as an acknowledgment of his public services. Mr. Heaton was twice married: first, to Elizabeth, sister of Wilson Jones, Esq., of Hartsheath Park; and, secondly, to Anne-Eliza, eldest sister of Lord Hexniker. Of the issue of these two marriages the survivors are seven sons and five daughters.

THE NEW CHAPEL just erected for CONGREGATIONAL DISSENTERS, at Phillimore-terrace, Kensington—Rev. J. Stoughton, Pastor—was opened on Wednesday last, when sermons were preached by the Rev. T. Murney and the Hon. and Rev. B. W. Noel, to very full audiences. Next the services about 300 ministers and friends sat down to an elegant collation laid out in a tent in the grounds of Mr. Charles Bennett, Woolstherpe Lodge, named from the birthplace of Sir Isaac Newton, who resided at Kensington. Suitable speeches on the occasion were made by Mr. T. Chambers, M.P., Mr. Apsley Pellatt, M.P., Dr. Morrison, Rev. T. Stratten, &c. The collections made amounted to £263. The chapel is a fine architectural composition in Romano-Corinthian, chiefly from the Portico of the Pantheon at Rome. The exterior is stone. Accommodation is provided for 1200 adults. The architect is Mr. A. Trimen. This chapel is the result of the greatest efforts yet attempted in London in connection with the Dissenters, whether having regard to the architectural design, to the general dimensions, or to the materials employed in its construction. The entire cost, including the purchase of ground and organ, is £7000.

THE QUEEN AND THE TWO GALLANT SAILORS.—At the anniversary dinner of the British Beneficent Institution, on Wednesday last, General Sir James Macdonald—the hero of Hougomont—related, in returning thanks for the Army, the following incident that occurred during the presentation of the Crimean medals by her Majesty:—" When (said the veteran) that gallant officer, Sir Thomas Troubridge, was wheeled to the dais on which her Majesty stood, her Majesty, in presenting to him the medal which he had so dearly won, declared to him that from that moment for the rest of his life he was her Aide-de-Camp. In making that declaration her Majesty expressed her deep commiseration for the misfortune of that gallant man by dropping a silent tear—a tear which ought to be encased in glass and placed in our national museum (Immense cheering). I may be permitted to mention another incident. When one of those gallant and glorious British tars approached to receive his reward, the medal by some accident dropped to the ground. It was picked up and presented to him by the Minister-at-War, on which the gallant tar said he would much sooner have received it from the hands of the Queen. Her Majesty immediately desired it to be replaced on the dais, and then took it up and presented it to the gallant fellow, whose feelings may be better imagined than described at this mark of her Majesty's favour."

THE NEW ROUTE TO THE CONTINENT, via Harwich and Antwerp, from the high speed of the vessels employed—the run between the two ports (137 miles) being frequently accomplished in ten hours—and the economy both of time and money it offers, is rapidly increasing in favour. In future the boats will leave Antwerp at nine a.m., arriving at Harwich by daylight, and in time for a special train due at Shoreditch at 10.30 p.m. This alteration —which has been made in order to work in connection with the trains direct from Berlin, Leipsic, Brunswick, Hanover, Cologne, Brussels, &c.—will bring the Prussian capital within forty hours of London!

NEAR SEBASTOPOL.—AMBULANCE WAITING FOR THE WOUNDED.

SKETCHES OF THE WAR.

WE resume our Artist's Sketches before Sebastopol, with a picturesque scene of the Watering-place, from the Middle, or, as it is sometimes called, the White House Ravine, from the building on the right of the picture, which is occupied for Commissariat stores. In the foreground is the Well and Watering-place, with picturesque groups of French soldiers—Zouaves, &c.; and on their way down the ravine, towards Sebastopol, is the night relief, which generally musters between two and three thousand men (*See front page*).

Next is a View of an Ambulance waiting for the Wounded: in the distance is seen the Green Hill. This lonely spot is near the Valley of Death—of which we have also received from our Artist a sketch full of the poetic melancholy which the name implies. We shall engrave this sad scene in a week or two.

The next Illustration is from a Correspondent in the Camp before Sebastopol, who sent it as a specimen of Russian art—"a grotesque picture (he says), which I observed suspended above an embrasure in one of the enemy's batteries, which guard the Sebastopol road at the head of the Dockyard Creek. The subject seems to intimate that the Russian gunner can enjoy the ridicule of his enemies as well as his neighbours." The scene is sketched as seen through a telescope directed on the works in Sebastopol.

Our own Artist accompanies his sketch of the next Illustration with these particulars:—"I had commenced a view of the town of Sebastopol from the Green-hill Battery; but, having had several shots fired at me from the Russian rifle-pits, with rather unpleasant precision, I thought it advisable to defer the washing-in of the effect in my water-colour sketch until some more favourable opportunity, when the attention of the Russian sharpshooters might be directed to some other object; for, I assure you that the sound of a rifle-ball is anything but pleasant to the ears of an amateur." The accompanying scene is the result of this somewhat perilous enterprise. It shows the town, sketched from the battery, with piles of arms, a working party, &c.

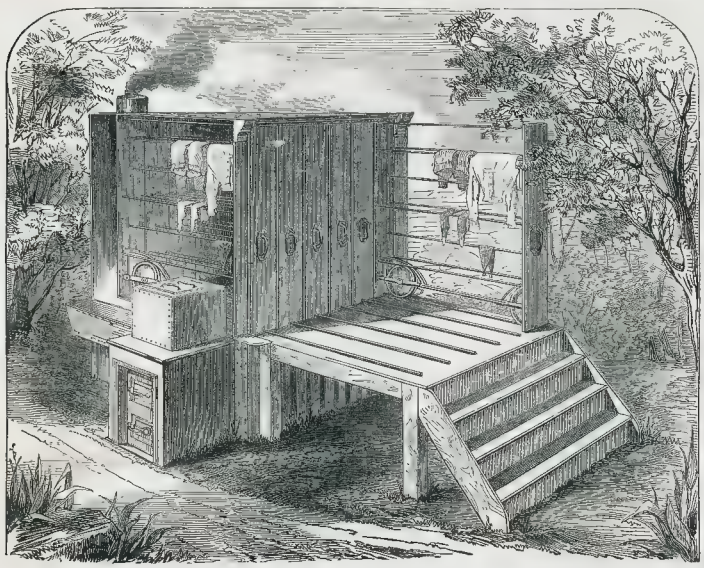
The lowermost Illustration on the next page shows the spot at Balaclava, where the linen, &c., are washed for the General Hospital.

HOUSE IN SEBASTOPOL, SEEN THROUGH A TELESCOPE.

NEWLY-INVENTED DRYING-CLOSET.

THIS Closet has been recently forwarded to Scutari, for the convenience of the sick and wounded in the Hospital. Its cost has been defrayed by the munificence of Miss Burdett Coutts, who has made herself acquainted with its capabilities to the most minute details, and has sent an engineer to Scutari with it, to superintend the working of it for a time. The Closet consists of six "horses" of galvanised iron, inclosed in a double case of corrugated

SEBASTOPOL, FROM THE GREEN-HILL BATTERY.



NEWLY-INVENTED BREYING-CLOSET, FOR THE HOSPITAL AT SCUTARI.

ron; the intervals between the two cases being filled with earth or sand, to prevent the external radiation.

Its capabilities were previously tested before Miss Burdett Coutts, when it was shown that 1000 articles of linen can be thoroughly dried in twenty-five minutes by means of this contrivance. The working temperature is 240 deg. The waste heat from the furnace heats the water in the boiler of 100 gallons capacity. There is also the convenience of a washing-trough and a wringing-machine attached. The whole apparatus is portable, and easily fixed in any situation.

This Closet was made from a suggestion by Lieut. Tracey; the entire management being left to Mr. Jeakes, of Great Russell-street, Bloomsbury, under whose energetic direction it was completed and got ready for trial in sixteen days.

THE NEW TURKISH ARMY.—The *Journal de Constantinople* publishes the Imperial *hatt*, by which the Christian subjects of the Sultan hitherto excluded, by jealousy of religion and race, from the profession of arms, are called to take part in the military service of the Empire. The proclamation starts from the point, that all the subjects of the Sultan are alike, and without exception cared for by their Sovereign. It is next intimated that measures are taking for consolidating the bases of the Ottoman State, for carrying out administrative reforms, and for giving legal guarantees for the welfare of all. It is under these circumstances that the regulations respecting the military service of the empire come under revision. The fact that the Mussulmans at present perform the military service, while the *zekate* belongs to all, is presented as an anomaly which it is time to abolish. Accordingly, it has been resolved, with the advice of the high dignitaries of the State, that all the Sultan's Christian subjects shall be liable to be called on to serve in the army, as they are already bound in duty to do; that those enrolled shall form a military contingent; and that those who do not serve in person shall pay, in addition to the ordinary taxes a special impost, to be called the Djidaye, or indemnity. It is said, further, that owing to the great numerical superiority of the Mussulman population, and their habit of carrying arms, the Christian portion of the Sultan's army will always be smaller than that composed of the same elements as at present. The rules under which these measures are to be carried out will be published in special firmans. In the meanwhile the enrolment will commence, both in Asia and in European Turkey, the soldiers so raised to be entitled to all the rights which may hereafter be established more definitively for the benefit of the Christian army. Those soldiers who give proof of capacity and merit will be raised to the rank of officers. In this way the burden of military service, which has hitherto weighed exclusively upon the Mussulmans, will be alleviated, and the other classes of the population of the empire will be admitted to the honour and glory of serving the State and the country.

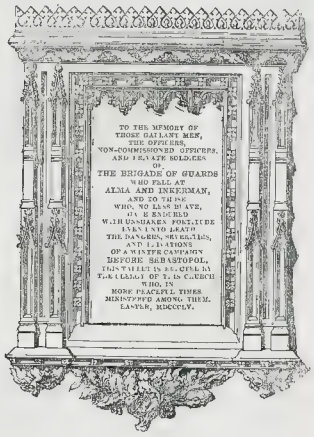
THE RUSSIAN OVERLAND TRADE. The transport of goods between St. Petersburg and Kowno has, in consequence of the blockade of the Bay of Finland, attained a magnitude that affords employment to some thousands of carriers, waggoners, &c., and it is computed also to 30,000 horses. In addition to this amount of traffic the number of troops marching from the capital westwards often make the roads impassable for private travellers for half a day at a time. The unconscientious conduct of these *kibitka* drivers, as regards the goods committed to their care, has given rise to so many complaints, that the Minister of the Interior has found himself compelled to issue special police instructions with reference to these gentry. It was notorious that they not unfrequently threw away to the road-side goods entrusted to them to convey, or purposely left them at railway stations or in private houses, not to say pawned them. *Letter from Berlin, May 26.*

MONUMENT TO THE GUARDS AT WINDSOR.

A NEAT tablet, of Gothic design, has lately been erected in the Church of the Holy Trinity at Windsor, to the memory of the officers and soldiers of the Brigade of Guards, who fell at the battles of the Alma and Inkerman.

The Church of the Holy Trinity was erected ten years ago, in part for the accommodation of the Household Troops quartered at Windsor; and here the whole of the Brigade of Guards have frequently attended Divine service. Hence arose the proposition to erect this tablet; and the accompanying representation of this memorial will, doubtless, be very interesting to the remains of that gallant brigade, when this number of our Journal reaches the Crimea, as a token of homage to their bravery, and sympathy with their sufferings.

The Household Brigade generally have a kindly feeling towards the Church of the Holy Trinity. The officers of the 1st and 2nd Life Guards have selected it as the church in which to place tablets to the memory of two of their brother officers who have died in the course of the last six years (Lord William Beresford and the Hon Captain Bertie). The non-commissioned officers and privates of the same regiments have also placed here a tablet to the memory of the Rev. John Hawley, in testimony o



TABLET JUST ERECTED IN HOLY TRINITY CHURCH, WINDSOR.

their regard and esteem of his zealous ministry among them when they were quartered at Windsor. These circumstances are highly gratifying, indicative of the feeling of attachment of the Household Brigade towards the church.

The tablet has been designed and erected by Mr. White, of Vauxhall-bridge-road.

A BERNE journal states that Colonel Dickson had arrived there for the purpose of concluding contracts for the formation of an Anglo-Swiss Legion. Colonel Salzberger, of Thurgau, is said to have undertaken to organise this legion, in which duty he will be joined by Colonel Funk, who commands the artillery of Berne. These officers will each command one of the two regiments, which will be placed under the orders of an English General. The advantageous conditions offered to the soldiers are the same as those given by the recruiting officers at Longwy and Thionville—viz., 180f. bounty and 1f. 20c. a day pay.

M. CHARLES BAUDIN who has acted as Chargé d'Affaires here since the departure of his Excellency Count Walewski retains his post as First Secretary to the Embassy.

WASHING ESTABLISHMENT FOR THE GENERAL HOSPITAL AT BALACLAVA.

CALENDAR FOR THE WEEK.

SUNDAY, June 3.—Trinity Sunday
MONDAY, 4.—Kingdom of the Netherlands divided, 1831.
TUESDAY, 5.—St. Boniface.
WEDNESDAY, 6.—Weber died, 1826.
THURSDAY, 7.—Corpus Christi.
FRIDAY, 8.—Astley's Theatre burnt, 1841.
SATURDAY, 9.—Lilly the Astrologer died, 1681.

HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING JUNE 9.

Sunday.	Monday	Tuesday.	Wednesday.	Thursday.	Friday.	Saturday.

LOVE, the FIRST DRAMATIC VENTRILOQUIST of Europe, at the UPPER HALL, 69, Quadrant, Regent-street. Every Evening at Eight o'Clock, except Saturday; Saturday at Three. Piano, Miss Julia Warman.

CATERHAM RAILWAY COMPANY.—Notice is hereby given that the next ORDINARY MEETING of the Shareholders of the Caterham Railway Company will be held at the office of the Company, Hibernia-chambers, on MONDAY, the 25th day of JUNE next, at 2 o'clock in the afternoon precisely. J. SYRETT, Secretary
Hibernia-chambers, London-bridge, May 30th, 1855.

DAIRY MANAGEMENT. See No. 5. FARMER'S CLUB.—AGRICULTURAL MAGAZINE Sixpence post-free.—C. T. THOMASON, 10, Upper Thames-street; and all Booksellers.

WESTBOURNE COLLEGE, Bayswater-road, Hyde-park. Under the patronage of the Archbishop of Canterbury, the Bishops of London (Visitor Winchester, and Lincoln. Sir James Stephen, K.C.B. President, &c. &c. The Half Term will commence on WEDNESDAY, 6th JUNE. Prospectuses may be obtained on application. Fees—Six, Seven, or Eight guineas a Term Entrance-fee, Two guineas; Stationery, One guinea a year C. MACKENZIE, A.M., Principal.

LONDON HOMŒOPATHIC HOSPITAL, 32, Golden-square. Patroness—H. R. H. the Duchess of CAMBRIDGE.
Vice-Patron. The Duke of Beaufort.
President—The Right Honourable the Earl of Wilton
Chairman—The Right Honourable Lord Robert Grosvenor, M.P.
A GENERAL MEETING of the Friends of this Hospital will be held at WILLIS'S ROOMS, King-street, St. James's, on WEDNESDAY, 6th JUNE, 1855, at Six o'Clock, p.m., the Right Hon. Lord Robert Grosvenor, M.P., in the chair. Several gentlemen are expected to attend and address the Meeting

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE —W. O. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under:—

Ships.	Tons	Commanders.	Destination.	Docks.	To Sail
Borderer	421	W. Good	Calcutta	London	June 15
Wm. Miles	654	J. Creighton ..	Calcutta	Liverpool	June 15
Stuart Wortley ..	890	J. Simpson	Bombay	E. Ind'a	June 6
Planet	442	W. F. Buckham ..	Hong-Kong & Shanghae	London	June 5
Delphin	288	G. Murray	Hong-Kong & Whampoa	W. India	June 17
Balmoral	357	A. Clarke	Shanghae	London	June 20
Kensington	900	W. King	Port Phillip	London	June 10
Maid of Judah ..	665	J. Stewart	Sydney	London	July 11
Ashlar	504	Richard Pill	Geelong	London	June 5
Centurion	696	W. Edwards	Sydney	London	June 20
Sea Queen	416	W. Rowe	Adelaide	St. Kath	June 5
Northampton ..	469	Robert Bradshaw ..	Cape of Good Hope	London	June 6
Meteor	290	J. Brodie	Cape of Good Hope	London	June 15
Ocean Gem	392	E. Robinson	Cape of Good Hope	London	June 25
Edith	319	F. B. Harry	Agoa Bay	London	June 20
Clifford	300	H. Davis	Mosse Bay	St. Kath.	June 15

These Ships have been selected specially for their high-class and fast-sailing qualities, and will be found well worth the attention of Shippers and Passengers.—W. O. YOUNG, 54, Cross-street, Manchester; 19, Dale-street, Liverpool; and Sun-court, Cornhill, London.

GRAND FINE ART TREBLE NUMBER OF THE ILLUSTRATED LONDON NEWS.

On SATURDAY NEXT, JUNE 9th, will be published

A TREBLE NUMBER

OF

THE ILLUSTRATED LONDON NEWS,

CONTAINING

SPLENDID ENGRAVINGS

From the best Pictures now Exhibiting at the ROYAL ACADEMY and by the SOCIETIES of PAINTERS in WATER-COLOURS; among which will be found:—

	Painted by
"The Wrestling Scene," from "As You Like It" (whole-page.)	J. D. Maclise, R.A.
"The Nearest Way in Summer-Time" (whole-page.)	T. Creswick, R.A., and R. Ansdell.
"The Milleress Bairn" (whole-page.) ..	T. Faed.
"Scotch Gamekeeper" (whole-page.) ..	R. Ansdell.
"Britomart Unarming."	F. R. Pickersgill, A.R.A.
"Belted Will's Tower, Naworth."	W. Bennett.
"The Devil's Bridge, Pass of St. Gothard." ..	W. Collingwood Smith.
"The Post-Office at Albano."	Louis Haghe.
"En Route."	Joseph J. Jenkins.
"The Beacon."	George Dodgson.

Also, the following

WHOLE-PAGE ENGRAVINGS:

"Forts de la Halle."	Gavarni.
"Dames de la Halle."	Gavarni
"Dutch Boats."	E. Duncan.
"Alfred the Great."	J. Gilbert.
"Last Week of Smithfield Market." ..	E. Duncan.
"Karanji, near Balaclava."	E. A. Goodall.

ENGRAVINGS of the

PALACE OF INDUSTRY,

Now open at Paris; and of the

HORTICULTURAL EXHIBITION AT THE CRYSTAL PALACE, AT SYDENHAM;

Besides a Variety of Authentic Sketches from

SEBASTOPOL AND THE SEAT OF WAR.

THREE SHEETS—144 Columns. ONE SHILLING.
No Extra Copies can be obtained unless ordered immediately.

THE BALTIC FLEET, 1855.—We have the satisfaction to announce that on Saturday last Mr. J. W. Carmichael, the celebrated marine-painter, formerly of Newcastle-upon-Tyne, sailed for the Baltic, to sketch the Events of the War for the ILLUSTRATED LONDON NEWS. The Sketches by this distinguished Artist as they are received will be engraved in our Journal, so as to present a Series of Illustrations of the Operations of the coming Campaign in the Baltic.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JUNE 2, 1855.

THE Austrian Government is not pleased at the publication by the British Parliament of the protocols of the late Conferences at Vienna. Count Buol, in a circular to the Austrian Plenipotentiaries at the various Courts of Germany, persists in stating that the negotiations for peace cannot be regarded as terminated; and Lord Palmerston, in urging the withdrawal of Mr. Milner Gibson's motion, based his plea for Parliamentary silence on the same pretext. Count Buol, who sticks to protocols, "like grim Death," states that "Austria has resolved to recommend *confidentially* to the serious consideration of the Courts of Paris and of London new propositions, in which she thought to find a loyal and complete fulfilment of the Third Point of guarantee, and which *his Majesty the Emperor deems of a nature to be presented to the St. Petersburg Cabinet as an ultimatum.*" After scolding the British Government for breaking through the reserve which Count Buol thinks the case demanded, and for publishing what he deems ought not to have been published, he concludes by informing the representatives of the Emperor that "as yet Austria does not express *any* opinion upon the situation of affairs;" but that shortly it will break silence and explain itself fully to the German Diet at Frankfort. Fortunately the question has removed itself out of the pale of diplomacy—at least, for the present. For the future, the policy which Austria may be pleased to adopt with reference to the war against Russia is a matter of more concern to herself than to France and England. The Allies—with an alliance cemented in the sanguinary fields of the Alma and of Inkerman—are able to fight their own battle. They would be glad of Austrian aid; but they are in a position to do without it. If Austria plays the coward; —if she hate Russia, but is afraid to strike her;—if she allows timidity to sway her councils when boldness would best become them, on her own head will fall the retribution. She will not harm England or France; she will not save Russia from humiliation; but she will bring upon herself calamities that no foreign foe could inflict upon her, and open an account with her own subjects which she will have to wipe off at a far greater expense and far more fearful hazard than she could have incurred by any display of vigour against Russia. If any State of Europe has reason to dwell with complacency upon the possible defection of Austria from the cause of the Western Powers, it is the gallant little State of Sardinia. There was a deluge after Metternichism, which Metternich foresaw; and there may be a deluge after Buolism and Bruckism, which neither Buol nor Bruck may be clear-sighted enough to discern. Austria is, indeed placed in a perilous dilemma by the war; a dilemma so great and so perilous that nothing but the highest courage and the promptest decision can save her from evil consequences. Take which side she will she is confronted with a danger and a difficulty. If she take part against Russia by actual hostility, the foreign armies, which in an unfortunate hour she degraded herself by calling to her rescue against the insurgent Hungarians, will, in all human probability, be employed to excite her Hungarian and Sclavonian populations to rebellion. Russia knows that there are such men as Kossuth and Mazzini in existence—and, in case of need, will not scruple to employ them, if she can discover no better or more readily available means of weakening her enemy. On the other side, if Austria boldly throws in her lot with Russia, the Allies will be unwise indeed if they, also, do not make use of the question of "nationalities," beginning with that of Poland, to see how far it will carry them, and what damage it will inflict upon the enemies of European freedom. The predicament of Austria would in this respect be bad enough in itself, without the additional evil of a neighbour and rival so tricky, and in reality so hostile, as Prussia—striving against her for the preponderance in Germany, and ready to take part in any project that might aggrandise the dynasty of Brandenburg at the expense of that of Hapsburg. Such are but a few of the difficulties that beset Austria; but, as happens among individuals, so it also happens among States and Empires—boldness and honesty to do the right, irrespective of consequences, cuts the knot that no skill and prudence could untie. It is in desperate circumstances that genius and greatness declare themselves; and if there be either genius or greatness in the Councils of the Emperor Francis Joseph, or in his own breast, Austria will even now at this, the eleventh hour, defy Russia by act and deed, as she has already defied her by her diplomacy. To have been saved from dismemberment by the armies of the late Emperor Nicholas is humiliation enough for a great empire like Austria to endure in a century. She cannot afford to add to it such humiliation as would be involved by her withdrawal from the Western alliance, after the part she has taken in the late negotiations.

THE Sebastopol Inquiry has unearthed a great many curious things; but perhaps a correspondence which has just been published, as part of the illustrations to the "System" which has so signally superseded the British Constitution, is about as instructive as any disclosures yet obtained. The number of letters is small, though the principal epistles are somewhat lengthy. The writers are the late Premier of England, and the late Leader of the House of Commons. The subject is the alleged incapacity of the Duke of Newcastle for the all-important office which he lately held. The difficulty is the doing justice to the nation concurrently with behaving kindly to the Duke. The result is (we need hardly say) that the Earl and the Lord prefer to sacrifice the interests of the country. The moral is—but perhaps that may be left to the sagacity of the readers.

There is nothing new in the facts which are thus elicited. Months ago the affair itself was the subject of debate in both Houses; and the country "thought its own thoughts" about the men who had stood by their order so scrupulously as the late Premier. And now it is probable that the still graver and darker revelations recently made by Mr. Gladstone, on behalf of himself and his own clique in the late Cabinets, will engross the attention of the nation, and this minor intrigue will pass unheeded. When a retiring Minister deliberately informs us that, while he and certain colleagues were professing to manage the war in the way most consistent with the honour of England, they were really conducting it in the way least injurious to the interests of Russia, we take the black confession *en masse*, and scarcely care to inquire into the means by which this patriotic scheme was carried out. Yet, as the Duke was one of Mr. Gladstone's party, and as the Earl of Aberdeen was another, this retention of an official whom the Whig Lord declared, and the Peelite Lord admitted, to be unequal to his office, was a victory on the side of the Russians in the Cabinet. The large question arising out of Mr. Gladstone's speech on the Disraelite motion is too important to be discussed incidentally, but it is most desirable to note how the Newcastle affair connects itself with the misfortunes of the Crimean campaign.

Lord John Russell appears perfectly to have understood the real views of his colleagues, and, with a certain degree of shrewdness, to have foreseen that, ultimately, the terrible war in which we had engaged would be found a Frankenstein to its creators. He, therefore, seems to have been inclined to "make stock" for the time that he saw was coming. When the late Government should be accused of playing with the war, it would be well to have it on record that a portion of the Government, at least, had had an awakened conscience on the subject. We sincerely wish that a worthier view of Lord John Russell's protest could be taken; but it would be an insult to common sense to affect to see sincerity in a demonstration which, upon a matter of such awful importance to the country as the due prosecution of a great war, went no further. We know the end of the story. Lord John Russell, in his place in the House, told us that, having protested against the Duke of Newcastle holding office, he took the advice of friends, and did not press the matter. *Liberavit animam!* How thrice fortunate is the nation whose ruler can absolve himself of responsibility so pleasantly. A few neatly-rounded paragraphs addressed to a noble friend and the work is done. The process is only paralleled by that of Mr. Micawber, who, when in the financial straits, always sat down and recorded in writing his extreme unhappiness and disgust with society, and rose with a kind of conviction that he had wound up his affairs.

The opinion of Lord John Russell was that the Duke of Newcastle ought to retire, and that Lord Palmerston ought to take his place. He assigns divers small reasons for this view, and a large one, and characteristically argues the minor reasons best. The grand justification for taking the War Department out of inefficient hands, and consigning it to others supposed to be vigorous, is treated very gingerly by both noble Lords; but the Earl of Aberdeen, in whose retentive memory a certain Palmerstonian phrase about "antiquated" imbecility may have abided, was eager to remind all whom it might concern that, if age were to be taken into account, "Palmerston is within a few months as old as I am." Both of the conscript fathers honoured the year 1784 by condescending then to come into the world for its government and guidance. But Lord Aberdeen does not deal with Lord John's proposition so much on the ground that Lord Palmerston was too old for the work, as on the assumption that nobody could do the work at all the logical corollary being that it might as well be left undone by a nice willing person, like friend Newcastle, as by anybody else. And this logic appears to have convinced Lord John Russell, or at least the "friends" who advised him, not to stir further in the business.

There are many undeniable propositions and much general good sense in Lord John Russell's protest, and this, we humbly venture to submit, makes the case rather worse for him. For an aristocratic logician he has been strangely content to avail himself of a plea which we hear chiefly from the very humble classes. No mistress of a household who has had occasion to point out the blunders of a domestic, but will remember to have been met with an answer, which to the culprit seemed to convey an extenuation by no means so apparent to the complainant. "Well, M'm, do you know that all the time I was doing it, I thought, somehow, that it was wrong." When the hour comes for demanding of Lord John Russell how he can justify his having continued to co-operate with those who were, by their own confession, wronging the trust reposed in them by their Sovereign, he will rise and urge that honourable gentlemen have only to turn to the Sebastopol evidence, and read from his own letters evidence that he knew all the time that it was wrong. How small the difference between the servants of the Crown and the servants of the cheesemonger!

One other suggestion has been prompted, less by the perusal of these letters than by reconsideration of the part played by Lord John Russell at the time they were written. It is thought that his Lordship, with all his abstract reverence for Lord Palmerston and all his notorious devotion to that nobleman's interests, could not discern in Lord Palmerston's antecedents or character any especial reason for his becoming Premier—especially, when another statesman of extraordinary merit was ready for the office. But it was evident that Lord Palmerston's talents and energy could not be left in the Home Department—anybody could receive deputations on Beer Bills, and correct the blunders of country magistrates. The nation wanted Palmerston for use, and would have him. It might be better, Lord John is supposed to have thought, that the war should be handed over—technically and officially—to Lord Palmerston, and that he should be so placed that the wishes of the nation might seem to be met than that the unreflecting and peremptory public should call him to the office of Premier. Palmerston, as War Minister, might remain so, in the event of changes; but from a less responsible post a change must lift him, and might lift him too high. If this were the idea, and Lord Aberdeen detected it, and therefore retained the Duke of Newcastle in place until change came and Lord Palmerston went up to the top of the tree, this was another victory of the Cabinet Russians.

So wags the world. Every week brings us some new evidence of the disinterested motives of those who are good enough to watch over our destinies, and of the system on which they work. But every such exposure, melancholy in itself, tends to good; and for this reason it is well that all possible publicity should be given to the Newcastle correspondence between Lords Aberdeen and John Russell.

THE NEWSPAPER-STAMP. In consequence of unexpected delays in the House of Lords, the bill introduced by Sir G. Cornewall Lewis, on behalf of the Government, for the abolition of the compulsory stamp on newspapers, has not yet passed through Committee. As the third reading will, in all probability, not take place till near the middle of June, and as the law will only become operative in fourteen days after it receives the Royal Assent, no changes announced or contemplated by the newspaper press, in consequence of the measure, can be legally carried into effect for some weeks yet to come; possibly not before the first week in July.

THE CHURCH-RATE ABOLITION BILL.—The House of Commons is to go into Committee on this measure on Friday, the 8th of June; and Mr. Follett, M.P., has given notice that he will move that the bill be committed that day six months.

THE POSTMASTER-GENERAL has instituted a series of pecuniary fines varying from half a crown to half a sovereign, to be inflicted on his subordinates who are guilty of errors that endanger the safety of registered letters while passing through the post.

The Royal Agricultural Society have issued the programme of their intended proceedings at Carlisle, commencing July 19.

LATEST INTELLIGENCE.

SEA OF AZOFF. ONE HUNDRED AND SIX RUSSIAN VESSELS DESTROYED.

The following intelligence has been received from the Secretary of the Admiralty:

"A telegraphic despatch has just been received at the Admiralty with the intelligence that on the 22nd of May, on the appearance of the Allied squadron before Berdiansk, the Russians burnt four war steamers and considerable stores of corn

"On the 23rd the forts of Arabat were bombarded and the powder magazines blown up.

"One hundred and six merchant vessels have been destroyed, and only one small Russian steamer remains in the Sea of Azoff

"Admiralty, May 31, 1855, 6.15 p.m."

The dates in this despatch are evidently wrong, as the one received by the French Minister of Marine states that these transactions took place on the 26th and 27th ult.

The *Times* has received the following telegraphic message from its correspondent in the Crimea:—

VARNA, Thursday

On the 24th of May the French made a reconnaissance across the Tchernaya with 35,000 men, and established a camp at Tchorgoum

Two thousand men of the Turkish Contingent have arrived.

The French have taken 1000 oxen at Kertch

At present there are twenty-four steamers of the Allies in the sea of Azoff

The *Kriegerische Zeitung*, under date of Constantinople, May 24, has the following:—

One hundred thousand Allied troops are about to attack the Russians at Inkerman

Eighteen steamers are cruising in the Sea of Az

VIENNA, May 30.

It is rumoured that the Grand Duke Constantine has resigned the office of Grand Admiral of the Russian navy. The Peace party in St. Petersburg has regained the ascendant, and it is said that a new note is to be sent to the German Powers

Eight thousand Piedmontese troops have already arrived before Sebastopol, and about 7000 more are daily expected. Lord Raglan's force is now calculated at 26,000 effective. The Turkish forces number 10,000 encamped near Balaclava, and 25,000 Turks and Egyptians, who commenced to arrive on the 15th, in exchange for the 10,000 who re-embarked some days before for Eupatoria. The French army numbers 113,000 men The whole force of the Allies before Sebastopol amounts to about 200,000 men. It is said that for field operations about 91,000 of these will be detached consisting of 60 000 French troops, 20,000 Turks, the whole of the Sardinian troops, and a part of the English army. These statistics are drawn up from data supplied before the starting of the Kertch expedition. If the reports be correct, they seem to indicate that the Kertch expedition is in the main English, and therefore under the complete control of Sir George Brown; while the prevalence of the French force in the army (as reported) for operations in the field, would seem to indicate the probability of its being placed under the control of a French commander

THE COURT.

The Whitsun holidays have been passed in comparative retirement by the Court at Osborne. On Saturday last the Queen and Prince, accompanied by Prince Alfred, the Princesses Helena, Princess Adelaide, and Princess Feodore, went to Parkhurst Barracks, where her Majesty inspected the dep.t battalion, under the command of Lieutenant-Colonel Aplin.

On Sunday her Majesty and his Royal Highness Prince Albert, the Prince of Wales, Prince Alfred, and the Princesses . . . the Duchess of Kent, the Princess Helena, Princess Adelaide, and Princess Feodore, attended Divine service at the parish church at Whippingham. The Rev. George Prothero officiated

On Monday her Majesty and his Royal Highness Prince Albert, attended by the Marchioness of Ely, the Hon. Mary Seymour, Major-General Bowles, and Captain Du Pat, embarked in the *Fairy* for Portsmouth. Her Majesty and Prince Albert, on arriving at Portsmouth, went on board the *Centurion*, transport screw-steamer, and inspected the arrangements for conveying the detachment of 17th Lancers . . . to sail on the evening of the 31st ult. for Constantinople. . . . went on board the new Royal yacht, and returned to Osborne about half past six o'clock

On Tuesday the Duchess of Kent took leave of her Majesty, and left Osborne for London. In the afternoon the Queen, accompanied by the Princess Helena, drove to Ryde. Prince Albert embarked in the Royal yacht *Fairy*, and went to see the new works constructing at Spithead Fort

On Wednesday the Queen and the Prince walked in the grounds

On Thursday the Court returned to town, arriving at Buckingham Palace about six o'clock

Yesterday (Friday) her Majesty gave her second State Ball this season. The Hon. Mary Seymour has succeeded the Hon. Beatrice Byng as Maid of Honour in Waiting

FASHIONABLE ENTERTAINMENTS.

The Countess Barnstorff gave a delightful juvenile ball, on Saturday afternoon, at the residence of the Prussian Legation, on Carlton-house-terrace. The *fraulein* was honoured with the presence of their Royal Highnesses the Duchess of Cambridge and the Princess Mary, and their Royal Highnesses the Grand Duchess Hereditary of Mecklenburg-Strelitz and Prince Adolph of Mecklenburg-Strelitz. The young Prince Adolph appeared in the Highland costume.

The Countess Colloredo gave a magnificent ball on Wednesday evening, at the residence of the Austrian Legation, Cumden house. The Countess was honoured with a brilliant attendance. Several members of the Royal family and nearly one of the most distinguished representatives of the fashionable world were present.

The Duchess of Beaufort gave a grand ball on Tuesday night, at the family mansion in Worcester-square. His Royal Highness the Duke of Cambridge honoured the *reunion* with his presence.

The Countess of Derby had an assembly on Thursday evening, at the family mansion in St. James's-sq., are. The party was most numerously attended

Her Royal Highness the Duchess of Kent, attended by Lady Anne Maria Davison and Sir George Couper, went to Frogmore on Wednesday, and returned to her residence, Clarence-house, St. James's, in the afternoon

His Royal Highness the Duke of Cambridge dined with the Third Guards Club, at Grillion's Hotel, on Monday last.

FRENCH PLAYS.—The estimable comic actor, M. Levassor, will commence a short series of French Plays and the Matinées Recreatives et Comiques, at the St. James's Theatre, on Wednesday evening next.

SCARCITY OF MEN IN RUSSIA.—In the present dearth of soldiers, which is beginning to be most sensibly felt, the Emperor has favourably listened to a proposal made by the Governor-General of the Caucasus for embodying the irregular corps of Tartars and Bashkirs inhabiting the provinces of Orenburg, Samara, Wiatka, and Perm. Count Perofsky is empowered to organise and embody the nomadic hordes of the Bashkirs and Tartars of the Steppes into regular military corps, giving each family thirty dessiatines of land belonging to the domains of the Crown.

A SIGN OF RETURNING PROSPERITY.—At the Bradford Borough Court, the other day, the night superintendent of the police force told the magistrates that during the last fortnight there had been more drunkenness in the street, and more drunken people brought to the police-station, than during the three nights previously. The Mayor inquired, "How do you account for it?" "Trade must be mending," said the officer

The shipping returns of the Board of Trade for the month ending the 30th of April exhibit a considerable decrease in the employment of tonnage This decrease, however, has been relatively felt to a greater extent in foreign than in British shipping, a further corroboration being thus afforded of the fact, that British vessels have the preference whenever there is a full supply of both.

LAW VACANCIES. The appointments vacated by Mr. Phinn, the Second Secretary to the Admiralty, are:—Counsel to the Admiralty, Judge Advocate of the Fleet, Recorder of Deptford, Counsel to Post-office on Western Circuit, and to the Royal Forests in Hampshire. The first appointment is worth £500 per annum.

Monsieur Genard left New Orleans in a balloon, and travelled only 310 miles in six hours, landed his passengers at Port Gibson, Mississippi, and then resumed his voyage.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

A very extensive business having been transacted in Consols this week, both for Money and Time, prices have further advanced nearly one per cent. This improvement in the quotations was, in a great measure, resulted from the large imports of the precious metals, and the favourable accounts from the Crimea respecting the progress of the Allied arms. In the Stock-Exchange there has been an increased demand for money, arising from the settlement in the Consol and Railway Market; but, at the Bank in Lombard street, the applications for discount have been very limited in number and amount. That money will become cheaper, is evident from the great accumulation of capital in the Bank. To get rid of a portion of it, numerous large purchases of Stock have been made on account of the Directors, and part of the Bullion comprehensive that the Stock will be forced upon the market at a unfavourable period. The South Sea Company has withdrawn some large sums hitherto lent by it

There has been a further shipment of gold to the Continent, but some large purchases of bar silver have been made on German account, at 61¾ per ounce. The imports have been again . . . ; viz. £171,000 from Australia, and not less than £200,000 from New York. Several vessels with gold on board are now on their from Sydney and Melbourne

On Monday Consols were very firm The Three per Cents marked 91¾ up to . . . the Three per Cents Reduced, 91; the New Three per Cents, 91¾ to 91¾; Bank Stock was 209½; India Stock, 235. The Omnium was worth 3¾ to ¼ pm. Long Annuities, 1885, 16¾. Exchequer Bills, 12s. to 17s.; Ditto, Advertised, 7s. to 9s. pm. There was a steady market on Tuesday, and the Three per Cents for the Account, were 92¾—the Three per Cents Reduced being quoted at 91¾; the Three per Cent Consols, 91¾ to 92¾. India Stock 234 to 236; Bank Stock, 208½ to 209½. Long Annuities, 1860, were 3 15-16 ½. Ditto, 1885, 16¾ 11-16. Omnium marked ¼ pm. Exchequer Bills, 16s. to 20s. Ditto, advertised, 6s. to 8s. pm. The Market was firm on Wednesday . . . Consols for Account were marked 92¾ to 93¾; the Three per Cents Reduced, 91¾ to 91¾; the New Three per Cents, 92¾ ¾; and the Three per Cents, 923 to 92⅞. Long Annuities, 1860, 3⅝; India Bonds, 18s.; Exchequer Bills, 18s. to 17s.; Do., advertised, 6s. to 8s. prem.; Omnium, 4¾ prem. On Thursday there was not quite so much activity, and prices showed a tendency to recede: Consols were 92¾ ¾; and for the Account, 93¾ ¾ to 92¾. New Three per Cents were 92 to 92¾; and Reduced, 91¾ ¾. Bank Stock, 210 to 209½; Omnium, 4¾ prem.; and the New Annuities, 16 13-16. Exchequer Bills, 18s. to 19s prem

There has been considerable excitement in the Market for Turkish Bonds, at a material increase in the quotations. They have marked 89¾. Buenos Ayres Six per Cents Land Loan . . . Ditto Bonds, 3¾; Mexican Three per Cents, 22¾; Russian Five per Cents, 106; Ditto, Four-and-a-Half per Cents, 89½. Spanish Five per Cents, 20¾; Ditto, New, Deferred, 12¾; Sardinian Five Ditto Two-and-a-Half per Cents, 64; Ditto, Four per Cents, Five per Cents, 99¾; Ditto, Four-and-a-Half per Cents, 87⅛, Venezuela Four-and-a-Half per Cents, 28; and Belgian Four-and-a-Half per

A . . . States have continued very firm in price, and rather . . . transactions have taken place in them. Australasian, 85¾; British North American, 65½; Commercial, 31; English, Scottish, and Australian Chartered, 18¾; London Chartered of Australia, 2¾; Ditto, New, 5¾; London Joint-Stock, 7¾; Union of Australia, 75¾; Union of London, 28¾ Miscellaneous . . . months realised higher rates: Australian, 7¾; Canada Government Bonds, 112¾; Canada Land Company, 13¾; Preference, 45; East and West India, Docks, 119¾; Land . . . General Screw Steam Shipping Company, 14; Netherlands Land, 1¾; Peninsular Gas, 14; Peel River Land and Mineral, 3; Peninsular and Oriental Steam (New), 162½; Royal Mail Steam, 74; South Australian Land Company, 7¾; Queensland Land, 1 . . . Shares have marked 1¾ per cent. . . . and Oldham . . . 20; Stour, 8¾; Loughborough, . . . 60 Stourbridge . . . ford and Worcester, 42½. There was a moderate inquiry for Waterworks shares: East London have realised 103; Grand Junction, 68½; Ditto, 7½; Hertford and Ware, 7¾; Lambeth, . . . Ditto, New, 16½; Ditto, 8 pm; Guelph and Goke Commercial, . . . have been steady as to price, but the business transacted in them continues limited: British Provident, 20; Brighton, 15¾; City of London, 90; Imperial, 112; Ditto, New, 30; Surrey Consumers, 11; Westminster Chartered, 41 ex div Insurance Companies' Securities have been heavy, yet we have no change to notice in the quotations. Bridge Shares have ruled nominal

The transactions in the Railway Share market have been rather extensive, and prices, generally, have had an upward tendency. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS. Aberdeen, 24; Bristol and Exeter, . . . ; Caledonian, 64¾; Chester and Holyhead, 15¾; East Anglian, 1¾; Eastern Counties, 12¾; Edinburgh and Glasgow, 59; Edinburgh, Perth, and Dundee, 20; Great Northern, 93; Great Western, 65¾; Lancashire and Yorkshire, . . . ; London and North-Western, 1 . . . ; London and South-Western, 8 . . . Manchester, Sheffield, and Lincolnshire, . . . ; Midland, 8 . . . ; Norfolk, . . . ; North British, . . . ; North Eastern, . . . ; North Staffordshire, . . . ; Scottish Midland, 49; Shrewsbury and Chester, . . . ; South Devon, 13¾; South Eastern, 62¾; Vale of Neath, 20

LOAN SHARES AT FIXED RATES.—Manchester, Buxton, and Matlock, 2¾; Midland Bradford, 93; South Staffordshire, 7

PREFERENCE SHARES. Aberdeen, Seven per Cent, 83; Eastern Counties, Five per Cent, No 1, 1 premium; Edinburgh, Perth, and Dundee, Four per Cent, 93; Great Northern Four-and-a-Half per Cent, 102; Ditto, Five per Cent . . . ; Great Western Four-and-a-Half per Cent, 98. L . . . ; Lancashire Six per Cent, 137; Midland Consolidated Six per . . . ; Eastern Berwick, Five per Cent, 93; Ditto, York . . . ; North British, . . . ; Oxford, Worcester, and Wolverhampton, 103; South Wales, . . . 24, Wilts . . . and Gloucester Six per Cents, 15

FOREIGN.—Antwerp and Rotterdam, 8; East Indian Five per Cent, 24¾; Grand Trunk of Canada, A issue, 93; Great Central of . . . ; Indian Peninsular, 5; Great Luxemburg Shares, 3¾; Great Western of Canada Shares, 21; Lyons and Geneva, 16; Paris and Lyons, 24¾; Ditto, Dutch, . . . ; Sambre and Meuse . . . ; Scottish Australian Investment, . . . ; Copper, . . . ; Lisbon and Alentejo, 1; Lisbon and Oporto, 1; Sambre and Meuse, 16; Rhymney Iron, 20¾; Ditto, New, 6; Santiago de Cuba, . . . ; United Mexican, 6

Friday Evening.

There has been a steady market for Consols to-day. In prices very little change has taken place. The Three per Cents are 92⅜ ⅝ down to 92⅜ . . . ; Three per Cents Reduced, 91¾; and the New Three per Cents, 91¾ ⅝. In Foreign Bonds and Railway Shares a fair business is doing

THE MARKETS.

CORN EXCHANGE (Friday).—Very moderate supply of English wheat have been received up to our market this week, principally sent by land carriage. Although the arrivals of foreign in to-day's market was limited, the demand was rather inactive, yet, from the firm tone on the part of the factors, very little change took place in the quotations. To . . . was a good show of foreign wheat. Selected qualities were tolerably firm, at full prices. . . . ; Inferior and middling kinds ruled heavy, and the turn in favour of buyers. Flour . . . ; Barley . . . ; Malt . . . ; Beans . . . ; Peas . . . ; Oats . . . ; Linseed . . . ; Cakes . . . ; Rapeseed . . . ; Tares . . . ; Hempseed . . . ; Canaryseed . . . ; Carraway . . . ; Coriander . . . ; Tares . . . ; Foreign Wheat . . . ; Barley . . . ; Oats . . . ; Flour . . . ; Seeds . . . ; Linseed

THE "GEYSER" AND "ARCHER" OFF RIGA.

THE BALTIC FLEET.

TWELVE months ago the people of England were eagerly waiting the news of some great naval exploit in the Baltic. About the end of May a rumour prevailed that Sir Charles Napier had bombarded Cronstadt, but, like many other rumours, it proved to be without foundation. This year the movements of the Baltic fleet are not watched with so much interest as they were in 1854—public attention being mainly directed to the Black Sea, so that if any signal victory should be won by Admiral Dundas, it will take the country by surprise.

In the meantime, although no great enterprise has been attempted, the blockade in the various ports in the Baltic has been strictly maintained. On the 7th of May the squadron off Riga commenced proceedings by capturing eight Russian merchant vessels. These ships were receiving their cargoes on board outside of the bar of the Duna, the river that runs up to Riga, probably to enable them to get out to sea quicker than they could have done had they to cross the bar loaded. They appear to have felt secure from any attack; for the shore boats continued to bring goods on board after the English steamers were in dangerous proximity. At last, but just too late, the signal was made on shore, warning them of the peril of their position. Whether it was misunderstood was uncertain; but, instead of putting back into the harbour, the Russian masters stood out to sea, running, as it were, into the very jaws of the lion; for a little manœuvring effectually cut off their retreat, and the vessels were all taken. They are said to be worth £17,000 or £18,000, which will prove by far the best prizes taken this war, if they are condemned. There is no doubt they were going to try and run the gauntlet. Whether the lawyers will be able to save them or not remains to be proved.

The disposition of the fleet has hitherto been somewhat similar to that of last year, Nargen being the head-quarters, while the screws watch Helsingfors and the mouth of the Gulf. This duty has been performed by the *Esk*, *Cossack*, and *Amphion*—diminished by *Imperieuse* and *Tartar*, sent home for repairs, on account of serious damages in running foul of each other. The *Archer* and *Geyser* have been guarding the Gulf of Riga, assisted by *Basilisk* and *Desperate*; and, including the prizes already mentioned, have sent home, upon reference to the Admiral, some twenty vessels, filled principally with flax, hemp, linseed, oil, and rye, which will give the captors about £30,000. There are a few Russian, and, of course, good prizes. All the others are principally neutral, and clearly took their cargoes in after the announcement of the blockade. The Dantzic mail routine has fairly commenced. The *Driver* has taken the two first turns, and the *Vulture* conveys this mail. The contract steamers have also commenced their weekly visit from Elsinore with bullocks and vegetables, and right good they are. Nothing as yet has gone up the Gulf of Bothnia. The surveying-ships have been busy in surveying the northern shore; and the *Merlin*, accompanied by *Euryalus* and *Magicienne*, was lately engaged examining the neighbourhood of "Borgo," an anchorage between Helsingfors and Cronstadt.

The Admirals are said to keep a dignified and discreet reserve, and nothing is known of the future movements. At the same time a steady and systematic progress is making in rendering the ships ready and efficient, and even if the strongholds are not attempted the ships will not be idle, but will have all their resources constantly employed against the enemy in some shape or another, and the gun boats will be of great assistance in enabling the fleet to reach everything on shore. Last year a constant run of vessels took place between Helsingfors and Abo on the one hand and Cronstadt on the other. Such a state of things will hardly be permitted this year, as the blockade is to be much more strict.

Captain Vansittart, in the *Magicienne*, who has been on a cruise round the Gulf of Finland, having reached as far as Seskar (some twenty-five miles from Cronstadt), reports that all the towns and villages on the coast are entirely manned (nautically speaking) by women and children, all the males having been taken to strengthen the different garrisons. All the male inhabitants of Hogland have been taken away by the Emperor to man the gun-boats; and it is rumoured that the intention of the Admiral is to take possession of the island, and there build an hospital. It is a fine healthy island, and well adapted for that purpose—Faro being too far away, should any casualties, either from sickness or an engagement, take place. There is a large trade going on between Stockholm and the Aland Islands, and it is thought that on the arrival of Admiral Baines some of the small steamers under his command will be sent to the Gulf of Bothnia to impede communication. The islanders of Nargen appear, from the English money they obtained last year, to have thriven well. Additional huts have been raised; increased accommodation provided for washing clothes; the children look better fed and certainly better clothed; and all seem much pleased at the reappearance of their old friends the English.

According to all accounts, the Russians, far from idle during the last six months, have endeavoured to make as secure as possible all points liable to be attacked. At Riga, for instance, they have sunk huge masses of rock and immense stones in the channel, so as to render the approach to that place very difficult, if not impossible. The entrance to Revel is also defended by a quantity of large iron-spiked piles driven firmly into the ground, and so arranged that no gun-boat whatever, not even one of the smallest, can pass between any two piles without striking.

Another not unimportant fact is, that the Russians have succeeded in removing the greater part of their fleet, which was, during the whole of last summer, shut up in Sveaborg, from that place to Cronstadt; the few ships left behind are completely dismantled. It is supposed that this movement was effected *after* our fleet left the Baltic last year, and *before* the communication between Sveaborg and Cronstadt was completely cut off by the ice. There are also some very strong earthworks erected at Sveaborg.

On the 22nd of May the fleet was still at Nargen, near Revel, with the exception of the flying squadron, which was cruising off Hogland, and the *Duke of Wellington*, which left Nargen on the previous Tuesday, on account of having small-pox on board—the number of cases being 24, namely four officers and twenty men. The Commander-in-Chief went in her, leaving Admiral Seymour in command. The vessels exercise daily, firing at targets, only five miles from the enemy's guns. The officers of the different ships go on shore every day on the island of Nargen, to play cricket and walk about; but strict orders have been given by the Commander-in-Chief that no depredation is to be committed on the island, such as setting fire to trees, or molesting the inhabitants, who are mostly Swedes. Communication is kept up with Revel by means of small boats, but they are not allowed to bring anything from there beyond their own common necessaries, which consists of some black bread, barley, and rye; therefore the only thing that can be procured on the island is milk. The vessels hired by Messrs. Ransils and Deacon expect to make a good harvest this year by carrying provisions to the fleet. They have sent invoices to the different ships, but the charges on everything being 150 per cent, they will perhaps be disappointed. It was reported that, on the return of the Commander-in-Chief in the *Duke of Wellington*, the fleet will go to Hogland, or Nyborg, have a look at Cronstadt, and then return by the arrival of the troops to attack Sveaborg. The season is now sufficiently far advanced to commence operations, and not leave things to the last moment. Such a magnificent fleet as we now have in the Baltic should not return to England this year without materially weakening the coast defences of the Russians. The inhabitants of Revel were in great alarm, and the troops in constant fear, expecting the fleet to commence operations against the town. Soldiers in disguise were sent to Nargen to observe the movements of the fleet, therefore they know as well as ourselves all that goes on, and every new arrival. Thirty thousand men are quartered in Revel. The ladies and children have taken to the country, and every house-owner has been compelled to lay in provisions for six months.

A Wismar ship, the *Betsy*, was brought to Elsinore on the 19th ult., in charge of a prizemaster; she had been captured on her way from Riga to Sheerness, with a cargo of rye. It was understood that she would be followed by ten other vessels that had been taken by our cruisers while sailing under a variety of German flags.

The *Basilisk* arrived off Memel on the 19th ult., bringing with her as a prize the Russian sloop *Emma Helene*, laden with salt, which she had captured off the island of Eesel. In addition to this sloop the *Paul Friedrich*, *Betsy*, and *Johanna*, all from Mecklenburg, are mentioned as having been captured and sent to England. The crew of the *Paul Friedrich*, which was on board the *Emma Helene*, was set on shore at Ilberty; that of the latter vessel has been transferred to the *Basilisk*.

The garrison in the town of Polangen (the place nearest to the Prussian frontier) is just now very inconsiderable. The Cossacks who hitherto have formed the border guard have been withdrawn; and only 100 men, part Hussars, part Bascshirs, have taken their places. A communication, however, is established between this handful of men and a strong body of infantry and artillery stationed further inland, and maintained by a chain of squadrons of Hussars reaching as far as Libau and beyond it. Libau itself has no garrison at all.

An English vessel was wrecked last autumn on the Russian coast between Libau and Polangen; the crew were saved, but, instead of being made prisoners, were permitted to return home. It has caused no little unpleasant feeling in those parts that not many days back an English vessel of war approached the spot where the wreck lay, and, after firing a few blank shots to warn off interference, sent a boat's crew to set fire to the remaining timbers. They succeeded in perfectly destroying what remained of the hull.

Memel has again been visited by fire. On the 18th ult. a fire broke out close to the post-office, and was not extinguished till after it had destroyed three dwelling houses and much injured a fourth. In a town so large, a proportion of which still lies in ruins from the late conflagration, this misfortune is doubly felt, from the difficulty of the now houseless occupants finding shelter anywhere.

The following passage from a letter received from an officer on board one of the vessels blockading Riga gives some particulars regarding the capture of prizes on the 7th and 8th of May:—

H.M.S. *Geyser*, off Riga, May 8th.

On the evening of the 7th inst., while in company with the *Archer*, we observed a sail, and on nearing her observed another. We dropped a boat to take the first, and proceeded to the second, on coming up with which we dropped another boat, and went in chase of a third. We took (in all) three on the night of the 7th. The *Archer* boarded one, but she was not detainable. On the morning of the 8th we steamed off the port of Bags and forced six vessels to come out; the remainder, being within gunshot of the batteries, we could not get at. They manned all their guns on shore, and hoisted a red flag as a signal for all vessels to weigh, as they were going to fire.

RUSSIAN SISTERS OF MERCY.—Of the Sisters of Mercy who have left St. Petersburg for the Crimea—96 in all—at least 63 are stationed in and about Sebastopol; of the latter number, at least half are in the town itself, and at the different surgeons' stations. The letters received in the capital from them, and those around them, portray in very lively colours the amount of carnage which the fire of the besiegers causes the Russians. It appears that the wounded are for the most part removed to the north side of the fortress and thence to the interior; but, from the frequent want of means of transport, and, on the other hand, from the inexpediency of moving those severely wounded, their numbers in the town become extremely unmanageable. The great distance from their resources of supply makes it impossible to convey to the troops, much less to the sick, all the necessaries they require: the article of which there was the least deficiency was tea, so essential to the comfort of a Russian; but of sugar there was a great lack, so that even the officers were obliged to be allowanced. Leeches cost a silver rouble a piece. The descriptions of the scenes these pious females passed through after every more important affair are fearful. That of March 24th is more particularly mentioned, on which occasion 600 wounded were brought in for treatment in twenty-four hours. From the number of amputations and other serious operations, in which they assisted the surgeons, they frequently had to stand on a floor an inch or two deep in blood. The visit paid by two of the ladies, accompanied by a priest, to the Malakoff Tower, and their celebrating Divine service there under the fire of the enemy, partakes of the romantic. After climbing the hill, and entering the fortress, where they found the soldiers and sailors assiduously occupied in returning the incessant fire of the enemy, they reached the tower, now destroyed, where the deceased Kornileff formerly had his quarters. After passing through a casemate occupied by the sailors, they attain a long, deep, dark corridor, with a row of oaken columns on each side. Here mass was celebrated; the chants and other sacred songs were not omitted; all the necessary paraphernalia was at hand, having been brought thither from a church that had been destroyed; and, after a sermon from the Pope, they carried the church vessels in procession round the bastion with tapers in their hands, the enemy firing all the time! They subsequently went out on the ramparts of the fortress and were shown the lunette, Kamschatka, and the two chains of sharpshooters opposed to each other, but yet so near that, as the soldiers there say, they might eat their broth out of the same plate. According to all accounts the bullets of our rifles are doing much more havoc than the balls of our cannon.—*Letter from Berlin, May 26.*

ENTHUSIASM FOR THE WAR IN NEW SOUTH WALES.—The following is an extract of a letter from Sydney, New South Wales, received by a gentleman in London, dated March 6th, 1855:—"The news of the sanguinary affair at Inkerman has excited the most extraordinary degree of enthusiasm and sympathy throughout the colony. A public meeting was held at the theatre to receive subscriptions in aid of the Patriotic Fund. Very large sums were put down, commencing with the contribution of Daniel Cooper for £1000, and £500 a year during the continuance of the war. Several of the banks gave £500 each, and a great number of private individuals subscribed sums varying from £250 to £100. The city was subsequently divided into districts, and collectors appointed to each:—— ward being assigned to myself as ——. In our perambulations through this very limited area we collected in three days about £3500. I believe that the aggregate of the subscriptions raised in Sydney will be little short of £30,000. This is certainly a gratifying proof of the truly British sympathies by which the people of the colony are influenced, and, I think, affords an unequivocal argument that, whatever temporary causes of discontent may exist between it and the home authorities, its loyalty is unimpeachable."

A CLEVER RUSE.—The manner by which the soundings which have enabled Admiral Lyons and Admiral Brunt to plan the successful attack on Kertch is curious. A British naval officer, whose name is not yet probably known, captured a vessel having on board a private carriage belonging to the Russian Governor of Kertch. With this "material pledge" in his possession, he sent a polite message to the Governor, stating that the English cruiser was unwilling to deprive him of his private property, and would have great pleasure in restoring the carriage to its former owner. The offer was accepted, and the ship's boats entered the Bay of Kertch, with the vehicle on board, sounding as they went. By this means it was ascertained that there was a passage for the small steamers to within a short distance of the coast, and the Governor's carriage made a track for the British fleet.

EXEUNT AUSTRIA AND THE FOUR POINTS!

AUSTRIA has clung to the Conferences to the last moment, and to the last shred. But Time has at length put an end to them, and to her intervention as a peace-maker. These windy and empty shams collapsed on Monday last; and Count Buol—the Austrian Gladstone—the expert special pleader—the glib of tongue but the unwise of counsel—has been temporarily deprived of the opportunity of splitting straws for the bewilderment of plain men. Within the limits of his own *Chancellerie* he may continue to indite vain words and quibbles to the representatives of his master in the petty Courts of Russian Germany. In this capacity he will do little mischief, though he may cause every true Austrian to blush, that the destinies of so fine an Empire should be confided, even partially, to such incompetent direction. It is, of course, free to Austria to essay some new effort; and to reappear in the arena of diplomacy with fresh proposals. But it is also competent to England and France to decline any further parley, except with Russia direct, and on the express demand of that Power. Whether the English Ministry has the determination to assume such high ground remains to be seen; but we think it is evident, from the dreary history of these infructuous negotiations, that Viennese diplomacy has had its day; and that nothing is to be gained by any further deliberations under the auspices of such men as Buol and Bruck, or any other Austrian statesman now in office. Whatever course the British Government, in the excess of its courtesy to such a great and independent Power, may think fit to assume, the British people—whose opinions are not represented by Mr. Cobden or Mr. Gladstone, or by any other member of the hybrid Peace-at-all-price and pro-Russian party in the House of Commons, or by such degenerate Peers as Lord Grey (who ought to receive a diamond snuff-box, or the Order of St. Vladimir, at the least, from the new Czar)—has made up its mind that Austria is out of court, and that Russia herself must ask for peace before peace be again debated.

There was a time when Austrian assistance, boldly and honestly rendered to the Allies, might greatly have shortened, if it had not altogether prevented, the war. But that time is passed. Austria either did not see her true policy, or, seeing it, had not courage to pursue it. She and the Four Points must therefore stand aside, and let the real business of the world proceed as it is proceeding, and will proceed—in the Baltic and the Sea of Azoff. The Four Points are virtually defunct. Events have gone far beyond them; and the next attempt at drawing up terms of pacification will probably include Six Points, if not Seven. Point Five will be Indemnification by Russia for all the expenses incurred by France, England, Turkey, and Sardinia, in the prosecution of the war; Point Six, the restoration of the Crimea to its ancient owners; and Point Seven, the re-establishment of Poland. If the successes of the Allies and the obstinacy of Russia should lead to Point Five, Point Six will follow, and Point Seven may perhaps not lag very far behind its legitimate predecessors. How such a rearrangement of the map of Europe would suit the views or the interests of the Emperor Francis-Joseph, and his timid counsellors Buol and Bruck, it is for them, and not for the Allies, to consider. But if Austria does not at once cast in her lot with the victorious masters of the Crimea, of the Baltic, of the Black Sea, and of the Sea of Azoff, she need expect no deference or consideration, in the hour of triumph, from those whose conquest she impeded. As yet she makes no sign. She is afraid to declare herself neutral; for such a confession would be too degrading. She is afraid to declare herself the friend of Russia, for that would let loose upon her a couple o. avalanches which she knows to be impending and trembling over her head; and she is afraid to declare herself for the Allies, because they have not been strong enough to take Sebastopol, and annihilate the Russian forces in the Crimea. In one sentence;—she is afraid to take the course which she knows, and feels, and has over and over again admitted, to be the rightful one, lest the Allies should prove to be the weaker in the struggle, and she should thereby incur the vengeance of the Power which saved her from Kossuth in the day of her peril and extremity. Meantime she will, according to Count Buol, adopt what he calls "an expectant policy;"—that is to say, she will wait till she sees who is to be the winner. Unhappy Austria! She has thrown away a noble opportunity. She has discouraged and disgusted her friends, and given strength to her enemies—external and internal—and must bear the penalty that, sooner or later, will be exacted from her—by fate, by necessity, and by justice. Her policy is to be "expectant;" but she is pretty certain to suffer much that she does not expect, but which people out of the boundaries of her own dominions can see, if she cannot.

Yet, in considering the position in which Austria—even more blameable than her unworthy neighbour of Prussia—has managed to place herself, we would ask, how it is that Mr. Gladstone, Mr. Cobden, Mr. Bright, and all the other benevolent philosophers who speak with such horror of the miseries inflicted upon the world by the Demon of War, have no denunciations to throw at the heads of Austria and Prussia? Against Russia who provoked hostilities by her wicked ambition and rapacity—they have not a word to say. Against Austria—who, by adopting a bold policy at the commencement of the disputes, might have prevented the firing of a single gun, or the loss of a single life—they have nothing to allege. But against their own country, and against France—who have taken up arms to prevent the peace-breaker from riding rampant over all Europe—they allege all imaginable crimes. Mr. Glad-

CONSECRATION OF THE BURIAL-GROUND AT SCUTARI, BY THE BISHOP OF GIBRALTAR. (SEE NEXT PAGE.)

stone draws pathetic pictures of the unutterable cruelties of war of its antagonism to the Christian spirit—of its murders—of its robberies—of its ruthless destruction of all that civilised and religious men hold dear; but he applies none of his blame to the aggressor. He and his Quaker friends heap all the odium upon the States who resist the evil-doer, and launch no blame against the evil-doer himself. We suppose Mr. Gladstone and his new allies pay the policerate. Let them do so no longer, if they have faith in their own doctrine, that Russia is right and England wrong in the present struggle. In the commonwealth of nations, if their arguments be good for anything, the policeman is as bad as the murderer, and the judge and executioner are both as execrable as the assassin. But others out of their pale can denounce war with as much zeal and sincerity as they can. The so-called "Peace-Party" have no monopoly of their detestation of it. All Christian and sensible men detest war; but, unlike these one-sided and fallacious reasoners, they do not shower their sympathy upon the aggressor, and confound in one common denunciation not only the Power that invades the right but the Power that defends it.

Let the constituencies of Great Britain put a mark upon the pro-Russians. Like Austria, they help to prolong the war which they dislike; but, unlike Austria, they lower the reputation of England in the eyes of the world. Austria can damage her own reputation; but that of England is beyond her reach. Mr. Gladstone, Sir James Graham, Mr. Cobden, Earl Grey, and their followers, have more power; for their words are supposed to be those of influential statesmen, and not only encourage Russia in her obstinacy, but cause foreign nations to be doubtful both of our power and of our determination. A Parliament unanimously resolved to fight it out with Russia to the last extremity would be of more value in putting an end to the war than an army of 100,000 men. The people of England have other duties to perform than those of tax-paying and finding heroes for the struggle. It is their duty to mark such men as Mr. Gladstone and other pro-Russians, and exclude them from the next Parliament. It is by no means too soon to consider that part of the question. It is time for the constituencies to stir, and to take means for being more worthily represented. A dissolution of Parliament may not be so distant as one-half of the members of the present House of Commons desires; and, when it comes, the people will be untrue to themselves, if they allow a single pro-Russian to be elected to that assembly.

CONSECRATION OF THE BRITISH CEMETERY AT SCUTARI.

WITHIN the past month another burial-ground has been formally added to the cemeteries of Scutari, already immense, owing to the predilection which the Turks of Europe reserve for being buried in Asia—that quarter of the world in which are situated the holy cities, Mecca, Medina, Jerusalem, and Damascus. Every one who has read the charming romance of "Anastasius" will recollect how picturesquely the author has described these dreary realms. "So long and so dusty," wrote the author, many years since, "has time been at work to fill this chosen spot—so repeatedly has Constantinople poured into it her dead—that almost the whole contents—that the capital of the living, spite of its immense population, scarcely counts a single breathing inhabitant for every ten silent inmates of this city of the dead. Already do its fields of blooming sepulchres stretch far away on every side, across the opposite hills and the bend of the valleys, already are the avenues which cross each other at every step in the domain of death so lengthened, that the weary stranger, from whatever point he comes, still finds before him many a dreary mile of road between marshaled tombs and mournful cypress-trees ere he reaches his journey's seemingly receding end; and yet every year does this common patrimony of all the lands to decay still exhibit a rapidly-increasing size, a fresh and wider line of boundary, and a new belt of young plantations, growing up between new flowerbeds of graves." The increase has continued to the present day; but the addition we have now to record has associations of redoubled gloom in this new cemetery being demanded by the necessities of war.

The ceremony of consecration took place on the 16th ult. by the Bishop of Gibraltar, the Right Rev. Dr. Tomlinson. There was little preparation for the occasion, and it was scarcely known in Pera; but our Artist chanced to pass in his way to visit a sick friend at Scutari. On the spot where the service was read by the Bishop was a platform raised about two feet from the ground, upon which was placed a desk provided with the book of prayer, at the foot was a small cushion, and near it an armchair, these being the only accommodations prepared for the ceremony. The several persons having assembled on the ground, a procession was formed by the clergy, in their canonicals; followed by about thirty nurses from the British Hospital at Scutari, a few officers, and about a hundred soldiers in arms. The cortège having walked round the ground allotted for the cemetery (half of which is already filled with graves), the several persons grouped around the platform, which the Bishop and his assistant ascended, to read the impressive consecration service. There were few spectators of the scene; scarcely a dozen of the convalescent soldiers, who, a few minutes after the ceremony was over, might be seen crowding the cafés and wine-shops of Scutari. Had the consecration been publicly announced, it would, in all probability, have been attended by thousands from Stamboul and Pera; and the assemblage would have greatly added to the impressive character of the scene. As it was, its scant simplicity would have surprised the Turks, whose religious ceremonies approach the pomp of spectacle.

Towards the centre of the group who took part in the ceremony might be recognised Lord Stratford de Redcliffe, who was evidently much impressed by the solemnity of the occasion, and the sad recollections by which it gave rise. Amidst the nurses surrounding the clergy might be seen Lady Redcliffe and her daughters.

In our Artist's sketch nothing is seen of Scutari; but the magnificence of the distant view is brought into vivid contrast with this new home of the dead. On the left lies the Sea of Marmora, busy with ships, steamers, and men-of-war. In the opposite direction extend the heights of Galata, and far in the extreme horizon may be discerned the tower of that suburb. Among the more interesting objects shown in the View are Seraglio Point, the points of St. Sophia and Achmet's mosques, cypresses, and the square tower of the Old Seraglio; the broken line was admirably set off by the delicate pink tints of the setting sun

---

"TOO WIDE AWAKE FOR THE BRITISHERS."—When the *Driver* was sent in to British Port, to serve the vessels lying there with the official notice of the blockade, she found among others an American barque called the *Sammy Appleton*, of Boston, U.S., a fine craft of about 900 tons register, whom she also served with a warning to clear out within six days. A day or two afterwards the *Driver*, being out cruising, fell in with this very same American, and an officer of the *Driver* was sent on board to examine the ship's papers. They were found perfectly in order, whereupon the officer demanded to see the bills of lading. The American captain objected to this, and began to make difficulties, which caused the suspicion of the British officer, so he insisted on their production, which was at length complied with, and from which it appeared that the *Sammy Appleton* had just landed at British Port 50,000 rifles and 10,000 revolvers, besides about 800 cwt. of cotton, as the ostensible part of the ship's cargo. "Oh! oh! you have been landing rifles, have you, my friend?" quoth the Lieutenant. "Now we'll just search your hold; and taking the carpenter of the *Driver* with him, as is usual in such cases, he proceeded to examine and ransack the hold of the American ship, but without finding anything suspicious. "You may thank your stars, my man," said the Lieutenant to the Skipper, when the search was concluded, "that I found no arms on board your vessel; for had there been one single rifle more than the number of bales on board, you would have been nabbed, as sure as my name is ——." "Ah, I calculate I was too wide awake for you Britishers this time," said the Yankee, chuckling with delight; "and I reckon I'm on the safe side of the hedge now." Nothing could be done, and the *Driver's* boat shoved off. It may add that the *Sammy Appleton* entered the Sound on the 16th of March, and arrived at British Port on the 18th of April.—*Letter from Memel.*

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

SOMMIER has decided on paying us another visit; how long she means to remain, if she intends starting again in a day or two, or taking up her abode for the season, of course we cannot pretend to say; but, wisely profiting by the proverb that tells us to make hay while the sun shines, Parisians and foreigners alike turn the sunshine to account, and the streets boulevards, gardens, and promenades, are alive with *flâneurs*, native and imported, and Paris looks even gayer than is its wont to do in June. A hint *en passant*. Stranger, you who wish to behold this city of sights, this paradise of idlers, for itself, come not in "the season," when the sunshine is like that of the North Pole, visible at midnight, and confines itself to *salons* and theatres; come in May or early June, when the Parisian lives out-of-doors, and every street—let alone the Tuileries, Champs Elysées, Luxembourg, &c.—boasts some verdure, some shade, some gusts of lilac-breath some hint of the country, something to brighten and freshen the especially dingy and dirty aspect it has been wearing for so many months: for, apart from the grand places and thoroughfares contained within a comparatively small limit, the rest of this mighty metropolis presents anything but a *riant* physiognomy.

The King of Portugal is greatly fêted here. It is said that a splendid réunion is to take place in his honour—at St. Cloud, if the weather be favourable; at the Tuileries, in the contrary case.

It is, we believe, decided, or nearly so, that the Palace of St. Cloud is to be offered to Queen Victoria during her stay: the Elysée was the residence first intended for her, but it appears that the Emperor, considering the situation of St. Cloud much more likely to suit the tastes of her Majesty, in affording her constant opportunities and considerable space for enjoying air and exercise, has been led to the latter choice. The Empress, we are told, takes the utmost interest in the preparations in progress of this reception, and superintends them in person. Her Imperial Majesty has ordered a *ceinture* in diamonds, which she purposes presenting to the Queen.

The King of Sardinia is also expected in Paris, and it appears now but little likely that the Emperor and Empress will be able to execute their plan of a visit to Biarritz, as was proposed.

Since the price has been reduced, the influx of visitors to the Exposition Universelle has enormously increased. The erection of an immense fountain, and plan[illegible] rown holland, which is to be continually watered, within the glass roof, will, it is hoped, prove some safeguard against the intense heat, which is so much complained of; though the latter plan will have the effect of making the lower compartments of the building extremely dark—a disadvantage from which many of them suffer already. If these means be found insufficient, it is probable that the project of a Belgian Dr. Van Hecke—will be adopted for establishing a means of ventilation. There is little diminution of the discontent felt against the Company of the Exhibition, and new grounds of complaint daily arise. Among other summary proceedings on the part of the *employés*, that of declining to give change is one. Last Sunday—the fine-weather day—two acquaintances of the writer, going to other, put down a franc; the money-taker immediately slipped it into the box and compelled them to pass on, despite their remonstrances, minus the twelve sous due to them. When, on the occasion of one of his late visits, the Emperor expressed his intention of defraying the expenses of the fête day, for the benefit of the poorer class, the Company made objections to the arrangement commencing so soon as the Emperor proposed, stating that the first of the occasions, being still in the month of May, would deprive them of the full receipt of some of their five-franc days. His Majesty immediately replied that that difficulty should be obviated, as he would indemnify them according to the measure of their most profitable day since the opening of the Exhibition. It appears that the Prince Napoleon pays the utmost attention to the complaints made by the exhibitors, and endeavours, as far as possible, to remedy the evils they represent.

On Monday took place at the Champs de Mars a magnificent review, before the King of Portugal. The troops from Versailles, St. Germain, and nearly all the garrisons within a few leagues of Paris, were assembled to take part on the occasion; and, the weather being beautiful, the affair went off brilliantly.

Horace Vernet, whom the Paris journals reported as having gone to Frohsdorff, to paint an equestrian portrait of the Duke de Bordeaux, has not yet left Paris for that purpose, in consequence of being retained as yet by his numerous works in hand. It is stated as a positive fact that the Comte de Paris has definitively given in his adhesion to the *branche aînée*.

Negotiations have been going on to arrange that the post of *première dame d'honneur* should be held by the Duchesse de G——, whose name, besides that of her late husband, was one of those most conspicuous at the Court and in the exile of Charles X.; and a place about the person of the Empress was designed for her daughter. The Duchesse has, however, declined, on the plea of her health having for some time been precarious.

Nothing can exceed the brilliant triumphs of Mdme. Ristori, the star of the *troupe* acting at the Italian Opera. From the beginning of these representations her popularity has been gradually growing; but in Alfieri's tragedy of "Mirra" it has reached its height. Mdme. Ristori is, in this chef-d'œuvre, no mere actress, nor does she resort to any of the stage-tricks or stage-aids supposed here and elsewhere to be necessary to stage-effect. She is the woman, not the tragedian; she loves and suffers; she *feels*—not feigns—remorse, horror, passion, despair, jealousy; all these work their traces on her face, whose muscles are not masked with paint and lurd; she carries the audience—breathless, palpitating—through every shade, every cadence, of growing horror, till her death sets loose their emotions in tears and cries. Rarely, indeed, has a French public manifested the enthusiasm with which this great tragedian has been received; and long will the impression she has made on it be remembered. It appears that, by *ordre supérieure*, M. de Rouvière is to be engaged at the Théâtre Français, to play in the "Hamlet" of MM. Alex. Dumas and Paul Meurice.

THE CARLIST INSURRECTION.

A telegraphic despatch from Madrid, of June 2nd, announces a signal defeat of the Aragonese Carlists on the 31st ult. Disposing his force in five columns, General Gurrea made a sort of battue of the enemy, who was stationed in some broken ground called Los Valles. A number of Carlists were killed, and the routed remnants gave themselves up in great numbers. The General expresses his conviction that the Carlist insurrection in Aragon will speedily be at an end. Three of the chiefs were taken or killed. One of these fought hand to hand with a Major of the Carabiniers and wounded him, but was himself slain. This is an important blow; the more so, at this particular moment, that it will probably act as a check upon the Carlists in other provinces, who will be less disposed to take the field now that the staunchness of the troops, the loyal feeling among the Nationals, and the little they can expect from the nation in general, has been proved by recent occurrences in Aragon.

The *Gazette* of June 2nd contains a royal order, authorising the provincial deputation of Toledo to raise, in case of necessity, bands of musketeers for the defence of the province, and to purchase 800 muskets for the National Guard.

The Government has applied to that of Portugal to send the Carlists there resident, who have approached the frontiers, into the interior of the country.

The Government has ordered the Ecclesiastical Seminary at Toledo to be closed. Within its walls, a few days ago, cries were uttered of "Viva Carlos VI."

THE WAR IN THE CRIMEA.

A telegraphic despatch from Lord Raglan announces that the bombardment of Sebastopol recommenced on Wednesday afternoon. In a day or two we shall probably hear of some result

The main interest of the news from the Crimea this week relates to the proceedings in the Sea of Azoff, where the flotilla of the Allies has gained signal successes. In the despatches from General Raglan, Admiral Lyons, and Admiral Brust, which will be found in another column, full particulars are given of the taking of Kertch. Since the date of those despatches we have only the meagre reports received by telegraph, but they are explicit enough as to the leading facts. After taking possession of Kertch and Yenikalé, the fleet proceeded to Genitchi, landed a body of seamen and marines, and, after driving the Russian force from the place, destroyed all the depôts and vessels laden with corn and supplies for the enemy. In this affair one man only was wounded. On the 26th ult., the Allied flotilla having appeared before Berdiansk, the enemy set fire to four of their steamers and to some large storehouses. On the following day the Bay of Arabat was visited, but no vessel was seen. The fleet exchanged a brisk cannonade with the forts, and one of its shells blew up a powder magazine. Altogether, the enemy has lost, in four days, an immense quantity of provisions, four war-steamers, and 240 vessels employed exclusively in provisioning the troops in the Crimea

The *Oest. Deutsche Post* of Vienna, in the following passage, takes a rather different view of our successes in the Crimea from that which Mr Cobden gives in his speech of Tuesday night:

The conquest of Kertch and of Yenikalé is perhaps more important than the occupation of Perekop would be. It was long thought, but erroneously, that the Russians received all their reinforcements by the isthmus of Perekop, and at first, during the progress of the campaign in the Crimea, that the Allies have destroyed that the Emperor Nicholas had caused bridges to be constructed over the Palus Meotis, by means of which the Russian army received the greater number of its reinforcements and its supplies of provisions. When masters of the Sea of Azoff, the Allied vessels will without difficulty be able to destroy these bridges which connect the fetid lagoons of the Gulfe Mare. The consequences of that conquest will soon be felt by the Russians. It is more particularly the cavalry concentrated in the Crimea that will be the first to suffer. Their number is estimated at 40,000, exclusively of the horses of the artillery. The quantity of forage required for so large a number of horses was drawn almost exclusively from the south eastern part of Russia. The closing of this road will soon compel the Russians to reduce the force of their cavalry, which now gives them so great an advantage over the Allies.

The whole of the correspondence between the Governors of Kertch and the military authorities, together with the archives of the place for many years, were found floating in the hurricane by a midshipman of the *Royal Albert*, and are safe in the possession of the English. From these it appears that the want of provisions was much felt in the Crimea, bread having risen to double its former price. A letter was found from the Russian Commander-in-Chief, ordering the immediate preparation of a hospital for 16,000 sick and wounded—a proof that the Russians expect not only an unhealthy season, but a bloody campaign.

Accounts from Simpheropol state that Karasu-Bazar, which lies nearly halfway between the former town and Kaffa, state that the families of the Russian employés and soldiers are abandoning Taurida, under the pretence of the dearness of provisions, but in reality from a fear that the whole of the Crimea will be conquered. Letters from St. Petersburg state that for some time past orders have been given not to send any more troops into the Crimea, in order not to cause too much difficulty in providing supplies for them, and also in order not to sacrifice there all the picked troops of the Russian army.

A despatch from General Pelissier gives some details of the brilliant victory on the 22nd and 23rd ult. On the night between the 21st and 22nd the French attacked the Russian ambuscades situated on their extreme left, in front of the Central Bastion. The Russians made an energetic defence, and the works were taken and retaken five times. On the morning of the 22nd the enemy's artillery forced the French to retire; but the night following our allies attacked the works again and carried them. The loss of the French amounted to 1500 killed and 3000 wounded; that of the Russians was estimated at 1200 killed and 6000 wounded. General Pelissier states that 1200 dead bodies were given up to the Russians during a short truce which he granted

Two days after the victory the Allies took possession of the heights of the Tchernaya, the enemy making no resistance. The occupation of these heights is an immense progress towards the complete investment of Sebastopol, which may now indeed be regarded as a doomed city. The enemy are driven to a still greater distance from the besieged place. They are reduced to act on the defensive, and if we have begun a series of offensive operations which, according to all probability, will soon end to a pitched battle.

The *Vienna Wanderer* contains an interesting article on the late proceedings in the Crimea, and the change which is likely to take place in the operations of the Allies:—

It appears evident (says the *Wanderer*) from the events which have lately occurred in the peninsula, that the conquest of Sebastopol will be no longer left to the chances of a storm, but that every strategical combination will be adopted, the better to ensure success.

As soon as the Allies have firmly established themselves in Kertch, Arabat and Tchongar, they will probably become points of operation, as both are exposed to sanguinary attacks by land and by sea. The isthmus—two or two points from each other is somewhat over four German miles (about eighteen English), while the tongue of land lying between Arabat and the southern coast does not exceed three German miles (about thirteen English) in width.

The communication between Arabat and Genitchi, the narrow tongue of land which runs up from Arabat to the north coast of the Sea of Azoff, is cut by the Putrid Sea—can easily be stopped, without the assistance of any land forces, and for this purpose a couple of ships would be amply sufficient, and it is a question why for the Black Sea fleet does not possess a sufficient number of gun-boats and light vessels to enable the Allies to advance up the Putrid Sea as far as Perekop, and cut off all connection between the Crimea and the mainland.

A great number of roads, having different directions, stretch from Kertch and Yenikalé—some leading to the south, some to Simpheropol, and Sebastopol, and some to Eupatoria and Perekop; but the most important of them all is the one which leads over Karasu Bazar, and connects Theodosia with Simpheropol. This road is the best kept, and passes through the finest districts, leaving the north of the Taurian mountains. Should the Allies be successful in passing victoriously along this road, as seems to be their plan, the Russian forces will find themselves in a very critical position, with no line of retreat open to them but that which was followed by the Allies in their first advance into the Crimea. The importance, in such a case, of the position of Eupatoria is at once evident to all.

The distance between Simpheropol and Sebastopol, with Bagtchesarai in the middle, is between eight and nine German miles (about twenty-nine English miles); and in this district, most probably, a great battle will take place, for the interest from Kertch is a sufficient proof that the Russians do not feel themselves sufficiently strong to divide the forces which are concentrated there, in order to meet an advancing foe. All these ideas are based upon the assumption that the Allies have a sufficiently strong cavalry corps, and that baggage trains and field artillery are ready at command; for, as the expedition moves further from the coast, they can no more count upon the support of the ships, and the force employed must not number less than from 30,000 to 50,000 men

DRIVING BACK THE RUSSIANS.

The advance against Tchorgun took place at daybreak on the 26th ult., and the object was secured without any loss to the Allies. The French troops, in the course of the previous morning, had struck their large tents, and substituted the small *tentes d'abri*, and soon after midnight were ordered to leave their several encampments for the purpose of forming and concentrating near to the entrance of the plain. Just before daybreak on the 26th the advanced body were within a thousand yards of the square redoubt on the side of the hill to the north of the opening, forming the valley of Tchorgun. The cavalry occupied a position on the plain, and the reserve of French and Ottoman troops stretched back as far as Balaclava.

General Canrobert commanded on the field; but General Pelissier superintended the operations from a projecting height on the right flank, near the Canrobert redoubt. The force altogether comprised about 20,000 men, and included the division of British cavalry, a Sardinian division, and about 5000 Turks. Daylight no sooner exposed the approach of the Allied force than the enemy ran in all directions. The large redoubt was attacked at the point of the bayonet, just as the first tints of morning were visible; but, contrary to all expectation, the guns had been all removed. A few detachments alone guarded the work. On pushing up the hill to a shelving plain where the enemy had cut a series of zig-zags and intrenchments, it was equally found to be abandoned. The troops which had

retired made a slight opposition from the side of a neighbouring height, but a few discharges of shells and grape caused them to fly. At the same time that this transpired on the left of the Tchernaya, other troops had advanced on the right, and gained possession of a low mamelon and ridge commanding the village itself. No opposition was offered, and a few rounds of grape and some shell were discharged into the woods above the village to complete the disorder of the troops who were escaping. The enemy kept up a very active fire from the batteries on the side of the Inkerman mountain, but the shells usually burst half way in the air, and the shot, though falling as far as the redoubt near Tchorgun, failed to do any execution. Some prisoners were taken, and also a number of horses, and some sheep and cattle. Such was the hurry in which the troops quartered in the village had escaped, that many had left portions of their dress behind, and in a few instances articles of considerable value. It is stated that part of the force quartered during the winter at Tchorgun had only been lately withdrawn to the intrenched position

First Subscription of £1 per Share, 10s. 6d., including £1 on account of Second Subscription to be paid on or before the 1st of July next. Applications for Shares, and for Prospectuses, to be made to the Secretary, at the Offices, No. 33, Parliament-street, Strand, London
CHARLES LEWIS GRUNEISEN, Secretary

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JUNE 9, 1855.

THE renewed discussions on the several War and Peace amendments before the House of Commons have occupied the principal part of the week. The speeches on the first two nights were chiefly delivered by small men; but there were exceptions, and the principal exception was Sir James Graham, who had pledged himself to vindicate his own conduct in regard to the war, and did so, in his own fashion, to a large, attentive, but contemptuous audience. In good truth the spectacle was not a pleasant one; and if any man in that House had a hostile feeling towards Sir James—whose unsparing tongue and unhesitating adroitness have made him foes in his time that man could scarcely have desired more humiliation for his enemy. To see that tall imposing figure rise, nearly in the centre of the House, and in proximity to the professedly anti-national party, Sir James's new allies—to hear all that painfully elaborate yet ineffective special pleading, and the dismal tones with which the speaker sought to infuse the feeling of discouragement which he evidently experienced, was quite triumph enough, if any one was present to whom such a triumph could be acceptable.

Sir James Graham arose for his own vindication, and, we regret to say, abundantly proved his complicity in the acts of Mr. Gladstone and the other members of the Russian party in the late Cabinet. This English Minister, too, had watched over the dignity and honour of Russia; this English statesman declared that he was at a loss to understand the objects for which the war was being carried on. He thought that Russia had offered large concessions; and he considered that we had no claim, after a fierce and bloody struggle, to look to any other object than that we had originally proposed to ourselves, and asked for in a peaceful manner—in a word, that Russia ought to be placed in no worse a position, after involving Europe in a frightful war, than she would have occupied had she bated her arrogance, and conceded the requisitions of the Allies. Such is the doctrine of the Peelites, and, unhappily, they were for many months in a situation which enabled them to act up to that doctrine, and to carry on the war in accordance with its spirit.

He drew out a sheet of paper on which he had jotted down what he conceived to be the concessions of Russia, and he compared them with her original claims. Never was a broker's catalogue drawn up in a smaller spirit, or with more pretentious putting forward of the meanest details; and there was an impatient sensation pervading the House, as it was thus trifled with. Russia, he said, had originally insisted that no other Power should interfere between her and the Porte. Now, three other nations were mixed up in the negotiations—there was a grand concession. We hardly like to write the words, it seems so improbable that the effrontery of a Russian partisan could carry him so far in an English House of Commons; but our readers, if they refer to the report, will find that Sir James Graham described this as Russia's first concession. The three nations armed, and two of them rushed into the fray, defied and defeated Russia, and dictated terms to her, and we are called upon to regard it as a concession that she listened. The next is almost more outrageous. Russia had demanded that the Turkish Ambassador should sue for peace, either at St. Petersburg or the head quarters of the invading army. Well, as Turkey did not sue for peace at all, and drove the invading army out of the invaded territories, Russia agreed to meet her at Vienna; and this is represented as another important concession for which we are to be duly grateful, and which helps to make the continuance of the war unrighteous as well as unnecessary. Then came a third; but it appears to be so akin to the second, that it looks as if the broker, in his zeal to make out a long list, had put in the same item under two heads. Russia had refused to negotiate with Turkey because the latter was not acknowledged as one of the European family, or comity. Now, the Turks having shown they they can beat their beloved brethren very soundly—as at Silistria and elsewhere Russia has no objection to recognise the relationship. Next, Russia had demanded a material guarantee, and had seized the Principalities as such; but here was a great concession—she had been beaten out of her guarantee, and therefore demanded it no longer. But the most important concession of all is to come. Russia, before the war, had fleets in the Baltic and the Euxine. Now they have been destroyed by the suicidal hand of Russia herself; and, added Sir James, "I do not think we shall ever hear any more of Russian naval strength in these waters." Never, of course. If peace were proclaimed to-morrow, Russia would not think of building a single new ship in three years' time she would not have one more than at present. Is it wonderful that the House of Commons murmured impatiently as the ex-Lord of Admiralty insulted it with such sophistry?

But Sir James had other articles in his catalogue. Bomarsund had been a "practical lesson" to Russia. It was so—and perhaps the unhappy inhabitants of the Aland islands, whom Sir James's Government left to the revenge of the Czar, can tell what effect that lesson produced when our forces were withdrawn from the Baltic. The poor Aland people, whose children have been actually transported wholesale, by way of punishment to those who supplied the Allies, will testify to the value of the "lesson." Then there was the mouth of the Danube. Sir James spoke on this with his usual want of candour, and talked of the obstructions which had arisen at the Sulina mouth. The fact is—first, that Russia cheated us in the neatest manner (and in a way which reflected the highest honour upon our vaunted diplomatic servants), when the arrangement was originally made by which she was left in charge of the Danubian outlet; and, secondly, she wilfully blocked up the Sulina mouth, partly that Odessa might benefit by the trade which ought to have ascended the river, and partly for military reasons, now evident enough. Well, we forced the passage, relieved the port, and burned the quarantine; and now Russia is ready to concede the care of the mouth of the river to a Commission, in which England is to have a voice—the voices of her guns having wrought that much conviction. And then Sir James, summing up all these marvellous concessions, proceeded to argue that any attempt at limitation of the Russian preponderance was improper. Being confronted by the awkward fact that such limitation had been proposed by himself and colleagues, he explained we beg attention to the juggle—that it was certainly proposed, but not as an ultimatum;—that is to say, Russia was at liberty to reject it, without incurring the risk of a suspension of the negotiations. In the auctioneer and broker spirit, Sir James had thrown it out, "Something for a bidding, gentlemen, say something: let us say a limitation." Only that this was to be a Dutch auction, and the demand to be lessened perpetually until it became low enough to please the Czar.

Such was the vindication of Sir James Graham! Ought not England—and, indeed, Europe—to be deeply thankful that the insincerity and petty cabals of the Peelite party made it impossible for them to continue in office, and that the war has, at all events, been rescued from the hands of those who can feel, act, and speak like Gladstone and Graham?

We have left ourselves but little space to comment upon the speech of Mr. Cobden that arch-agitator, who now condemns agitation; that prince of demagogues, who, having served his own purpose in stirring up the passions of the crowd, disparages the popular intellect which he formerly extolled, and reads lessons of Conservatism in favour of that aristocracy against which, at one time, he was delighted to hurl his denunciations. Mr. Cobden sees through coloured spectacles. All that his country does is wrong; even the capture of Kertch and the events which have so rapidly followed it—so fertile in results—in the highest degree beneficial to the cause of the Allies, he affects to treat as "a little expedition to the Sea of Azoff;" as one which will "afford no renown to our armies;" and as little better "than our marauding expedition last year to the Gulf of Finland." Mr. Cobden, however, seems to have parted company, to some extent, with his friend Mr. Bright. The Damon and Pythias of Peace-at-all-price have a point of difference between them. Mr. Bright would not fight under any circumstances, unless human nature should at extremity get the better of his religious doctrine; but Mr. Cobden has informed the world that, if the Russians were besieging Portsmouth, he would cease talking and set to work, and that, if he could not take his place in the field, he would work for his country in the hospital. The people of England would rather fight Russia in the Crimea than at Portsmouth, and that is a difference between Mr. Cobden and his countrymen which is not at all to the credit of Mr. Cobden's sagacity. To judge from the peroration of his elaborate and amusing speech, he will not support a war against 60,000,000 of people at a distance of 3000 miles; but he would aid the war against the same number of people if it were waged at seventy miles from London. Luckily we are all not Cobdens. If we were, we should incur a very serious risk of soon becoming Russians.

A FRIEND of the Maine Liquor Law, who signs with the name *tant soit peu* inappropriate—of "Malthouse," forwards us some statistics, to prove that the operation of the Sunday Beer Bill has been to diminish sensibly the number of persons brought before the magistrates of the six large towns of Liverpool, Leeds, Bolton, Sheffield, Paisley, and Leicester. The figures may be as our Correspondent puts them; but they do not support his proposition that the *only* way to put a stop to drunkenness unfortunately the national vice in the British islands is to put difficulties in the way of the poor man's obtaining liquor.

Mr. Malthouse says—and we quote his sentiments at full length, that he may have the benefit of all the publicity we can give him:—

> The great source of crime, poverty, vice, and profligacy is intoxicating drink. It is our gaols, our workhouses, our lunatic asylums. A Sunday Beer Bill, by prohibiting the sale on certain hours does much vice and crime. A bill, closing public-houses at ten on Saturday night till Sunday, would do still more good; and a law prohibiting the traffic entirely, or a Maine Liquor Law, would accomplish in England, same as in Maine—make the gaol to let! Pauperism, crime, rags, and poverty would become *rara avis in terris*. The money now spent in liquor would be thrown into the channel of trade. The man who spent all his earnings at the Cat and Fiddle would buy good food for himself and family, good shoes, hats, coats, &c., &c.; give his little boys and girls a good education, and fit them to take their place in society as men, and not things: it would in a create a demand that would double the number of workmen now in England could not supply; and we should have to send to America and to Australia and bring back again the sons and daughters of Old England who had been driven to a foreign land to earn a living which they could not have for them in England. This temperance reformation is no Utopian dream, but a reality

Our Correspondent, like many other well-meaning men who agree with him, may be right in his objects, without being right in the methods by which he would obtain them. The ease by which alcoholic liquors may be obtained, and their cheapness, are not found all over the world to act as incentives to drunkenness. In France, in Germany, and in Italy there is no license required for the sale of wine, beer, or spirits. Any person may sell them—grocers, bakers, barbers—whoever pleases to add that traffic to any other, or to devote himself entirely to it. Neither are there restrictions upon the days or hours at which he may vend his commodities. Every day till midnight he may keep his shop open; Sundays are no exception; and the Continental Governments would as soon think of putting a restriction on the use of water as on that of wine. And yet there is no drunkenness. Frenchmen, Italians, Spaniards, and Hungarians are all as notoriously sober as Englishmen, Scotchmen, and Irishmen, of a certain class, are notoriously the reverse. It follows, therefore, that there must be some other reason for undue indulgence in stimulating drinks than the mere facility of obtaining them. The English man finds it difficult to get drink, and he becomes drunk. while the Frenchman, who has no legal or legislative difficulty in procuring any alcoholic beverage that he pleases—either on Sunday, or Monday, or any other day—does not, as a rule, indulge to excess. He uses wine as a friend; while he sometimes in this country "puts an enemy into their mouths to steal away their brains." The advocates of a Maine Liquor Law should explain this before they advocate a policy of repression. Suppose a league were to be got up to endeavour to prohibit the use of cold water as a beverage, what would the ultra Teetotallers say of the abominable tyranny of any majority that should succeed in it? They may depend upon it, if we cannot eradicate drunkenness by education and improvement of the moral tone of society, we shall never eradicate it by law. These men should have more faith in the principle of freedom, and all the more because their repression, if successful at all, would be one-sided; and would operate as a penalty against the poor, and leave the rich unscathed to do exactly as they pleased. The tectotal Earl of Harrington may find beef or mutton necessary to his existence; and a ploughman or blacksmith may find beer essential to his health, and strength, and constitution: but suppose the blacksmith—smitten with a crotchet—should find out that beef was not good for the Earl;—that mutton might do him mischief;—and that his Lordship ought to live well on bread and onions? Would the Earl tolerate the interference? We rather think not. These worthy people make a mistake. The Maine Liquor Law is unsuited to this climate; and interference with the freedom of the poor has already been carried somewhat too far. Free-trade in light wholesome French wines would do more to diminish drunkenness than all the attempts to shut up public-houses which have ever yet been made in this country.

MEMORIAL OF THE LATE PROFESSOR EDWARD FORBES.—A subscription has been opened for erecting a monumental tablet at St. George's Church, Isle of Man, and a scholarship in the Douglas Grammar School (open to the whole island), in memory of Professor Edward Forbes.

LETTERS from Constantinople by the last mail speak of the Sultan having it in contemplation to visit France about the middle of August.

LORD STRATFORD DE REDCLIFFE gave a grand dinner on the Queen's birthday. "He made a speech (says a French letter) very warlike against Russia, and highly eulogised the Emperor of the French, and not a little Louis Napoleon."

THE office of Counsel to the Admiralty, vacated by Mr. Phinn's appointment as Second Secretary to the board, will be filled by Mr. Atherton, Q.C.

THE COURT.

The Court has remained in London during the past week, and the Royal race meeting at Ascot, for the first time for several years, has wanted the eclat invariably attending her Majesty's presence.

On Saturday his Royal Highness Prince Albert went to Sydenham, to inspect the Floricultural Show at the Crystal Palace. The Queen and the Prince took a drive in the afternoon; and in the evening her Majesty honoured the Royal Italian Opera with her presence. The Prince Consort presided, on the same evening, at the annual dinner of the officers of the Grenadier Guards, at Grillion's Hotel, and afterwards joined her Majesty at the Opera.

On Sunday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, the Princess of Hohenlohe-Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe, attended Divine service in the private chapel of the Palace. The Hon. and Very Rev. the Dean of Windsor officiated, and administered the holy communion.

On Monday Prince Albert, accompanied by the Prince of Wales and Prince Alfred, went to Eton for the purpose of hearing the speeches of the Eton scholars. On the return of the Prince to London her Majesty and his Royal Highness visited the Duchess of Gloucester at Gloucester-house. In the evening the Queen had a dinner party, the company at which included the Duchess of Kent, the Princess of Hohenlohe-Langenburg and the Princess Adelaide of Hohenlohe, Count Persigny (the French Ambassador), the Duke and Duchess of Atholl, the Marquis of Ely, Earl Spencer, the Earl and Countess of Clarendon, Viscount Torrington, Viscount and Viscountess Folkestone, the Right Hon. Sir Richard Lkenham, and Major-General Sir Frederic Smith.

On Tuesday the Queen and Prince Albert went to Gore-house, Kensington-gore, to inspect the Exhibition of Works of Ornamental Art. Lord Stanley of Alderley, President of the Board of Trade, was in attendance. Her Majesty and his Royal Highness drove out during the afternoon, and in the evening honoured the Princess' Theatre with their presence.

On Wednesday the Queen held a Privy Council at Buckingham Palace. The Earl of Clarendon, Lord Panmure, Viscount Palmerston, and the Earl Granville, had audiences of the Queen. In the afternoon her Majesty, accompanied by the Princess of Hohenlohe-Langenburg and the Princess Adelaide, took a drive in an open landau, the Prince Consort attending on horseback. In the evening the Queen had a dinner party, the company at which included the Duchess of Kent, the Hereditary Grand Duchess of Mecklenburg-Strelitz, and the Duke of Cambridge; the Princess of Hohenlohe-Langenburg and the Princess Adelaide of Hohenlohe; the Marquis and Marchioness of Abercorn, the Marquis and Marchioness of Headfort, the Earl of Howth, the Earl and Countess of Durham, Lord John Russell, Lord Panmure, and Lieut.-Colonel Berkeley (Scots Fusilier Guards).

On Thursday the Queen and her illustrious guests took a carriage airing during the afternoon.

The Duchess of Wellington has succeeded the Marchioness of Ely as the Lady in Waiting to her Majesty. Lord De Tabley and Sir Frederic Stovin have relieved Lord Waterpark and Mr. F. Cavendish in their duties as the Lord and Groom in Waiting to the Queen. Major-General the Hon. Charles Grey has relieved Major General Buckley in his duties as the Equerry in Waiting to the Queen, and Captain the Hon. Dudley De Ros has relieved Captain Du Plat as Equerry in Waiting to Prince Albert.

Her Royal Highness the Duchess of Gloucester took a carriage airing on Wednesday, and paid visits to the members of the Royal family, at their respective residences.

The Prince and Princess Doria Pamphili have arrived at Thomas's Hotel, Berkeley square, where they intend remaining some weeks.

The Countess of De by gave a grand ball on Wednesday evening, the company being invited to meet the Duchess of Cambridge and the Princess Mary.

ROYAL VISIT TO PARIS. The approaching visit of the Queen of England to their city begins now to form a topic of interest in the gossip of the Parisians, and, indeed, at all the towns along the line of route. Preparations for the reception of her Majesty and the Prince Consort have been already commenced at Boulogne, where they are to occupy an extensive suite of apartments at the Hotel Brighton—at which establishment it will be recollected Prince Albert stayed during his visit to Boulogne last year, as did also the King of the Belgians and the King of Portugal. The apartments destined for the especial accommodation of her Majesty are at present in process of redecoration, for it is said the Queen will stay at Boulogne a day or two, and be present at a grand review of the Army of the North. The Emperor will of course come from Paris to receive her Majesty. There are to be very gay doings, and most of the houses adjacent to the hotel are already let to families of distinction.—*Letter from Boulogne.*

DURING Prince Albert's visit to the Flower Show a very spirited photographic likeness of him was taken in three seconds by Mr. Negretti, the artist who has succeeded to the office held in the Palace by Mr. Delamotte. His Royal Highness, who seemed much pleased with the production, took it away with him.

REORGANISATION OF THE MILITARY DEPARTMENTS.—The following are some of the arrangements already completed:—Mr. Thomas Hovell has been appointed Director-General of Contracts; Mr. John Robert Godley, late Private Secretary to the Lord-Lieutenant of Ireland, now one of the Income-tax Commissioners, will be Director-General of Stores. No appointment has yet been made to the office of Director-General of Army Clothing, as Mr. George Du Bois has been appointed Inspector-General of this department. Sir John Burgoyne will retain his office of Inspector-General of Fortifications; and Mr. Monsell remains Clerk of the Ordnance.

THE PRESS AT GIBRALTAR.—According to a new ordinance, no printer will be able to print any publication not previously examined and licensed by the Governor's Secretary, under a penalty of 100 dollars, to be levied by distress and sale of his goods and chattels, if not instantly paid.

EXTRAORDINARY MOUNTAIN ASCENTS.—One day last week two married ladies from the neighbourhood of Windermere, accompanied by a gentleman from Keswick, commenced a tour from the latter place at two o'clock a.m., and by dint a strong moth-and wind, attained the summit of Saddleback to witness the rising of the sun. Here snow was observed six feet deep. After taking a little refreshment, they descended on the east side, past Sadday Hause, through Inverse; thence into the Earl of Lonsdale's liberties, as far forward to Peckerigg. Thence they ascended to the summit of Saddleback, and down Scales Fell to Scales. There they rested about four hours, and then proceeded to High-row; afterwards to Brundholm Wood, passed Greta Bank, and back to Keswick.

DUTY ON STAGE-COACHES.—A deputation of the metropolitan and provincial stage-coach proprietors waited on the Chancellor of the Exchequer, at his official residence, Downing-street, on Tuesday, relative to a modification of the 3-lege Duty at present levied on stage-coaches. The deputation was introduced by General Wyndham, M.P., and was supported by the presence of Lord R Grosvenor, M.P., and several other members of the House of Commons. Mr. Bradfield, secretary to the committee of the Stage-Carriage Association, in explaining to the right hon. gentleman the objects of the deputation, stated that, considering the present state of the revenue, a reduction of the duty one-third would be satisfactory. Mr. Williams, M.P., stated that, both in Scotland and in the district of the Regent's-park, the public were greatly inconvenienced by the withdrawal of the omnibuses. Lord Robert Grosvenor confirmed all that had been stated in reference to the hardship of the trade, as did Mr. Alcock, M.P. The Chancellor of the Exchequer, in reply, stated that he had taken a note of the prayer of the deputation, and of the grounds on which they urged it; but could not at present give them any definite answer upon the subject.

A FRENCH SWINDLER.—At Lambeth police-office, on Wednesday, Manoel Peter Chrisman, *alias* Edward Redmesant, *alias* Ressar, with a hundred other *aliases*, was brought up from Horsemonger-lane prison, and placed at the bar before Mr. Elliott, on preferring seventy charges of unpaid debts and robbery. On taking his place at the bar the prisoner—who was fashionably dressed, and who is a remarkably showy and good-looking young man—folded his arms, and with the most perfect effrontery leered at his victims, who at the time completely crowded the court; and it was remarked by many that a more impudent rogue, not even the renowned Captain Johnson—who had swindled the poor old lady Mrs. Stewart, out of several thousand pounds worth of property, on a promise of marrying her—never stood in that position. When told by the magistrate that there were reasons to believe that he had not given his right name, and asked to give his correct name, his reply was—"If they have got my real name what is the necessity of asking me for it?" Some person in the body of the court here made a remark in an under tone of voice which was audible at his entrance, upon which the prisoner, turning to him, said, "Hold your tongue!" The prisoner here passed the fingers of both hands through his ample crop of jet black hair, and curled it in the most perfect style. The charges against the prisoner were very numerous:—From Miss Oliver's, St. John's-wood, he had taken plate and a writing-desk. He had his addresses to Miss Rosa Griffiths, and made her a present of the writing-desk. From Mrs. Langdon, Camberwell, he stole a bottle, a Church of England Service, a piece of crochet work, and seven valuable books. From Mr. Weir's, Camberwell, he stole some wearing apparel, and left, as he did elsewhere, a trunk full of firewood. From Mr. Vigors', Pimlico, he took, while staying there for half an hour, a gold watch, chain, seal, two gold bracelets, two gold rings, and various other articles—amounting to £18, leaving the usual box of firewood. To the house of Mrs. Laurence, a widow lady at Camberwell, he "brought" a Church Service and Bible, and took away from it an eight-day skeleton clock. Several other charges were also brought forward, but the evidence being incomplete he was remanded.

A Parliamentary Return shows that there are at present twenty private reformatory schools in England and Scotland, certified by Government, and capable of containing about 1600 children.

PROFESSOR SCHLAFHAUBE, OF THE UNIVERSITY OF * * * *

A SKETCH FROM THE LIFE.

LARELY runs the tide of human life—
There is no effort in our German land—
Of what avail are ceaseless moil and strife?
Is there not Time? Why move, if we can stand?
There is no object the wide world can show,
Worth English hurry, sweat, and sore distress;
Let the moons wane and wax, and come and go—
And let us Germans doze in happiness.

Why should we turn and spin in frantic haste
When we have seventy years to live and dream?
Through cloud and vapour speed is perilous waste:
Anchor the ship, there's fog upon the stream;
And let us sit and smoke the live-long day,
With deep-drawn whiffs, and drink the fattening beer;
Gazing on earth, or on the wreathlets grey
That curl above the pipes we love so dear.

Pipes! blessed pipes! There were no good on earth
Without tobacco. Give us that, and peace;
A little sunshine, and the children's mirth.
We ask no more! And if our wealth increase
Like growing corn, why let it! We are glad!
But trouble us, oh men of other climes,
No more with whistling steams, and efforts mad,
That make us languish for the ancient times.

Perish the Sultan! What is he to us?
Let Russia flourish! Why should we complain?
Are we th' avengers? Work thy pleasure, Russ!
And let us smoke and sleep—and smoke again!
Firm as a rock let Germany endure;
Not like a rocket, blazing from the west;
Japan in Europe slow, but very sure.
Oh give us pipes and peace, and let us rest! C. M.

Dresden, April, 1855.

FINE ARTS.

EXHIBITION OF THE WORKS OF J. J. CHALON, R.A. A collection of pictures, drawings, sketches, &c., by the late J. J. Chalon, R.A., with the addition of a selection from the works of A. E. Chalon, R.A., has just been opened at the rooms of the Society for the Encouragement of Arts, &c., in the Adelphi. On former occasions the Committee of this Society have devoted the use of their rooms to the display of the collected works of individual artists—Etty and Mulready to wit; and the exhibitions thus produced have been viewed with great interest by the public. Chalon, though a man of considerable ability in his way, was not an artist of the class of either Mulready or Etty; and the present collection, though curious in some respects, is not of that importance which justly attached to the works of those eminent artists viewed as contributions to the British school. The selections from the works of A. E. Chalon, however, in a different and more attractive style, help to fill up what would otherwise be a meagre display, and, taken as a whole, this collection of some 100 pieces will not be viewed without instructive results. J. J. Chalon was a very industrious artist, and was constantly producing something—landscapes, sketches of society, scenes from romances and plays, and portraits, with new and then an attempt in the higher walks of art; but he appears towards the end of his career to have painted with less carefulness and finish than in earlier periods: and some of the productions resulting are so crude that it would have been better for his fame to have left them in the studio, or in the private collections to which they belonged, than to have brought them out for re-exhibition in association with other works which are really meritoriously executed. Amongst the latter things in this collection we may mention: "Macbeth and Banquo's first sight of the Weird Sisters," apparently an early work, and one of some ambition, in which breathes something of the wild savageness of Salvator; "A View from Richmond-hill—Autumn," sunny, and richly coloured; "The Severn, from Clifton," and "Great Marlow, from a Gravel Pit"—capital landscapes, genuine in material and colouring, and happily free from affectation. "Paris in 1815," "The Serpentine during the hard Winter of 1823,' and other group-pictures of this class, are chiefly curious as examples of bygone costume. Amongst the works of A. E. Chalon we particularly notice, as good of their kind, a highly-finished Portrait of the late Princess Charlotte, the property of her Majesty; and "An Imaginary Marriage of Two Living Dwarfs," a composition of portraits, painted for the late Marquis of Lansdowne, and now the property of Miss Giffard. The large picture of the Christ "And Herod and his men of war set him at nought and mocked him, and arrayed him in a gorgeous robe"—is ambitious in treatment, and has merit in points. But there is a weakness in the principal figure which deprives the work of the importance the subject is entitled to.

M. MONTI'S SECOND LECTURE ON SCULPTURE.—M. Monti delivered his second lecture on ANCIENT and MODERN Sculpture on Wednesday evening, at his atelier in Great Marlborough street. Having previously disposed of Egyptian and Assyrian sculpture, he now came to Indian sculpture; which was remarkable for the display of a rich fancy, and a wide and varied application of natural objects, to the elucidation of allegory. This portion of the discourse was rather mythological than purely artistic; and comprised explanations of the various Indian deities, and their attributes; beginning with the four-faced Brahma, and his spouse, ornamented with the lotus. Several diagrams of effective groups from Ellora, and other places, were then produced. After which M. Monti exhibited a curious bas-relief of Indian sculpture, which he ascribed to about the fifth century, before the Christian era (and therefore about contemporary with the Parthenon), and which showed that at this early period Indian art had arrived at a very high rank. Then came, in rapid succession, specimens from Java, Burmah, China (in clay), Mexico, and Peru (in clay), which closed the review of Indian sculpture. The sculpture of the Pelasgic families, whether settling in Greece, or various parts of the Mediterranean, and which preceded and led to the great achievements of pure Greek art, were then considered; the illustrations being taken from remains at Naples, Herculaneum, the temples of Ægina, &c. M. Monti appears to have studied the history of his subject with great care and fulness; and the style in which he treats it is lucid and attractive.

THE Lord Advocate of Scotland has been for some time engaged in preparing for the press a memoir of the late Lord Cockburn, with anecdotes and sketches of the distinguished contemporaries of the deceased judge, especially those with whom he maintained an intimate correspondence. This work is already spoken of as likely to prove not at all inferior, as the interest of its lively and varied materials, to the life of Lord Jeffrey, by Lord Cockburn himself.

A DEPUTATION from the printers of Paris waited last week on Prince Napoleon, and obtained permission that, during the period of the Exhibition, notices, advertisements, prospectuses, catalogues, plans, guides, and other printed papers connected with the exhibitors, and to be distributed in the interior of the Exhibition Palace, may be printed on unstamped paper.

IMPORTANT COPYRIGHT CASE.—SWEET AND OTHERS *v.* BENNING. This action, which, in the form of a special case, was argued on Tuesday and Wednesday last, in the Court of Common Pleas, by Mr. Lush for the plaintiffs, and by Mr. Bull, Q.C., and Mr. Peter Baker, for the defendant, involves a very serious question as to what is really the kind of copyright that now exists in articles in newspapers and periodicals, and how that copyright may be protected. The Court has reserved its judgment.

ONE of the Aides-de-Camp of General Pelissier is Prince Polignac, son of the Minister of Charles X.

DOVER SAILORS' HOME.—The foundation-stone of an appropriate building destined as an asylum for sailors was laid at Dover on Wednesday, by the Right Hon. F. Bouverie, M.P.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

MR. RUSKIN has just put forth a sixpenny pamphlet of "Notes" on some (to him) of the principal pictures exhibited in the rooms of the Royal Academy. He is bitterly critical. The Academicians obtain an undue share of his abuse. The best picture in the Exhibition is, in his eyes, Mr. Millais' "Rescue," in which, perhaps, many will be found to agree; and the next best Mr. Cope's "Royal Prisoner," in which he surely must stand alone. After these he apparently places Mr. Lewis's "Armenian Lady." He pooh-poohs the President; condemns Maclise; thinks very little of Stanfield, still less of Roberts; sees no nature in Creswick—very much that is not praiseworthy in Boxall; most commonplace Wilkieism in Mr. Faed; and an utter absence of poetic feeling in Herbert. His admiration is confined to a flower piece by Miss Mutrie, to a moorland scene by Mr. Inchbold, and to some other smaller transcripts of rural and every-day nature by comparatively unknown men. He does not condescend to notice Mr. Hart; but sees a future of good in Mr. Leighton. "It seems to me probable," he says, "that Mr. Leighton has greatness in him, but there is no absolute proof of it in this picture; and if he does not in succeeding years paint far better, he will soon lose his power of painting so well." Mr. Ruskin is to continue his remarks from year to year, so that he is likely to have every brush, and perhaps every maulstick held up against him. He is to do with his name to it what Dennis did in literature in the same way a century and a half ago. This dreaded satirist has much good sense, as indeed Dennis had, and he has all the asperity of that "tremendous" critic. We can fancy him before a picture, much like Dennis with a new tragedy or epic before him:

> And stares tremendous with a threatening eye,
> Like some fierce giant in old tapestry.

He is likely to become as great a terror to painters as Churchill certainly was to players.

Lord Strangford's death has created a second vacancy in the list of the Vice-Presidents of the Society of Antiquaries. His Lordship's successor is not yet even named. Mr. Hawkins, of the British Museum—eminently distinguished for his knowledge of English coins and English caricatures—succeeded the late Sir Robert Inglis, as we announced some time back that he was likely to do.

The removal of Lord Strangford from among the living, reminds us that the last literary exertions of his Lordship were directed to the discovery of materials for the life of an ancestor of his, well known to all the readers of English history, poetry, and painting, of the reign of Charles I. We allude to Endymion Porter, of whom too little has been preserved. He was a fine cavalier with a love of all that is beautiful and noble. We have had the pleasure of conversing with Lord Strangford on the subject of Endymion's life, and know that his materials deserve publication; but in what state of forwardness the biography was left we have yet to learn.

A contemporary, whose weekly gossip has of late been more than usually uninteresting, has thought fit to correct that passage of our column of Talk, in which we announced that a monument was about to be erected, by private subscription, over the grave of Mr. Lockhart. Our contemporary adds nothing of moment to our intelligence, while he does not tell all that we told. In one passage we can correct our contemporary, while correcting ourselves. Who is the Right Hon. Sir Henry Ellis, said to be so active in promoting the subscription for the monument? No doubt, Sir Henry Ellis, the Principal Librarian of the British Museum, whose distinctions should be well known to every literary man; but who is not a Privy Councillor, and therefore not a Right Honourable.

An author of note, recently appointed Chancellor of the Exchequer, and therefore by virtue of his office "The Right Honourable," has just been evincing the interest he continues to take in literature and education generally. The new Treasury Minute on the cheaper transmission of books by post bears evident proof of Sir George Lewis's pen. The *present* rate of postage for books is sixpence per pound, or fraction of a pound; and for Parliamentary books and papers *one* penny per quarter of a pound. On and after the 10th inst., by the new Treasury warrant of regulation, all works of Literature or Art, and all maps on canvas or paper, will be charged at the same rate as Parliamentary papers are charged at present—viz, one penny for four ounces, or fraction thereof, up to a pound; and then twopence for each additional half-pound, or fraction thereof. When the postage amounts to fourpence, the book sent may be printed, written, or plain. Of course, certain necessary and easy conditions are attached. The postage must be prepaid, and not in money, but in stamps, a fixed to the book or map transmitted. Nor is this all. The packets must be open at each end, and must not contain any written letter, or communication in the nature of a letter. The size (an important consideration) is limited in length, width, and depth, to two feet. Of the working of this, we will give a few instances. On and after the 10th of the present month John Doe or John Roe (when so inclined) may send from the Land's End to John o' Groat's the following books at the following fair and reasonable charges:—"Kelly's" Post office Directory," 2s. 4d.; Murray's "British Classics" (a thick octavo), 8d.; "The Clergy List," 10d.; "The Law List," 6d.; Bell's "Annotated British Poets," 3d., "The Army List," 2d; "The Navy List," 2d.; "Bradshaw," 2d.; the "A B C Guide," 1d.

Death has removed from among us that ministering angel which stood sixty years since by the death bed of Robert Burns, and in honour of whom his last and almost his best song was written. We allude to Jessy Lewars, for such was sixty years since her maiden name, of whom Burns sung so deliciously:

> Thou art sweet as the smile when fond lovers meet,
> And soft as their parting tear—Jessy.

We remember to have seen her—not in her prime, but when she still retained that soft agreeable voice and winning eye, which won from a true poet a deathless name. For a however Jessy Lewars is sure of Petrarch's Laura or Waller's Sacharissa, and certainly surer than "Granville's Myra," unless Pope's allusion may preserve that otherwise perishable name.

Greenwich is not remarkable for retaining any of its old houses, and now the last has gone. Eastward of the Crown and Sceptre, and still facing the river, antiquaries have certainly seen and lovers of whitebait might have seen, had they chosen—a capital example of an old house of the reign of Charles I., when domestic architecture was struggling between the Elizabethan building and the style imported by Inigo Jones. It was called Crowley house, after Sir Ambrose Crowley, for whom it was built has long been in a tumble-down condition, and is now no more. We missed it the other day, and found others who missed it. It smacked of Greenwich and "The Fortunes of Nigel."

The Special or Charter Committee of the Royal Literary Fund have made their report; and the counsel consulted (Mr. Sergeant Merewether) has given his opinion that the proposals of the committee cannot be carried out by the present corporation, by the present charter, or by-laws made under it. The recommendations of the committee are much to the point. The principal ones are these:—1. "That henceforth the administrative body of the society should have the power of granting revocable annuities to distressed men of letters and scientific writers, to the extent of a certain limited proportion of the income derivable from the society's real property or vested funds;" and, 2. "That henceforth the same administrative body shall have the power of granting relief by way of loan." These and other recommendations have been made in the wise and manly belief that a Literary Fund Society possessed of realised property to the amount of (in round numbers) thirty thousand pounds; possessed of a landed estate yielding two hundred pounds per annum; and further supported by Royal patronage, and by annual donations and subscriptions from the public, should endeavour to conform itself to the spirit and requirements of the time. In this belief, a special general meeting of the members of the corporation has been summoned to meet at Willis's-rooms on Saturday, the 16th of June, at two o'clock.

THE PALACE OF INDUSTRY, OR FREN

EXHIBITION BUILDING, AT PARIS.—(SEE PAGE 583.)

DESPATCHES FROM LORD RAGLAN.

War Department, June 5, 1855.

Lord Panmure has received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B :—

Before Sebastopol, May 22, 1855.

My Lord—Adverting to my despatch, No. 251, of the 14th April, I do myself the honour to lay before your Lordship the copy of a letter which I have received from Rear-Admiral Sir Edmund Lyons, with its enclosure from Commander Prest of the *Hannibal*, bearing testimony to the exertions and valuable services of Captain Gell, of the East India Company's Service, Acting Quartermaster-General, in conducting the 10th Hussars and 12th Lancers through Egypt, and in superintending the embarkation of those regiments at Alexandria. I have, &c., RAGLAN.

To Lord Panmure, &c., &c., &c.

Royal Albert, off Sebastopol, May 10, 1855

My Lord—I have the honour to enclose for your Excellency's information copy of a letter from Commander Prest, of the *Hannibal*, calling my attention to the praiseworthy exertions of Captain Gell, of the Honourable East India Company's Service; and as her Majesty's Consul at Alexandria, and Colonel Peile, of the 12th Lancers, both bear testimony to this officer's valuable services, I shall feel greatly obliged if your Excellency will have the goodness to bring his conduct under favourable consideration in the proper quarter. I have, &c.,

R. LYONS, Rear-Admiral and Commander-in-Chief.

His Excellency Field Marshal Lord Raglan, G.C.B., &c., &c.

Her Majesty's steam-vessel *Hannibal*, Kamiesh, May 7, 1855.

Sir,—I trust that you will not think me presuming if I endeavour to place before you some of the merits of Captain Gell, Hon. East India Company, the Deputy Assistant-Quartermaster General, conducting the transit of the 10th and 12th Regiments of cavalry through Egypt, and superintending their embarkation.

Colonel Peile and Parthy are more capable than I can be of bearing testimony to his services, but I beg to add my witness to the zeal, great energy, and consummate tact by which he obtained a maximum of work from a people notoriously inert, and thus made my portion of the embarkation very simple, that no casualty of any kind has occurred in getting from the shore into positions and although the several ships more than 1000 horses, is attributable to his foresight and prudence. I respectfully submit that it may prove advantageous to the service if his exertions be brought to the notice of Lord Raglan.

I have, &c., BEN. P. PREST, Commander.

Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief.

CRIMEAN ARMY FUND

Before Sebastopol, May 22, 1855.

My Lord,—I have the honour to lay before your Lordship the copy of a letter which I received a short time ago from the Hon. Algernon Egerton and Mr. Thomas Tower, who succeeded Mr. Jervoise Smith and Mr. Gwyn in the duty of distributing all that was sent out by the Crimean Fund for the use of the British Army.

I cannot speak too highly of the exertions of all these gentlemen. Their courtesy, their kindness of heart, and their unceasing desire to gratify the wishes of all, are above all I can say in their favour, and they carry with them the grateful acknowledgments of every officer and man, who are equally anxious with myself to bear the ample testimony to the manner in which they have fulfilled their onerous task, despite of fatigue, weather, and every possible inconvenience. I have, &c., RAGLAN

The Lord Panmure, &c., &c.

Crimean Army Fund Agency, Kadikoi, May 8, 1855.

My Lord,—We have the honour to report to your Lordship that the operations of the Crimean Army Fund, of which we are the honorary representatives in the Crimea, have now closed.

In announcing this officially to your Lordship, we beg to express the hope that our endeavours to carry out the thoughtful and generous intentions of that association towards our noble and gallant countrymen in the Crimea have in some slight degree promoted the public service, and have not interfered in any respect prejudicially to the organisation of an army which we so love and admire.

We cannot conclude our mission without thanking your Lordship, the Quartermaster-General, and the authorities for the kind countenance and support which we have received from the very commencement to the termination of our difficult but most grateful task.

Your Lordship will allow us to speak most highly of the quartermasters of regiments with whom we have been thrown in such frequent contact.

We have, &c., (Signed) ALGERNON EGERTON.
THOMAS TOWER.

To Field-Marshal Lord Raglan, G.C.B., Commander-in-Chief.

War Department, June 6, 1855.

Lord Panmure has this day received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B. :

Before Sebastopol, May 20, 1855.

My Lord,—I have the honour to report to your Lordship that a portion of the Allied armies took up a position yesterday on the east of the Tchernaya, the left of the French resting under the wooded heights on the edge of the ridge overhanging the valley, and opposite the Inkerman heights; the right extending beyond Tractir; and the ground more to the right, beyond Chorgoun, being occupied by the Sardinian troops, aided in their advance by the 10th Hussars and the 11th Lancers and the Horse Artillery, under Colonel Parlby.

Omer Pacha at the same time moved forward to the low heights in front of Baraclava and thus effected support to the French divisions before him. These were commanded by General Canrobert, who pushed forward across the bridge of Tractir, and drove the enemy, who were not in great numbers, offand leaving cleared his front, he withdrew to this side of the river, where he now remains.

Sir Colin Campbell advanced the Royal Marines from the high ridge on our extreme right to a point commanding the old Baidar road, and Colonel Parlby, with the regiments I have mentioned, reconnoitred the country on the immediate right of General Canrobert's position, and patrolled along the Woronzow road, in the direction of Baidar.

The appearance and bearing of the Sardinian troops are highly satisfactory, and I anticipate the greatest advantage from their addition to the army under their distinguished leader, General La Marmora, whose zeal for the service and ardent desire to co-operate with us, I am happy to have so early an opportunity of acknowledging and recording. Nothing of importance has occurred in the British trenches since I wrote to your Lordship on the 19th inst.

The 47th of General Egerton, of the 7th, and the 34th of the 19th ultimo, [illegible] reported by Lieutenant-General Sir George Brown, the receipt of the report of the conduct of the officers, non-commissioned officers, and men of the Light Division, who were engaged in the attack on the Quarries on the 7th inst. I am glad to be able to say that the number of casualties in that affair was not so great as I had reason to apprehend it would be from the position in which the troops were placed.

I have, &c., RAGLAN.

RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM THE 18TH TO THE 24TH MAY, INCLUSIVE.

Sergeant 20th Foot: James Flaherty
Privates—1st Foot: William Mead; 47th: Thomas Murphy. 57th: John Moran, John Jukes, Charles Howe. 68th: William Hardyman. Royal Sappers and Miners: Neil Campbell, Richard Wales
Total 9 killed

RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES WOUNDED FROM THE 18TH TO THE 24TH MAY INCLUSIVE.

Lieutenant—7th: Lieut. R. Williams severely
Lieut.-Colonel—1st: Lieut. Michael Seymour, dangerously.
Captains—47th: William M'Connell, severely. 57th: James Barnes, severely
Lieut. Corporal—38th: Wm. Hudson, slightly.
Second Corporal—Royal Sappers and Miners: William Swan, severely
Drummer—1st: James M'Laughlerty
Privates—1st: Henry Bromley, John M'Donald, Peter Scales, severely. George Davidson, James Stewart, Thomas M'Donald, severely. 7th: Martin Cassidy, Cornelius Brown, severely: John Pounds, Peter Jackson, severely. 20th: Robert Thompson, severely. 47th: Edward Hughes, slightly. 57th: John Hare, James Kennedy, dangerously; Patrick M'Mahon, severely. 68th: William Clarke, severely. 57th: James Lees, William Reid, Timothy Sheehan, severely; William Bligh, slightly. 88th: Matthew Kane, severely. 8th: John Murphy, slightly. 20th: James Fields, severely. 7th: Thomas Hennessy, slightly. 88th: James Wilson, severely. Royal Sappers and Miners: George Wood, severely; Alexander Mills, slightly. Royal Sappers and Miners: George Wood severely; John C. Weeks, slightly. Royal Sappers and Miners: George Wood severely.
Total 4 killed, 34 wounded

RETURN OF CASUALTIES IN THE ROYAL NAVAL BRIGADE, BEFORE SEBASTOPOL, FROM THE 18TH TO THE 20TH MAY.

KILLED.—Frank Ivey, ordinary seaman, Queen, slightly.
WOUNDED.—Midshipman Orde, Queen, slightly; Thomas Smith, A.B., Queen, slightly; John Arnold, L.S., Leander, slightly; John Smith, A.B., Leander, severely.
Total—1 killed, 4 wounded.

Before Sebastopol, May 26, 1855.

My Lord,—I have the honour to enclose the fortnight confidential reports of the Generals of Division and Brigade to the 20th inst.

I have likewise to transmit, for your Lordship's information, a letter from the Inspector-General of Hospitals, showing the extent of the cholera to the latest period.

I earnestly hope that the disease is not gaining ground

The Lord Panmure, &c. I have, &c., RAGLAN.

Before Sebastopol, May 24, 1855.

My Lord,—I have the honour to enclose a return of the daily [illegible] of cholera in the army in the Crimea, from 10th to 20th May, inclusive.

Your Lordship will notice by the return that the disease has moderated in its force, and that the mortality is one-third less than it was during the preceding seven days, though I cannot say that the number of attacks has diminished in proportion, or that the disease has been circumscribed by narrower limits; on the contrary, I think it, if anything, more generally diffused, as cases have occurred in every division.

At Balaclava several admissions into the General Hospital there have taken place from the barrack-at Cadiguen, from the Land Transport Corps, and from ships in the harbour, which have swelled out our rate of both admissions and deaths.

The removal of the Buffs and the 48th Regiment to higher and drier ground has been attended with good results.

Great attention is paid to the sanitary condition of the camps, and to all matters that it is thought may tend to excite the disease.

The attention of medical officers has been drawn to the subject of cholera belts, and I have reason to believe that a large army has been supplied with them; and if not, the supply in store is ample enough to meet the demand.

I have, &c., J. HALL,
Inspector-General of Hospitals

Field Marshal Lord Raglan, G.C.B., Commanding-in-Chief

CAPTURE OF KERTCH

Admiralty, June 6, 1855.

A despatch, of which the following is a copy, has been received from Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea :

Royal Albert, Straits of Kertch, May 26, 1855.

Sir,—I have great pleasure in requesting you to inform the Lords Commissioners of the Admiralty that the Allied arms and fleets are masters of the Straits of Kertch, and that they have in the sea of Azoff a powerful steam flotilla, of light draught of water, capable of cutting off the enemy's supplies, and harassing him in all parts. And, however, at the moment these arts are at hand for sweeping in a vast number of gun-boats of the lighter draught, it is should be found desirable to do so.

My letter of the 22nd inst., No. 395, will have informed their Lordships that an Allied expedition, consisting of 5,000 men of all services, and to be [illegible] of artillery, were then on the point of leaving the anchorage off Kebsaloph, in Kertch, and my message by electric telegraph will have announced the complete success of that expedition; but it is my remains for me to give an account of our proceedings for their Lordships' information.

The fleet, which consisted of her Majesty's ships named in the margin, and a French fleet of nearly equal force, under the command of my friend and colleague, Admiral Bruat, re-entered the Straits of Kertch early down on the birthday of the illustrious Majesty the Queen, and both armies and navies confidently anticipated a successful celebration of that auspicious day. The fleets steamed rapidly up to Kamiesh, where the army landed under cover of the guns of the steam-frigates, and immediately ascended the heights without opposition, with the steamers of light draught of water pushed on towards Kertch and Yenikale: and the enemy, apparently taken by surprise at the rapidity of these movements, and at the imposing appearance of the squadron, blew up his fortifications on both sides of the straits, mounting not less than fifty guns (new and of heavy calibre), which have fallen into our possession, and retired after having destroyed three steamers and several other heavily-armed vessels, as well as large quantities of provisions, ammunition, and stores—[illegible] leaving us masters of the entrance into the Sea of Azoff, without our having sustained any loss whatever.

As the disembarkation was unopposed, in consequence of the fire of the steam-frigates having arrested the advance of the enemy, there was no field for the gallant army that was united to our arms to expend; but the General they had to perform were very arduous, and I should be doing injustice to him and to my own feelings if I were not to say that no Commander-in-Chief was ever more ably assisted than I am by the Captains and those under their command, one and all of whom set a most glorious example of the zealous and talented second in command, Rear-Admiral Stewart, and they could not possibly do better. There was, however, an incident during the day that called forth the admiration of both fleets, and which deserves to be particularly noticed. Lieutenant M'Killop, whose gun-vessel, the *Snake*, was not equally with the others in landing troops, dashed past the forts after an enemy's steamer, and although he soon found himself engaged not only with her but also with two others who came to her support, he persevered, and by the cleverness and extreme rapidity of his manœuvres prevented the escape of all three, and they were consequently destroyed by the enemy, and the *Snake* had not a shot hurt, though shot passed through the vessel.

Yesterday morning I had the honour to accompany the combined steam flotilla named in the margin into the Sea of Azoff, and dispatched them, under the orders of Captain Lyons, of the *Miranda*, on the interesting and important service they have to perform.

I find the expedition has been deferred but a short time longer, there would I no doubt have been [illegible] the enemy's steamers, and probably a [illegible] but as it is, I have every reason to expect that the Allied fleets and armies [illegible] Azoff, &c.

I have, &c.,
Rear-Admiral and Commander-in-Chief

The Secretary of the Admiralty, London.

Admiralty, June 6, 1855.

With reference to the above despatch Lieut. Henry Frederick M'Killop will be promoted to the rank of Commander, so soon as he shall have completed the sea time required to qualify him for that rank

Admiral the Master of War has just received (June 6) from General the Admiral of the Squadron of the Mediterranean the following despatch :

On board the *Montebello*, May 26, 1855.

My dear Admiral,—Just as I had the honour of writing to you by the [illegible] 24th of May and 25th, a second expedition to Kertch has been resolved on.

The embarkation commenced on the evening of the 21st, left on the 23rd, and disembarked on the 24th, at Kamiesh Bourun; and on the 25th we occupied Yenikale, after having passed Kertch, and taken the batteries in the neighbourhood of Ak-Bounun. On the 25th Admiral Lyons and myself entered the Sea of Azoff, and despatched a squadron for Berdiansk and Arabat, at set out in the night, and was composed of four French and ten English vessels. The so complete success of this expedition, in which our troops, led by General d'Autemarre, displayed their habitual ardour, is due also to the rapidity with which it was undertaken; in all of which undertakings I ought to acquaint you with the most complete and cordial co-operation of Admiral Lyons.

From the first day, and after having moored, the disembarkation of the French commenced with order, under the direction of Captain Jumen de la Graviere, on board of my staff.

After being assured of the perfect practicability with which the expeditionary corps effected a landing, I advanced with the *Leplace* to reconnoitre the batteries of Ak Bounun, the powder-store of which the Russians had lately blown up.

The enemy, seeing that they were on the point of being turned, did not hesitate to blow up several others of them, and evacuate these post ons.

A very short time afterwards an English gun-boat of light draught of water was directed against Yenikale, to cut short the progress of a Russian steam-vessel which was attempting to make for the sea of Azoff. A serious engagement immediately commenced between these two boats, in which the batteries of Yenikale also took part. I brought up the *Fulton*, whose guns were quickly directed towards the theatre of the struggle, while she was exposed to a very brisk fire. I ordered the *Mogador* to assist her, and Admiral Lyons, on his side, supported the commander. However, the Russian vessel, which we knew carried the treasure of Kertch, escaped, leaving in our hands two craft, laden with valuables and a part of the civil and military archives of the confusion of the Russians, taken suddenly both by land and sea, became such that they soon gave up a too long resistance, and did not even take the trouble to carry off the wounded that had been brought from Sebastopol. In the course of the day they had set on fire some considerable magazines which they possessed at Kertch.

At last, having evacuated Yenikale, they set fire to a magazine, which contained nearly 80,000 lb. of powder. The concussion was such that several houses were destroyed, and vessels at ten miles' distance felt it.

The enemy has lost 150,000 sacks of oats, 250,000 sacks of corn, 100,000 sacks of flour.

A foundry of guns and gun-carriages has been destroyed

Three steam-vessels have been sunk by the Russians themselves; thirty transports have been destroyed, and as many [illegible]. About 200,000 lb. of powder have been destroyed in the several explosions. The guns that have fallen into our hands number from sixty to eighty, and are very fine and of large calibre. BRUAT.

NAVAL AND MILITARY INTELLIGENCE.

THE HON. Board of Ordnance invite tenders for constructing temporary Barracks in Calcutta for 3000 men.

THE FLOATING BATTERIES.—It has been ordered that the side-propeller vessels of these vessels are to be dispensed with, and a greater patch, equal to 5-ths more, given to the centre screw-propeller, experiments of late having proved beyond all doubt that a greater rate of speed will be attained thereby. The *Glutton*, now fitting out in dry dock, will take from sixty to seventy tons of fuel, and fourteen days' provisions for her crew.

ON Saturday a fine addition was made to our Navy by the launch of the *Bruenswick*, 80-gun ship. The *Brunswick* was originally constructed as a sailing-vessel, the steam and auxiliary screw not having then been introduced into the Navy; but, by slightly altering a part of her after-body, it has been effectively applied, and she is now a most efficient war-steamer

THE *Rosamond* is under orders for the East. She will take with her in tow two mortar-vessels for the Black Sea. Twelve mortar-vessels are ordered to be fitness immediately, to be attached to Admiral Dundas's squadron, in addition to the gun-boats already belonging to it.

THE FRENCH FLOATING BATTERIES. Another of the French division of iron screw floating batteries has been launched. Four out of the five of the French contingent are now afloat; but they are far behind, and will scarcely be ready for service by the time Our's, on the contrary, that is, the four remaining (the fifth having been burnt) are nearly ready for sea. Two of them are in actual commission, Capt. Montagnac, one of our most gallant and liberal officers in the French Navy, and a member of the Admiralty Board of Works, has been appointed to the command of the French division of floating batteries.

THE embarkation of the A troop of Royal Horse Artillery, under the command of Captain Hewett, took place at Woolwich on Saturday, on board the Peninsular and Oriental Company's screw steamship *Soone*. The embarkation was in every respect as perfect as could be. The Artillerymen's horses were placed in the centre dock, and the gangways from the sides of the ship, by this arrangement, were not [illegible] the horses were not [illegible] the ship, but in a manner which was originally anticipated. [illegible]

A FURTHER alteration has taken place in the dress of the Royal Foot Artillery. The design was approved of by the Queen on Saturday last. The new cap is to be small in size, but similar in point of shape to that worn by the Horse Artillery. The facing of black cloth is to display the novelty of having the white feather, royal arms, &c., on the side, instead of in the front. There is to be no band. A scarlet bag is to flow from the cap. The new design possessed for the shako [illegible] deratum, viz., that of lightness.

THE *Retribution*, 28, paddle-wheel steam-frigate, bearing the flag of Rear-Admiral of the Blue Robert Lambert Baynes, with his entire squadron, left the Nore on Wednesday, at 9.30 a.m., for the Baltic, the gun-boats and mortar-vessels preceding the squadron the day previous.

THE Sardinian Government orders for sword-cutlery and bayonets in Birmingham, but the insubordinate and irregular conduct of some of the workmen employed in the trade greatly impeded the execution of Ordnance contracts. Messrs. Hodgkinson and Lawrence are under engagement to supply Government with 1000 bayonets per week; but they and other contractors are at present unable to obtain more than 40,000 bayonets with the Board of Ordnance.

THE SARDINIAN RIFLES.—An incident occurred to-day which threw a strange, and to us pleasant, light upon their manner of making war. While the cavalry pursued the Cossacks to the river, the Sardinian Rifles advanced from the mountain, and took up a position commanding the valley of the Tchernaya. They had hardly done so when our own Hussars and Lancers, returning from the pursuit, were descried in the distance. The Sardinians, perceiving a body of the enemy's cavalry in the ravines near, immediately formed their camps, mistook them for enemies, and prepared to receive them as such. Colonel Cadogan, who is attached to their contingent, remonstrated with the Sardinian officer, and offered to advance at the head of the strange cavalry. He did so; and, finding that he at least did not treat deserters in the uniform, he pointed out to this countryman the error into which their allies were betrayed, and turned them aside, so as not to interfere with the arrangements of the Sardinians. This done, he [illegible] back; but, to his amazement, when he reached the spot, he found that the Rifles were gone. While yet undecided what to do or in which direction to proceed in search of the fugitives, he heard a step behind him. Looking round, he found himself face to face with the commander of the Sardinian corps. Colonel Cadogan told the Sardinian officer here was nothing to fear, that the cavalry in front were English. "So much the better," was the careless reply; "then we can make common cause against the enemy." Whereupon the Sardinian put a whistle to his mouth and produced from it a horrible squeak. Astonished with this occurrence, the Colonel stared at his comrade in arms; but who can describe his [illegible] when he saw the Rifles, while yet under their command, in all directions, and from all places, like Bedouins [illegible] Up started the Rifles in all directions, and from all places, like Bedouins [illegible] Up started the Rifles in all directions, and from all places, like Bedouins [illegible] Up started from briar and bush, from ditches and rocks, where the whole corps had been lying perdu waiting for the approach of what they believed to be the enemy. What Russian cavalry had advanced was that of ours. Their surprise would have exceeded that of Colonel Cadogan. When the Sardinian Rifles saw it was they were silent. They were hardly enough of them on the Kamiesh road to [illegible] themselves as [illegible] and settled down in groups which in an incredibly short space of time they had made out of nothing. They are exceedingly small, but active and energetic men. They march in a trot, and climb up steep places with a wonderful rapidity. *—Letter from the Camp, May 21.*

MR. COBDEN indulged in the following piece of gossip in his speech on Tuesday :—"Possibly the wife of some Cabinet Minister drew from her husband, or answered [illegible] of the editor of some leading journal, the fact that there were two parties in the Cabinet—two all-powerful parties—and that the peace party, who were in a minority, regarded [illegible] submission"

* Royal Albert, Rear-Admiral Stanhope Aguamemnon, Sir Jean d'Arc, Princess Royal, Sidon, Vulcan, Lizard, Triton, Simoon, Furious, Stromboli, Arrow, Miranda, Spitfire, Gladiator, Vesuvius, Curlew, Swallow, Cadmus, Snake, Jackal, Medina, Wasp, Viper, Lynx, Beagle, Arrow, Banshee, Swallow, Insight.

† Montebello, Vengeance, Curlew, Swallow, Arrow, Medina, Viper, Wasp, Lynx, Beagle, Arrow, Banshee, and five French steam-vessels.

NOTES OF THE WEEK

THERE is a perspective in time as well as in space. Just as material objects dwindle into points or disappear altogether when removed to a distance from us, so a political act or a speech in Parliament may in March raise a storm in the lobbies, yet be forgotten in June by all but some half-dozen assiduous students of Hansard. There is hardly a member of the House of Commons of any note who has not two or three times—in the opinion of half the world, including many of his best friends by some unlucky speech or vote, "regularly done for himself." But no animal dies so hard as your politician. He has his roll in the mud of abuse; and, in a month or two, gets up again, Antæus like, rather the better for his tumble. Peel killed himself politically half-a-dozen times at least; Disraeli's suicides are almost past counting—yet is he alive and well at this hour. Mr. Layard, if we may trust the obituary of the Clubs perpetrated, not long ago, one of the most complete acts of self destruction on record; yet is now not much the worse for it. Yet, in spite of these encouraging examples, I cannot help thinking that Mr. Gladstone will not easily get the better of his suicidal act—his speech on Mr. Milner Gibson's motion. "Doctor, the Thames is from us!" Pitt is reported to have said to Vansittart, in consternation at the secession from the Ministerial banner of the ever-faithful band of Scottish members, and now, when Lord Elcho indicts on gentle castigation on Mr. Gladstone, be sure the clouds are dark over the heads of the Peelite party. It is not pleasant to be told by a hitherto constant supporter that "if anything could tend to render the prospect of peace more remote, it was his right hon. friend's speech." At least, there can be no doubt now that the charge of lukewarmness in conducting the war brought against Lord Aberdeen's Government, must have been substantially correct. Perhaps the best speech which the debate has yet given us was that of Sir E. B. Lytton, on Monday night.

The past week has been fertile in news from the Crimea—news all of the same roseate complexion. Withdrawal of a number of troops from Azoff is ours. The military road constructed on the borders of the Putrid Sea, by which Russia could always, even if Perekop was closed to her, introduce men and material into the Crimea, is ours. More than a hundred cannon, much provisions and military stores, are ours. Two hundred merchant vessels and cargoes are captured or destroyed. All these are great facts, and cannot be without influence upon the result of the war. Yet the most important fact of all, that which gives the most substantial ground for the belief that at no distant period we may welcome an honourable peace is, that in these days war is money, and that, no power on earth can carry on a long war without a long purse. It isn't a chivalrous view of the subject, but we may rest assured that, in the power of raising unlimited sums, possessed by England and France, even more than in the skill and gallantry of our troops, we shall find the means of loosing the knot whose folds are now pressing on the energies of Europe.

Last Saturday was a great day at the Crystal Palace. Two attractions—the flower show, and the "first performance" of the upper set of fountains—drew a great crowd to Sydenham. As nobody, except the holders of season tickets, was admitted, the result must have been very satisfactory to the shareholders. For once in a way this is well enough, but it is to be hoped that the directors do not mean in future to restrict admission, whenever any peculiar attraction is provided, to the holders of season tickets. It looks like it though, for the same rule prevailed on Monday, when Milne Aldoni was to have sung, but did not. A guinea in these hard times is a good deal of money; yet there are plenty of gentlemen who would not object to pay so much for an after dinner cup, much any more than for a stall at the opera; but the family-man, who wants to take his wife and two or three daughters, is positively excluded by the price. I am convinced that a five-shilling admission on extraordinary occasions, when more than the average amount of entertainment was to be obtained, would be more advantageous to the company; and certainly it would be fairer to the public. The gardens are now in extreme beauty, and every day makes it clearer that there is, at least, in summer time—is the real attraction of the place.

Not alone are the Crystal Palace shareholders revelling in the novelty of fine weather, a continuance of which a few days will in high barometer seem to promise. Days of sticking out, and gradually to the thirsty soil, followed by warm, growing weather, make at this season a mighty difference in the promise of the harvest. This sort of weather came too late to redeem entirely the hay crop; but we may now begin to hope that the produce of corn may not be much inferior to that which the bounty of Providence accorded us last year. See another harvest would be a complete set-off against the cost of the war. Altogether things look hopeful, though it is well to remember the old proverb, "That we mustn't holloa till we are out of the wood." Of wood is the Crimea and the Baltic. In the former we have met with success, which seems to presage greater events. One great cause of fear has yet is in that quarter, lest disease, pestilence—cholera perhaps, or plague—should come in with the hot weather. That scourge averted, it would seem that we have little to fear. Nearly one hundred thousand French, English, and Sardinians, armed and fed as never army was before, ought to go anywhere and do anything. But even the taking Sebastopol, immense as the effect of such a success would be, would not equal the results that might be expected from the striking a great blow in the Baltic. If Cronstadt should fall?—the chances are heavy, indeed, against such a conquest, yet it is possible. This, indeed, would be a victory—one that would at once enable the Allies to dictate what terms of peace the, please.

SACRED HARMONIC SOCIETY, EXETER-HALL.—The final performance of "Elijah" takes place on Friday next, the 15th.

HARMONIC UNION, HANOVER-SQUARE ROOMS.—The programme for the next concert, which takes place on Wednesday evening, includes Cherubini's overture, "Faniska," Weber's air, "Though Cowards Flee Away" Beethoven's magnificent Eroica Symphony, Mendelssohn's Caprice Brillante, and Beethoven's "Ruins of Athens." In the latter work Miss Lucas and Mr. Weiss are engaged as principal vocalists. The band will, as usual, be led by Mr. Blagrove, and Herr Molique will occupy his post as conductor.

A FIELD-DAY IN FAIRY LAND. This afternoon and evening the plain, which for months past bore the same uniform aspect, a sweet feature of diversity from those we were accustomed to see, and became thereby always a renewed interest. The hill tops were covered with tents, and in the evening with long rows of blazing fires. Baggage and ammunition waggons crossed the plain, and traversed the ground, which, but on the rare occasions of a reconnaissance, was for us forbidden ground. Herds of the horses of our Camp were driven out and fed luxuriously upon the grass and young corn, which up to the present had been allowed to grow undisturbed, because the end in view it grew lay within range of our batteries, and because the propensity of the Cossack riderless, and their cunning in driving women and horses, bidden to followers in awe. The state of the ground between the Tchernaya batteries and the Tchernaya shows at once that the Russians never had a serious intention of defending this their look-out position. Small numbers of troops only have been quartered in or traversed this part of their late territory. The grass is in full growth, on the banks of the river there are some trees, and only here and there a few earth-huts, or the black traces of a past fire, show that some detachments of troops have now and then made lateral camping grounds. The vegetation on that side of the hills at which we found it on a side when we first landed in the Crimea, abundant and odoriferous. Flowers, bright blue, purple, and yellow, actually covered the ground; little plots of poppies shone in the distance like fields of red ochre; now and wood is thereabouts in full rose shrubs in full bloom, and some wild herb or other, as you have passed it or grass, or smelt the faint odour of the beach. All to the, the sun was tempered by a fresh breeze, and you would scarcely think that the first advance against the Russian position had all the features of a field day in fairy land.—*Letter from the Camp, May 25.*

Prince Menschikoff, after a short stay in the Russian capital, has set off for Finland.

The grand review in Paris on Monday, in honour of the King of Portugal, went off exceed ngly well. The Champs de Mars was crowded. Numbers of well-dressed ladies took their places on the terraces and wore shawls and caps.

MUSIC.

GRISI goes on triumphantly with her farewell performances—certainly *bond fide* farewell performances this time. She seems to be cruelly exerting herself to aggravate the regret which will be felt for her final departure; for she is acting and singing with the power and beauty of her most palmy days. Her performance of *Lucrezia Borgia* on Monday was a display of tragic grandeur and pathos to which no other representative of the character has ever been able to approach.

On Thursday (last week) Tamburini, after a retirement of three years' duration, reappeared in the part of *Don Giovanni*. It has always been admitted that Tamburini has for many years been the greatest—indeed the only *Don Giovanni* on the stage. Since he retired various eminent performers have essayed the part, and every one has been a failure. They have all been measured by Tamburini's standard, and all have been found wanting. Perhaps the knowledge of this fact has been his inducement for returning to the scene of his former glories. Much expectation was excited by his return; and, in the part of *Don Giovanni*, expectation was not disappointed: for, though it was at once perceived that his voice was but the ghost of what it had been, yet, as the beau ideal of the high-born and high-bred Spanish libertine, he still stood alone and unrivalled. He was, consequently, received with much of the warmth of former days. In his next character, however—the *Duke Alfonso*, in "Lucrezia Borgia," which he performed on Monday—he was less successful. His vocal defects were more conspicuous, because less redeemed by dramatic excellence; and his reception, we regret to say, was positively cold. We are sorry that this great performer has been induced, after leaving the stage, to return to it at his time of life. He adds another to the many proofs that such a step on the part of a veteran is always an unwise one. On his part the step has by no means been a matter of necessity, and the sooner he retraces it the wiser he will be.

THE production of Mr. Henry Smart's new opera, "Berta; or, the Gnome of Hartzberg," at the HAYMARKET, on Saturday last, was an occurrence calculated to excite reflections both pleasant and painful. pleasant, that we have yet among us, even in the decayed state of our musical drama, composers able to enter the lists with those of any country in Europe; and painful, that such composers have not a single theatre, in the greatest city in the world, where anything like justice can be done to their works. When we say, as every one must do, that this opera was poorly and lamely got up, we impute no blame to the Haymarket manager. On the contrary, Mr. Buckstone showed good taste in accepting a work of so much merit, and produced it as well as his means and re-sources would allow. But it is in an *opera-house* that an opera must be performed; not in a theatre, where music is only one and a subordinate object. The announcement, however, of a work by a composer of Mr. Smart's reputation attracted an audience not only large, but musical, who were capable of discerning the merits of the piece, notwithstanding the imperfections of its performance.

"Berta," in spite of its title, is a comic opera, in two acts, without a grain of German *clabber*. The libretto, by Pitsball, has good points, and affords room for musical effects; but its plot is excessively complicated, and so confused as to be sometimes unintelligible. A detail of its incidents (as the attempts of some our daily contemporaries have shown) would be tedious and unreadable. There are two rustic lovers, *Michael* and *Berta*; the damsel an arrant coquette, who torments her unfortunate swain by her ambitious dreams and capricious airs. A good-natured *Baron*, the lord of the village, who has returned incognito after a long absence, undertakes to cure *Berta* of her failing, and thus bring about the happiness of the lovers. He sets about his self-imposed task in a somewhat unaccountable way. He mingles, as a mysterious stranger, among the holiday makers at a fair, persuades the superstitious *Michael* that he has supernatural knowledge, and promises to gain for him, by some magical spell, the affection of *Berta*. He then gets *Michael* involved in a charge of theft, and thrown into prison, while he declares himself to be the long absent *Baron of Hartzberg*, announces his intention of choosing a wife among the maidens of his native mountains, and designates *Berta* as the object of his choice. Thus the little fire's ambitious dreams are realised; but her heart is now awakened, and clings to her poor lover in his dungeon. She obtains access to him, and (with the *Baron's* secret connivance) they escape together to the mountains, where they take refuge in a ruined castle, supposed to be haunted by a *Gnome-King*, who is the subject of a fearful tradition. Here the *Baron* appears before them and tries a similance of the *Gnome*, and *Berta's* courage and constancy are sorely tried, but she stands the test, and the *Baron* is convinced of her unchangeable love for *Michael*; whereupon the ruin is transformed into a splendid hall, filled with wedding guests, and the lovers are united. The foundation of this story is good, but the playwright has reared upon it a mass of extravagance and absurdity which would be an obstacle to the success of the opera, were it ever so well performed. The music, however, is charming. It belongs to the pure and classical school of dramatic composition; is full of fresh and expressive melody, constructed with masterly skill, and rich in beautiful orchestral effects. The principal characters (the two lovers—are admirably sustained by Mr. and Mrs Sims Reeves. Weiss, the best baritone singer on our stage, personates the *Baron*; and a comic couple, introduced to enliven the piece, are very fairly acted and sung by Mr. Farquharson and Miss H. Gordon So far there is nothing to find fault with, but the effect of the music was almost destroyed by the discords of an orchestra that could not play, and a chorus that could not sing. We felt for the poor composer, assisting at the martyrdom of his own beautiful conceptions. How differently they would have sounded at the Opéra Comique! Despite the beauties of the piece, nevertheless, triumphant success was the fate of its performance. The principal singers exerted themselves greatly, and the chief airs and duets were applauded, and some of them encored. Several of these pieces are so pleasing and graceful that they cannot fail to become popular, both in the concert-room and in the private musical circle. Next week we shall engrave a scene from this successful opera.

THIS is the height of the Concert season, and many more of them take place every day than it is possible to notice. On Saturday, the 26th of May, at the annual concert of Mr. F. Chatterton, the eminent harpist, Miss Martie Spiney, a girl eleven years old, who made her début before a London audience, and whose brilliant performance of a fantasia by Beyer was much and deservedly applauded at Mendelssohn Hermann, a young performer, lately arrived in this country, gave a *soirée musicale* at the rooms in Harley-street, on Monday. His lady is not only a singer, but a pianist, and on this occasion co-played extraordinary excellence in both capacities. She has a beautiful voice and a brilliant finger; and her singing, as well as her pianoforte playing, bespeaks the highly-accomplished artist. She was assisted by several of our best performers; and this concert (which was attended by a crowded and fashionable audience) was one of the most elegant entertainments of the season.

THE THEATRES, &c.

ST. JAMES'S THEATRE. What are called "single-handed entertainments"—together with their modifications, two handed and three handed—are as popular in Paris as in London. There are French Albert Smiths, Loves, and Woodins, as well as English. Among these, M. Levassor and Mdlle. Julie Teisseire hold a distinguished place. On Wednesday evening both these highly finished artists appeared at this theatre in their favourite "Soirées et Matinées Récreatives et Comiques." We fear that the pieces chosen for the occasion are of too slight a character to suit exactly our stormier British taste. A "deux pas de bonheur" serves to illustrate the moral that we frequently go abroad to seek the happiness that we might find at home. A certain *Sir George*, charmed with a song, travels over the Continent in search of the singer, and ultimately discovers his invisible charmer in the person of *Betty*, his own ward, who had all along been the companion of his tour. The idea is pretty, but the interest feeble. We require stronger fare than this piece was added a vaudeville, called "Le Bas Bleu," in which M. Levasor resumes many disguises, and ultimately succeeds in detaching the young lady from her studies and disposition to single-blessedness. Some songs were capitally well sung by both performers, and the success of the entertainment will, we think, principally depend on these.

MARYLEBONE.—On Wednesday Miss Edith Heraud will perform at this theatre, for one night only, the character of *Pauline*, in the "Lady of Lyons." The performance is for the benefit of an orphan family.

SHREWSBURY SHOW. This ancient pageant will be enacted at Shrewsbury, upon a grand scale, on the day next.

CREMORNE GARDENS. The first of the three summer meetings of the Royal West London Horticultural Society takes place, on Thursday next, in these gardens. Upwards of sixty gold and silver medals are to be competed for. A brilliant show is expected.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

On Monday last a special general court was held at the Trinity-house on Tower-hill, at which Prince Albert was unanimously re-elected master.

The Emperor Alexander, yielding to the wishes of the Empress Dowager of Russia, has forbidden the Grand Dukes Michael and Nicholas to return to the Crimea.

Prince Ernest of Leiningen has left Berlin for Dantzic, whence he will proceed to join the Baltic fleet, in which he is to serve.

Letters from Italy attribute a political purpose to the journey of the Archduke Maximilian (brother of the Emperor of Austria), now travelling in the Peninsula.

Prince Albert presided, on Saturday evening last, at the annual dinner of the officers of his regiment, the Grenadier Regiment of Foot Guards, given at Grillion's Hotel, Albemarle street.

The King of Prussia was to proceed to the Rhine provinces on the 8th, accompanied by the Prince of Prussia, and, after visiting several Rhenish towns, return to Ems or Saarbrück on the 15th.

It has been decided that the Queen of Spain shall not go this year to La Granja, on account of the unsettled state of the country. For the same reason the Duke and Duchess of Montpensier will prolong their stay in Spain. It is not decided whether the Court will return to Madrid or continue at Aranjuez.

Baron Von Usedom is suffering from a severe kick he received from a horse at Epsom races, and from which he is only slowly recovering.

It is reported that the Empress Dowager of Russia will arrive in Berlin on the 24th inst.

The *Indus*, which arrived at Marseilles on Monday, brings, among other passengers, Lord and Lady Haddo, and the Hon. Master Gordon, from Alexandria, from Ceylon, the Right Rev. the Lord Bishop of Colombo.

The Czar has conferred the Order of St. Anne, with the insignia in diamonds, on Baron de Chazal, Aide-de-Camp of the King of the Belgians.

The Earl of Albemarle's son, Lord Bury, has entered on his legislative functions as a member of the Council of Canada.

The King Regent of Portugal attended an exhibition of cattle at Socavem, on the 27th ult., and was himself an exhibitor of bulls bred by his Majesty.

The Duke de Montpensier has offered his services to the Spanish Government, and declared that he will devote his life to the defence of the Queen, the dynasty, and liberal institutions.

Sir Moses Montefiore is on his way to Jerusalem, where he intends founding a large hospital for Jews.

The Bavarian Government has taken possession of the vast estates belonging to the Leuchtenberg family, which it purchased some time back for 3,000,000 florins.

Chief Baron Pigott has arrived in Dublin. His health has been materially improved by a brief residence in a more genial climate.

The Emperor of Russia, anxious to raise funds to relieve the soldiers and sailors who have had house property injured at Sebastopol, has ordered the sale of two hotels at St. Petersburg, belonging to the Admiralty.

Sir Henry Lytton Bulwer, the late Minister at Florence, on relinquishing that appointment, obtained his retiring pension, and is now in Paris.

The young King of Portugal is grandson of Auguste Eugénie Napoléone, Dowager Empress of the Brazils, widow of Don Pedro, and daughter of Prince Eugène Beauharnais, who was the brother of Queen Hortense, and mother of Napoleon III.—is the cousin of the Emperor of the French; as he is, through his father, a nephew of Prince Albert, Consort of the Queen of England.

Jung Bahadoor, the Nepaulese who visited London some years ago, has set out on an expedition against Tubet.

The Bey of Tunis died on the night of the 1st June. His successor and cousin, Sidi Mohamed Bey, ascended the throne without this sale.

The Hon. F. H. F. Berkeley has postponed his motion for a Committee to inquire into the operation of the Sunday Beer Act to June 26.

Redschid Pacha is living in retirement at his splendid palace, the late acquisition at Buyukdere, on the Bosphorus, and his Vienna mission, it appears, is adjourned sine die.

Mr. Mechi, of Tiptree-hall, announces his intention of becoming a candidate for Maldon when a vacancy occurs.

The *Moniteur* of Saturday contains decrees confirming seven promotions to the rank of Officer, and eighty-five nominations to that of Knight in the Legion of Honour; as well as the grant of 350 military medals, made by the Commander-in-Chief of the Army of the East.

Baron Manderstrom, the Swedish Secretary of Foreign Affairs, has been appointed Ambassador to Vienna, the appointment has not yet been signed, as important negotiations of importance.

Sir Ralph Abercromby departs in a few days to resume his diplomatic duties at the Hague, after a short leave of absence.

A contract has been entered into between the Ottoman Government and M. Lenzi Oskara for the establishment of a submarine telegraph to unite the Dardanelles to Egypt.

M. Mavrocordato is likely to resign, in consequence of the complaints made by the Western Powers of the inefficiency of the measures taken by him to repress the Greek brigands.

Mr. Pope, the Governor of Newgate, has resigned his post, and retires on an allowance of £500 per annum for life.

Mr. H. Puley, emigration agent at St. John's, New Brunswick, has been appointed Commissioner for the Fisheries of British North America, at a salary of £1000 a year.

Madame Stoltz is about to enter into an engagement with the Imperial Theatre of Rio Janeiro, on the terms of 400,000 francs (£16,000) and a house and carriage.

Zephaniah Williams, the Newport Chartist, who was transported with Frost and Jones to Australia, has made an accidental discovery in Tasmania of a bed of yellow coal of very superior quality.

The Photographic Society has appointed a scientific committee to investigate the permanency of photographs, the causes of fading, and the phenomena of the act; and it is the intention of this committee to publish the results of their experiments from time to time.

A party of two hundred Mormons, mostly Welsh and English, arrived in Pittsburg on the 10th of May, on their way to the city of the Latter-day Saints, in the valley of the Great Salt Lake.

The *Volksbote*, published at Munich, states that a large number of ornamental articles for horses, bearing the portrait of the late Czar, have been imported into that city for the purpose of distribution.

The Queen has been pleased to grant the sum of £50 annually, for the purpose of being given in rewards for the encouragement and promotion of the education of the pupils of Victoria College, Jersey.

Already no less than 4000 members of Continental choral societies have enlisted as subscribers for the celebration at Lille on the 17th.

The amount raised for the various objects of the Free Church of Scotland for the year ending March 31, 1855, was £368,050 9s. 3d.

The little republic of San Marino having refused to give up some political refugees claimed by the Pope, a diplomatic "tempest in a teapot" is the consequence.

The workmen employed at the Old Hatton and South Hetton Collieries have been on strike during the last week.

A bill ratifying the Fugitive Slave Law passed to a third reading in the Massachusetts Senate on the 16th ult.

In London there are now about 42,000 tons of shipping entered outwards for Australia.

The Legislative Session of the Belgian Chambers was closed on Saturday last.

The carpenters at the Curragh Camp have struck for higher wages.

It is said in Berlin that a treaty of alliance between Sweden and the Western Powers is again on the *tapis*.

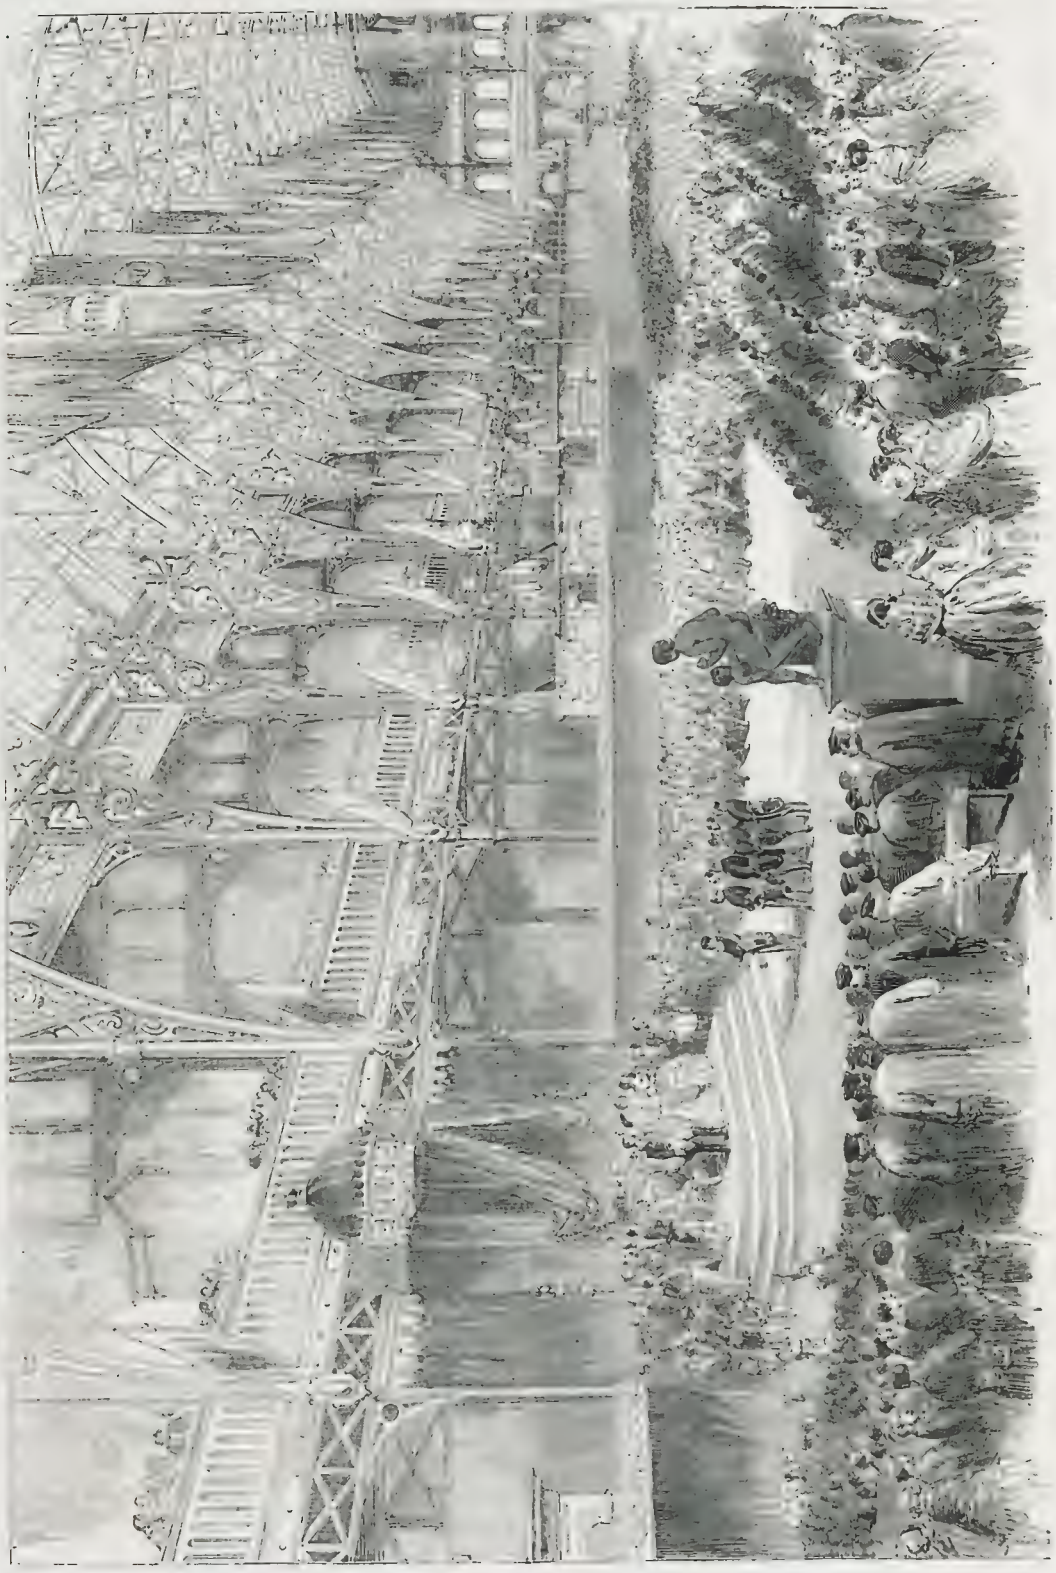
Madrid and Lisbon will soon be united by a line of electric telegraph, which will pass by Badajoz.

The six new steam-frigates building for the United States' Government are reported to be progressing as rapidly as possible.

Mr. Hunter, the Assistant Poor Law master at Cork, has been committed for trial to answer a charge of embezzling a letter containing the sum of £39, the property of her Majesty.

The reports by the *Arctic* from America, confirm the accounts brought by the previous steamer of the satisfactory prospects of the grain crops throughout the Western States.

The *Journal de St. Petersbourg* contains a bitter complaint that Easter Monday was chosen for reopening the attack on Sebastopol. That remark well-known a party which observes Good Friday instead of Easter Monday.



OPENING OF THE PALACE OF INDUSTRY AT PARIS, BY THE EMPEROR OF THE FRENCH. (See p.

HER MAJESTY'S STATE BALL. THE GRAND STAIRCASE AT BUCKINGHAM PALACE

THE Queen gave a (second) State Ball at Buckingham Palace on Friday [illegible] A *bouti-pas* was prepared for the Q[illegible] picture-gallery and the other rooms we[illegible] nutiful shrubs and plants in flowe[illegible] liu chandeliers, filled [illegible] ur of the Foot Guards was on duty in front of the [illegible] of the regiment.

The company be[illegible] Palace soon after nine o'[illegible] ast assembled in the [illegible] The Duchess of Cambridge and the P[illegible] tended by Lady Suffield and Major Horne Purves. The [illegible] rand Duchess of Mecklenburg Strelitz was attended by Lady Caroline [illegible]st and Baron Lilie. The Duc[illegible] was attended by his Equerries in Waiting. The Maharajah Duleep Singh was attended by Sir J. Login.

Her Majesty and Prince Albert, and the Royal Family, accompanied by the Princess Adelaide of Hohenlohe Langenburg, were conducted by the Lord Chamberlain, and other officers of the Royal household, from the White Drawing-room to the Ball-room.

The Queen wore a dress of white tulle over white silk, trimmed with bunches of lilac and white lilacs, with green leaves and rosettes of green satin ribbon, ornamented with diamonds. Her Majesty's head-dress was composed of lilacs to correspond with the dress, and diamonds.

The Duchess of Cambridge wore a white glacé silk dress, trimmed with point-lace, with three deep flounces of point-lace, each flounce trimmed [illegible] The stomacher ornamented wi[illegible]s and [illegible] diamonds. Her Royal Highne[illegible] diamond [illegible]

The Princess Mary of Cambridge wore a dress of white tulle over a [illegible] white glacé silk petticoat, trimmed with bunches of grapes and green and gold grape leaves. The body trimmed to match, and ornamented with [illegible]klace pearls and diamonds. Her Royal [illegible]ad-dress was formed of bunches of grapes, with green and [illegible] and diamond ornaments.

[illegible]sty and the Prince, and the Royal circle, were followed by the [illegible] company into the Ball-room, where the Queen opened the Ball [illegible] Excellency Count Persigny, the French Ambassador.

Quadrille bands (Mr. Laurent's and Mr. John Weippert's) were stationed in the Ball-room and the Throne-room.

Refreshments were served to Their Majesty's guests in one of the principal State apartments during the evening, and the supper was served in the State Dinner-room, the gold plate which decorated the tables being relieved by a choice assortment of flowering plants.

We have engraved the Grand Palace Staircase: it is oblong in plan, being longer from north to south than from east to west. From the Great Hall the ascent is by a flight of marble steps to the first landing, whence the stairs turn to the right and left: a flight, in continuation of the central one, being continued up towards a room called the Garter-room not used, however, on Ball nights, and therefore the stairs are completely hidden by flowers of the greatest beauty being placed upon them. The balustrades, of the most exquisite workmanship, are of or-moulu, and, from the richness of their detail and [illegible] to the [illegible] A moulding smal[illegible]lustrade is carr[illegible] at a height parallel to th[illegible] on a blue ground. Below [illegible] fation of various-coloured marbles, most exquisitely imitated, above it the wall [illegible]d to imitate dove-coloured and [illegible] marbles. Portrait[illegible]e III and his Queen, George IV., W[illegible] IV. and Queen Adelaide, the Dukes of Kent and Sussex, Prince [illegible] of Cumberland (now King of Hanover), and the Duchess of Kent, ad[illegible] are long bas-reliefs of the Four [illegible] runs round the upper part [illegible] in the standrels of which are paintings by Townshend, emblematic of the Seasons. A double light of engraved glass completes the whole. In the arches are bas-reliefs of Cupids sporting amongst acanthus foliage. The architectural details are beautifully relieved with colour and gilding, and produce a charmingly rich and pelatiful effect.

The *tout ensemble* of the Grand Staircase on the o[illegible] of the State Halls is extremely magnificent. T[illegible] men for nearly all are in uniform, [illegible] present wearing sober-coloured Court dresses—mingled with the endless [illegible] of the colours of the ladies' dresses, the quaint gaudy costumes of the Yeomen of the Guard, the nodding plumes and brilliant equipments of the Gentlemen at Arms, with the gold-embroidered dresses of the Pages, added to the Polychromatic decoration and gilding of the architectural features of the Staircase, heightened also by flowers, produce an effect of rich colour almost impossible to describe.

THE SILENT MEMBER. (No. XX.)

THE Vienna Conferences are at length announced to be finally closed; and for the first time, they have done something with which the people of this country will be satisfied. The last meeting was distinguished by an announcement from Count Buol which affords a by no means brilliant specimen of the logical abilities of some of our model diplomatists. The Count intimated that, "having engaged to find elements of accommodation and having failed to find any elements of accommodation, he had fulfilled his mission." If to fail in an object is the same thing as accomplishing an object, the Count may, of course, congratulate himself on his success in having made a failure. Upon this principle the Conferences may be said to have realised all they intended to effect; for, having undertaken to negotiate a peace, and not having negotiated a peace, they have—in a diplomatic sense, which seems to be very different from common sense—won all they desired. It is to be hoped that we shall hear no more of these Vienna Conferences, which may henceforth be buried under the weight of their own protocols. We shall, however, be reminded of them once more, by something still heavier than even the protocols, in the shape of the bill we shall have to pay for our share of the expenses.

The Total Abstinence question has had an airing in Exeter Hall, and a little wholesome ventilation will be useful to a subject which ought to be looked at with the aid of a little more enlightenment than has hitherto been mixed up with it. The champions of what is called the Temperance cause are very well-meaning men; but they look at their favourite object too entirely from one point of view, and they resolutely refuse to see anything but the evils of the present system. That which is in itself harmless should be left to the fullest freedom of choice, though it may be true that directly the line is overstepped where harmlessness ends and mischief begins the law may oppose a barrier for the protection of society. If drunkenness is an evil, let it by all means be punished as a proportion to the harm it inflicts; but the fact of drunkenness being evil is no reason why that which is in itself harmless should be prohibited. The advocates of prohibition are in the habit of pointing to other matters with which legislation has interfered, and which are said to be harmless in themselves; but it is not true that the objects which have been instanced in proof of this position are of themselves innocuous. The advocates of the Maine Law allege that it is quite as reasonable to shut up houses of refreshment as it has been to pass a law for the closing of betting-houses. But the two cases are by no means identical,—for betting is an evil in itself, a *malum in se*; while a glass of beer may be a good thing in itself; and if nobody were allowed to purchase one, it would become a *bonum prohibitum*. There is no doubt that drunkenness is the monster vice of the age, but the cure must be accomplished other means than those of driving the disease inwards, and causing it to fester in the form of evils which would be the case if the open sale of liquor were to be suppressed, and a fraudulent trade were to be established. A law that the common sense of society would revolt against could never be imposed, for it will surely be violated in some indirect manner, and it would not only be the law breaker, but also the community as a whole that would be demoralised by evasive practices.

Among the minor delinquencies of the present day is the mischievous habit of picking flowers in the grounds of the Crystal Palace. A love of flowers seems in itself a very harmless predilection, and there does not appear much criminality in taking a single flower from a well stocked parterre, but the directors have found it necessary to bring several fair offenders before the magistrates. Prevention is always better than cure; but more especially is it desirable to warn rather than to punish a class of transgressors against the law who have in all no criminal intention, and who do not think of the mischief they are doing. The evil is certainly one that ought to be checked, but the circumstances scarcely justify a charge of wilfully damaging a plant, when the will is clearly to become possessed of a flower, and not to damage property. If the servants of the company were to be vigilant in preventing the evil, and if requests to the public not to pick the flowers were to be conspicuously placed about the grounds, the necessity might be avoided of having to bring before the bench such a class of persons, chiefly females, who have had no dishonest intent, and whom it is hardly fair to place in the degraded position of criminals.

It is gratifying to observe that Lord Brougham is again at his post in the House of Lords, using the most earnest exertions to continue the amendment of the law, which has already been purged of so much that was bad by his untiring zeal and unequalled ability. A few days ago he inquired into the causes of the very heavy exactions of fees from the suitors in the County Courts, which it is quite a mistake to regard as a tribunals in which justice is cheaply administered. The County Courts are a vast improvement on the old system, as far as debts of moderate amount are concerned, for when those debts were sued for in Westminster-hall, the expense of litigation was such as to make the amount in dispute an item of insignificance, when compared with the cost of obtaining it. The result used to be that law was avoided as ruinous; but now, although a vast number of small debts are sued for in the County Courts, the fees are felt as a cumbrous tax on the administration of justice. Several shillings must be expended at the very outset of the prosecution of even the smallest claim, and when the amount is very small, the costs frequently exceed the debt sought to be recovered. The only really cheap tribunals are the Metropolitan Police Courts, where two shillings paid for a summons constitute the whole expence of proceeding; but where, unfortunately for the humbler classes, the civil jurisdiction is so limited that even a common claim for wages cannot be enforced, and whence appliciants are continually sent away to the County Court with an intimation that the Magistrate has no power to assist them. It is, undoubtedly, in some respects advisable that the criminal and the civil jurisdictions should be kept distinct from each other, but it is idle to boast of having brought justice home to every man's door, until either the Police Courts have jurisdiction in civil cases, or the County Courts are made sufficiently cheap for the poorer class of suitors. The County Courts have certainly aided in bringing home justice to many a door; but if the article is brought home it has to be paid for rather heavily before delivery. The fees taken in the County Courts are far more than sufficient to pay the expenses incidental to the establishment of those tribunals, and the entire excess is so much improperly abstracted from the pockets of the suitors. It may be difficult to adjust very nicely the balance between the sum to be taken from the public and the cost of administering the law; but it is very easy to make a much nearer approximation between the two than has hitherto existed. Another of Lord Brougham's proposals for Law Reform has for its object the saving of a very large number of persons every year from lengthened and often wholly undeserved imprisonment. In these days of national excitement on the subject of the war which absorbs almost every other question—one is apt to lose sight of much that, at other times would excite very serious interest. The liberty of the subject is usually regarded as one of the very highest objects of respect, and yet we are allowing it to be trifled with annually to a very considerable extent; for, out of 28,000 persons committed to prison in 1855, no less than 6300 were, by discharge or acquittal, shown to be innocent. It will of course happen unavoidably that some charges should be made which, from various causes, cannot be sustained, but, supposing this to be an inevitable evil, is the duty of legislation to mitigate as far as possible a mischief which cannot be entirely remedied. This is the purpose which Lord Brougham has in view; and he has accordingly been urging the Government to adopt certain reforms in the criminal law by which persons who are in prison may be brought to a speedy trial. This desirable end he is endeavouring to attain by promoting a measure which will give magistrates power to deal with a great number of small offences, and also by an act of Parliament for causing assizes to be held more frequently in the course of the year, as well as adding to the number or rather to the frequency of the circuits of the Judges. Now that the Superior Courts are free from more than half their former labours by the institution of the County Courts, it must really be a matter of satisfaction to the Judges of the former to be enabled to earn more conscientiously their large salaries by an increased amount of public utility, which the reforms of Lord Brougham would afford them the Luxury of practising.

Note.—The sign — denotes below the average and the sign + above the average. The number in the second column is the reduction for the 1000 feet above the level of the sea, and is represented by 100.

The reading of the barometer increased from 29.72 in. at the beginning of the week to 29.93 in. by the 2nd; decreased to 29.8 in. by the 4th; increased to 29.86 in. by the 5th; decreased to 29.67 in. by the 6th; and increased to 29.85 in. by the end of the week. The mean for the week, in the light of 82 feet above the level of the sea, was 29.844 inches.

The mean daily temperatures have varied during the week from 49° below to 12° above their average values. During the period they were below, viz., from May 28th to June 6th, the average defect was 7.5° daily.

The mean temperature of the week was 55.6°, being 1.5° below its average value.

The mean temperature during the week was 17.7° in the first quarter, 58.4° in the second quarter, 56.6° in the third quarter, and 53.6° in the last quarter.

Rain fell during the week to the amount of one-tenth of an inch.

The weather during the week has been remarkable for great changes of temperature—extremes of heat and cold having both been experienced.

LEWISHAM, June 8, 1855. JAMES GLAISHER.

DEATHS IN LONDON.—During the week ending last Saturday, the births of 1180 children were registered in the metropolis, of whom 597 were boys, and 583 were girls. The average number of births in the corresponding weeks of the years 1845-54 was 1403. The deaths registered during the week were 1070, of these, 522 were males and 548 females. There was thus shown to have been a decrease of about 140 on the deaths registered during the week preceding; and is partly attributable to the fact that the Registrar-General's office was closed on Monday last, the day appointed for the quarterly meeting of the Board of Guardians, when the number of deaths, corrected for the increase of population, is usually 1200, the number of deaths 1070 were those of persons above ten years of age. There is not much idle talk in the metropolis. Zymotic diseases: small pox was fatal in 21 cases, a variation in 18, hooping cough in 41, and diarrhœa in 16 cases.

CIVIC ENTERTAINMENT TO THE JUDGES.—On Saturday evening an entertainment was given by the Lord Mayor, in the Egyptian Hall, Mansion-house, to her Majesty's Judges.

ROYAL SOCIETY.—On Thursday the following candidates were elected into the Royal Society:—Arthur Connell, Esq., William Farr, Esq., William Ferguson, Esq., Ferdinand Hueffer, Esq., Isaac Holden, William John Hamilton Moseley, Esq., [illegible], Esq., James Lake, Esq., A. Follet Osler, Esq., [illegible], M.D., Charles D. Vignoles, Esq., Charles Vanderweyde Walker, Esq., Robert Wright, M.D., Alexander Wallace Williamson, Esq., [illegible]son, Wilson, Esq.

WORKING-MEN'S-IN-THE-FIELDS' LIBRARY AND READING-ROOM FOR THE WORKING CLASSES.—The third festival of this institution was held on Wednesday evening, at the Northern Schools, Castle-street, Long-acre. There were about 300 working men and their wives present, and Lord Radstock, the Dean of Hereford, Rev. T. Jackson, Rev. T. D. Maurice, Dr. Lockhart Robertson, Mr. T. J. Farnfield, and other friends of the working classes, took of the festival. Letters were read from Earl Grosvenor, Viscount Goderich, and Lord Overstone, regretting their inability to be present. The Rev. H. Moseley, M.A., the Vicar of the parish, presided. The company sat down to tea at about half past seven, and amused themselves for some time by looking over the handsome books presented by His Royal Highness Prince Albert, the Bishop of London, Miss Coutts, Sir Walter Trevelyan, Sir Henry Dukinfield, the late Vicar, and others. When the library became crowded a large number of the guests adjourned to the School of Art and Design, fitted upon the floor above, which had been originally designed as a night-school for children, but was converted into a School of Design. Here Mr. Dunsmonth, when it was opened under the auspices of the Duke of Devonshire, delivered a lecture, and drawings by artisans were exhibited, which showed considerable talent and accuracy, soon after eight o'clock the whole company adjourned to the boys' school room, which, with one of the committee-rooms, was filled by 500 guests, and gaily decorated with flags. The visitors, however, were so numerous that between fifty and one hundred had to return to the library, where they had tea served, and amused themselves by the singing glees while the festival was going on below. The Vicar said grace before and after tea, and then gave a concise history of the Library, which, he said, had been in operation for three years, and had not been so fully supported as he expected by the working classes. There were, however, 129 members, and if that number were increased it would soon become entirely self-supporting. The building provides education for 124 children in the School of Art for boys, adults and children; evening recreation and instruction for 129 in the Library; and a Life Assurance Branch Association numbering upwards of 80; without speaking of the Sunday-schools, evening classes, and other institutions connected with it. He thought he might assume that the building he had had the satisfaction of seeing grow up among them in one of the worst districts of the parish might now fairly be looked on as an institution that had struck its roots deep, and was calculated to exercise a wide influence for good upon the neighbourhood. Several resolutions were afterwards moved and seconded by Lord Radstock, the Dean of Hereford, Rev. John Lawrell, Rev. E. T. Yates, Mr. Palmer, Mr. Churchwarden Stobbs, Mr. Warrington, and others; but the most striking speech of the evening was by a Mr. Parker, a working man in a coach-factory in the parish, who astonished the company by quoting Aristophanes, Æschylus, and Sophocles; and then, as he expressed himself, "stripped himself of his plumes" by saying that he had learnt all he knew of them; first, by attending a lecture of Professor Browne, at that Library, on "Attic Tragedy;" and then by buying translations of the Greek poets, which he had read with delight and avidity. The evening passed over with great gratification to all; and at the close a vote of thanks to the Vicar and committee was passed by acclamation.

THE OMNIBUS TRADE.—Owing to the high rate of mileage duty and the advanced price of provender, several of the omnibuses in the principal thoroughfares have been taken off the road during the last few months, to the great inconvenience of the public. In 1853, 1848 omnibuses were licensed; last year, only 1160. Fifty omnibuses used to ply between Chelsea and Hoxton, but now only 26; on the Stoke Newington and Bank road one fourth of the number has been withdrawn; and so in like manner in other neighbourhoods.

PRESERVATION OF LIFE FROM SHIPWRECK.—On Thursday a meeting of the Royal National Life-boat Institution was held at the Society's house, in John street, Adelphi, his Grace the Duke of Northumberland, K.G., President of the Society, in the chair. A reward of £5 was granted to the crew of the life-boat of the institution stationed at Lytham, in consideration of their prompt conduct in going off to the assistance of the crew of the flat *John*, which was observed during a heavy gale of wind to have driven on the Horse bank, on the Ribble's fore coast. Also, a reward of £5 to a boat's crew for their laudable exertions in the rescue of human life. The Duke of Northumberland, after a few observations, presented the silver medal voted to Mr. Shaw, chairman of the Engine Works Association, who assisted the Lardships which the bill inflicted upon the class which he represented. Several other members having remarked upon the working of the Act, Sir William Molesworth in reply, promised to present the petitions. He would see Sir George Grey, the Home Secretary, on the subject, and in the meantime would give his best attention to the matter which had been laid before him.

LORD GODERICH AND HIS CONSTITUENTS.

LAST SATURDAY [illegible] holidays, the Liberal electors of Huddersfield entertained Lord Goderich, M.P., at a banquet in the Cloth Hall of that town of Lilliputian dimensions. It was the first time the most influential [illegible] had presided at a public meeting, and in the evening a public meeting was held in the Philosophical Hall, when Lord Goderich, as a member of the Government, explained the state of affairs, and the course he had pursued in Parliament during the two years he has been the representative of Huddersfield. Nearly 2000 persons were present.

After taking a survey of the present state of home politics, he considered the conduct of Government with regard to the war. He agreed with Mr. Layard that the Government of Lord Aberdeen was in no half degree responsible for the war, owing to their want of a decided policy. He think (said his Lordship) this war has been occasioned, not by a love of peace, but by timidity in the councils of the nation. Now that we were at war, however, he thought that we ought not to make peace unless upon such terms as were likely to secure the honour and dignity and the safety of Europe. Having disposed of the war, and passed on to the next great question of the day, Administrative Reform, he was glad to see that Government was beginning to show some coming out of its partiality in the matter:—

But, after all, it is not merely the Government who have something to do in the matter; we have all of us a matter to do; constituencies in fact on my own, the manufacturing districts, have much to do with this question. We are told that Parliament is filled with lawyers and now one has just lately served or alluded to. It has been stated at the exigencies of party, and at the request of influential members of Parliament. Now, let me tell you this, that if you desire to have Administrative Reform, to have those changes made in the mode of carrying on the business of the country, and of appointing men to discharge the duties of it as they're service, we must ourselves be prepared to bear the necessary expenses of Parliament, and not grudge the small contributions which are required to wait on the subordinates of Ministers to ask for favours. (Laughter.)

I am told that the most important seat in Parliament is Manchester. That is an important one no doubt, but I am modestly ignorant of the fact. I do not claim to be the most somniferous [illegible] but I may say that I am known to be a Liberal, and I do not have now to say that, as I desire Administrative Reform, and I believe it is important it should be effectually carried, that members of Parliament should maintain their independence and free opinion. I have one and determined that Mr. Hayter's office shall never again be that of a party whelp. (Cheers). That is the way to prove that we are in earnest. Let your constituents send to Parliament so-called Liberals, and there are plenty in town, who like to be the carriers of Whig and tories of the Treasury bag, they want favours for themselves and their friends. Let your constituents send men who are independent, who will support Administrative Reform. (Cheers). There were times when I should be unworthy of my position in the House of Commons if I could not call my self to account for my actions, but this I say, that I am not conscious of having given to her friends [illegible] Parliament, but I have kept in my constituents in good temper by the papers I have laid before the House, by the speeches I have made, and by the manner in which I have endeavoured to perform my duties to my constituents; and if the whole thing is to be ruined by pressure upon members of Parliament, and upon Ministers, the House of Commons is filled with incompetent men (Hear, hear). And to those gentlemen that are present to hear of persons who may support the Government, and who may not, I can only say, that after all the same or [illegible] and I shall be found in the same position as I have been. I think I have spoken you, I will not say, that the task of conducting the affairs of the country is not an easy one, but it is not to be done by arranging all matters at public meetings, but by the earnest co-operation, I may say, of every man in the country; and I believe, I shall not be deceived, that the administration of the country shall be carried on, as we often say, by the manner in which private business is carried on, before you arrive at that condition of affairs you will find [illegible] called upon to make a deeper sacrifice than perhaps you now contemplate. (Hear, hear). I, for one, am prepared to face the consequences of my [illegible] I am convinced that we are fighting a battle [illegible] and I believe that good administration here [illegible] will be followed by [illegible] whatsoever it may lead [illegible] (Cheers).

The meeting then separated.

After some considerable [illegible] Lord Goderich sat down amidst profound and enthusiastic cheering, he addressed having occupied nearly three hours and a quarter.

THE BERNE AND GENEVA RAILWAY.

(To the Editor of the ILLUSTRATED LONDON NEWS*)*

I have just with considerable interest the excellent article published in your [illegible] last Saturday, on the opening of a portion of the Western Railway [illegible], and, intended, when complete, to unite the towns of Morges and Geneva on the Lake of Geneva, with the Lyons of Neufchatel, on the lake of Neufchatel. This, however, being the first published account of that railway which has fallen under my notice, I feel, as the engineer who laid out the line and executed almost the whole of the work got up, that it is only just to myself that the public should be known. The construction of the branch of Lausanne, the railway passes generally through the [illegible] valley of the Vaud, was requested in 1844, by Mr. W. Haldimand, a Swiss gentleman, and afterwards adopted by Mr. Robert Stephenson, in his report to the Federal Government. The branch to Lausanne, however, was entered laid out by myself, and the greatest possible attention was given to secure the best line, under the various point of view of convenience to the town of Lausanne and port of Ouchy, and neighbouring villages, together with a facility for its execution to very moderate engineering. I regret that time much insisted upon, and which will probably be executed in the course of time.

I am, Sir, your obedient servant, G. H. PHIPPS, M.I.C.E.

24, Great George-street, Westminster, June 6, 1855.

THE *Opinione* of Turin states that it is in contemplation to connect Sardinia with Europe through Genoa instead of Spezzia. With this view the telegraphic line between La Spezia and Cagliari is to be connected by an submarine cable with Maddalena, and Caprera, and Civitavecchia, the latter coming in contact with Varna by suspended wires. Mr. Brett is expected this month of June, with the cable to be laid between that place and Algiers.

THE POPE effected his return from the country on the evening of the 23rd ult. The road between Castel Gandolfo and Rome was strongly guarded by detachments of gendarmerie, stationed at short intervals, and patrols of horse police, who perfectly succeeded in ensuring the safety of his Holiness.

A LETTER from Beyrout mentions the death of one of the French sœurs de charité, who had fallen a victim to her zeal and devotedness in the discharge of her duties. A number of persons attended her funeral, and for the first time in such a case which was carried before the clergy was seen escorted by Turkish soldiers, with their arms reversed.

THE CONSERVATIVE LAND SOCIETY.—On the 6th inst. a Leicestershire share oddet took out the shares No. 11,000, making the amount subscribed for by members since the formation of the society in September, 1852, £5,500,000! The withdrawals on this capital of half a million and upwards have been under £13,000, and the amount of land sold exceeds £404,000.

SPORTING INTELLIGENCE.

The principal event of the week has been the successful maiden appearance of John Scott's crack two-year-old, Fly-by-Night, by the Flying Dutchman, to whom two other Derby favourites—Bird-in-Hand and Polmoodie (a very elegant creature)—ran second and third. He is a low, lengthy, and very powerful colt, not unlike his sire about the head, and quite as heavily engaged as his unfortunate half-brother, Grœulus Eucrines, who has a large off-side, which sadly interferes with his training. The unexpected defeat of Habena, whose party were very confident, was also another "great fact" on the Vase day, and Claret cleared her at the Stand with the utmost ease. It is quite evident that she must have run some pounds below her real form. Oulston, a very ugly top-gered animal, out of Alice Hawthorne, won the Vase very cleverly; and taking a line through Rataplan, who forced the running from end to end, he must be set down as not better than Kingstown. He sprung at once to 3 to 1 for the St. Leger, which at present looks like a match between him and Hibernian. The public were sadly disappointed at the defeat of the old horse, who has always been a great favourite with them. Cocrebus has passed out of Joseph Dawson's stable; and it is said that Blooming Heather will not improbably become one of the Danebury string. Bird-in-Hand, Oaks defeat, by a bad mare like Marchioness, does not enhance her value The *on dit* is, that the Oaks winner was only backed in the stable for £25 by the gentleman in whose name she ran. Marlow, the jockey, is said to be progressing favourably; and it seems that it was not owing to his own extravagance, but to an unfortunate mortgage in which all his savings were invested, that his friends felt it their duty to open a subscription for him. Boopdoor completely failed in his attempt to go two-and-a half miles in the Ascot Stakes; and, after nearly pulling Aldcroft over his head in the first three-quarters of a mile, got completely beaten before they rose the hill, and walked in last of all. The public never believed in his power to accomplish a long distance; but such is their confidence in the Jethard stable (who quite thought so from his private performances with Fandango) that they made him first favourite. Mortimer's mean appearance was sadly against him, and backers on considered that his most appropriate sphere would be a light water art instead of a racecourse. However, his owner knew better, as he had tried him to be quite as good as he was at Chester, and booked victory as certain. Lord Clifden had a turn in the Hunt Cup with Chullee, a daughter of old Crucifix, who has greatly improved under Isaac Day's care.

The racing calendar has not much to invite the sportsman in its pages for next week. Monday will, however, be an afternoon of considerable interest at Tattersall's, as the Royal stud yearlings will be brought to the hammer. They number about thirteen or fourteen, and include a sister to Frantic, and a sister to Grapeshot. Ten of Lord Zetland's on Monday averaged 180 guineas each, which was made up by final bids of every kind from 455 guineas (the price of the colt by Orlando out of Little Finch), down to 12 guineas, so that the great prices of last year are not at all likely to be realised by Mr. Goodman's forced legged process of hunting, it is credibly reported that Sir John Trollope is to hunt the Cottesmore country in future.

The willow is being wielded in earnest at last. Clark and his eleven are taking their rest for a week, but on Monday the Marylebone Club and ground play the county of Sussex, at Lord's, and on Thursday the gentlemen of England encounter the gentlemen of the Marylebone Club on the same ground. We fear that we shall see very few public school matches there this year, as head-masters are unaccountably averse to their faces against them, and wish them always to be played in their school closes. The Marylebone Club the week past Surrey in one innings, by four runs; Haygarth contributing 97 to the score before sherman reached his stumps

On Tuesday the Oxford University sculls will be rowed for; and Saturday is appointed both for the Glasgow Flag Regatta and the Ranelagh Club aquatic sports. The latter will be sailed off Battersea reach, and a £10 silver cup will be the prize of the day. The entry for the Henley Regatta will be made on Saturday. Its prizes are valued at £136, the silver sherry not included; and comprise cups of every value from 100 guineas to 12 guineas, for all kinds of competitors, from eight-oar crews to sculers

ASCOT RACES.—TUESDAY.

Trial Stakes.—Coronet, 1. Early Morn, 2.
Seventh Ascot Triennial Stakes.—Fly-by-Night, 1. Bird-in-Hand, 2
Sixth Ascot Triennial Stakes.—Claret, 1 Clouds, 2.
Ascot Derby Stakes.—Ingratiar, 1. Hazel, 2
Ascot Stakes.—Merrimack, 1. Mishap, 2
Her Majesty's Gold Vase.—Oulston, 1. Rataplan, 2
Welcome Stakes.—Battercr, 1. Fan, 2

WEDNESDAY.

Fifth Ascot Triennial Stakes.—Wickedest, 1. Hi ken, 2.
Fernhill Stakes.—Flatterer, 1. Queen's Head, 2.
Royal Hunt Cup.—Chullee, 1. Orsan, 2
Sweepstakes of 15 sovs. each. Contention, 1 Redemption, 2
Coronation Stakes.—Alcyone, 1. Miss Fairman, 2
Hunt Cup Plate of 100 sovs.—Catsnaptan, 1. Octavia, 2
Her Majesty's Plate Saucebox, 1. Venison, 2

THURSDAY.

Prince Stakes.—Paletot, 1. Venison, 2, 3.
Visitors' Plate. Shorcham, 1 Lot and 2.
New Stakes.—Milton, 1. Polmoodie, 2
Grand Cup.—Fandango, 1. Rataplan, 2
Sweepstakes.—Alarm, 1. Orsan, 2.
Windsor Castle Stakes.—Professor, 1. Afghan, 2

A FORAGING EXPEDITION NEAR KERTCH. The Highlanders, in little parties, sought about for water, or took a stray pop at a "cat keep sake" in the houses on their way to the wells, but the French were ever before them, and grew into the grumbling way of appropriating to themselves all the spare shells. The houses were clean outside and in—whitewashed neatly, and provided with small well placed windows, which were barely adequate, however, to light up the tenor of their ways. The heat in the small rooms of the better class of mud inside was most oppressive and disagreeable: it seemed to proceed from the logs of like bread and vessels of fish all which were found in every cabin. Each cottage had its granary, stables for cattle, pens, boarders, and rude agricultural implements outside. The ploughs were admirably described by Virgil, and a reference to "Adams' Antiquities" will save me a world of trouble in analysing the country of Dodona-farmed out. The interior of the furniture was all smashed to pieces; the Lens and daubs, captives to the bow and spear of the Gaul, were cackling and quacking piteously as they were carried off in baskets from their homes by Zouaves and Highlanders. Every house we entered was ransacked, and every cupboard had a pair of red breeches sticking out of it, and a blue coat inside of it. Vessels of smoking oil, bags of sour biscuit, casks of flour or bam, wretched clothing, old boots, and bundles ripped up for treasure, the hideous pictures of saints on paneling or paper which adorn every cottage with lamps suspended before them, were lying on the floors. Large dressed themselves in faded pieces of costume or aped fancy long pendants in old drawers, and danced about the gardens. One house, which had been occupied as a guard-house, and was marked on a board over the door, "No. 7 Rangione," was a scene of especial confusion, for masses had evidently fled in great disorder, for their great-coats and uniform-jackets still lay on the floors, and flags of the black bread filled every corner, as well as an immense quantity of old books. A Russian Testament in this indigenous art not finding anything of value, had with great wrath devastated the scanty and nasty-looking furniture, was informing his comrades outside of the atrocities which had been committed, and added, with the most amusing air of virtue in the world, "Ah, Messieurs, Messieurs! ces brigands, ils ont volés tout!" No doubt he had settled honourably with the proprietor for a large bundle of yellow, like Sir Peter Laurie, and considered that he and which were offered to us on very reasonable terms. Notwithstanding the great richness of the land, little had been done by man to avail himself of its capabilities. It never in my life saw such quantities of weeds or productions of such inexorable ferocity towards pantaloons, or such eccentric flowers of such huge dimensions, as the ground outside these cottages bore. The cabbages were evidently gazeters rather than agriculturists. Around every house were piles of a stubs acre like peat, which is made, we are informed, from the dung of cattle, mixed as well, I suppose, with straw, and baked and dried away. None were taken that I saw, though the quantity must have been very great which fed on the fields around. Poultry and ducks were, however, captured in some dance; and a party of Chasseurs, who had taken a huge well-looking buck, were in high delight at their fortune, and soon dispatched and cut him up into fits with their swords. There were some thirty or forty houses scattered about the ridge, but all were pretty much alike. The smell was equally disagreeable in all, in spite of wh ewash, and we were glad to return from a place which a letter of the 21st said "A Glasgow beggar wad na tak a gift of."

Letter from Kertch, May 24.

On the 23rd ult. there were 190 cases of cholera at St. Petersburg

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Compared with the previous week, the amount of business transacted in the Consol Market, since our last, has been small. Prices have, therefore, shown a tendency to decline, in consequence of the unfavourable tribute of carrying. The demand for money for commercial purposes has improved, yet we find that the applications to the Bank of England have not increased in number. From this fact that the charge for discount accommodation is lower by fully one-half per cent in Lombard-street. The stock of gold in the Bank is still increasing, notwithstanding that the French exchanges have taken a turn against us, and the imports of that metal this week have been good—viz., £197,000 from New York, £9000 from the Peninsula, and £60,000 from Australia, together with a larger quantity of silver 2,400,000 dollars—from Mexico and the West Indies. The shipments have comprised £483,000, chiefly silver, to India, China, &c.; and about £50,000 to the Continent

During the transactions in national Stocks were limited:—The Three per Cents Reduced were 91¾ up to 92; Consols for Account, 91¾ to 92; the New Three per Cents, 92¾ ⅜. Long Annuities, 1860, were 3 15-16; Ditto, 1885 (the Stock), 16⅛. Exchequer Bills, 1000*l* each, were done at 2½ to 2⅝. Exchequer Bills, 1858, 1s. to 2s.; Omnium, 5 prem. Exchequer Bonds, 100 ⅝ There was much dullness in the market on the following day Bank Stock realised 208½ The Three per Cents Reduced were 91¾ ⅝; Consols for Account, 91¾ to 91⅞; and the New Three per Cents, 92¾ ⅜. Long Annuities, 1860, 3⅞; Ditto, 1859, 3⅜; Ditto, 1885, 16⅝ The dimness was observed on the 4th prem. Exchequer Bills, 36s. to 2s. Ditto Bonds, 100*l*. Wednesday's business was rather limited: Bank Stock, 210 The Three per Cents Reduced were 91¾ to ⅞; the New Three per Cents, 91¾ to 92⅛; Consols for Account, 91¾ to ⅞; Long Annuities, 1860, 15⅞; Ditto New, 2¾ to 2⅞; India Bonds, 22s.; Exchequer Bills, 20s. to 23s. prem.; Exchequer Bonds, 100*l* ¼. The Stock Market was rather dull on Thursday The Three per Cents Reduced were 91¾ ⅞; the New Three per Cents, 92¾ ⅞; Consols for Account, 91¾ to ⅞; Exchequer Bills, 19s. to 22s.; India Bonds, 20s. premium; India Stock, 205 to 208

The demand for the Foreign Loans has been devoid of interest; yet, with very few exceptions, no material change has taken place in the quotations Brazilian Five per Cents have realised 100; Ditto, Small Ones, Buenos Ayres Six per Cents, 91¾ to ⅞; Ditto, Three per Cent, 74; Mexican, Three per Cents, 23½, Peruvian Five per Cents, 88; Portuguese Three per Cents, 41; Sardinian Five per Cents, 86¾ ex div.; Spanish Three per Cents, 38¾; Ditto, New Deferred, 18¾; Ditto, Passive Certs, 8¾; Dutch Two-and-a-Half per Cents, 64; Ditto, Four per Cents, 95¾; Ecuador, 3¾; Granada One-and-a-Half per Cents, 16⅜; Venezuela, 29¾; Russian Five per Cents, 100; Ditto Four-and-a-Half per Cents, 90¾; Belgian Four-and-a-Half per Cents, 93¾

The following statement shows the state of the note circulation in the United Kingdom during the four weeks ending on the 12th ult.

Bank of England	£20,182,578
Private Banks	3,067,063
Joint-stock Banks	4,14,879
Scotland	3,931,501
Ireland	6,412,270
Total	37,515,608

Compared with the previous week there is an increase in the total circulation of £160,543, but a decrease of £1,000, when compared with the corresponding month in 1854

The fluctuations in the value of Bank Shares have not been large Australasia have realised 84½, 84; China, 30; Oriental, 54; Crystal Palace, 2¾; General Screw Steam Shipping Company, 15¾; London Dock, 102; East and West India, 121; Victoria, 18; North of Europe Steam, 12¾; Civil Service, 6¾; Imperial and General, 3; Peninsula and Oriental Steam, 91¼ Union Bank, 7¾; Colonial Shares were ruled dull—Australian, 84; Canada, 104; Bank, 104; Ditto, 102; Ditto, 98; Ditto, 94; Loan Company, 97; Neath, 12; Oxford, 110; Regent, 14; Stafford and Worcester, 42½; Stourbridge, 285. Water-works Shares have been inactive. Berlin, 14; East London, 105¾; Grand Junction, 68½; Kent, 75¾; Southwark and Vauxhall, 92¾; West Middlesex, 91; Ditto, New, 16¾. In Gaslight and Coke Companies' Shares very little has been done. Imperial, 117; Great Central, 11¾; Ratcliffe, 7½; Surrey Consumers, 11 Insurance Companies Securities have met an inactive market. In prices nearly any change has taken place Bruce shares have sold — Hope, at 12; Waterloo, 6; Vauxhall, 2¼; Ditto, Old Annuities of £3, 82½; Ditto, New, of £7, 2⅝

Railway Shares have been flat and drooping, with a dull market. The following are the official closing prices on Thursday

ORDINARY SHARES AND STOCKS.—Aberdeen, 56; Caledonian, 68¾; Chester and Holyhead, 15½; East Anglian, 1½; Eastern Counties, 12½; Edinburgh, Perth, and Dundee, 104; Great Northern, 92¾; Ditto, B Stock, 136½; Great Southern and Western (Ireland), 100; Great Western, 68; Lancashire and Yorkshire, 81½; London and Brighton, 109½; London and North-Western, 102½; London and South-Western, 84¾; Ditto, £50, 39½; Ditto, £10, 31½; Manchester, Sheffield, and Lincolnshire, 21; Midland, 74½; North British, 31½; North-Eastern, Berwick, 79½; Ditto, Extension, 13½; Ditto, Leeds, 91½; Ditto, York, 84½; North Staffordshire, 12½; Shropshire Union, 4¾; South-Eastern, 66¾; Vale of Neath, 21¾

PREFERENCE SHARES.—Aberdeen, No. 2, 95; Edinburgh, Perth, and Dundee, Fourper Cent, 63; Great Northern Five per Cent, 117; Ditto, Four-and-a-Half per Cent, 103; Great Western, Birmingham Stock, 76; Lancashire and Yorkshire Six per Cent Stock, 140; Midland Consolidated, 111¼; Ditto, Three per Cent Midland Consolidated, 59; North British, 100½; North-Eastern—Berwick, Four per Cent, 95½; North Staffordshire, 23; South-Eastern Four-and-a-Half per Cent, 100; Stockton and Darlington Five per Cent, 117

FOREIGN.—Antwerp and Rotterdam, 9; East Indian Five per Cent, 2½; Grand Trunk of Canada, 9½; Great Luxembourg, 3⅞; Great Western of Canada Shares, 23¾; Paris and Lyons, 44; Rouen and Havre, 7½; Western of France, 24¾

Mining Shares have been flat. On Thursday British Iron were 4; Fortune, 1¼; United Mexican, 6¾

triday Afternoon.

There is only a moderate business doing in Consols to-day. Prices, however, are tolerably firm. The Three per Cents, for the Account, are 91¾ ⅞; the Three per Cents Reduced, 9.3; and the New Three per Cents, 92¾ ⅜. Bank Stock, 210 Foreign Bonds and Railway Shares are steady

THE MARKETS.

CORN EXCHANGE (Friday). We continue to be very moderately supplied with English wheat. Change, however, to the present day fine weather, and the favourable accounts at hand from all parts of the country respecting the appearance of the crops, a large portion of all kinds of wheat of home produce rule heavy, at barely Monday's prices. There was a moderately supply of foreign wheat, in many of which were almost nominal, and floating cargoes can manded very little attention. We had a slow t be for both barley and malt at previously rule place on these terms. The malt trade was dull, and inferior sorts were rather easier to purchase. Peas and beans were but little was do

Liverpool Corn Trade.—Liverpool, May 30.—Wheat, 1859 cash, 6s. to 6s. 2d.; 1855 Irish oats 26.0 foreign, wheat 10,089; barley, 0; oats, 2,940; flour, 8300 sacks; Odd barrels, 400.

Ipswich. Wheat, Essex and kent, 4s. to 78s.; ditto, white, 77s. to 82s.; Norfolk and Suffolk red, 70s. to 75s.; rye, 46s. to 48s.; grinding barley, 34s. to 35s.; distilling ditto, 36s. to 38s.; malting ditto, 40s. to 42s.; malt, Norfolk and Suffolk, 60s. to 72s.; brown ditto, 62s. to 64s.; Kingston and Ware ditto, 70s. to 72s.; Yorkshire and Lincolnshire ditto, 68s. to 70s.; Scotch ditto, 72s. to 74s.; oats, Dutch black, 24s. to 25s.; ditto, white, 25s to 26s.; Irish ditto, 23s. to 24s.; grey peas, 40s. to 42s.; maple ditto, 42s. to 44s.; white ditto, 42s. to 44s.; boilers, 44s. to 46s.; Essex and Suffolk beans, 40s. to 42s.; tick ditto, 38s. to 40s.; tares, 6s. to 7s.; country marks, 42 to 46s. per 280 lbs.; American flour, 30s. to 32s. per barrel

Seeds.—At agricultural seeds are slow in sale, at last week's currency. Linseed and rapes seed, inclusive, were of steadily at full prices

Linseed, English, sowing, 74s. to 78s.; Baltic, crushing, 70s. to 72s.; Mediterranean and odessa, 68s. to 69s.; hempseed, 48s. to 50s. per quarter. Coriander, 20s. to 21s. per cwt. Brown mustard seed, 10s. to 14s.; white, 14s. to 16s.; tares, 8s. to 9s. per bushel. English rapeseed, £23 0s. to £25 0s. per last of ten quarters. Linseed cakes, £10 15s. to £11 5s.; ditto, foreign, £11 10s. to £12 0s. Rape cakes, £6 10s. to £6 15s. per ton. Canary, 48s. to 50s. per quarter. Red clover seed, English, 52s. to 66s.; white ditto, 62s. to 72s. per cwt.

Imperial Weekly Averages.—Wheat, 77s. 7d.; barley, 33s. 2d.; oats, 23s. 3d.; rye, 46s. 2d.; beans, 40s. 4d.; peas, 42s. 3d

The Six Weeks' Averages.—Wheat, 78s. 4d.; barley, 35s. 9d.; oats, 27s. 1d.; rye, 45s. 1d.; beans, 40s. 8d.; peas, 40s. 9d.

English Wheat Last Week. Wheat, 16,523 barley, 14,238; oats, 11,508; rye, 600; beans, 6980; peas, 329 quarters.

Bread. The prices of wholesom bread in the metropolis are from 10d to 10½d.; of household ditto, 8d to 9d. per four-pound loaf

Tea. Large public sales have been held this week, and the demand has fallen off. In prices, scarcely any change has taken place

Sugar. Our market has been very inactive, and most kinds of raw sugar have given way 6d per cwt. Barbadoes has changed hands at 56s to 61s.; brown Mauritius, 52s. 6d. to 54s.; yellow, 55s. 6d. to 59s. 6d.; Bengal, 52s. to 54s. 6d per cwt. Dutch, 50s. 6d. to 53s. 6d. to 60s.; grabay, 45s. to 45s. 6d.; Madras, 52s to 53s per cwt. Refined goods are firm. Brown lumps, 68s. 6d.; pale, 69s. 6d. to 70s. 6d. per cwt

Coffee. The transactions in this market have been confined to immediate wants In the value of ordinary descriptions has taken place. Good ordinary Cheribon, 47s. to 47s. 6d. per cwt

Rice.—There is a full average business doing in this article, the prices of which are well supported

Provisions.—New Irish butters have sold to a moderate extent, and fine Waterford has realised 90s. to 92s. per cwt. In foreign qualities very little is doing, at further depressed rates. English butter is very dull, but not lower. Bacon moves off slowly, at barely the late decline. All other provisions are slow sale

Tallow.—Our market is very inactive. P Y C. on the spot is selling at 52s. to 52s. 6d., October to December, 51s. 6d per cwt. Town tallow, 49s 6d.; rot cash.

Oils.—The demand for most oils has improved, and the quota tions have an upward tendency. Linseed on the spot, 30s., and for forward delivery, 41s. per cwt. Pale rape is worth £36 to £36 10s.; brown, £34; sperm, £133 to £134; cod, £46 to £46 10s. In turpentine very little is doing—spirits, 34s. to 35s 6d.; rough, 8s. 9d to 9s. per cwt

Spirits. There is a steady demand for, rum. Proof Leewards, 2s. 3d. to 2s. 4d.; East India, 2s 3d. to 2s. 3d per gallon The brandy market is rather active, and prices have an upward tendency. Cognac spirits, 10s. 3d. cash; Geneva, 2s. 9d to 2s. 6d per gallon.

Hops (Friday).—We continue to have a good demand for Sussex hops, the prices of which have further advanced. All other kinds are quiet as done at last week. Mid and East Kent, £4 0s. to £6 0s.; Weald of Kent, £3 10s. to £5 10s.; Sussex, £3 0s. to £5 10s. per cwt

Coals (Friday). Hollwell, 18s.; Squoberwm Methyr, 22s. 6d.; Wayn. Methyr 22. 6d per ton.

Smithfield (Friday). The supply of beasts in to-day's market was seasonably extensive and the demand for all kinds ruled heavy, at a decline in the Monday's quotations of 6d per 8 lbs. We were fairly supplied with sheep, which moved off heavily at 6d. per 8 lbs. lower Lambs were exceedingly dull, and 8d. per 8 lbs lower than on Monday. In calves very little was done, at 6d to 8d. per 8 lbs. less money Pigs were very dull, and cheaper. Mile cows moved off heavily, at from £14 to £19 each, including their small calf

Per 8 lbs. to sink the offal.—Coarse and inferior beasts, 3s. 2d to 3s. 4d.; second quality ditto, 3s. 6d to 3s. 10d., prime large oxen, 4s. 0d to 4s. 2d.; prime Scots, 4s. 4d. to 4s. 6d.; coarse and inferior sheep, 3s. 6d. to 3s. 8d.; second quality ditto, 3s. 10d to 4s. 0d.; prime coarse-woolled sheep, 4s. 2d. to 4s. 4d.; prime Southdowns, 4s. 6d. to 4s. 8d.; large lambs, 5s. 2d. to 5s. 6d.; prime small ditto, 6s. 0d. to 6s. 4d.; large hogs, 3s. 8d. to 4s. 0d.; neat small porkers, 4s. 2d to 4s. 4d.; lambs, 5s. 6d. to 6s. 8d.; suckling calves, 22s to 28s.; and quarter-old store pigs, 21s. to 27s. each. Total supply beasts, 2470 cows, 171; sheep and lambs, 6600; calves, 350; pigs, 230. Foreign: beasts, 190; sheep, 230; calves, 0; pigs, 0.

Newgate and Leadenhall. (Friday).—The trade was extremely dull, at drooping prices:—

Per Blbs. by the carcase:—Inferior beef, 3s. 4d. to 3s. 6d., middling ditto, 3s. 6d. to 3s. 8d.; prime large ditto, 3s. 8d. to 3s. 10d.; ditto small 4s. 0d. to 4s. 2d.; large pork, 3s. 2d. to 3s. 8d.; inferior mutton, 3s. 2d. to 3s. 4d.; middling ditto, 3s. 6d to 4s. 4d.; prime ditto, 4s. 6d. to 4s. 10d.; veal, 3s. 4d. to 4s. 10d.; small pork, 3s. 10d. to 4s. 4d.; lamb, 5s. to 6s. 4d.

TUESDAY, JUNE 5.

WAR-OFFICE,

1st Life Guards: Lieut.-General P. A. Latour, C.B., to be Colonel

1st Dragoons: Lieut.-General H. Bar [illegible]

2nd Dragoons: Lieut.-General [illegible]

3rd Light Dragoons: Ensign W. C. Goldie to be Lieutenant

5th Dragoons: Sergeant-Major J. B. Moulton to be Quartermaster

6th Dragoons: Ensign W. C. Goldie

Coldstream Guards: Surgeon-Major Arthur Sedgwick, M.D., to be Assistant-Surgeon

F. Bowen, M.D., to be Assistant-Surgeon

1st Foot: Lieut. A. Worthington to be Captain

2nd: Lieut. A. Worthington to be Lieutenant

8th: C. W. Bacshaw and W. Gibson to be Ensigns

9th: Second-Lieut. J. C. Brown to be Lieutenant

13th: Ensign W. G. H. Grubbe to be Lieutenant; J. Allen to be Ensign.

21st: Lieut. H. S. Reynolds to be Captain; Ensign R. B. Twining to be Lieutenant

The appointment of the Ensign appointed on June 1, 1855, to 4 Hartford, and not Bradford as previously stated

23rd: W. Lyttelton to be Ensign

49th: Lieut. T. D. Forde to be Captain.

50th: G. Chrane to be Ensign.

[illegible]

ON STAND-BY.—Brevet Lieut.-Col. A. T. Hey and to have his Brevet rank converted into Substantive Rank

BREVET. Brevet Lieut.-Col. D. Forbes to be Colonel; Major H. E. M'Gun to be Lieutenant-Colonel; Capt. C. W. Reynolds to be Major; Capts. A. Barnard to have the local rank of Major in Turkey.

MEDICAL STAFF.—Inspectors-General of Hospitals with local rank, W. Henry and W. [illegible] to be Inspectors-General of Hospitals. To be Inspectors-General of Hospitals A. [illegible] and A. Baird to be Inspectors-General of Hospitals while [illegible]

BRITISH FOREIGN LEGION.—Colonel J. Kinloch to be Inspector-General of Hospitals and R. J. Ward, to be Assistant-Inspectors, with the rank of Captains. Depot at Shornclife: J. F. Towers to be Major Commandant, with the Brevet rank of Lieut.-Colonel; R. A Fowler to be Staff-Paymaster; C. Knight to be Staff Quartermaster; F. Schmidt to be Brevet-Major; H. Gloumann to be Field Constable Depot at Reigniland: Lieut.-Col. [illegible] to be Commandant; C. Addison to be Staff-Paymaster; D. Miles to be Staff Quartermaster; Dan one to be Staff Surgeon 1st Class. First Depot of Rifle Battalion, Major C. S. von Bussow, to be Major Commandant. First Line Battalion: K. Murray to be Major Commandant, with the Brevet rank of Colonel; A. F. Shaw to be Major Second Line Battalion: H. H. von Alten to be Major Commandant

THIRD LEGION.—Lieut.-Col. W. Melville to be Commandant; Major [illegible] Wauchope, Major [illegible] Wauchope, Major [illegible] Wauchope, A. Wauchope, Major [illegible] Wauchope, Major [illegible] Wauchope, Major [illegible]

THE ASCOT CUP, 1855.—(FROM "THE LADY OF THE LAKE.")

THE ASCOT RACE-PLATE.

THE Ascot Prizes, which have been contested for during the week, in design and manufacture fully sustain the great advancement in this branch of art which we have had the satisfaction to record with each successive year of late. They are picturesque and poetic in character, and present strange contrasts with the old Race-cups—mostly imitated from poor Italian or pseudo-classic models. In these days our artists mostly borrow the subjects from history or poetry, and, catching inspiration from the author, work out his design with the aids and accessories of characteristic detail; and his design, being transferred to the artisan, is wrought with spirit and exquisite finish, so as to rival the finest school of metal-work. A few evenings since, at the *conversazione* given by Lord Londesborough to the Numismatic Society, how strange was the contrast between the assemblage of early German plate and the Race prizes of our own day: the one quaint, curious, and grotesque in form; and the other simple and natural in outline, yet presenting an equally fine specimen of working in metal with that of the remote period.

Two of the three Ascot prizes for the present year are groups illustrative of modern poetry. First, is the *Queen's Gold Cup*, manufactured by Messrs. Garrard, goldsmiths to the Crown, from a design and model by Mr. E. Cotterill, whose equine compositions we have so often had occasion to commend. His present work is a group of statuettes in silver, in illustration of Burns's masterpiece, "Tam o'Shanter." The subject is old and familiar, but Mr. Cotterill's treatment of it is novel and striking. "Tam," mounted on "Maggie," has just reached the "key-stane," in time to escape, but not without losing her tail, of which the vengeance of the carline, is represented in the act of depriving the old mare. Poor "Maggie" could scarcely have gone a yard or two further; and the artist has most successfully portrayed an animal who has done her best, and can do no more—a more instructive position than that of a race-horse at the winning-post.

The Ascot Cup has also been manufactured by Messrs. Garrard, from a design and model by Mr. W. Spencer. The subject is an incident from Sir Walter Scott's "Lady of the Lake:" during the games at Stirling, which James the Fifth attended, the exiled Douglas appeared and joined the sport, an unbidden guest. He had been declared victor in every trial of strength and skill, when a noble stag was let loose, intended to be pulled down by the Royal hounds; but Lufra darted from her master's side, and, like him, soon gave evidence of her superiority. The indignant huntsman, in revenge, struck the dog, when Douglas, with one buffet, laid him stunned at his feet. Then

> C.amoured loud the Royal train,
> And brandished swords and staves aman;
> But stern the Baron's warning "Back!
> Back, on your lives, ye menial pack!
> Beware the Douglas."

This group is throughout a masterly composition.

The Royal Hunt Cup has been manufactured at the establishment of Messrs Hunt and Roskell, gold-smiths to the Queen, from a design and model by Mr Alfred Brown, whose graceful productions we have often engraved. The present Prize differs altogether in its character from either of the preceding groups. It is a candelabrum of pure silver, and consists of the twisted stems of vines supporting sockets for lights. Upon the rocky base is seen a combat between two dogs and a wolf; the wolf has disabled one of his antagonists, but the other has seized him by the throat. This superb piece of table-plate is admirable for its bold and simple design and high finish.

THE ASCOT ROYAL HUNT CUP, 1855. THE QUEEN'S ASCOT GOLD CUP, 1855.—(FROM "TAM O'SHANTER.")

THE EMPEROR OF AUSTRIA.

THE attachment of his Imperial Majesty to field sports and the chase is well known: his closely-knit frame and activity eminently qualifying his Majesty for these enjoyments. On the 28th ult., according to the well-informed Correspondent of the *Times*, "his Majesty the Emperor went capercailzie shooting in the Styrian mountains. As is his wont on such occasions, he wore the costume of the country, which consists of a loose "pike-grey" coat with green facings, a grey and green waistcoat, black leather shorts, ribbed white stockings, and half-boots. If to this is added a green hat, ornamented with the tail-feathers of the cock of the woods and the beard of a chamois, you have the complete costume of the Imperial "Jäger" as he descended from the train at the foot of the Semmering."

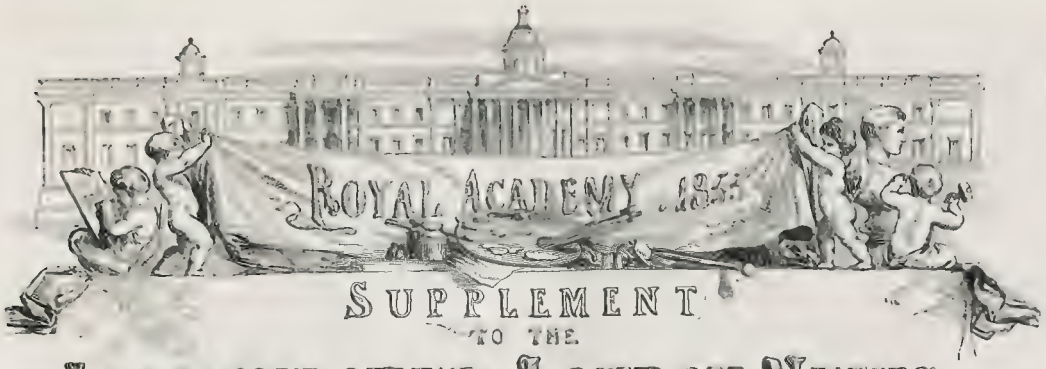
THE EMPEROR OF AUSTRIA, IN HIS "JAGER" OR STYRIAN COSTUME.

The accompanying Portrait is from a print recently published in Vienna.

THE IMPERIAL CONTEST.—Under this title, Messrs. Jaques, of Hatton-garden, have just issued a Game, which has, at least, the attraction of novelty to recommend it. The antagonism of the game, which is played upon a board marked at right angles, as in chess, is indicated by the designation. The Emperor and his soldiers occupy the centre square; the Allies—namely, the English, French, Turks, and Austrians—lining the four sides, which are uniformly stamped with a crescent, symbolical of the Ottoman Empire. The "contest" is carried on by mutual aggression, and not by a mere defence, as in other games of an analogous kind. The Emperor endeavours to reach the remote squares, by moving in straight lines; which the Allies strive to prevent, by a general system of circumvention. The game is obviously based upon mathematical principles, and its balance of strength is pretty evenly maintained. Although simple in its laws, and of easy and immediate acquirement, it is in the power of neither side to win without considerable strategy; and hence, as a preliminary study to the more recondite game of chess, the "Imperial Contest" merits the attention of young people, besides being useful as a mental exercise.

LORD RAGLAN AND HIS LITTLE LADY FRIEND.—A little girl, Christiana Benson, daughter of the late Mr. Benson, of Annan, sent three pairs of wristlets to Lord Raglan in December. They were characteristically acknowledged in the following letter:—"Before Sebastopol, April 22, 1855. Dear Miss Christiana,—I received only last night your little note of 20th Dec., forwarding to me three pairs of very nice wristlets. Although the winter is over, and the weather is generally fine, yet occasionally there is a very cold wind, and wristlets are still most acceptable, and add materially to one's comfort. I shall wear those you have so kindly bestowed upon me with the greatest of pleasure; and I shall ever remember with pride and satisfaction the little girl whose feelings of benevolence dictated so useful an offering. Yours, very gratefully, RAGLAN.—Miss Christiana Benson, Ecclefechan, Scotland."

ANCIENT POSSESSIONS OF THE "LORDS OF THE ISLES."—On the 30th ult. the estate of Kilmuir, as it has been called, in the north end of the Island of Skye, was sold in the Parliament-house, Edinburgh, to Captain Fraser, of Kildrokie, at the upset price of £30,000. This estate comprises the most valuable portion of what remained of the once kingly possessions of the Lords of the Isles.



SUPPLEMENT
TO THE
ILLUSTRATED LONDON NEWS.

No. 747.] SATURDAY, JUNE 9, 1855. [VOL. XXVI.

ART EXHIBITIONS OF 1855.

WE this week redeem our promise, and devote a Supplement to the three leading Art Exhibitions—viz., the Royal Academy of Arts, the Old Society of Painters in Water-Colours and the New Society of Painters in Water-Colours.

Our range of selection is, indeed, large—the three Exhibitions from which our Engravings are made, including 2228 works of art, contributed by more than 1000 different artists.

The difficulty of selection from so large a range, is, indeed, great; but the difficulty is still greater than many will at first imagine. By some publishers it is thought (very foolishly we are sure) that an engraving of a picture in so popular a paper as the ILLUSTRATED LONDON NEWS would interfere with its sale as a separate engraving. Then the rules of the Royal Academy will not allow a picture to be copied—even at daybreak—while it is within the walls of the Academy, and the painter himself (mind this!) is only too anxious to have his labours made known to the tens of thousands who have no chance of ever visiting the Academy. This harsh and foolish rule is confined to the Academy; no other Art Exhibition in London has so unmeaning an exclusion. And this rule as respects the

BRITOMART UNARMING."

...ly harsh. Some of your best artists reserve ... sketches to ... ment, and are naturally unwilling ... to be made from what they consider ... unfinished work. As young blood is admitted into the Academy, the most unnecessary regulation will surely be rescinded.

In spite of a rule so useless and unmeaning, we have this week ... pleasure in presenting to our readers five pictures from the ... Academy Exhibition: two by two of the most distinguished of the Academicians—Mr. Maclise and Mr. Creswick; and one by a ... distinguished Associate—Mr. F. R. Pickersgill. The remaining two are by very able and still improving artists—Mr. Ansdell and Mr. Faed—already established favourites with critics ... connoisseurs, and—almost better still—with the public at large.

THE ROYAL ACADEMY.

We have heard three remarks made about the present Exhibition that have much good sense to recommend them. First, that the Exhibition is but ill supported either by talent or numbers; second, that portraits prevail more largely than has been seen since the death of Sir Thomas Lawrence; and, third, that the hanging of the pictures has been in several remarkable instances (to which we shall have occasion to refer as we proceed) manifestly unjust.

Of the fifteen hundred and fifty-eight works of art exhibited, only one hundred and sixty-four have been contributed by members of the Academy, and these are hung in every instance in the best places—on the line. It will be said by some within the walls of the Academy that this small part of the Exhibition is the Exhibition itself; but this is very far from the case. True it is that, with a very few exceptions, all the best ... contributed by members of the Academy; but not less true is it ... some of the very worst, and those among the best hung, proceed from this favourite body.

The rules of the Academy allow a member to exhibit not more than ... works of art. This year only three members, and those three portrait-painters, avail themselves of this privilege. These three are Mr. ... Pickersgill, Mr. Frank Grant, and Sir William Ross. The next ... prolific contributor is another portrait-painter, Mr. Boxall, who ... with seven portraits. In the next great number, the landscape-... with the portrait-painters. Thus Mr. Lee (a hanger) sends ... ; and Sir John Watson Gordon contributes six portraits; ... Cooper, an Associate, sends six landscapes and cows; and ... Ross, another Associate, contributes six miniatures. From Mr. ... we have (as we are happy to think) five most excellent pictures. Others contribute four, three, and two works of art, while eight send ... one each, and twelve are absentees.

Among the members who are absentees we may mention all the architects—Barry, Hardwick, Smirke, and Cockerell; one sculptor—the elder Westmacott; and five painters—viz., the two Landseers, Mulready, Chalon, ... Eastlake. A list of Associates we refer, with regret, Mr. Alfred ... and Mr. Lance. We can ill spare the rich Italian banditti ... of the one, or the momentary thoughts and unuttered sighs of the other.

Our readers who live remote from London, and who have no opportunity of examining the Exhibition for themselves, will thank us for a general notion of the arrangements of the rooms. In the East or Great ... the places of honour on the line are given to Mr. Maclise's "Orlando;" Mr. Herbert's "Lear and Cordelia," Mr. Hart's "Captivity of ...," Mr. T. M. Cooke's "North Sea Breeze on the Dutch Coast," ... scene from Spenser," by Mr. F. R. Pickersgill. These are the first pictures that engage attention when viewed from the Centre Room. As we follow *the line* a little nearer and still more intently, other pictures of merit, but of less dimensions, are observable. Thus here is a female head (Beatrice) by the President, Sir Charles Eastlake; another ... head (Charistabel) by Mr. Dyce, two small Websters, a charming ... Egg, a little Leslie, two small Friths, three Copes of reasonable ... and average merit, and a small John Lewis that more than ... the most ... examination. Above these the portraits engross ... the available space. Over Mr. Maclise's "Orlando," a "Yeomanry Officer on Horseback," of the size of life, scowls on the canvas of Mr. F. Grant. Over Mr. Herbert's "Lear and Cordelia" is seen a full-length of "Joseph Robinson Pease, Esq.," of Hesslewood, East Yorkshire, painted by Sir John Gordon, and presented to Mr. Pease, as the Catalogue informs us, by his friends and neighbours." Over the "Tyrant of Padua," by Mr. Hart, hangs a full-length of "Colonel Haldyard, painted for the Town-hall of Stokesley: and over Mr. Pickersgill's "Britomart" is seen "Mr. Gladstone" at full-length, in the robes of the office of Chancellor of ... those very robes which Mr. Disraeli surrendered to him ... Between these conspicuous full-lengths are ... portraits of much greater merit—some by Mr. Grant, ... by Sir John Watson Gordon; Mr. Desanges standing his ground ... ably and skilfully among them all.

Stepping westward, we enter the "Middle Room;" and here, on each side of the west door are hung two scenes of maternal gratitude—one by Mr. Hook, the other by Mr. Millais. Mr. Hook's picture is called "The Gratitude of the Mother of Moses for the Safety of her Child;" ... Mr. Millais's is entitled "The Rescue." The Scriptural incident is well known—the infant Moses rescued from a watery grave. Mr. Millais's is a scene from everyday life—the rescue by a London fireman ... real Higginbottom—of a family of infants, and the expressive gratitude of the mother at the restoration of her children. The central spot, on ... north side, is occupied by Mr. Hart's "Othello and Iago," crowned by an admirable full-length portrait of "Sir Peter Laurie," by Mr. Grant. ... pictures of position in this room that arrest attention may be few ... "The Nearest Way in Summer Time," by Mr. Creswick and Mr. Ansdell (Engraved in this Supplement, p. 545); ... "Scotch Gamekeeper," by Mr. Ansdell (another feature in our paper of this week, p. 540); two clever Scottish Kirk scenes—one by Mr. Phillip, the other by Mr. Stirling; a fine head of the "Bishop of Mauritius," by ... small; and one not less fine, by the same artist, of "Mr. Rendel, the ... Mr. Lee's excellent and suggestive twin picture of the "Life ... of the Second Duke of Buckingham of the Villiers Family," ... "Contrast;" Mr. Johnston's "Abdication of Mary Queen of Scots," Mr. Glass's "Prairie Scenes;" Mr. Sant's "Fortune-Teller;" Mr. F. Goodall's "Arrest of a Peasant Royalist;" Mr. Herbert's portrait of "Horace Vernet;" "A Fruit Piece," by Mr. Lance; ... Boxall's "Sunshine;" "Decameron;" Mr. Horsley's "Scene from ... Comedy;" ... "Angel of Archdeacon Sinclair," by Mr. Horsley; ... half-length of Lord Iwin Landseer," by Mr. F. Grant.

In the West Room, four large pictures engross, and not improperly, every eye. The position of ... Lee's are of Royal Academician ... and two by outsiders. Mr. Roberts contributes a grand "View of ... Abbey, Midlothian, a Subject ... Mr. Stanfield exhibits a noble picture of the ... of St Nicholas." The outsiders are Mr. Le Jeune and Mr. ... The latter has displayed many of his advantages in his "Cimabue Procession," the picture having been sent to obtain (in his private view), the latter not inadvantageously in "Aaron and Hur holding up the hands of Moses ... Israel might prevail." The centre of the south side is worthily filled ... Mr. Smith's "Eden"—a child with flowers, much in Sir Joshua's manner. ... South Room is dedicated, as of old, to Miniatures, Drawings, and ... In the department of miniatures Sir William Ross, Mr. ... Mr. Derrick, Mr. Wells, and Mr. Gullick are seen in honourable ... The place of honour is given to a full-length, by Mr. Moira of "Don Pedro V., King of Portugal." Immediately above hangs a drawing of Lord Lyndhurst, by Richmond. The chief novelty in this room is a very clever portrait, by Millais, of Mr. John Leech, the bookbone of Punch as an artist, and manly in his look withal, though described in the Catalogue as *Mrs.* John Leech.

The North Room is set apart, as formerly, for the reception of an ill-assorted mixture of architectural drawings, flower-pieces, and surplus oil-pictures. No one work of art arrests the eye.

From what we could see in the Octagon Room, the general arrangement may, like very pictures—looked very muchas of old. We were chiefly pleased during our short stay in this room by the careful attention given to each picture by a distinguished member of the Charity Commission.

The den devoted to Sculpture presents a remarkable appearance. We have only one portrait statue, and that in the background. While the centre is occupied by a group in marble called "Child play—the children of Herbert Ingram, Esq.—a graceful and playful composition by Mr. A. Munro, conceived poetically, and carved with a very delicate chisel.

Our first illustration this week of the state of art in England is from the Royal Academy Exhibition, and is one of three pictures contributed by Mr. F. R. Pickersgill, A.R.A. He has selected his three subjects from three sources extremely rich in artistic material—from the New Testament, the "Pilgrim's Progress," and the "Faërie Queene." The first (341) is entitled "John Sendeth his Disciples to Christ:" the second (324), "Christian Conducted by Charity, Prudence, Piety, and Discretion into the Valley of Humiliation;" the third (16, and our subject), "Britomart Unarming and Discovering Herself before Amoret, whom she has rescued, and the 'Jolly Knight' she has subdued." All these pictures exhibit a conscientious, and in many respects a successful, seeking of what is lofty and beautiful in art. But Mr. Pickersgill is nearer to Spenser and Bunyan than he is to Scripture. What a truly Spenserian picture has he brought before us! How lovely in her female strength, and in her own half-concealed beauty, is the gentle Britomart! How sweet a damsel has been rescued in Amoret! That Knight on the left of the composition is a sort of a realisation of Sir Philip Sydney. Those Cupids that lift the helmet from the heroine are in the best manner of Italian art—or what is just as good, in Stothard's manner. That Cupid on the ground playing with the Knight's long lance (for which the picture is too small) is happily suggestive of the love combat that has occurred. How exquisitely has Spenser painted Britomart for the pencil of Mr. Pickersgill!—

> With that, her glistring helmet she unlaced:
> Wide as a doll, her golden locken, that were unbound
> Still in a knot, unto her heeles downe traced,
> And, like a silken veile, in compasse round
> Adowne her backe and bosom diuided diuine.
>
> * * * *
>
> Such when those knights and ladies all about
> Beheld her, all were with amazement rmt.
> And every one gan grow in secret doubt
> Of this and that, according to each wit:
> Some thought that some enchantment feygned it;
> Some that Bellona in that warlike wise
> To them appeared, with shield and armour fit:
> Some, that it was a maske of strange disguise:
> So diversely each one did sundrie doubts deuise.
>
> *Spenser's Faerie Queene*, Book iv., Canto 1.

It is said by Spenser himself that the poet's wit surpasseth painter's far in picturing the parts of "beauty dayne;" but Spenser, had he seen Mr. Pickersgill's composition from his great poem, might have admitted, without compliment, that the painter of Britomart and Amoret had done something to lessen the justice of his remark.

Our second illustration is taken not from the page of poetry, but from the autumn life of many a Scottish Highlander. For this characteristic and clever example of what other artists can accomplish in the manner of Sir Edwin Landseer, we are indebted to Mr. Ansdell. It is one of two pictures meant to be hung together, as each assists the other. It is called the "Scotch Gamekeeper" (498); and its companion is called the "English Gamekeeper." One is a leading attraction in the Middle Room; the other a leading attraction in the West Room. Critics are divided which to prefer. Some incline to the greater variety of game to be seen in the Scottish picture, and some prefer the whole execution of the English composition to that of its Scottish companion. Nationality has perhaps something to do with this. John Bull likes his own Yorkshire or Norfolk gamekeeper; and Saunders his own Highland man from the moors of Sutherlandshire and the mountain passes of Argyllshire. How unlike are the two keepers; yet how true is each to his own country. There is a bulldog bearing about Bill Tatler, the Lancashire keeper, in Squire Thornhill's employ: and an indescribable but characteristic peculiarity about Duncan McDougal McGregor who sees after the Inverness-shire estates, which McDonald of that ilk has recently rented for £2000 (English) to a leading member of the Stock Exchange. Our third subject is also from Scotland, and by a Scottish artist. Mr. Ansdell is a native of Lancashire; but Mr. Thomas Faed, the able artist of that touching picture, the "Mitherless Bairn," see page 541, is a Scot by birth, and a true-hearted Scot in feeling. Mr. Faed has found his subject in that Foundling Hospital of Scottish song, called "Whistle Binkie." The author of the "Mitherless Bairn" is Mr. William Thom, and here is the song itself:—

THE MITHERLESS BAIRN.

> When a' ither bairnies are hushed to their hame,
> By aunty or cousin, or frecky grandame,
> Wha stand last and lanely and sairy forlorn?
> 'Tis the puir dowie laddie—the mitherless bairn.
> The mitherless bairnie creeps to his bed,
> Nane covers his cauld back, nor haps his bare head,
> His wee hackit heelies are hard as the airn,
> And chilblains the lair o' the mitherless bairn.
>
> Aneath his cauld brow nae kind dreams hover there,
> O' hands that used kin' his locks in a dark hour;
> But morning brings clutches, a' reckless and stern,
> That jow na the locks o' the mitherless barn.
> The sister who sang o'er his saftly rocked bed,
> Now rests in the mools where their mammie is laid:
> While the father toils sair his wee bannock to earn,
> And kens na the wrangs o' the mitherless bairn.
>
> Her spirit that passed in the hour of his birth
> Still watches his lone, lorn w'dderings on earth.
> Recording in heaven each bairnly plea and earn
> Wha coulnely deal with the mither-less barn.
> Oh! speak him na harshly; he trembles the while
> He bends to your bidding, he bends to your smile.
> In their dark hour o' anguish the heartless shall learn
> That God deals the blow for the mitherless barn.

Full not to observe with what touching truth Mr. Faed has contrasted the modest, ill-clad mitherless bairn, half afraid to enter Jock's cottage to ... chicken that picks the crumbs before him) with the well-conditioned boy of the same age that stands full and sleek before him. Mark the beautiful female face, that tells its own story so quietly, in the woman seated on the left of the composition; nor omit to remark how truthful is the expression on the face of the old deaf woman, who is still lending a willing ear to the untold but expressive tale of the child who enters hungry and half-uncertain of his reception. The painting, too, in point of execution, is very beautiful; nor is the observation which we heard made before it by one competent to judge without its full significance—"Here is a work that will survive." And yet this picture is shamefully hung: to see it you must have recourse to your knees. This is wrong—it is fairly worth any half-dozen pictures above it. How is this? Is it that we have the old envy of Wilkie's genius once more among us? Our readers may not remember the story to which we allude. Wilkie's first picture exhibited in London was "The Village Politicians," his second "The Blind Fiddler." He was then a lad raw from Scotland, contriving to live without getting into debt, on eighteen shillings a week. His first picture attracted, and received attention. His second was certain to raise his reputation. Something must be done. He was to be "killed" quietly. His "Blind Fiddler," now a leading remnant in the National Gallery, was hung between two of Turner's seventy Battles of Hastings, and "Pope Pius VII. Adoring the Host Elevated during a Thunderstorm in the Campagna of Rome," now a leading remnant in the Vernon Gallery, was hung between two of Turner's seventy Battles of Hastings, and "Fire, Flood, and Tempest—the Wreck of a Transport, Vapour," and "The Blacksmith's Forge." But the ... was amply rendered to the picture. The story is only in part as told ... of Academy, as the position of "The Blind Fiddler" was injurious to the same body, and to the rising Community of the Academy—Messrs. Herbert, Cooper, and Lee, who hung from the ... Of a picture so full of permanent beauties. It is pleasant to tell ... the artist obtained for it. For "The Blind Fiddler," Mr. Lee received from a dealer four hundred guineas; and it has since passed into other hands at an advance of one hundred guineas. We may safely ... tell that it has not yet reached its maximum quotation.

Our *fourth* Illustration is from Mr. Maclise's fine, but single contribution. He has found his subject in Shakspeare—in "As You Like it," and the particular passage he has sought to illustrate is as follows ... may add that we have enlarged the quotation in the Catalogue, and corrected it:—

Rowland. Young man, have you challenged Charles the Wrestler?

Orlando. No, fair princes; he is the general challenger: I come but in as others do, to try with him the strength of my youth.

Celia. Young gentleman, your spirits are too bold for your years: you have seen cruel proof of this man's strength: if you saw yourself with your eyes, or knew yourself with your judgment, the fear of your adventure would counsel you to a more equal enterprise. We pray you for your own sake to embrace your own safety, and give over this attempt.

Rowland. Do, young sir; your reputation shall not therefore be misprised: we will make it our suit to the Duke that the wrestling might not go forward.

Orlando I beseech you, punish me not with your hard thoughts, wherein I confess me much guilty to deny so fair and excellent ladies anything. But let your fair eyes and gentle wishes go with me to my trial; wherein if I be foiled, there is but one shamed, that was never gracious; if killed, but one dead, that is willing to be so. I shall do my friends no wrong, for I have none to lament me; the world no injury, for in it I have nothing—only in the world I fill up a place which may be better supplied when I have made it empty.

Rosalind. The little strength that I have, I would it were with you

Celia. And mine to eke out hers.—*As You Like It*, act. i., scene 2.

The scene in Shakspeare is laid on the lawn in front of the *Duke* Palace, and the point of time chosen by the artist is that when *Orlando* is about to engage with *Charles*. The characters introduced from the left to the right of the spectator, are *Dennis* (servant to *Oliver*), *Oliver* (son of *Sir Rowland de Bois*), *Charles* (the *Duke's* wrestler), *Touchstone* (a courtier), *Duke Frederick* (the usurper), *Celia* (daughter to *Duke Frederick*), *Rosalind* (daughter to the banished Duke), *Touchstone* (a clown), *Orlando* (son of *Sir Rowland de Bois*), *Adam* (servant to *Oliver*). Lords, and attendants. In the centre of the composition is the *Duke*; on his left is the slim but lithe *Orlando*; on his right the confident but strong-built *Charles*. As the eye runs from the *Duke* to the two competitors, we can all but hear distinctly from the lips of the athletic wrestler, "Come, where is this young gallant that is so desirous to lie with his mother earth?" and, while the words are reaching our ears, we watch the young David of the scene, and look with earnestness on the lovely faces of *Rosalind* and *Celia*—one of the sweetest groups to be seen on modern canvas. Are we sure of the result of such unequal contest? *Orlando* certainly is. The eyes of *Rosalind* and *Celia*

Rain influence and adjudge the prize

Charles must fall. It would be easy to write a chapter on this fine realisation of a scene in Shakspeare. How admirably is *Touchstone* conceived. With what poetic feeling is that rainbow of hope distantly, but modestly, introduced over *Orlando's* head. But we must allow our engraver to speak for Mr. Maclise, and our readers to follow up what we have only in part suggested. The picture was painted for a lady, *Charles* is, therefore, not a Hercules, or a Figg, or Broughton, or Duff Barker, or Dutch Sam—but just what he is, apparently more than a match for the slim built *Orlando*. The lady is Mrs. Betts; and the house, on the lawn of which the scene is laid, is a modern Elizabethan building—Preston-hall, near Maidstone—a kind of painter's anachronism perfectly justifiable. We must add that the picture, in point of colour, is warmer and richer than is usual with Mr. Maclise.

Our fifth illustration (p. 569) is one of those twin compositions of two distinguished artists working on one canvas, that has of late years become extremely fashionable, and, we will add, what is not often the case with things fashionable, extremely sensible as well. The first to revive the fashion of other schools were Sir Edwin Landseer and Sir Augustus Callcott; these were followed soon after by Mr. Sydney Cooper's cows and Mr. Lee's landscapes. Then came Creswick and Frith, and Creswick and Ansdell—of both pairs thus working conjointly we have choice instances in the present Exhibition. Never did Beaumont and Fletcher work more happily together than Mr. Creswick and Mr. Ansdell have wrought together in that truly English scene, "The Nearest Way in Summer Time" (No. 440). Of story there is not much to tell. The subject is, however, are of the most pleasing nature, and the objects introduced are of that country-life character which never fails to find admirers. "The Nearest Way in Summer Time" is, in Messrs. Creswick and Ansdell's eyes, that taken by a waggon, waggoner, and horses through a streamlet impassable in the spring, and only rendered passable by the recent droughts of a sunny summer. The drought, however, has not been of a sufficient duration to lessen the green-like hues of trees in a transition state between May and June, while there is water enough to cool the horses' feet, and to show us what the stream must be like after a week of April showers. Most marvellous in point of execution is this choice specimen of our English school of painting. The horses all but walk from out the canvas—the trees all but move—the spectator begins to feel the very air of the picture upon his cheek. No wonder then that in rooms crowded as those of the Royal Academy, spectators are found delighted to linger about a landscape of which Gainsborough could have applied the arrangement and general colour, but not the details or the full results.

With this fine example of the Joint labours of Mr. Creswick and Mr. Ansdell, our Academic illustrations for the week must end. We give, however, in our present Supplement, other Illustrations from the two Societies of Painters in Water Colours, but, in order not to interrupt our criticisms on the Royal Academy, we shall transfer what we have written about them to that portion of our Journal in which they appear.

The largest, and certainly one of the finest, landscapes in the collection is the "Rome" (594) of Mr. Roberts, R.A.—

> Rome! thine imperial brow
> Never wore a fairer
> Wreath than that which rests on thee now.
> Proud Mistress of the Main!
>
> Thou hast the sunset's glow,
> Rome! for thy dower,
> Flushing tall cypress bough,
> Temple and tower!

Such is the quotation which Mr. Roberts has given in illustration of his noble picture of a Sunset over Rome. How very imperfectly it fulfils what his fine picture embodies. It is impossible to stand and muse before this grand panorama of the great capitol without calling to mind the Cæsars, and Cæsars, and Popes, and Painters, who have done so much for the long glories of the majestic city. From the point of view chosen by the painter we have modern Rome—nobly represented by St Peter's on our left—and ancient Rome, with its Coliseum, Pantheon,

and crumbling ruins on our right. The yellow Tiber flows at our feet. The fine lines of Dyer at once occur to the poetic mind :—

> The Burnum of
> At dead of night, 'mid his crash'd bones
> Again the voice of Time, departing moans
> Trembling all precipitate down dash'd,
> Rattling around, loud thundering to the moon.

Sitting in front of this fine picture, which adds importantly to the well-earned reputation of Mr. Roberts, Gibbon might have conceived his history of the "Decline and Fall of the Roman Empire," which he tells us was first thought of amid the ruins of the Eternal City.

After the Roberts the next great landscape of moment is the "St. Sebastian" of Clarkson Stanfield, to which Lord Hardinge thus gracefully referred in his speech at the Academy dinner :—

> When I saw it the failing light would not enable me to inspect it so closely as I could have wished; but I should refer to the manner described by the artist in that admirable and noble picture as a proof of the skill of the British artillery, and the steadiness of the British infantry. In the storm by which that place was captured they could not find a breach, and they remained twelve feet below the parapet. They could not get upon it, and they sat fire to the ruins of the convent which burnt like a gridiron. It was impossible to descend, and the men were so steady that they lay down while the artillery, at five hundred yards, fired two feet over their heads. For two hours this continued. The infantry were reinforced, the artillery kept on firing, and when a breach was made the men started up, resumed the attack, and carried the place.

The point of time chosen by the artist is that when the British troops, under Wellington, took possession of the heights and convent of St. Barthelomew The Duke is in the foreground, looking across the water at the important operations that are taking place against the lofty fortress which towers to the skies before him. All with man is activity and life. Yet the sky is tranquil, and but for man, tranquillity is everywhere. This fine picture is to be viewed in two lights—as a landscape, and as an historical composition. It is noble as both, and is in every respect a suitable pendant to the scene before Gibraltar, by the same artist, where the ship approaches that noble fortress, carrying to St. Paul's the dead body of the heroic Nelson.

Mr Stanfield's other contributions are two in number—"Ilfracombe, North Devon" (87), and "The Zuider Zee—Dutch Boats entering Harbour" (342): a species of composition for which he has long been famed, and in which he has no rival of any name but Mr. Edward Cooke.

In the same rank of excellence with the large Stanfield and the two Roberts, we confidently place that masterpiece of Mr. Creswick's—"The Newest Way in Summer Time," to which we have endeavoured in vain to do justice, both by the pen and the pencil. But this is only one of Mr. Creswick's four contributions. The other three are called "Morning the Mouth of an Eastern River" (50); "Afternoon—the Banks of the Wye" (204); "Common Scene in Surrey" (302); and "A Welsh Hill" (345). All these exhibit the best qualities of this thoroughly English painter.

Mr. F. R. Lee, generally a pleasing painter, though not usually too cold in his colours, is not seen this year in full force. He has six pictures in all:—"A Devonshire Mill" (154); "Sketch from Chiefden, looking towards Maidenhead, on the Thames" (180); "Peas on the Banks of the River Taw North Devon" (219); "The River Awe—Argyllshire" (356); "Cattle on the Banks of a River" (422); "The Taw Vale, North Devon" (624). In the Cattle scene he had the assistance of Mr. Sidney Cooper; and has, consequently, wrought as if more was expected from him. His sketch from Cliefden is unusually hard.

No artist evidently delights more in green lanes and chequered shades than Mr. Richard Redgrave. He sees Nature always in a solid aspect. He has no love, apparently, for any other period of the year than spring. Of his three pictures—"The Spring" (88)—

> Deep and still that gliding stream
> Beautiful to me with dreams,
> As the river of a dream.—

"The Bird Keeper" (240); "The Source of the Stream" (347)—we prefer the last. It is one of those green delights that perpetuate spring in the depths of winter.

We wish we could say as much of any one of the four pictures which Mr. Witherington's rank as a Royal Academician has enabled him to hang too prominently before us. He is a careful but cold painter. A chill runs through the spectator at the very first sight of a picture by Mr. Witherington.

Of Mr. E. W. Cooke's four contributions we prefer the largest—"A North-Sea Breeze on the Dutch Coast—Scheveling Fishermen Hauling the 'Punch' out of the Surf" (269). Here we have the right salt-water smack, and a stirring scene rendered with exquisite life and motion. Scarcely less true is "Scheveling Sands—Low Water, Tide making in" (323), by the same artist. Of a different character is "Venice—Fish arrived" (344); and still more different is "Winter—A Scene on the Fens of Huntingdonshire, old Druining Mill now destroyed" (61), a marvellous piece of dreary nature that creates a shudder.

Mr. F. Danby delights, as formerly, in lake scenery, evening lights, and dead calms. His contributions are called "A Party of Pleasure on the Lake of Wallenstadt, in Switzerland" (46); "Evening—In the Rosy Time of the Year" (287); "Dead Calm—Sunset at the Light of Exmouth" (566). These are hardly up to the mark of his earlier efforts in the same line. A younger Danby (T. Danby) sends "The Poet's Hour" (137).

> Hark! how the sacred calm that reigns around
> Bids every fierce tumultuous passion cease,
> In still small accents whispering from the ground,
> A grateful earnest of eternal peace.

Hardly up to the mark of Gray's description, but poetic and pleasing.

The titles of Mr. Sidney Cooper's six pictures will convey to his admirers an excellent notion of what he has been about. They are called "Cooling the Hoof" (75); "A Group in an Interior" (172); "Autumn Showers" (310); "Cattle on the Banks of a River" (422); "A Way over the Fells" (525); "Haymaking Season" (560).

> On summer's day, fragrant hay
> So sweetly scents the breeze

In No 422 our English Cuyp has called in Mr. Lee to lend assistance, and has, therefore, wrought in his best mood.

We wish we could praise Mr. Pyne's "Florence—from San Miniato" (1140); but there is little to admire in it. It is poor in conception, and weak in point of execution. Mr. Pyne is more at home when he is painting, not for the Royal Academy, but for Suffolk-street.

Mr. Carmichael will please more admirers than his Newcastle friends with "View of Hellgoland, where the Foreign Legion will embark" (44)—

> The meteor flag of England
> Must yet terrific flame,
> Till its every rebel foe shall depart,
> And the star of Peace return.

We have seldom seen him happier.

Mr. Anthony has been to Stratford-on-Avon, and has painted "The Close of an Autumnal Day" (23) in that poetic spot. His motto is from Tennyson :—

> Sweet after showers, ambrosial air,
> That rolls est from the mossy glom
> Of orchard and dusk pasture loam,
> And mingles with your cheer, and smiles
> And talks with all.

Mr Anthony should have the gold room of Shakspeare than of Mr Tennyson. The point of view is not good. At some of the details we are extremely happy.

Mr. Linnell always a faithful worshipper of nature. Lastly, "A Country Road" (642), displayed his well-known peculiarities of touch and tone. No artist has a finer relish for English scenery than Mr. Linnell; but he is apt to get mannered, and to see nature after his own fashion, and not as she is.

To Mr. Jutsum and Mr. Bottomley we have already done justice in the Landscape department of the Royal Academy; therefore little remains for us to note except a clever scene by young Mr. Carrick—"Borrowdale, Cumberland" (606), evidently painted on the spot; and a highly-finished view of "Rouen Cathedral and its Market-place", from the pencil of Mr. S Read, to whose taste and skill our pages still continue to be indebted. Mr. Read's "Rouen" is a marvel in water-colour art

This mention of Mr. Read's successful picture reminds us that we must here return to the two Societies of Painters in Water-Colours, from whence we have drawn our remaining illustrations of the week. To the facile hand of Mr. Louis Haghe (whose reputation is more than European) we are indebted for the "Post-office at Albano." No. 78 of the New Water-Colour Society, and most deservedly looked upon as one of the leading attractions of that agreeable exhibition. What wonderful contrast in the heads of those monks! What varied thinking they reveal! Would that the art of engraving on wood could do justice to them in point of colour. But it is not easy in any material to represent Mr. Haghe's marvellous command of the resources of his art.

From the New Society to the Old is an easy and agreeable walk. Here we have the advantage of seeing Mr. William Collingwood Smith, Mr. Joseph Jenkins, and Mr. George Dodgson in their happiest moods, and the advantage, moreover, of transferring to our pages an example of the skill of each. To Mr. Collingwood Smith we are indebted for the view of "The Devil's Bridge in the Pass of St. Gothard" (No 28); to Mr. Jenkins we owe "En Route" (No. 244), one of the choicest treasures of the screens; and to Mr. George Dodgson we are obliged for "The Beacon" (No 137).

We shall continue our illustrations and resume our criticisms in an early Number.

MR. HORSLEY'S FRESCO IN THE CORRIDOR OF THE HOUSE OF PEERS.

(To the Editor of the ILLUSTRATED LONDON NEWS *)*

You [illegible] the Engraving [illegible] London News of Mr. Horsley's Fresco of Satan Touched by Ithuriel's Spear which [illegible] Eve," the artist has not followed the poet servilely [illegible] might have done. As regards the *attitude* of Adam and Eve, Milton says :—

> [illegible] night sister or bride sweet,
> [illegible] the while she rose majestically Eve, in his picture of "Satan [illegible] Spear" (in her action (Stothard, [illegible] sample) also depicted them thus; and it remains an [illegible] Mr. Horsley's composition would have been improved by a closer rendering of the poet's [illegible] But, as it is, he has represented Adam—by the side of Eve, certainly, yet in "embracing" in a half-sitting posture, as though taking an uncomfortable nap, and not as if he were enjoying a sleep which, although "sleep-light," was sound and refreshing, and should be contrasted by the painter with the "troubled repose" of Eve. Fusell's picture denotes this deep sleep of Adam; and [illegible] beautiful grouping of the figures of our first parents fully realises the "embracing" of the poet

In the second place, Mr. Horsley has not followed Milton's description of the *place* where Adam and Eve "embracing slept." The painter represents them as [illegible] of a cave full; the poet places them in "their humble bow'r," beneath a "shadowy roof," and says, that—

> On their naked limbs the flowery roof
> [illegible]

Milton has given such a rare description of this bower, with its "roof of thickest covert" which "was fit for [illegible] Lover," and which [illegible] and paved with odorous [illegible] Flowers," that the painter entirely omit it, manifests great inattention to the subject he has undertaken to illustrate; and this inattention becomes the more remarkable when, as in the present case, the picture is set forth as a model one, and intended to illustrate the masterpiece of one of the world's greatest poets, and to adorn a corridor of (what is meant to be) one of the world's architectural glories.

Exception might also, perhaps, be taken to the introduction, in the fresco, of the serpent. It is subsequent to the scene of the picture, that the "subtlest beast of all the field" is spoken of; and, in placing him near to the sleeping Eve, Mr. Horsley would seem to have been again inattentive to Milton's description; for the poet distinctly says, that, to Adam and Eve's bower,

> Bird, *beast*, insect, or worm, durst enter none

I remain, Sir, yours truly, CUTHBERT BEDE, B.A.

NELL GOW'S OAK.

A VISION.

THE sun had set, the air was still,
And slowly closed the day;
No breezy sound came from the hill,
Nor murmur from the Tay:
I in mine gazed upon the Oak,
Beneath whose branches high,
Neil Gow from slumbering silence woke
The spell of melody.

Deep darkness like a curtain came.
I closed my weary eyes;
Around the tree shone sparks of flame,
Like stars in wintry skies.
Each acorn cup appeared a lamp,
Each bough a harp was made
With gossamer strings; and over all
Beat Neil's immortal shade.

A breeze crept up from Murthly woods,
And swept the airy strings,
Till on each wild, but mountain floods,
From all their secret springs;
And while the cadence ebbed and flowed,
Clouds sympathising wept,
The trees their topmost branches swayed,
And faultless measure kept.

Soon through the hazy southern gloom
With halo round his head,
The shade of Burns approached—to whom
The minstrel homage paid.
The poet, musing, caught the strains,
And gave to sound sublime
The immortality of words.
To charm through endless time.

I heard the stately solemn air,
That fires the patriot's soul,
And at its wild gusts fierce deep despair,
And crowns the social bowl.
I saw the secret whisper rustled.
I heard fond passion's vows,
And then a spray descending wrestled
The hard and minstrel's brows.

I know not when the music ceased;
I woke, but all was still,
The golden glory of the east
Was gilding Birnam hill.
The Duke of Atholl I awoke,
As he would honoured be,
To guard with care that sacred oak—
Great Neil's immortal tree. B.

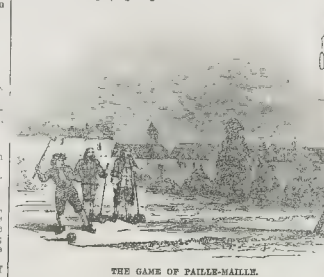
PRESENT TO THE EMPEROR OF THE FRENCH.—The directors of the Crystal Palace have caused to be prepared two volumes, elegantly bound in [illegible] morocco, containing a series of photographic views of the progress of the Crystal Palace, from the raising of the first column on the 5th of August, 1852, to the opening on the 10th of June last year. The views were all taken by Mr P. Delamotte, the late photographer to the Crystal Palace, but at present head drawing-master to King's College. There are among the collection, [illegible] keys, each of the finest and most successful specimens which the photographic artist has yet produced. This splendid work is intended to be presented to the Emperor of the French, as a memorial of his visit to the Crystal Palace.

THE ELECTRIC CLOCK AT LONDON-BRIDGE TERMINUS.—On the 1st [illegible] 1852, the system of sending time-signals hour by hour from the Royal Observatory at Greenwich to various telegraph stations came into successful operation. Certain hour signals were required by the South-Eastern Railway Company, and the remainder were passed on to the Electric Telegraph Company, for distribution along their system. The interchanges of communications for these purposes were accomplished by a commutator carried by the great clock at the London Terminus. The next step in the system was to show time to the shipping in the Downs by the drop of a ball at Deal, caused by a telegraph signal sent from the Greenwich clock at one p.m. On the 3rd of March last a clock was erected over the South Kent platform, facing passengers as they arrive in London; and since that date it has faithfully shown Greenwich mean time, which is sent to it, second by second, from the Royal Observatory.

A LONDON EARTHQUAKE. In 1842 an absurd report gained credence among the weak-minded, that London would be destroyed by an earthquake on the 17th March (St. Patrick's Day). This rumour was founded on certain doggerel prophecies one pretended to be pronounced in the year 1203, and contained in Harleian Collection (British Museum), 980 b. folio 319; the other by Dr. Dee, the astrologer (1598, MS. in the British Museum). The rhymes, with these "authorities" inserted in the newspapers, actually excited some alarm, and a great number of timid persons left the metropolis before the 17th. Upon reference to the British Museum, the "prophecies" were not, however, to be found; and their forger has confessed them to have been an experiment upon public credulity.—*Curiosities of London.*

THE GAME OF "PAILLE-MAILLE," AND THE STREET OF PALL-MALL.

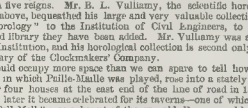
"THE Mall," in Saint James's-park, not many years since, was commonly regarded as the place where the game of "Paille-maille" was first played in England, and whence the Park-avenue was said to have taken its name. Strutt calls it "the game of Mall," and thus favours the above notion; but, in "the spacious street between the Haymarket, N.E. of St. James's-street, S.W.," we have preserved the entire name of the game—*Pall-Mall*. Charles II. caused the Mall in the Park to be made for playing the game, which was a fashionable amusement in his reign; but it was introduced into England much earlier, and was played in the Park when the original alley had grown into a street, and taken the name of the game itself—Pall-Mall. In "Sir Robert Dallington, A Method for Travel," 4to., 1598, Paille-Maille is described as an exercise of France, which the author marvels had not been introduced into England and in "A French Garden for English Ladies," 8vo, 1621, it is described as a French game. Blount, in his "Glossographia," edit. 1670, says, "this game was heretofore used in the long alley near St. James's, and vulgarly called Pall-Mall." The name, however, occurs much earlier; for King James I., in his "Basilicon Doron," recommends "Paille-Maille" as a field-game for the use of his eldest son, Prince Henry: proving the Mall in the present street to have existed as early as the reign of the above King. In a Crown survey, referred to by Mr. Cunningham, we find "Pell Mell Close," partly planted with apple-trees (Apple-tree Yard, St. James's-square, still exists); and in the above document are also named 146 elm trees, standing on both sides of Pall Mall Walk; and Faithorne's plan, 1658, shows a row of trees on the north side; and the name of Pall-Mall, as a street, occurs in the rate books of St. Martin's in the Fields under the year 1656. Pepys mentions the game as played in the Park "2nd April, 1661: to St. James's-park, where I saw the Duke of York playing at Pele-Mele, the first time I ever saw the sport." It is described by Blount as "a game where a round bowle is with a mallet struck through a high arch of iron (standing at either end of an alley), which he that can do it at the fewest blows, or at the number agreed on, wins." A drawing of the time of Charles II., engraved in Smith's "Antiquities of Westminster," and of late in John Carter's "Westminster," shows the above arrangement for playing the game.



THE GAME OF PAILLE-MAILLE.

The name is derived from *Pella*, a ball; and *Maglia*, a mallet; the implements with which the game was played. Of these, a set was discovered in the spring of last year, upon one of the playing places, as thus described in the "Curiosities of London," lately published :—

> In 1854 were found in the roof of the late Mr. R. L. Vulliamy, No. 63, Pall-mall, a box containing four pairs of the mallets, or maillets, and one ball, such as were formerly used for playing the game of Pall-Mall upon the site of the above house, or in the Mall of the St. James's-park. Each maile is 4 feet in length, and is made of lance-wood, the head is slightly curved, and measures outwardly 5½ inches, the inner curve being 4½ inches the diameter of the mallet-ends is 2½ inches, each shod with a thin iron hoop the handle, which is very elastic, is bound with white leather to the breadth of two hands, and terminated with a collar of jagged leather. The ball is of box-wood, 2½ inches in diameter. The pair of mallets and a ball, here engraved, have been presented to the British Museum by Mr. George Vulliamy.



BALL AND MALLETS FOR PLAYING THE GAME OF PAILLE-MAILLE.

It should be added that M. Vulliamy was born in the above house, and died here in January, 1854, aged 74 years; and here his family lived before him for 130 years, thus carrying us beyond the date of Pepys seeing Paille-Maille first played. The Vulliamys were clockmakers to the Sovereign in five reigns. Mr. B. L. Vulliamy, the scientific horologist, who died as above, bequeathed his large and very valuable collection of works on "Horology" to the Institution of Civil Engineers, to whose well-arranged library they have been added. Mr. Vulliamy was an Associate of the Institution, and his horological collection is second only to that in the library of the Clockmakers' Company.

It would occupy more space than we can spare to tell how the avenue of elms in which Paille-Maille was played, rose into a stately street, from three or four houses at the east end of the line of road in 1560; how a century later it became celebrated for its taverns—one of which, "Wood's at the Pall-Mall," was a haunt of the gay old Pepys; and how the place became a noted duelling-ground. Dr. Sydenham died there in 1689, at his house next "the Golden Pestle and Mortar," which sign remained to our day over an apothecary's shop upon the north side of the street. Another old sign, "the Golden Ball," has lasted to our time; but "the Golden Door" and "the Barber's Pole" have disappeared. Of Sydenham's residence here, Cunningham relates an anecdote told by Mr. Fox to Mr. Rogers, that Sydenham was sitting at his window, looking on the Mall, with his pipe in his mouth and a silver tankard before him, when a fellow made a snatch at the tankard and ran off with it. Nor was he overtaken (said Fox) before he got among the bushes in Bond-street, where they lost him.

Nell Gwyn lived in 1670, "on the east end, north side;" and from 1671 to her death, in 1687, in a house on the south side, with a garden towards the Park; and it was upon a mount in this garden that "the impudent comedian" stood, to hold her "familiar discourse" with Charles II., who stood "on ye green walk" under the wall. This scene, as described by Evelyn, has been cleverly painted by Mr. E. M. Ward, R.A. The site of Nell's house is now occupied by No. 79, Society for the Propagation of the Gospel in Foreign Parts. East ward of Nell Gwyn's lived Sir William Temple, the Hon. Robert Boyle, and Bubb Dodington; and on the south side, Doctor Barrow, and the Countess of Southesk, the celebrated Countess of De Grammont's Memoirs. In Marlborough-house lived the great Duke of Marlborough; and in a house in front of the mansion Sir Robert Walpole. Of Schomberg-house, Nos 81 and 82, built for the great Duke of Schomberg, the centre and the west wing remain. What a host of celebrities have tenanted this mansion. The bas-relief of painting, over the middle doorway, was placed there by Astley, the painter. Its present tenants are—Messrs. Harding, the silk-mercers, reminding one of "fair Pall-mall" of Gay's time :—

> Shops breathe perfumes, through sashes ribbons glow,
> The mutual arms of ladies and the beau.—Trivia, book ii.

Defoe describes the Pall-mall of 1703 as "the ordinary residence of all strangers, because of its vicinity to the Queen's palace, the Park, the Pall-Mall, the theatres, the chocolate and coffee houses, where the best company frequent." However, the street became early noted for its taverns, which we consider to have been Pepys's "houses for clubbing." The first modern club-house was No. 86, opened as a subscription house, called the Albion Hotel, and now the Office of Ordnance. From the removal of Carlton house, in 1827, "the sweet shady side of Pall-mall, as Captain Morris called it, has almost become a line of club mansions, in their architectural character resembling Italian palaces, and some of their decorations aspire to the higher art of classic sculpture.

"SCOTCH GAMEKEEPER."—PAINTED BY R. ANSDELL.—EXHIBITION OF THE ROYAL ACADEMY.

THE MOTHERLESS BAIRN, PAINTED BY T. FAED.—EXHIBITION OF THE ROYAL ACADEMY.

KUGLER'S ITALIAN SCHOOLS OF ART.*

THE taste for the study of art—its history, its schools, and its principles—is but a thing of yesterday. Half a century ago the works of high art amongst us were few, and were looked upon rather as curious trifles than things to be understood and admired. The amateurs and connoisseurs of those days scarcely knew the names of the great artists whose works they collected, because it was the fashion to do so, and little or nothing of their genius, their labours, the periods at which they lived, and the influence which their example exerted upon the progress of art. At length the dispersing of some of the principal Continental collections, in the spoil of which England has taken a lion's share—the influence of travel, and the aids afforded by the labours of one or two distinguished connoisseurs—labours undertaken more for love than profit—began gradually to exercise an influence upon the public mind, and gave it an appetite for enjoyments of a refined class previously beyond its ken. The result is seen in the large sums now given for pictures as compared with the miserable prices which they formerly fetched; in the elevated position acquired by the artist; and even in the improved taste displayed in the production of many articles of costume and domestic use.

Still, however, whilst the healing influences of art have been making all this progress, there have been few reliable aids afforded for the education of the community in the subject. The lectures of the professors of the Royal Academy have been exclusively addressed to artists and professed students, and the technical mysteries of the art have been kept jealously within the precincts of the studio: in a word art-producers have disdained to confer on what regards their calling with the public, upon whom they depend for the reward of their labours; and yet are so unreasonable as to expect the latter to admire, or purchase without admiring, what they do not understand.

A text-book of art for the use of general readers has long been a desideratum, which Dr. Kugler's "Handbook" will go far to supply. The rapidity with which, in its English form, it has passed through two editions and arrived at a third, is convincing evidence as to the large numbers of the community who have been craving for authentic counsel in this charming study. The author's research and industry are undoubted; his opportunities of arriving at facts have been considerable: and he has treated the subject with a copiousness and a fervour, and yet with a succinctness and a clearness of style, which commands, without tiring, the attention. If we hesitate to award the work the highest meed of praise, and to declare that it fulfils all our requirements of such a work, it is on account of a certain tinge, or bias, which we observe occasionally in the author's mind in reference to the genius and growth of art, in which we do not always concur. The author is a German, and, justly proud of the strenuous exertions now in progress in his country for the revival of art, he is apt to look with eyes too exclusively German upon Italian art; appears sometimes not to appreciate its really grander features; and certainly underrates the influence—an influence paramount above that of all others—which this art exercised upon the art and civilisation of Europe.

Dr. Kugler, at the very outset, in the preface to his second edition, asserts a position for Germany as the modern regenerator of the arts, which we are not prepared to admit. After stating that the first edition of his "Handbook of the History of Painting from the Age of Constantine to the Present Time," appeared in 1837, he goes on to observe:—"Ten years that have since elapsed have changed, in many respects, not only the opinions of the author, but the standard of knowledge respecting art and its history generally. At the time to which we refer we were standing, though almost unconsciously so, at the close of a period which may be said to have commenced with that work exercising so important an influence on the minds of artists, and known by the title of 'Herzen's Ergiessungen eines Kunstliebenden Klosterbruder's (Anglice, 'Heart Outpourings of an Art-loving Monk'). Our schools of painting, embodying that tendency of art to which the denomination of 'romantic' has been given, were celebrating their last triumphs. A general poetic interest, and the valuable results of a wide spread dilettantism, had disclosed to us the rich world of art belonging to the middle ages. The researches of critical knowledge had begun to elucidate the history of those ages, and Rumohr's 'Italienische Forschungen,' though the immediate result of the prevailing tendency, had gone far beyond it."

It is here implied—first, that the regeneration of art in Europe has been mainly due to Germany; secondly, that the impulse of this movement was given by the "Heart Outpourings of an Art-loving Monk," and its end accomplished by the publication of Dr. Kugler's "Handbook." A fit comment upon this modest pretension is found in a few words in the note of the accomplished editor of the English edition: "granting (says Sir C. Eastlake) that the writers of Germany had great influence on the revolution in art referred to, still it appears rather bold on the part of the author of the present work to date such a change from a single book." To which may be added that, although Germany was late in receiving the influence of the revived art of Italy, other European States—France, England, and Spain—had acknowledged, and practically proclaimed, its principles at a much earlier period;—long before the "romantic" art of Germany had "celebrated its last triumphs." Whether Germany has even *yet* received this inspiration is a question we will not discuss at present, though we have our misgivings.

Nothing shows the predilection of the author, in his national idiosyncracy for the *status quo ante* the revival for the glimmering and doubtful remains of ancient art lurking in obscure recesses in the byways of Europe, in preference to the fresh and vigorous art of Italy, consequent upon the revival, than the disproportionate space which he (or rather his coadjutor, Dr. Burckhardt) devotes to the late Roman, the Byzantine, and the Romanesque periods—themes extremely interesting and fruitful in themselves, but which have little to do with Italian art as it is known amongst the moderns.

The period of the Revival, according to the leading authorities, is commonly dated from the time of Cimabue; although recent discoveries, as recorded in Ottley's large works, the "Italian School of Design" and the "Early Florentine School," and some other publications, clearly establish that there were men imbued with the pure spirit of art, struggling on towards excellence, long anterior to the time of that renowned artist. However this may be, Cimabue's claims are so pre-eminent that he may still, with much reason, be cited as the founder of the modern school of Italy. At any rate he is entitled to distinguished and honourable mention in any work treating of the history of art in that country; and the perception of the distinguishing features of the effete old art and the vigorous revived art must be weak which would allow of placing the record of the deeds of this great master at the fag end of the chapter on Romanesque Art; reserving for his pupil Giotto the place of honour at the head of the book on the "Second Stage of Development." Yet this has been done by Dr. Kugler. And here again is a claim on the part of German art, to which we feel bound to demur. Speaking of the creative power evinced by the new art, the author writes as follows:—

> Above all it became necessary that the creating artist should appear more definitely in his own individual character. It was from his *consciousness* only that the relation between the earthly form and the unearthly spirit could be made evident; only when the representation was the result of original conception could the spiritual meaning be freely expressed.
>
> Thus the end in which the perfection of art was to consist was again thrown far in advance, and only to be attained after many successive eras of development. Thus, too, was at first necessary that a *subjective* tendency should establish itself exclusively; that the separation above alluded to should be distinctly defined before the alliance of the opposing principles could be attempted. This new subjective tendency appears now united with a style of representation, the intellectual direction and order of which correspond strikingly with that of Northern art, and which, on that account, may be denominated Germanic. Certain indications even show that the North (where this style was developed half a century earlier) exercised some influence upon the development of the same in Italy. This may be concluded from Italian sculpture, which, somewhat sooner than painting, accepted the Germanic principle of form. Another means of influence was also, as we have suggested, contributed by the circumstance of Naples being governed by a noble French house. Regarded, however, in a broader light, we may consider this metamorphosis in style as one of native origin, founded on the same disposition which led to it in the North, and followed by analogous results. In this also we find the consummation of the purely mediæval artistic life, and of the Germanic spirit generally speaking. Those essential features in which the Italian-German and the Northern-Germanic style correspond, are less of an outward and material, than of a moral, nature. They are based upon a mode of conception, which, disregarding the accidental, kept only the simple and strictly essential, in view; that mode of conception, in short, which is generally characteristic of the feeling of the period. This is why, in some instances, Giotto and Wilhelm of Cologne are seen to approach closely together, though, in other respects, the two schools are, as we have shown, so widely sundered.

In all this there is an attempt to claim affinity between German and Italian art of the thirteenth and fourteenth centuries, which never existed, and the pretending to which argues a disregard of the special favouring circumstances under which art was imported into and nurtured in the Italian peninsula. What names can German art put forward as contemporary with, or half a century anterior, to the great masters of the Early Florentine School? What trace of influence of German art acting upon Italy can the most devoted champion of the "Vaterland" suggest? As to the supposed sympathy between Giotto and Wilhelm of Cologne, and the inference sought to be deduced from it, it may suffice to remark that Giotto died forty years before Wilhelm established himself at Cologne; while Giotto's great master, the creative spirit of this new order of art, quitted the field of his labours nearly forty years previously—making a difference of upwards of seventy years between the close of Cimabue's career and the commencement of Wilhelm's. Those who wish for ocular evidence of the achievements of German art, at the period when the art of Italy was at its zenith of power and greatness, may contemplate with advantage the contributions of German art recently made to the National Gallery. It is with reluctance that we enter upon discussions of this sort, touching the claims of the arts of neighbouring nations, but the question has been forced upon us by the author of this work in such a way, and under such circumstances, that we could not avoid meeting it.

If we complain that the founder of the Florentine school was unceremoniously and unfairly treated in being brought in as a joint of the tail of the Romanesque school; with no less reason are our old associations and prejudices in connection with the great names of Italian art disappointed, when we find the great crowning genius of that school denied the high place and honours to which we have always considered him entitled. In a work of five hundred and eighty pages, a hundred and twenty of which are devoted to the quaint remains of Byzantine and Romanesque art, a dozen pages only are vouchsafed to Michael Angelo. The tone too is cold, even disparaging; showing that, however just in the abstract, German notions of Italian art are not in harmony with those derived from inspiration under an Italian sky. We are told that Michael Angelo, "like Leonardo, *led the way* [he was the closing figure in the grand procession] in accomplishing the perfection of modern art, and shone as *one of its brightest lights.*" His masterpiece, "The Last Judgment," is very unceremoniously criticised. "It must be admitted," the author writes, "that the artist has laid a stress on this (the terrible) view of his subject, and this has produced an unfavourable effect upon the upper half of the picture. We look in vain for the glory of heaven, for beings who bear the stamp of Divine holiness, and renunciation of human weakness; everywhere we are met with the expression of human passion, of human efforts. *We see no choir of solemn, tranquil forms, no harmonious unity or clear grand lines produced by ideal draperies;* (!) instead of these, we find a confused crowd of the most varied movements, naked bodies in violent attitudes, unaccompanied by any of the characteristics made sacred by holy tradition. Christ, the principal figure of the whole, wants every attribute but that of the judge *no expression of Divine majesty reminds us that it is the Saviour who exercises this office.*"

The suggestions as to the essential requisites for the treatment of this grand subject—"solemn, tranquil forms," "ideal draperies," and all—we leave without comment. It will be for the reader to decide between Michael Angelo and Kugler upon these points, which concern the highest resources of creative art. But, when the author denies divinity of character and appropriate expression to the face of the Saviour, we must observe that he differs from many of those who have hitherto criticised this great picture, and who seem to have discovered in that face an admirable mixture of compassion and sorrow with the sternness of the judge; whilst the left hand, slightly elevated, interposes, as to screen from his sight the execution of the terrible sentence he is denouncing. To account for these discrepancies in opinions and feeling, we may observe that Dr. Kugler does not appear to have had any long and ripe personal acquaintance with the great works of the Italian school in their native atmosphere. Speaking of the composition of his "Handbook," he says:—"It consisted of materials gathered together partly for my own information, and partly as notes for public lectures. Several tours, and *one especially to Italy, undertaken shortly before*, had enabled me to give to these materials, for the greater part, the *freshness of personal observation.*"

Of the St. Peter's at Rome, that wonder of the modern world, we are told:—"It must be admitted that this work is not entirely free from the effects of a capricious taste; but the disposition of the whole is so singularly grand, that, had not the general effect of the building been injured by later additions, *it would have ranked among the most sublime works of modern architecture.*"

These passages are sufficient to indicate the medium through which the student will have to view Italian art, who does so by the light of German criticism. Apart from these drawbacks the work, as we said before, is one of great value and interest: the amount of facts contained in it is surprising, and the descriptions of the principal works of various ages are full, luminous, and often eloquent. Not the least meritorious portion of the contents, however, are the notes by Sir Charles Eastlake, who sometimes very judiciously qualifies the opinions of his author.

The work is illustrated by upwards of one hundred engravings, after the works of the old masters (drawn on wood by George Scarf, jun.) which, though necessarily small, are executed with remarkable skill and neatness, and considerable appreciation for the spirit of the originals.

To the present edition has been added an "Essay on the First Century of Italian Engraving," by F. Turner Palgrave, which shows the result of careful research into all the best authorities on the subject (principally Bartsch and Ottley); and which will prove a useful Handbook for amateurs.

ENGINEERS OF THE BRITANNIA-BRIDGE.—Mr. Lucas has just completed a picture which will prove of interest as a record of the completion of one of the greatest engineering works of modern times—viz., the Britannia bridge on the Chester and Holyhead Railway. It represents the conference held previously to the floating of one of the tubes of the bridge: a simple, business-like group of a dozen energetic, calculating, hard-headed individuals, discussing the order of proceedings on that memorable occasion. Amongst the more notable personages included in it are Robert Stephenson, the engineer of the works (for whom the picture has been painted); Admiral Moorsom, chairman of the Chester and Holyhead Railway; G. P. Bidder, C.E.; Joseph Locke, C.E.; I. K. Brunel, &c. The famous Britannia-bridge is seen a little in the background. The picture is now on view at Messrs. Graves and Co's, Pall-mall; by which an engraving of it will shortly be published.

LITERATURE.

THE ILLUSTRATED BOOK OF FRENCH SONGS. From the Sixteenth to the Nineteenth Century. Translated and Edited by JOHN OXENFORD, Esq. H. Ingram and Co.

All good judges, who may have disparaged French poetry, have ever made an exception in favour of its lyric, and even of much of its dramatic, effusions. But whatever other beauties it may boast, its songs are the very bloom of it. We speak of the literary view of them in praising them thus; for there is not, to some unanimity, nor, doubtless, the same ground for it, respecting the general musical merits of French songs. Yet even this—the worst part of them on the whole—even the music is highly prized by those at least for whom it was intended—the French themselves; and we have scarcely a right to exact from any national performance an extra national popularity. We remember the coarse metaphor which Frederick the Second of Prussia employed to depreciate the vocal music of France; but, if he was a great critic in the arts of war and statesmanship, which is by no means an indisputable point—his authority does not bear the same crushing sway upon subjects of taste: to which remark we may add another, viz., that some of the most successful productions of the French Ecole and of the French Théâtre have appeared since the death of Frederick. We believe, besides, that he alluded not to the song-music itself so much as to the prevalent national style of singing it,—which is certainly very peculiar, generally shocks a stranger, and is sure to excite great disfavour if it does not give the highest delight—there is no medium.

Of the literary merits, however, of French lyric poetry, we can, in the main, speak with very different confidence. In this and in the dramatic form the muse of France has left its chief masterpieces and obtained its most signal triumphs. Next to the tribune—where the tribune is free, where it is practically and really accessible to every orator throughout the community—the two kinds of literature we have mentioned are the most important. Everybody remembers old Buchanan's remark about one of them—"Give me the writing of a people's lays, and I will give you the making of their laws,"—in his day a profound saying, which was based even then on experience, but which a thousand wonderful instances of subsequent history have illustrated and verified. The Spaniards drove the Moors out of their country while chanting the patriotic ditties of their bards. In our own age Tom Moore's Irish "Melodies" exercised no small influence on political events. But the rhapsodies connected with the French Revolution, and subsequently with the glory of Napoleon and with the martial memories of the Empire, are the nearest to our purpose. Few cases in all history could better elucidate the social and political power of the lyric muse, or this great fact that what an entire nation sings is often of far more moment than what its rulers may proclaim or even do.

Independently, then, of the merits which may characterise a people's songs, there is much instruction and much interest attached to a study of them. He who thoroughly enters into their spirit enters into that of a community in all its broader and more permanent tendencies; he will, for instance, intuitively catch and perceive the sentiment which dominated some vast epoch; will appreciate or estimate that sentiment in its exact nature far more readily and surely than those of learned philosophic disquisition would enable him to do. Therefore, in the case of such a people as the French, the national song literature affords a rich and remunerative mine of study. But, why not this study in the originals? It is not ignorance of the language which alone prevents thousands from indulging their wish in this respect, and from paying attention to an object the attractiveness and use of which are so obvious. Where are they to find specimens of each class and division of a nation's ballad-productions, collected into one view? An English reader possessing that sufficient knowledge of French which is undoubtedly very common amongst us, would have plenty of time for glancing through, and for studying a convenient book like Mr. Oxenford's, and yet might not have time, nor indeed patience, for collecting, in by-way and cross-way, from many scattered publications, old and new, the samples which that gentleman has not only thus brought together but classified in their natural demarcations.

Had this "Book of French Songs Illustrated" not been so extremely entertaining in the perusal, and indeed so unusually pretty in appearance, we might not have deemed it necessary thus, in our very first comments, to insist on the value which it possesses. But since it is a gala-volume, as bright and beaming as any Annual, Keepsake, or festive miscellany that ever figured upon a drawing-room table, we were afraid that its fancy might, according to the well-known way of the world, do some material damage to its equally real qualities of intrinsic worth. People will not, if they can help it, allow either man or thing to have credit in an eminent degree for two good qualities of a dissimilar kind. Once they have granted that such a one is a fine gentleman, it goes to his heart to be asked to allow that he is also a solid thinker. Why were they not told of this at an earlier moment? They could have then set him down as a very useful and correct person, &c. In general, to give a person a striking reputation for any one line of work is to taboo him from every other. Sheridan make a speech! Islandian delivered in the House of Commons! Nonsense! Has he not succeeded on the stage? Bulwer write a comedy! Did he not write such and such novels? *Jim* Lucas is narrative, &c. The feeling or prejudice is common and so common, in truth, that we deemed it wise to mention at once the serious merits of the work before us as a work, lest its glitter as a volume, being the more obvious particular, might cause its character to be mistaken, and might make people suppose it to be among books what a mere fop is among men.

Having disposed of this point, we will add that in the study of songs, with that view which has been already adverted to—we mean with a view to the more sure and delicate appreciation of a nation's peculiarities and prevalent sentiments—foreigners reading such songs translated into their own tongue have a great advantage over persons belonging to the nation in question. These last reflect least on the very characteristics which most strike the foreign reader. What is the most peculiar to ourselves excites in us, of course, the least share of attention; but in others, by the light of the comparisons thus suggested, the largest share. And even the little peculiarities of phrase occasionally forced upon the translator, serve to protect from the common level of human emotion the minor differences of national genius.

For many and various reasons, in short, this convenient collection of French songs, rendered into English, is a desirable addition to our literature. We must mention that wherever the lay translated is more than a literary production and may be regarded as also a historic fact, on account either of the effect it produced or of the events with which it is associated—as all these cases, we say, the omission is subjoined to the version made by Mr. Oxenford. We are disposed to think that the reader who collates the two in these instances, and who, after perusing the words of the author, examines the words of the translator, will agree with us in admiring Mr. Oxenford's performance, and in assuring him, according to the well-known pun we have made upon a term used by our neighbours, that he is not a "traducer" of the poets whom he thus in part naturalises to the north of the English Channel.

The origin of French lyrics is remote, and may be ascribed to the eleventh century, the era of the Norman Conquest; and it is no easy task, by means of samples, to give any survey of a national career of poesy which extends over such a time. Nor, in truth, is all this attempted by Mr. Oxenford. But his specimens are, nevertheless, spread from a very early date, and come down to Beranger's songs and those of living writers.

He has divided his collection into five grand classifications, the motives for which he satisfactorily explains. The first comprises "songs of the olden time;" the second, "bacchanalian songs;" the third, "revolutionary, or patriotic songs;" the fourth, the "epicurean class;" and the fifth, the "comic and satirical."

Every author introduced is duly mentioned and recorded, *narratives of troubles*, in foot-notes—birth, death, date, or other circumstances being given, *ad unlem pagine*.

The most charming illustrations lavishly adorn the pages; and care has been taken to exclude from the number of poems thus presented, such as happen to be disqualified by their pre-eminent grossness, despite of any genius, for English tastes. Such is the publication which we have the pleasure of introducing to the notice, and recommending to the favour, of our readers.

GWEN; OR, THE COUSINS. By A. M. GOODRICH. J. W. Parker

No one will read these volumes without instruction and amusement—instruction from the considerations of the motives of the actions which agitate the social state, and amusement from the lively and stirring incidents with which the story is worked out. There are scenes in the *dénouement* of the story equal to any found in the best of our modern novels. Of the persons brought on the scene, it is not too much to say, that while very little departing from the ordinary types of character as met with in the world, the minute working of principle is so accurately shown that we seem to recognise "the Cousins" among our families: and wonderful as are the incidents of the story, admit them to be the just and necessary results of the causes to which they are traced

* Handbook of Painting: the Italian Schools. Translated from the German of Kugler by a Lady. Edited, with Notes, by Sir Charles L. Eastlake, F.R.S., P.R.A. Third edition. John Murray.

SCENE—LAWN BEFORE THE [illegible] T TO ENGAGE WITH CHARLES, [illegible] —PAINTED BY D. MACLISE, R.A.—EXHIBITION OF [illegible] ACADEMY.

"BELTED WILL'S TOWER, NAWORTH."—PAINTED BY WILLIAM BENNETT.—EXHIBITION OF THE NEW SOCIETY OF PAINTERS IN WATER-COLOURS.

"BELTED WILL'S TOWER, NAWORTH."

A very plea[illegible] and therefore well-executed, picture, called "Belted Will's Tow[illegible]" is from the careful pencil of Mr. William Bennett, and is deservedly regarded as one of the best landscapes to be seen on the walls of the New Water-Colour Society. The artist has chosen not to show so much the peculiar architecture of the castle, as its particular position and the glorious trees by which it is surrounded. What he has attempted he [illegible]. Some of these trees, and the progenitors of all, have seen [illegible]

"[illegible]riors paced the keep,
And bugles blew for Belted Will,

as the present Lord-Lieutenant of Ireland and the proprietor of the Castle of "Belted Will" sings touchingly in some exp[illegible]ve verse con trasting the present with the past condition of his hereditary seat. This Castle of Belted Will is Naworth Castle, some twelve miles to the north-east of Carlisle, and now within sight of the railway traveller who passes from Newcastle to Carlisle. It is deservedly regarded as one of the best examples in the north of the castle of a border baron. A fire in the year 1844 unhappily destroyed much of its antique character; but the restoration has been completed under the careful eye of Mr. Salvin—by far the best restorer of Mediæval castles that this country has seen.

Naworth Castle was built by two noble families in the north of England, the Dacres and the Howards, and is accessible only on the south. The celebrated inhabitant of it was Lord William Howard, long familiarly known in the north as "Belted Will;" but since Sir Walter Scott wrote known wherever English poetry is read by the same designation. There is a secret pleasure in transcribing Sir Walter's portraiture in words of this border chieftain:—

Costly his garb, his Flemish ruff
Fell o'er his doublet, shaped of buff,
With satin slash'd and lined;
[illegible]away his boot and gold his spur,
His cloak [illegible]ll of Poland fur,
[illegible]wiand;
[illegible]rchmen felt,
Hung in a bron[illegible]nt studded belt.

He was the grandson of Henry Howard, the poetic[illegible] son of Thomas Howard, the fourth Duke of Norfol[illegible] brother of Tho[illegible] Howard, Earl of Suffolk, father of the infamous Countess of Es[illegible] and Somerset—the same [illegible]rl of Suffolk who built Audley End. His uncle, also a Howard, was that Earl of North[illegible]mpton who built what is now Northumberland house, at Charing-cross. Belted Bill Howard was born in 1563 and died in 1640. His place of burial unknown; his portrait is still to be seen at Castle Howard.

SKETCHES ON THE SUTHERLAND COAST,

THE HERRING FISHERY, AND SUTHERLAND EMIGRANTS

THE coast of Sutherland, from Brora, a pretty little village with a few skiffs engaged in the white fishing during the summer, and one or two herring-boats, by which the inhabitants make their autumnal fortune, is placed where the Dornoch Firth opens into the North Sea. About fifteen miles further north stands the gigantic Ord of Caithness—a granitic precipice rising sheer up of 1200 feet above the sea—covered along all its front with sea-fowl of every species, including the skua-gull, whose wings have a stretch of eight feet, and which makes terrible devastation among the herrings, when, on moonlight nights, the shoal rises to the surface. According to the old oyster-dredging song—

> The herring loves the merry moonlight,
> And the mackerel loves the wind,
> But the oyster loves the dredging song,
> For he's come of a gentle kind.

The Ord of Caithness forms the boundary between Caithness and Sutherland, and the space between it and Brora forms the northern sea coast of Sutherland. The country towards the shore is tolerably fertile to the distance of a mile or so, when it rises into a chain of heathery hills, speckled with sheep, white and black. The sea-shore is stony, and studded with formidable rocks—not of very great dimensions, but many not visible at high water—rendering the coast exceedingly dangerous, especially as the most magnificent surf I ever saw breaks on, and at the rocks like a thunder-peal, throwing its sparkling surf some ten feet into the air, when it is carried away in a white mist by the north-east gale.

About three miles from the Ord of Caithness, on the Sutherland side, the range of hills breaks, in steep declivities, into one of the prettiest glens in the Highlands, down which the Helmsdale water comes impetuously brawling and foaming over the water-worn rocks which impede its headlong progress. This river forms the harbour of Helmsdale. At the top of the harbour, where the fresh and salt water join, a very handsome bridge spans the stream in one bold arch. The town is a cluster of houses stretching back to the foot of the adjacent hills. There are two piers, the north, the longer; the south acting as a breakwater, when the wind blows hard, as it sometimes does, as I can verify by per sonal experience. On the northern pier the boats lie three or four abreast nearly up to the bridge. On a space set apart women and girls, to the number of perhaps one hundred, or, in busy seasons, to double the number, perform shouting and joking in English and Gaelic, with their dresses besmeared with the filth of the herrings, and their arms bare to the shoulders, the delectable progress of gutting the herrings, as they are flung by large wooden spades in glittering masses to the pier. To the outward boats, over the inward, lines of broad planks are laid down, and persons, generally Highlanders, hired for the purpose—run along this shaking bridge, bearing on their sturdy backs large creels of herrings. There is a plank for going, and another for returning; and the cargoes are unloaded, gutted, salted, and barrelled by a distinct set of practitioners, so that the four processes go on together. Unfortunately, there is a dangerous bar about twenty feet from the mouth of the harbour, over which, as an old voyager wrote, "the sea breaketh high and strange." If the wind blows a gale into the harbour, the boats at sea try to run close-hauled, and get under the lee of Tarbetness, a long and black promontory, forming the southern termination of the Dornoch Firth, and crowned with a lighthouse, which is of unspeakable advantage to the herring fisheries and the coasting trade.

There are two classes of herring-boats, which abound all along the Sutherland and Caithness coast, in pretty equal proportions—Buckie-boats, and what are called the Celtic boats. The former are only about half the size of the latter. They are strongly built of hard wood, their cutwaters and transposts rise perpendicularly from the water, while the keel descends a good eighteen inches from the bottom, which is made very deep; the lowest, at least, the largest of them when high and dry, standing full five feet from the sand. They carry two masts, the taller of which is not one half the height of that used by the Celtic boats. I have often admired the firmness with which the mast is stepped in the bows. As it approaches the small deck (which forms a diminutive forecastle, the shelter of which keeps the provisions dry, by breaking the spray which comes in white showers over the bow)—as it approaches this deck, the round form of the mast gradually changes into a square, of larger dimensions than the round, and is firmly stepped in a block of wood clenched to the bottom of the vessel. The sails are spread fore and aft, both on the foremost mast and the lower spritsail mast, which is stepped right in the stern, and useful in going about. The spread of canvas of the buckie boats is about one-third of the unmanageable lug-sail used by the Celtic boats, raised with vast toil upon a yard about twelve feet long, while the length of the mast is fully thirty feet. These boats are very flat, measuring about three feet, or a little more, when high and dry, from the gunwale to the sand; the keel being only about an inch from the projecting sides, and invisible amidships; and, though broad-beamed, have no hold on the water. They go very fast before the wind; but are found to get down their immense lug with vast toil, and often great danger, as soon as the crew perceive the wind shifting against them. After about half an hour's labour they manage to reduce their sail to smaller dimensions. They can make but little way to windward; and when a leeward sea comes upon the broadside every surge heaves them nine or ten or fifteen feet towards the rocks, where, if the boat be once dashed, all is over.

But it is time for me to proceed with my herring-fishing expedition. I chose a buckie-boat, where the fishermen spoke a patois of Aberdeenshire, of which I could make out just here and there a word; while, in a Celtic boat, the men generally speak Gaelic, and, as they never go to sea except in the herring time, cannot be depended on as sailors. The night was most favourable. The moon was bright, and at its full—the harvest moon—shedding a silvery lustre, which illuminated the whole sea for miles, and showing the undulating hills of Sutherland and the mighty brow of the Ord of Caithness. Our skipper rubbed his hands, while a gentle breeze from the south, ruffling the surface of the long swell, just kept the sails "asleep." A large fleet of herring-boats stole like phantoms over the sea. They gradually scattered, but to no great distance from each other; and our crew, of course, began to prepare their nets. The "drift" of nets consists of from 16 to 26, according to the means of the proprietor of the boat or boats. Each net is sixteen fathoms long and four deep; the upper side of the net is lined with buoys, generally of inflated seal-skin, and the lower with plummets of lead. In the meantime, the skipper, standing in the bows (and I stand as beside him), looked keenly ahead. Presently, he made me understand, partly by words and partly gestures, that we were approaching the "bank;" and in about ten minutes—in which he told his crew, fine stalwart fishermen, were in a state of intense excitement—the skipper suddenly pointed ahead, and exclaimed distinctly enough, "The shoal!" I looked, and saw in the moonlight a dark appearance, which extended on each side and ahead further than I could see. It was evidently what the skipper called it, "a big shoal." In a few minutes we were sailing over herrings. I was told to look overboard, with my hands on each side of my eyes, when I saw a sort of glimmering, faint and indistinct, as I judged about two feet from the surface, immediately the process of shooting the drift began. One man held the sail-rope aside, the other the lead side; two others supplied the nets from a large heap; and in about ten minutes, or something more, the long line of nets were riding behind us, the sails having been kept partially filled, so as to impart a gentle motion to the boat, while the drift slowly followed it. It sometimes, but seldom, happens that currents, formed perhaps by a recent storm, or by the motion of the tide, entangle the nets, which causes terrible confusion and frequent cutting of the drifts, even when heavy with herring—a serious loss to the proprietors. These entanglements cause bickering and quarrelling, which sometimes end in bloodshed, as the current brings two boats—the nets of both of which are entangled with each other together. Mr. Hugh Miller, now editor of the *Witness*, and one of the greatest geologists in Europe, gives, in his first most amusing book, "Scenes and Legends of the North of Scotland, or, the Traditional History of Cromarty"—a curious legend of the consequences which ensued from the crews of two boats, with their nets entangled and drifted together, putting the knives intended for cutting the nets, to a totally different purpose. They fought, leaving over the respective gunwales of the boats. Blood was spilt, unfortunately, in the sea, and the offended herrings, which had been particularly numerous the year before, deserted the Firth, and did not return for seven years.

But to return to the shoal, the boats, and the drift. The boat had not advanced her own length over the shoal when the first buoy sank. Immediately the hauling in commenced, and the herrings, shaken from the meshes, came tumbling into the boat like a shower of silver. The light of the moon materially increased the effect, and the silver shower was continued until the whole drift was drawn, and the contents emptied into the boat. The luminous effect playing over the surface of the heaps of herrings only lasts for about thirty or forty seconds. The fish is one which dies almost immediately after its being taken from the water—hence the proverb "as dead as a herring." Drift after drift was shot and hauled with equal effect, and at length the boat had obtained its full cargo, and was deep in the water—the rest of the fleet appearing to be as well loaded as ourselves. There was plenty of work for the extra hands that day; and landing, gutting, and packing occupied nearly twice the time that they had done the day before. The herring is well known to be a very changeable fish. The shoal will appear in a night and disappear in a night. There will be one season in which they do not make their appearance at all, and another in which a succession of cloudy nights materially injures the fishing. This, however, seldom happens. Of all the months in the year, June, July, and August are likely to be the sunniest, and those in which the nights shine the brightest, and the greatest number of nights. Sometimes a great shoal comes on shore, pursued by their natural enemies, whales and porpoises. A case of this kind is related by Mr. Hugh Miller, in his "Traditions of Cromarty:"—"There is a tradition that shortly after the Union a shoal of many hundred barrels, pursued by a body of whales and porpoises, was stranded in a little bay of Cromarty, a few hundred yards to the east of the town. The beach was covered with them to the depth of several feet, and salt and casks failed the packers, when only an inconsiderable part of the shoal was cured. The residue was carried away by the neighbouring farmers for manure, and so great was the quantity used in this way, and the stench they caused so offensive, that it was feared that disease would ensue. The season in which this took place is still spoken of as as the Harst (or Harvest) of the Herring Drove."

Before I quit this interesting subject, I shall subjoin some statistics touching the herring trade in all its principal features, for which I am indebted to that excellent and very copious work, "Anderson's Guide to the Highlands." It is fair to state that the Messrs. Anderson acknowledge that the following statements were copied from the *John o'Groat Journal*, published in Wick:—

The account sets out with a state of the fishery in 1829 and 1840. The apparent falling off latterly is owing to the resort of so many boats to Helmsdale:—

STATISTICS OF THE HERRING FISHERY ON THE NORTH-EAST COAST OF SCOTLAND.

Boats belonging to Wick, engaged in			
Boats not belonging to the district			
Total number of boats			
Fishermen			
Curers (only 91 regularly entered in 1840)			
Women, chiefly occupied in gutting the fish			
Coopers			
Carters			
Other labourers			
Seamen in coasting vessels for carrying away herrings			
Total number of persons employed			
Total of barrels cured			

QUANTITY OF HERRINGS CURED AT FISHING TOWNS ALONG THE COAST.

	Barrels	
Peterhead	23,000	44,000
Fraserburgh	54,000	45,000
Banff	24,000	18,000
Cullen	5,000	3,000
Findhorn	8,000	6,000
Cromarty	7,000	7,000
Helmsdale	28,000	18,000
Lybster	32,000	14,000
Wick	106,000	48,000
Thurso and Tongue	22,000	7,000
Orkney	45,000	25,000
Shetland	32,000	27,000
Berwick		30,000

The cost of a boat without a fit of nets, is about £120. The fisherman generally receives from 9s. to 10s. a cran or barrel, for the herrings, and a crew four in number—when proprietors of the boat, sometimes make £20, £30, and even £50 per head. The wages allowed for about two months' service, from the middle of July to September, are from £7 to £9, and a cask and a half of meal a week. Poor widows and girls are employed to gut and pack, at about 4d. per barrel. They make from 20s. to £3 per season. Whisky is consumed amongst all, to a most enormous and demoralising extent.

After a further tour in Sutherlandshire, I returned by Helmsdale; and, walking down to the pier, I saw—it was at the close of September—the usual débris of a successful season broken barrels, broken oars, torn canvas, and a miscellaneous quantity of the rubbish which continually encumbers the pier of a northern sea-port town. The boats—the proprietors of them despairing of another herring—lay dancing on the undulations which proceeded from the heavy swell on the bar, by the jetty; while, on the other side, half a dozen or more Dutch galliots were taking in their cargoes of herrings. The square heavy mould, the massiveness of the timbers, and the side-boards which keep flat bottomed vessels from going to leeward, are their great characteristics. It is extremely rare that these schooners—many of them of 200 tons burden—are lost; they ride over the seas like ducks, their broad bluff bows dashing the spray aside in the most contemptuous fashion. The Dutch sailors, who are almost as square built as their ships, are, nevertheless, most excellent seamen. They are canny enough to construct their rigging and arrange their sails so that they can set them and haul them down without going aloft. There were a number of them lounging on the pier, walking about or sitting on casks, in their clumsy sea-boots and nor'-wester hats.

But a widely different class of people were grouped together upon the pier, no less than Sutherland emigrants: stalwart men, with strong features, broad flat bonnets, Sutherland tartan plaids, and the watchful and faithful colley, wondering where on earth he had got to; the married and the young women wore the usual homespun garments of the Highlands; while, on their heads, the matrons wore the curch, and the maidens the emblematic snood. During the day the number of emigrants increased, and the whole of the population of the town turned out to bid them farewell. There was an emigrant ship lying in Cromarty, and their destination was Canada. The passages of all, and maintenance of all down to the shepherd dogs, had been paid by the Duke of Sutherland, and their transport guaranteed, to patches of land and cottages in a district where a number of the Sutherland Highlanders were settled before them. The scene before me was unspeakably affecting. The nervous, agitated looks of the men, the restlessness which they manifested, the constant moving about, the continually opened and continually broken-off conversations, all showed the agitated nature of their feelings. The grief of the women was loud and utterly unrestrained. They clung to their relatives whom they were leaving—never, perhaps, to see more—with frantic energy, kissing each other on the forehead, the lips, the cheeks, and the hands; while the children clung to their mothers' skirts, utterly bewildered, and weeping in sympathy with their mothers. Every reference—and their overflowing hearts could not refrain from them—to the cottages in which they were born, to the little patch of land which they cultivated, to the loch, to the burn, to the glen, and to their friends at home brought forth a fresh burst of wailing. Several women fainted, and were carried in that condition into the boat—which, by the way, was a very good one—where they soon recovered.

I applied to the skipper, who was a Helmsdale man, to give me a passage for a small consideration, to which he readily agreed. I happened to mention that my destination was Tarbert, and that his was Cromarty. "Look," he said, "at those thin, fleecy clouds rising from the sea to windward; they will gradually turn to heavy clouds, and towards dusk there will be a furious gale, with drenching rain and hail." This was pleasant news for me, but I felt it still more for the poor women and children, and said so. "As soon," he replied, "as the first gust comes over the sea, and the first pelt of rain comes driving forth, I will spread the Moray Firth opens to the ocean—it will strike us on the larboard bow, so that I shall have to put in two reefs. Were it dead ahead, I would put it in three, for then it would be tack for tack against it; but as it will be, according to my judgment, we may keep a pretty good full, but still close hauled, till we run her under the lee of the Ness, where I can land you in a safe creek in the rock."

And now the time was come for our departure. There was immediately apparent a sort of revulsion of feeling amongst the emigrants and their relations on shore. It seemed to me that the actual departure had turned the thoughts of both from the hills and the glens—the rocks and the rivers of the Highlands—to the fertile district to which they were going, and where many of their friends had gone before them, and had written them home good news, so that by a universal impulse a loud cheer was raised both from boat and pier, and in which the stalwart Dutchmen joined; and glasses of whisky were drained first, as in duty bound, to her Majesty and the Royal family—then to those we leave behind us" "To those we'll find before us." The piper then struck up the most beautiful, and, at the same time, most melancholy pibroch ever composed—I cannot spell the Gaelic name but the meaning is, "We return no more." A light and pleasant breeze from the shore carried us merrily across the long swell of the bar and for about half a mile on our course, when it dropped into a dead calm, and left us heaving upon the long swell of the North Sea. Presently a light whale-boat issued from the harbour, and a reverend old gentleman, of a most patriarchal appearance, the Cathechist of the parish, stepped on board, and the emigrants all clustered round him, using the most endearing expressions to him, when, moving his hand to them, and taking off his hat—at which of course every head bonnet—he poured forth in Gaelic a most eloquent and exciting prayer. The women melted into tears, and the men were evidently moved. The prayer was not long; but I never heard anything delivered with such intense fervour. When he was on the point of leaving, the shaking of hands with all the parishioners—men, women, and children—was so cordially given, and continued so long, that the worthy skipper began to look a little impatiently to windward; besides, another pretty strong puff from the land which had sprung up was likely, he said, to last a half-hour or more, so that, when the worthy Catechist had got into his whale-boat, he put up the helm, crowded all sail—which was not scanty—and went, at a very fair rate, down the bay. "We must make as good an offing as we can," he said, "with this puff;" and we did carry it with us so as to take us at least three miles from land. According to the skipper's prediction, as the sun approached the horizon, the light fleecy clouds became one black one, ominous, spreading just from the quarter he had indicated. The head of the boat was now turned to north-east, so that the puff came down upon our starboard bow. This course would take us out of our way for a certain degree, but, as our skipper had said beforehand, "the compass, I had my own declension. Presently down came the tempest in its strength, preceded by several furious gusts, which, while they lasted only about three minutes each—tossed the boat over on her gunwale. But soon came the gale in earnest, with the driving rain and hail, and the "sea horses," as sailors call break-high breaking surges, came down upon us in their fury. The boat, under three reefed sails, behaved admirably, tossing her bow over the breaking seas, and plunging down into the troughs. Her keel was often half out of the water. This fierce contest with the elements lasted two hours and a half, during which we made no headway, but, owing to the excellent qualities of our craft, made no leeway; then there came a lull, with a breaking in the clouds: the rain continued, but the hail abated. The sea got less furious, so that the head of the boat was turned again towards the land—breaking seas still assaulting on the starboard bow, but, as I mentioned, with diminished strength, and now we made good way, one reef shaken out, and the motion of the boat becoming decidedly more easy. Presently, on rising on a sea, we could catch a glimpse of the Tarbetness Light, but still to windward. The skipper told me that three hours more would bring us, with another tack out to sea, under the lee of the Ness. We beat up—the sea still abating to within three miles of the Light, then turned the head of our craft out to sea, going as fast through the water as on the other tack, and, in two hours and a half, made a mile and a half of direct heading. Our course was then again turned landwards, which brought us parallel to the lighthouse. Another short tack seaward brought the lighthouse fairly under our lee; while the corresponding tack gave us, what sailors call, a "good berth." Presently we were in comparatively smooth water; and the poor emigrants—who, man, woman, and child, had been prostrated with severe sea-sickness began to revive; the men to hold on to the ginging for an hour was still heaving considerably—and the women to creep out from under the tarpauling, gradually to recover their health and spirits. They were dreadfully depressed, however, when they could see no "big ship," and were told by the skipper that this was not Cromarty; but he comforted them by assuring them that they would be there by to-morrow afternoon—using the same phrase to them as he had used to me, that the storm would commence when the sun went down, and would stop with the sun rising. Cheered by this assurance, they took out their stores of oat-bannocks and home-made cheese, and very good whisky, of all of which we all partook very heartily. The Celts had their hard biscuits, dried herrings, and Helmsdale gin, on which we made merry; while my friend the skipper—to whose seamanship and knowledge of the coast we owed our lives—preferred with us the "mountain dew" and home-made cheese; and, in the words of the old Scotch song, slightly paraphrased:—

> To wlang at the bannocks of oat (not barley) meal.

And now most of us went to sleep, for, as may be conceived, we were thoroughly done up. Some time after dawn, however, we were awakened by the skipper, when we found ourselves in a snug little cove in the rocks, where the undulating waves were of quite a harmless nature, and where I discerned a rugged enough ravine; up which, however, I soon made my way, and was presently installed in the comfortable quarters of the house of a half pay Captain, who lived with a maiden sister, who forms his only society. There is not another house in the weary waste of bog and rushes with which, for miles around, my friend's dwelling is encompassed. Certainly there are the two lighthouse keepers and their wives, and their children, and the fishing village of Portmahomack, which, during the herring fishery, is much frequented by French luggers and Dutch doggers; and the Captain's Jack-of-all-trades is not unfrequently seen on his master's shetland pony, with a hamper, which appears light when he arrives and enters a certain public-house, and heavy when he departs. By the means of the Jack-of-all-trades, shetland pony, and the hamper, my friend the Captain is enabled to put upon his table the choicest champagne, delicious-tasted brandy, and excellent hollands, rare of the juniper.

As stars arise upon the night.

NAPOLEON III., EMPEROR OF THE FRENCH.

(Continued from page 399.)

1808 TO 1830.—INFANCY, YOUTH, MANHOOD.

CHARLES LOUIS NAPOLEON BONAPARTE was born in Paris on the 20th of April, 1808. Foresight the most inquired could scarcely have presaged the coming fate and future history either of his family or of himself. At the hour of his birth his father was a King—King of that small but opulent territory which, scarcely a century before, through its commerce and the bravery of its people, had had a place of honour among the most powerful States of Europe. His uncle, the Emperor Napoleon, who had conquered the admiration of mankind even more by his commanding genius than by the might of his armies, was at that time at the very height of his dazzling greatness. Thrones were filled, or on the eve of being filled, by the various members of his family; and the extent of his actual territorial sway is recalled by the fact that, at the birth of this young Prince, salutes in honour of the event were fired throughout the western continent of Europe, from the Hague and Hamburg in the north, to Rome in the south; and in the east as far as the banks of the Danube. The Emperor had already commenced his aggression on the nationality of Spain; and, a few weeks after, another uncle of the newly-born was proclaimed King of Spain and the Spanish Indies; thus completing the chain of conquest which had merged the nationalities of half Europe in the paramount sway of the French, and had created so many royalties in the blood of one illustrious man. In the subsequent history of this young Prince are comprised the atonement of his family for the faults of that great man, and the tribute paid by Prince and the world at large to his virtues.

The Prince Charles Louis Napoleon was the third son of Louis, the King of Holland. His mother, Hortense Beauharnais, like others of these male members of the Bonaparte family, was the subject of studied calumny by the Emperor's enemies; but time has done justice to her virtues and accomplishments, of which the memory is enhanced by her noble dignity in adversity. Of the two elder brothers, Napoleon Charles was born in 1802, and died, at the Hague, in 1807. The second, Napoleon Louis, was born in 1804; and in March, 1805, he was baptised by the Pope, who was then still a prisoner in France. The Emperor himself held the infant at the font, and gave him his names; and the document stating the legality of his birth was deposited in the archives of the Senate, as according to the law of inheritance established on the formation of the Empire, he was in the direct succession to the Imperial Crown. Of this Prince—whose early death in the arms of his younger brother will afterwards be mentioned—it is recorded that he was of remarkable manly beauty, and that his faculties of mind and of character were of a very high order. He married, in 1827, his cousin Charlotte, the second daughter of Joseph Bonaparte, by whom he had no children.

In accordance with the custom established by Napoleon, of appealing on all great occasions, by means of a universal vote, to the will of the nation, the succession of these two young Princes to the Imperial Throne, in the event of the Emperor or of his brother Joseph dying without heirs, was adopted by more than three millions and a half of Frenchmen. The infant Prince, Charles Louis Napoleon, was the first child of the Imperialised race whose name was inscribed on the family register of the dynasty confided to the care of the Senate. He was not baptised until the 10th of November, 1810. The ceremony was performed by Cardinal Fesch, the Emperor was his godfather, and the Empress Marie Louise his godmother. Already the mother of Hortense had been divorced, and the Queen of Holland had seen with pain in the new marriage the prospect of direct heirs to the Emperor, which would deprive her sons of their hope of the succession. The great fact of to-day, compared with her maternal fears at that epoch, is itself one of the most solemn and striking incidents in the history of the Napoleon family.

The Emperor Napoleon was much attached to these two infants. Their prattle and play were his recreation; nor did the birth of his own child diminish his affection for them. In the midst of the gravest affairs—of plans and discussions which were to change the face of empires, his relaxation was to send for these boys, who were seated at a little table by themselves, at his side, when he was breakfasting, or at other repasts that were not matters of etiquette. He incited them to talk, and bestowed much pains on the formation of their infant minds: among other things, he was accustomed to make them repeat the fables of Lafontaine, which he explained in a manner suited to their young capacity.

But now came the period of reverse: the recoil of Europe on her conqueror; battles lost; peace rejected with the obstinacy of oblivious pride, or the magnanimous courage of despair; abdication and banishment—all that sublime drama traced by the prophetic and avenging finger of Fate—a story which the young Prince was then too young to comprehend, but from which he was destined to suffer and to profit.

The first exile of Napoleon did not necessarily involve the proscription of his family. On his return from Elba, his own child torn from him by the jealous Austrians, his heart yearned the more for the little companions of former days. When they were brought to him all the tenderness of his affection was shown with an intensity that might have disarmed the calumniators of his personal character could they have witnessed it; and he remained with joy their growing beauty and ability. But the events of the Hundred Days involved his family in the second exile, which followed Waterloo; and, although he was destined never more to see these children whom he had loved so well, the young Princes ever cherished with a filial affection the memory of their uncle; and the present Emperor certainly had much of personal feeling to conquer ere adopting, as he afterwards did, so strong a respect for the character and institutions of this country.

A sentence of perpetual banishment was pronounced against every member of the Napoleon family, without distinction of age or sex. The ex-Queen Hortense, with her children, was of course included. The sad story of French ingratitude to the illustrious man who at least had made France a sharer in the criminal ambition which was the ground of his punishment, is too familiar. The rage, the insults, which the Emperor himself could scarcely escape, were even extended to the most innocent members of his family. Writing the night before her departure from Paris, the mother of Louis Napoleon says:—"I am compelled to quit Paris, whence I am suddenly expelled by the Allies. Weak woman though I am, with my two children, yet so much feared, that the enemy's troops are stationed on the road we must traverse, ostensibly to protect us, but in reality to make sure of our departure." She was not quite just in this view. During the journey, accompanied by an Austrian officer named De Wilna, she was stopped at Dijon by a detachment of *gardes du corps*, by whom she was menaced and insulted. One of them endeavoured to seize her, and declared that she was his prisoner. "Madame is under the protection of Austria," cried M. de Wilna. The *garde du corps* paid no attention, and actually seized the ex-Queen by the arm to hinder her departure. M. de Wilna succeeded in disengaging her; and the two children having been rescued and pushed into the carriage with their mother, they succeeded in escaping. It happened, singularly enough, that the next day the ex-Queen was in a position to return the service thus rendered. It was at Lons-le-Saulnier, and there the people made a violent demonstration against the Austrian officer. The Queen appealed to them urgently on his behalf, and saved him from their rage.

The life of these two children and their mother was for some time to come a continued wandering. Geneva, Aix (in Savoy), the Grand Duchy of Baden, Bavaria, Augsburg, Rome, were successively the places of their brief residence; until, finally, the ex-Queen determined on inhabiting Arenenberg, in the Canton of Thurgovia, on the Swiss shore of the Lake of Constance. Here were passed the next few years of the life of Louis Napoleon Bonaparte.

The ex-Queen had the good qualities of the Empress Josephine, and more—she had the beauty and indescribable fascination of her mother, with a proud spirit, a strong firm character, and a deep sense of her duty to her children; a consciousness of the responsibility of her charge that approached her in character to the Roman matron of old; and, like some of those wondrous women, she trained and tempered her sons that they might be equal to their destiny, whatever of good or of evil might be in store. The means were not wanting, although the personal wealth of the family was so much diminished. The first preceptor of the young Prince Louis was the Abbé Bertrand; and he afterwards pursued his classical studies under M. Lebas, son of one of the deputies to the Convention of that name, and since Professor at the Paris Athenæum. During their residence at Augsburg the young Prince, like his uncle, distinguished himself at the Gymnasium of that city by his unusual aptitude for the exact sciences. He became a proficient not only in the dead languages, but also in some living ones; and he also received lessons in chemistry and physics from a M. Gaspard, who was at the time at the head of a manufactory in Switzerland. In all the merely physical accomplishments of a cavalier and a soldier he made rapid progress; he was extremely skilful in fencing, and as a marksman; and he also acquired that practice which has made him one of the most graceful and commanding horsemen of his age. He also became an expert swimmer—an accomplishment which twice in his life was of good service to him.

Naturally enough, the Prince's attention was early turned to the military profession. He studied it in theory and practice. It happened that there was a garrison at Constance, a regiment of the Baden army, and here he took his first lessons. Soon after he was allowed to take part in the camp of Thunn, in the Canton of Berne, where the Swiss held an annual meeting for artillery manœuvres, under the direction of an old soldier of the Empire, General Dufour. Here he went through all the exercises, and shared all the mimic hardships of the regular soldier—bivouacking with the men, eating the common bread, and, compass in hand, performing all the duties of an artilleryman. At other times he went with these pupils of General Dufour on excursions in the mountains, walking twelve leagues a day, with the havresac on his back, and sleeping in his tent at the base of some glacier.

Two anecdotes are told of Louis Napoleon at this period of his life which denote a courage of no common order. It appears that he was in the habit of making solitary excursions on horseback in the mountains near his mother's residence. On one of these occasions his attention was attracted by cries of alarm proceeding from a crowd of peasants. The horses of a carriage had taken fright, and were madly rushing towards a precipice. The coachman had been thrown off his box, and in the carriage (an open one) were a lady and her two children screaming with fright, and in terror at impending death. The young Prince, who was at some little distance, spurred his horse into a gallop, cleared every obstacle in his way, and arrived just in time to grasp the bit of one of the horses and turn them, at the very moment when they were about to dash into the abyss. The lady and her children were saved from a terrible death, and the Prince was hailed with passionate applause by the people.

On another occasion (it was in the winter, and when the Prince had scarcely reached his twentieth year), being on a visit with his aunt, the Grand Duchess Stephanie of Baden, he was walking on the shores of the Rhine, accompanying the Grand Duchess and his two cousins, the Princesses Josephine and Marie of Baden, and many personages of the Court. They were talking of the old chivalrous gallantry of the French character, and the Princess Mary was lamenting its decline. Louis Napoleon as warmly defended the claims of the present age, maintained that the French were not degenerate in that respect, and that in all times women who knew how to inspire devotion were sure to receive it. They had arrived at the confluence of the Rhine and the Necker, where, in winter especially, the waters are turbid and furious. As they were walking slowly along, the wind blew a flower from the hair of the Princess Marie into the foaming river.

"There!" cried the Princess thoughtlessly, "there would have been an admirable opportunity for a cavalier of the old order!" And she pointed to the flower already borne away by the current.

"What! a defiance?" said the Prince. "Well, I accept it."

And, before any one could stop him, he leapt, as he was, into the stream, amidst the terror of the ladies and the others who were of the party. The Prince, who was a good swimmer, strove valiantly against the eddies which at that point are very strong, sometimes disappearing altogether from view; but at length he conquered, and his friends saw him reappear, holding in triumph the precious flower, with which he soon regained the bank.

"There is your flower, my fair cousin! But, for Heaven's sake," he added, laughing and wringing his dripping clothes, "do not let us talk any more of your cavaliers of the old school."

An heroic imprudence, thus manifested, explains some incidents in the subsequent career of this young man, which only inspired ridicule in a society from which the spirit of chivalry had certainly departed.

1830 TO 1836.—THE ITALIAN INSURRECTION.—MILITARY SERVICE IN SWITZERLAND.—FIRST ESSAYS IN LITERATURE.

Although the immediate cause of the Revolution of 1830 in France was the effort of Charles X. to abrogate some of the most prominent, if not the most valuable, of the guarantees of political liberty contained in the Charter, there existed, deep in the heart of the nation, a sentiment of magical shame, indignation, and remorse at the events which immediately followed the final defeat of Napoleon in 1815. There was a wide-spread feeling not so much in favour of the Bonapartes as against the military invasion that had restored the Bourbons. We can now read the French mind of that epoch by the light of the eight millions of votes for the present Emperor; but even his most ardent champion will scarcely be prepared to advance that, had the King of Rome been presented to France in 1830, she would have chosen him Emperor with the same unanimity that, two-and-twenty years after, raised his cousin to the Throne. The time was not yet ripe for such an event. The younger branch of the Bourbons had a right to be tried: they had identified themselves—it matters not from what motives—with the first Revolution, and a kind of logic demanded that they, in their turn, should be permitted to essay the difficult task of guiding it to its legitimate end. If Louis Philippe was chosen by a clique, he was afterwards accepted by the nation; and it is at least questionable whether the interests of the Bonaparte family were not better served by thus exhausting the popularity which otherwise would have attached to the untried and the unknown.

The King of Rome—or, as he was usually termed, the Duke of Reichstadt—having been consigned by Austria to a kind of civil death, Joseph Bonaparte, the ex-King of Spain, as the head of the family, addressed to the Chamber of Deputies from New York a kind of protest on behalf of the Imperial rights of his nephew.

While Joseph Bonaparte was thus watching over the pretensions of the son of Napoleon, where was the son of Louis—he who was destined twenty years later to obtain for those pretensions, inherited by himself, the sanction of eight millions of Frenchmen? He was about to take the first active step in his eventful life. At the age of two-and-twenty, a young Prince, proscribed and restricted in his career, might be pardoned if he displayed more enthusiasm than judgment at such a crisis. If older and wiser heads than his were carried away by the excitement of that revolutionary epoch, it is not surprising that he should have regarded the Revolution of July as a reversal of that unjust pronounced by united Europe on his uncle in 1815—as the *coup de grâce* of the Holy Alliance, and of all the territorial spoliation in which the members of that honourable confederacy had indulged. During this period of excitement, he was at Rome, whither he and his mother had gone to spend the winter. The revolutionary fire had spread to Italy, and an insurrection against the Pope was in preparation. Louis Napoleon, obeying his instincts—and at that age the motives to action are little elevated—lent himself to the movement, which was organised by a conspiracy extending throughout the Peninsula. Before matters were ripe, however, the secret transpired, and Louis Napoleon was obliged to fly from Rome. At Florence, he joined his elder brother, Napoleon Louis Bonaparte, who but a short time after died of fever in his arms. Both the two Princes at once responded to an appeal made by the patriots of the Romagna. Even at this early period he had the habit of acting without announcing his intentions. Thus it was that his mother received the first news of his having lent his name to the Italian insurgents, after he and his brother had irrecoverably committed themselves. In his letter to Hortense, announcing the event, he said:—"Your affection will understand the motives of our determination. We have contracted engagements which we could not do otherwise than fulfil. Could we remain deaf to the voice of the unfortunate people who call upon us? We bear a name which implies a duty!"

Eighteen or nineteen years later, this personage, President of the French Republic, sanctioned and persisted in the occupation of Rome by French troops, for the express purpose of restraining the same revolutionary spirit. If one must approve the change which time and experience had wrought, one cannot the less admire the enthusiasm, the courage, and the self-devotion of the youth of two-and-twenty, who, at the dictation of a sense of duty, and from sympathy for an oppressed people, took arms in the defence of what he believed to be a holy cause.

The present Emperor of the French, then, and his elder brother, at about the epoch when their uncle Joseph was demanding a vote by universal suffrage to choose between Louis Philippe and the "young Astyanax of modern Troy," pining to death in the cold atmosphere of Austrian etiquette—those two brothers were drawing the sword in behalf of the independence of Italy, crushed under that same Austrian yoke. Who has not some escapades of youth to remember, if not to atone for? Who does not smile rather than blush, if those earlier adventures have been inspired by some magnanimous folly? The enterprise in which the two Bonapartes were engaged was at the moment a hopeless one; yet we must not forget that, some eighteen years after, one of their cousins was a chief of a successful insurrection on the same spot, and one of the rulers of a (short lived) Italian Republic. The attempt of 1830 was a total failure. Austria was too strong in Italy: the Italians too prone to factions and divisions. Yet Louis Napoleon Bonaparte acted with a promptitude and energy worthy of a greater cause and a grander scene of action. It is observable that in all his acts and writings the spirit of his uncle may be traced, as if he had been predestined to take up the work at the point where it was wrested from the former, and to fulfil it on the original plan. His military movements in this petty insurrection were an unconscious imitation of the tactics of the great Napoleon. He sought by rapidity and boldness to break the local power ere the alarm could be given and reinforcements arrive. He assembled a few men, and with one cannon—which represented his whole artillery force, and which he had himself put in serviceable order—he set off to take possession of Civita Castellane. But as this young ardour was thrown away. His movements, like greater and more important acts in his subsequent career, had been adopted without consulting any one. Probably it was *mal àpropos*; at all events, it displeased the insurrectionary chief, who filled the office of Minister of War for the insurgents; and the young Prince was ordered to retire. He proceeded to Bologna, from whence—the Austrians having strengthened their forces—he was speedily obliged to retire to Forli, and afterwards to Ancona. The Italian insurrection was virtually at an end. The two Bonapartes, however, gained laurels from the patriots. General Armandi, writing at the time to their mother, said—"You have reason to be proud, Madam, of being the mother of such sons. Their whole conduct under these painful circumstances, has been a series of acts of courage and self-devotion." The General adds "that history will remember them"—a prophecy which at the moment seemed somewhat absurd, but of which subsequent events have brought about the fulfilment; for assuredly posterity will harmonise with a verdict of a man whose subsequent career has been so remarkable. During this retreat the elder of the two brothers died in the arms of the other at Forli; and Louis Napoleon himself, overcome by chagrin and grief, fell ill of fever at Ancona. Here his life was also in danger from the vengeance of the Governments he had successively striven to overthrow.

His mother fled from Rome to his aid. Above all, he must be concealed from the police. Her maternal instincts inspired her with the means to deceive them. Concealing her terrors, and simulating security, she gave out that she had escaped into Greece, while all the while he was under her own care, in a house a few doors from that of the commander of the Austrian troops. Finally, by means of an English passport and a disguise, she conducted her son through the Austrians troops until they crossed the French frontier.

Louis Napoleon was suffering severely from fever. The Queen took the resolution of proceeding direct to Paris, notwithstanding the law of banishment still in force. She desired to rest a few days only in the capital that the health of the Prince might be recovered, and then to return to Switzerland. She alighted at the Hôtel de Hollande, close to the Napoleon Column in the Place Vendôme: the column was then still minus the statue of the Emperor, which had been removed by the vulgar vengeance of the Restoration; and the Queen, in choosing this particular spot, could scarcely have been ignorant of the powerful impression that moment, of the associations inspired by the presence of the nephew, after fifteen years of proscription, in face of the monument which the national gratitude had raised to the uncle. The French Government believed that the Prince and his mother were at Corfu; and the astonishment of Louis Philippe and his Ministers was great when the King received from the ex-Queen a letter dated from her hotel, frankly avowing their presence in Paris.

To M. Casimir Perier, the Prime Minister, who came to see her in the course of the day, she exclaimed, "A mother I had but one means of saving my son—to enter into France. I know the risk we run. My life and that of my child are in your hands: take them if you will."

But although the law rendered at least the son, as one of the Imperial family, liable to the penalty of death, the day for such sanguinary folies was past. The Government was not the less bound to guard against the effect that might be produced by the presence of the heir presumptive of the Imperial title at a period of such excitement. Clemency and courtesy were among the virtues of Louis Philippe; he had himself too much suffered in proscription to be capable of persecuting those unfortunate exiles.

M. Casimir Perier at once met the wishes of the Queen. He undertook to procure from the King a permission for a week's sojourn, solely on the score of the Prince's state of health, and on condition that their presence should be kept a secret. This was an engagement which with the most perfect good faith it was difficult to keep. The presence of the Queen and her son transpired; the papers spoke of it. It happened to be the 5th of May, the anniversary of the death of the Emperor Napoleon, and the column on the Place Vendôme was covered with garlands. The greeting Louis Napoleon, prostrate with fever, received on his return to his country, was the cry of the people in honour of his uncle and that graceful tribute to his memory. France was at that time too much excited to permit of any sentimental weakness on the part of the Government. The permission to remain rested on the condition of secrecy, and although there was not the slightest suggestion that the parole had been broken, the ex-Queen was almost instantly requested by Casimir Perier to quit France without delay.

[illegible] ing the dilemma; and the Prince, still [illegible] in a carriage, which at once left for [illegible].

In England they remained some weeks. During this period Louis Napoleon, recovered from his illness, applied himself to the study of [illegible] institutions and manners, and personally investigated the various sources of our industrial and commercial greatness. In this respect, [illegible] followed the example of most foreigners who visit our shores; but he was destined to turn in subsequent years all the knowledge thus acquired to the profit of his own country, as well in his earlier writings [illegible] his administration. He was at that time well received in [illegible].

Early in August, 1831, the Prince and his mother returned to their residence at Arenenberg, on the Lake of Constance.

He had already, to a certain extent, made himself "talked about." Whatever his character or his capacity, it was evident that he was animated by a spirit of enterprise, and that he did not resemble either his father or his uncle Joseph. The quasi legitimate titles of the "Citizen King" precluded at the time all serious thoughts of a return of the Bonapartes; but it was remembered that the Emperor himself, before the birth of the King of Rome, had regarded the son of his brother Louis as his probable heir, and that the marriage with Maria Louise had been looked at jealously by the Queen Hortense as an infringement on his presumptive rights. The death of the elder of the two sons of Louis had brought the younger still nearer to the sympathies of the Bonapartists in France, while at the same time he naturally attracted the attention of the conspiring [illegible] rope. Still, in the then state of public feeling, the last [illegible] thought of was that this young man could ever succeed to the Crown, or become the executor of the system of the Emperor Napoleon. [illegible] other hand, his insurrectionary escapades in Northern Italy had been hailed with fraternization by the democratic and revolutionary party. They saw in him what the hopes of their fathers had made of the First Consul: he was to be the liberator of oppressed nations; and thus, if Liberty had been crushed by one Napoleon, she would be avenged by another. The Poles, ever panting for a restoration of their [illegible] nationality, had responded to the toesin sounded in Paris, by an insurrection gallantly sustained and repressed with difficulty. The eyes of [illegible] were turned on the young Prince Louis Napoleon as a fit man [illegible] succeed at his head. On his arrival at Arenenberg, after the events [illegible] recorded, he received a letter from Count Plater, General [illegible] and other chiefs of the Polish national party, urging him [illegible] declare himself. "To whose direction," they said, "could our [illegible] prise better be confided, than to the nephew of the greatest [illegible] of any age? A young Bonaparte appearing among us with the tricolor flag, would produce a moral effect to which the consequences [illegible] calculable. Come then, young hero, hope of our country, trust to [illegible] Cæsar and his fortunes, and, what is still more precious, the destinies of freedom. You will merit the gratitude of your brethren-in-[illegible] and the admiration of the universe!" And the letter was [illegible] by an offer of the Crown of Poland, should the national [illegible] be crowned with success.

[illegible] and revolutionary ardour of the Prince was inflamed [illegible] events of the hour. Although he refused the proffered [illegible] on the ground that he belonged to France, he determined, not [illegible] ding the tears and entreaties of his mother, to fight as a volun- [illegible] in the ranks of the insurgent Poles. The taking of Warsaw stopped [illegible] on his way to the scene of action. All these proceedings indicate that this Prince, at this period, had more enthusiasm than judgment; but the proof they afford of a certain magnanimous courage ought to have protected him from imputations cast on him at a subsequent period, when it became the interest of the French Court to render him ridiculous.

[illegible] more effort the Prince made to commence a career of action ere resigning himself to seclusion and study. He wrote to Louis Philippe, asking to be permitted to serve his country in a military capacity; and claiming to be allowed to enjoy the title and rights of [illegible] citizen, of which the Law of Banishment—promulgated, under the Restoration, against the Bonapartes—had deprived him. Louis Philippe took no notice of this letter—which, to the men of that day, who saw France in the Chamber of Deputies, and could not comprehend the dumb justice meditated by the people towards the memory of their [illegible] hands, appeared the absurd and unreasonable escapade of a [illegible], possessed of an extravagant and disproportioned [illegible].

Secluded and studious in his retreat on the shores of the Lake of Constance, the Prince terminated the first active period of his earlier [illegible].

To a period of infructuous, if not pernicious, action, now succeeded [illegible] reflection and literary production. His uncle is said to have [illegible] a romance, and an ultra-revolutionary effusion, under similar [illegible] circumstances. Louis Napoleon's works were more original in [illegible] their tendency. He wrote, not from vanity, but because his [illegible] full of impressions it desired to throw off. Three publications rapidly followed each other—"Political Reveries," followed by a [illegible] ject of a Constitution; "Two Words to M. Chateaubriand on the [illegible] Question;" and "Political and Military Reflections on Switzerland." Even were these little works taken by themselves, with no [illegible] interest derived from the age and position of the writer, they would [illegible] attention by their intrinsic merit. Political wisdom, the result of [illegible] science, could not be expected from a young man of two or three-[illegible] twenty; but these publications evidence a large and liberal spirit, [illegible] habit of reflection and reflection rarely found in persons of that [illegible] would now be more remarkable in one whose first manly [illegible] had taken the shape of intemperate and ill-calculated political [illegible]. One of the best men of that day—Armand Carrel—said of [illegible] early works of the Prince, that they announced a good head and [illegible] character, and that there were in them profound observations [illegible] on [illegible] situations and a great sympathy with a new era.

[illegible] gave to the Prince received from the Swiss Government [illegible] the full title of citizen, which gave him certain rights without [illegible] naturalization. The death of the Duke of Reichstadt, [illegible] constituted Louis Napoleon the "young hope" of the Bonapartists. In June, 1834, he received a captain's commission in [illegible] regiment of the Canton of Berne.

Towards the close of the year 1835 a project was formed to marry the Prince to the young Queen of Portugal, then recently raised to the [illegible] throne. Louis Napoleon declined the proposed honour [illegible], and expressed his intention, as having been written so [illegible] "attempt at flirtation" with the [illegible] Prince. "have ad pted the report of my departure for Portugal [illegible] the hand of Donna Maria. However flattering [illegible] to me [illegible] of a union with a young Queen, beautiful and [illegible], and the widow of a cousin who was dear to me, it is my duty [illegible] as no act of mine, of which I am aware, has [illegible] a slightest foundation for it. I might even add that, notwithstanding the deep interest which attaches to the destinies of a people who have just conquered their liberties, I should refuse the honour of [illegible] the throne of Portugal should it happen that I was thought of in connection with it. The noble conduct of my father—who died [illegible] in 1810, because he could not associate the interests of France [illegible] those of Holland—is not forgotten by me. My father proved by his [illegible] numerous examples how preferable is one's country to a foreign [illegible]. In fact, I consider, [illegible] estranged from my infancy to cherish my country as [illegible]. I could not yield to any consideration on the interests of France. Persuaded that the great name I bear will not be for ever a cause of exclusion in the eyes of my countrymen, seeing that it recalls fifteen years of glory, I calmly await, in a free and friendly country, the hour when the people of France will recall to her bosom those who in 1815 were exiled by twelve hundred thousand foreigners. This hope, one day to serve France as a citizen and as a soldier, fortifies my soul, and is worth in my eyes all the thrones in the world."

Of course the foregoing was an "aside" to the French nation; but the writer's faith in himself and in his ultimate destiny is not the less apparent in every line. In the blaze of his after-success one is apt [illegible] to forget that at that epoch all Europe thought his Imperial pretensions ridiculous, or (we say for him) did not think of them at all. His [illegible] tenacious adherence to his fixed idea was not the less logical. The fifteen years of gaiety "constituted a "great fact;" and a Bonaparte, at some epoch or other, was sure to rise to the top, if only to show that France for ever rejected the "twelve hundred thousand [illegible]."

(To be continued.)

JOACHIM SANDRART,

THE VASARI OF THE NORTH.

One of the most obscure and intricate subjects is the wandering of the Germanic nations into Hungary in the twelfth, thirteenth, and fourteenth centuries. *Siebenbuergen*, or the Seven Boroughs, is to this very day the name of Transylvania, marking this Teutonic exodus. Through all Hungary at that date we find a tripartite division of labour; the soil was mostly cultivated by the Slavonic and Daco Roman aborigines; the Magyar conquerors were the military rulers and landlords; while the most cunning artificers of the towns were, as they are to this day, mostly Germans.

The goldsmith craft was the great school of art at that time. In the pomp of the festive board, and in the treasures of the sacristy—whether in the candelabrum that enlightened the mass, or the crosier that glittered in the hands of the prelate—the goldsmith showed the chief artistic power that was in him. From a family of these goldsmiths settled at Gleula, in the plain between the Theiss and the Transylvania Carpathians, sprung Albert Dürer. No one who reads the autobiographical memoir of this artist (A.D. 1524) can doubt that Albert's grandfather, who was settled at Gleula, was one of those Flanderines who, quitting the Lower Rhine, peopled the banks of the Maros with an industrious race that subsists to this day; and, moreover, we find that Albert's cousin Nicholas, after the return of the family to Germany, settled in Cologne, and was still called by the name of Unger, or the Hungarian.

Albert Dürer was the Alpha of the high art of Germany, who inaugurated the marriage of reason and art; although it was some time before the Byzantine hardness and curious frosty minuteness of the schools of Augsburg and Nuremberg were melted into ease and nature by the grandeur and glowing power of the bright and luminous era of the Southern *cinque cento*. Gradually the works of the great Italian masters became known through Germany; and before the breaking out of the Thirty Years War, Germany was covered with palaces built in the style of the Renaissance, and filled with choice works of art from the south of the Alps. At length, in the fatal year 1618, the Thirty Years War began; palaces were burnt down, and artists driven into exile. Painting flourished in the security of Italy, Spain, and the Netherlands, but took to flight from Germany; "and it was in vain," says Sandrart's biographer, in his quaint language, "that Adam Elzheimer, of Frankfort, attempted to seize the fugitive goddess by the coat."

Greater success both as an artist and encyclopedic writer on art was destined to attend the renowned Joachim Sandrart, whose gigantic labours, persevering genius, and felicitous juxtaposition with the most renowned artists of his own time, have procured him a place which cannot be filled up, and which entitle him to be called the Vasari of Northern Art—if one dare apply an imitative connexion to a genius of so original a character, and the possessor of accomplishments so extensive, that it is only the circumstance of the best edition of his work being in so ponderous a form, so uncouth a German dialect, and so obsolete a type, that has prevented him from enjoying that popularity with the general public which he decidedly has possessed with the hunters after recondite *belles lettres* for a period of nearly two centuries. The prodigious folio now lies before us in all its amplitude of volume, and although, perhaps, not the most skilled of literary epicures, we are not ashamed to be a voracious *helluo librorum*. How our eyes water at the sight of the title-page, "Die Teutsche Akademie," at the top, in big letters, not to mention the little fable at the bottom, being a view of the patrimonial residence of the ingenious Joachim, who, although an artist, has no objection to have it known that he is a *Laird*; nor must we omit to mention that the atmosphere for several feet around us is perfumed with a most delicious exhalation of an antique musty character from the book of the man who was the cicerone of Rubens in Holland, and who had Guido, Albano, and Pietro da Cortona for his friends in Italy.

In the end of the fifteenth century, or beginning of the sixteenth century, the great-grandfather of the subject of our memoir, John Sandrart, was Captain of Archers, in the service of Pope Alexander the Sixth, and, being knighted, had given to him by this notorious scion of the House of Borgia the Signiories of Scala and Fay. But who was his son does not appear. Certain it is that John Sandrart, the father of Joachim, married a Frenchwoman, Antoinette Cordeau, of Valenciennes: the fruit of which union was the renowned Joachim, who, according to his faithful and minute biographer and pupil, was born between the hours of three and four o'clock in the morning of the 12th May, 1606.

At an early age Sandrart discovered his taste for drawing and engraving: and in 1621, three years after the breaking out of the Thirty Years War, when only fifteen years of age, he was sent to study engraving under the well-known Egidius Sadler, whose work, illustrative of history and heraldry, may still be seen occupying a conspicuous place in the catalogues of our Bohns, Nutts, and Quaritches. Sadler resided in Prague, which, a few years before, was in the heyday of its political, literary, and artistic importance. Its presses teemed with an active Protestant literature: its University, dating from the fourteenth century, was frequented by students from all parts of Germany. All the wealthy nobles of Bohemia had built palaces which, in a decadent state, still adorn this capital; the decoration of which, in the Italian manner, kept up the artistic atmosphere of the place; and when a Bohemian speaks of the splendour of Prague, it is always to the seventeenth century that he looks back. Here Sandrart, surrounded with much that was capable of forming his taste, devoted himself to the subsidiary art of engraving; but Egidius Sadler, discovering his ingenuity, advised him to renounce the graving tool, and take to palette and brush; which advice the young student followed.

It was to Holland that Sandrart now directed his steps; and, settling at Utrecht, he became a pupil of Gerard Honthorst, whose works, under the cognomen of Gherardo della Notte, were, even in his lifetime, well known south of the Alps. At this time the fame of Rembrandt was not yet full blown. Rubens and Vandyck, as inhabitants of the Catholic Antwerp, belonged to a school distinct from that of Haarlem: and the swarms of Dutch landscape and conversation painters had not yet come up. The natural bent of Honthorst's genius was towards the [illegible]-wood, with the Church as an employer, who can doubt of his success? But in a Protestant country, where pictures were needed as mere articles of luxury, to adorn the rooms of wealthy merchants, conversation pieces—or, as it is called, *genre* painting—became a manufacture of a natural growth. The service of the Church had hitherto rendered art somewhat remote from daily life; but, in Holland, the growing wealth gained in commerce—a Protestant ritual that excluded the accessories of art, and the development of a new mine of interest in the reflection of social life during a most picturesque phase of costume—vigour in landscape and still life—remoteness from Italy, and comparative ignorance of what the Italians had done—all conspired to make the Dutch school what Hume, with singular felicity calls it, a window opened upon the seventeenth century. Gerard Honthorst was, perhaps, the most eminent of those Dutchmen that led the way. He is, in fact, a bridge or pier that connects the grand Catholic school of art with the miniature conversation pieces of the Dutch; for, preserving figures of the size of life with the characters of the grand school, he, at the same time, began to seek subjects in the times and manners of the period in which he lived.

Rubens, during his lifetime, was not indifferent to art in Holland, the continuation of which in the middle of the seventeenth century took place rather after his death than during his life, and it afforded him pleasure to become acquainted with a rising class of painters who were, as far as intention went, as faithful to nature as the Pre-Rubensite Flemings, with much more felicitous than they in that perspective and chiaroscuro without which nature cannot be truly imitated. "But, as his (Rubens') wife sickened and died, he took a tour into Holland, in order to forget his grief, by visiting the numerous excellent artists residing there, of whom he had heard so much; thus he came also to Utrecht to visit Gerard Houthorst, who received him well, and showed him all that was doing; among other things, a Diogenes, who, by clear daylight, was seeking an honest man in the crowded public place of Athens. The invention of this picture pleased Rubens, but he saw at once that it was by a young student of painting, several of whom were then in the room. On which Rubens asked which of these young men it was; and Houthorst answered, 'This young German,' pointing to me: on which Rubens, praising my essay, encouraged me to persevere. When he further wished to visit Abraham Bloemhart and Cornelius Poelemberg, and others, Hourthorst was, from sickness, unable to accompany him: he, therefore, asked Houthorst to send me with him, which commission I executed to his great content. After Houthorst had given him banquet, he travelled further to Amsterdam and other parts of Holland, where he saw through whatever was praiseworthy; in which trip I willingly waited on him as on an artist who could, by his counsel and conversation, give me an insight into my profession; and thus I accompanied him to the borders of the Brabant. I might have a great deal to say of him in this journey, but, to cut short, I found him perfect in all virtues, and held in great consideration by persons high and low. Among other things on the journey, he praised Houthorst's manner, especially in night pieces. He visited also Poelemberg; Poelemberg's intelligent little figures, which are so [illegible] by ornamental landscapes, ruins, and animals, on which account Rubens ordered several for himself."—*Sandrart, Vol. II., Book III., Cap. 16*

Charles I.'s accession to the Throne of England had now taken place, and he was sorely perplexed between his love of high art and his horror of Presbytery. Gerard Houthorst having been sent for by this pious prince Prince, he selected Sandrart from his pupils to accompany him: and when Houthorst had returned to Holland, Sandrart remained, and became a favourite of the King. Sandrart was thus in London during the golden age of English dilettantism. "It must be said," and one of Sandrart's anonymous biographers and pupils, "to the praise of all English princes and lords, that they delight in virtuous studies, particularly painting, so that when they hear of masterpieces of art, they send to the most distant lands with ready money to purchase them."

Sandrart dwelt with delight on the art-treasures of England, and spoke with enthusiasm of the Arundel marbles and gardens, with the treasures of the gallery, including the choice works of Hans Holbein, and the portraits of Erasmus and Sir Thomas More. "It is less pleasant and instructive to the young artist were the palace and gardens on the Thames, of his second patron the Duke of Buckingham, which were soon after dispersed, but most of the pictures of which were in Sandrart's old age (i.e., our Restoration period), again mostly gathered together in Prague by Ferdinand III., to replace the old Prague collection, which had been carried off to Sweden by Konigsmark, in the Thirty Years War. But of all the pictures that Sandrart saw in England, none seems to have made a greater impression on him than Titian's "Noli me tangere Emmaus," which adorned the Gallery of Manuscripts, in Whitehall Palace, and of which he appears frequently to have spoken to his pupils in his old age.

The murder of the Duke of Buckingham, and various other circumstances, after this period cast a gloom over the lives and prospects of the artists seeking Court employment; and this, combined with a desire to [illegible] the masterpieces of Italian art, led Sandrart away from the foggy climate and lowering political atmosphere of England, across the Alps, to the [illegible] sun and marble palaces of Venice, little more than [illegible] Titian, Veronese and Balthazar Longhena had, in painting and architecture, carried the decoration of the city to the most exuberant picture of palatial splendour. Sandrart copied the famous supper piece, painted for the refectory of the Servi, which is still a great ornament of the Academia of that city—a picture which, with its companion at Paris, may show neither passion nor devotion, neither the grief of a Magdalen nor the seraphic tranquility of a St. Cecilia; but, with its airy splendour, its sumptuous architecture, its brilliant figures, and festive movement, is certainly the most poetic expression that human genius ever lent to joyous luxury.

At Bologna and Rome, Sandrart examined the works of the great artists then living—Guido, Albano, Domenichino, Lanfranc, Pietro da Cortona, and made a particular acquaintance with the most eminent "Guido," says Sandrart, "in his old age, was a man of great [illegible] and lowering political atmosphere of England, across the Alps, to the [illegible] sun and marble palaces of Venice, little more than [illegible] Titian, Veronese and Balthazar Longhena had, in painting and architecture, carried the decoration of the city to the most exuberant picture of palatial splendour. Sandrart copied the famous supper piece, painted for the refectory of the Servi, which is still a great ornament of the Academia of that city—a picture which, with its companion at Paris, may show neither passion nor devotion, neither the grief of a Magdalen nor the seraphic tranquility of a St. Cecilia; but, with its airy splendour, its sumptuous architecture, its brilliant figures, and festive movement, is certainly the most poetic expression that human genius ever lent to joyous luxury.

At Bologna and Rome, Sandrart examined the works of the great artists then living—Guido, Albano, Domenichino, Lanfranc, Pietro da Cortona, and made a particular acquaintance with the most eminent "Guido," says Sandrart, "in his old age, was a man of great [illegible] and luxury, being fond of parties, of music, and, during [illegible] large sums at cards, high prices were given him for his pictures, which were not to be got out of his hands except through his card [illegible] ments; so that his debts in Bologna, where he lived, were about [illegible] scudi." And Sandrart informs us that when he died, in 1632, he left nothing but a little furniture, with a quantity of begun and half-finished pictures. "I mention this," says Sandrart, "not to diminish the praise of Guido, but as a warning to other young artists."

The Italian portion of Sandrart's great work is invaluable from the circumstance that, although Vasari flourished after Raphael, under the wing of "Il nostro Gran-Duca Cosimo," and has produced a work which is immortal, from being the fullest repertory of information relative to the greatest artists, of many of whom he was contemporary, and of others earlier, he received authentic traditional information from his seniors—yet there was much of the best of the Italian school in the end of the sixteenth and beginning of the seventeenth century, which he never lived to see, and which gap Sandrart, by his opportunities and his industry, helps to fill up, but which want of space prevents us from attempting to reproduce in an English shape.

Sandrart's chief ally in Rome appears to have been Pietro da Cortona, an artist whom personal regard and relish for a kindred pen induced him to speak of as "Pietro da Cortona, Coronato Pittori"—an altitude in art which Pietro managed to attain somewhat too literally by his decoration of ceilings, particularly that of the Barberini Palace; but the rest of house painters, and on canvas at best a servant of decoration, [illegible] da Cortona is one of the signs of the termination of the great age of sentiment in Italy, and of the imitation of the mechanical qualities of the Venetians, without their higher powers. Pietro, in 1634, agreed to accompany Sandrart to the north; but the French attack on Bavaria, which Richelieu had combined to further his projects, along with the business at the Barberini Palace, threw obstacles in his way. How ever, he begged Sandrart, if he returned to Italy, to let him know, and he would go to meet him as far as Venice. Sandrart, therefore, alone undertook the journey across a country ravaged with war, and, arriving at Frankfort, found it closely besieged by the Imperialist General Count Gallas, with 13,000 men under him. To be within sight of the spires of Frankfort, and not to enter, was too tantalising for so active and enterprising a spirit as Joachim; so, traversing the Croat camp, with great danger to himself, he, at daybreak, passed [illegible] at the [illegible] great astonishment of the guard, and was admitted to his home.

But we must now proceed rapidly through the other phases of the life of this most active and meritorious artist. The hot continuance of the Thirty Years War appears to have hindered him from settling in Germany: and, transferring himself to Amsterdam, he appears to have [illegible] him himself in painting, and in collecting notes of Rembrandt, Douw, Brawer, and their numerous other contemporaries, whose excellence is given its renown to the Dutch School, and of whom personal intimacy enabled Sandrart to give true and much condensed memoirs of value far exceeding that of Houbraken, De Piles, and others, who, living after the school, picked up their information second and third hand.

But a circumstance now recalled Sandrart to Germany: the [illegible] although inimical to the public tranquility, yet rendered Sandrart [illegible] of the castle and lands of Stockau, near Ingolstadt [illegible] after, however, with the mortification of [illegible] overrun with French troops, and of Sandrart seeing with his own eyes, from the tower of the neighbouring town of Ingolstadt, in which he sought security, his mansion burnt to the ground. With the Peace of Westphalia, which soon after followed, the clouds that had hung over Germany were dispersed; and now commenced the tranquil, happy, and unchequered period of Sandrart's life. In 1649 he was at the Congress of Nuremberg assembled to carry out the provisions of the Treaty of Westphalia, and, compounding courtier and painter, was admired for the politeness of his manners, for the fluency with which he spoke the Germans, French, Italian, Latin, and Dutch, and English. Having painted Piccolomini, the Count Palatine, and other leaders of the close of the Thirty Years War, he became known to the house of Austria, and afterwards was employed by the Emperor Ferdinand III. to paint a picture at full length of him. In 1672, being then sixty-seven years of age, he took a second wife, and, removing to Nuremberg, became President of the Academy there; and in the city abounding in associations with the life and works of the most genial of the Nuremberg painters, Albert Dürer—in full possession of experience, pecuniary ease, sufficient leisure, and the devoted admiration and assistance of his pupils, began that gigantic work which will transmit his name to a distant posterity as the author of (with all its faults) the most complete encyclopedia of art that has hitherto seen the light, mingled with historical and biographical matter which cannot be superseded. Sandrart lived to see the accomplishment of this great work—of the critical portion of which we may give an account and subject to some analysis on a future occasion, in connection with a review of the similar labours of others who, not content with the practice of art, have investigated its first principles.

PARTNERSHIPS WITH LIMITED LIABILITIES.

THE principle of Free-Trade is now firmly rooted in the national mind. Experience has tested its soundness, and those who were its bitterest opponents now frankly acknowledge its utility and wisdom. The Legislature, however, has not yet removed all impediments to its extension, for many duties still remain—protective in some cases, prohibitory in others; but, perhaps, the most remarkable and injurious exception to the rule of unfettered action in business is the restriction imposed on the employment of capital in the formation of mercantile partnerships. It is an obvious truth, though one that has received too little attention, that money constitutes one-half of every bargain; and while we proclaim the principle of freedom in the purchase and, sale of commodities, it s absurd to deny a corresponding liberty to the use of the instruments by which alone sales and purchases can be effected. Government has at length pledged itself to erase this blot on commercial legislation, and the Vice-President of the Board of Trade has given notice of his intention to submit a measure to Parliament for legalising partnerships with limited liabilities. This system, though new to the present generation of Englishmen, is of very ancient date on the continent of Europe, and has existed in France from the time of the Middle Ages, under the title of "La Société en Commandite"—mention being made of it in the most ancient commercial records, and in the earliest mercantile regulations of Marseilles and Montpellier. In the vulgar Latinity of the Middle Ages it was styled Commenda, and in Italy Accommenda. In the statutes of Pisa and Florence it is recognised so far back as the year 1160; also in the ordinance of Louis le Hutin, of 1315; in the statutes of Marseilles, in 1253; in those of Geneva, in 1588. In the Middle Ages it was one of the most frequent combinations of trade, and was the basis of the active and widely-extended commerce of the opulent maritime cities of Italy. It contributed largely to the support of the great and prosperous trade carried on along the shores of the Mediterranean; was known in Languedoc, Provence, and Lombardy; entered into most of the industrial occupations and pursuits of the age, and even travelled, under the protection of the arms of the Crusaders, to the city of Jerusalem. At a period when capital was in the hands of the nobles and clergy, who, from pride of caste or canonical regulations, could not engage directly in trade, it afforded the means of secretly embarking in commercial enterprises, and reaping the profits of such lucrative pursuit without risk; and thus the vast wealth which would otherwise have lain dormant in the coffers of the rich became the foundation, by means of this ingenious idea, of that great commerce which made princes of the merchants, elevated the trading classes, and brought them into position as an influential estate in the Commonwealth. Ducange defines the system of limited partnership in these terms:—"Societas Mercatorum quâ uni sociorum tota negotiationis cura commendatur, certis conditionibus;" that is, a society of merchants, in which the entire management of the business is commended or entrusted to one of the partners on certain conditions. It was always considered a proper partnership, societas, with certain reservations and restrictions; and in the ordinance of Louis XIV., of 1673, it is ranked as a regular part ership; and in the Napoleon Code of Commerce it is classed in the same manner.

At the head of this system in Italy was the Florentine House of Medicis. Speaking of this family, Philip de Commines says:—"Their agents and factors are in such high credit under colour of the name of Medici, that what I have witnessed in Flanders and England may appear to others incredible. I have seen a person called Gerald Quanvese, almost wholly supporting King Edward IV. in England, when engaged in civil war in his kingdom; he supplied the King at different times with one hundred and twenty thousand crowns, and made but little profit for his master; however, he did at length recover all his advances. I have seen another, named Thomas Portunary, who became guarantee between the same King Edward and Charles Duke of Burgundy on one occasion for fifty thousand crowns, and on another for eighty thousand." As a proof of his opulence of this family, Mr. Roscoe states, in his "Life of Lorenzo the Magnificent," that from the time of his grandfather Cosmo de Medici to the year 1471 they had spent the enormous sum of 663,755 florins in the erection of buildings and the carrying on of public works for the accommodation and embellishment of the city of Florence. The value of the ancient florin, or *Fiorino d'oro*, was about two shillings and sixpence; but it must be remembered that money was greatly more valuable in the fifteenth than it is in the nineteenth century, so that the outlay of the house of Medici was most princely. This wealth they acquired by the system of limited partnership. They had the confidence of the nobles and clergy, who placed their funds in their hands, and reaped the benefit of their sagacity and experience. All classes were benefited by this active dispersion of capital, which permeated all the markets of trade, instead of lying barren, or being heaped up in the markets of interest; which, indeed, would have been a most hazardous experiment, as the Canon Law absolutely prohibited usury, even to the extent of the smallest fraction, by most severe penalties.

Some ten years since a very instructive volume on this subject was published anonymously, but it is now known that the author was an Englishman, long resident in Holland, and engaged in the Dutch trade.* It gives the following clear and simple explanation of the system:—

> Partnerships *en commandite* or *in commendam*, that is limited partnerships, when the contract is between one or more persons, who are general partners, and jointly and severally responsible, and one or more other persons, who merely furnish a particular fund or capital stock, and are thence called *commanditaires*, or partners *en commandite*, the business being carried on under the social name or firm of the general partners only, composed of the name of the general or complementary partners: the partners *en commandite* being liable to losses *only to the extent of the funds or capital furnished by them*, but their names must not appear in the style or firm of the partnership; nor must such partners interfere in the business of the partnership (though they may assist in its deliberations), under the penalty of being considered general partners, and of becoming personally responsible for the debts and engagements of the firm.

Experience, which is ever correcting speculative theories, is the true test of utility and security; and, if the system of limited partnership be judged of by that standard, a verdict must be pronounced in its favour. The rapid rise and prodigious extension of industry in the United States are mainly to be attributed to this plan of uniting small capitals, feeble when divided, but strong in their concentration. In the year 1813 there was not even a solitary dwelling on the spot where the factories of Lowell now stand. During the last war between America and England the water-power there afforded by the falls of the Merrimack and Concord rivers first tempted speculation in that locality; but it failed, being undertaken by only two persons, whose means were inadequate to the enterprise. In 1826 the two factories that had been established passed into the hands of a company formed on the *commandite* principle; and from that day to the present the whole district has flourished. Lowell is now the metropolis of the cotton manufactures of the United States, and in due time may rival Manchester. King William of the Netherlands adopted the principle of limited partnerships in Holland, Belgium, and Java, when the general pacification of Europe took place in 1815. He himself became a *commandite* partner with Mr. John Cockerill in the iron works of Seraing, which rapidly became most lucrative. At the close of the war he had only three merchant-ships at Rotterdam, and two at Antwerp; this was the whole of his commercial navy fitted for long voyages; he soon raised it to 300, each of 1000 tons burden; and Java, which, under the government of Sir Stamford Raffles, showed a deficit in the revenue of £333,333 6s. 8d., rose, in a few years, under this monarch's rule, to a net income of £1,333,333 6s. 8d. If space permitted, additional evidence might readily be adduced, in the modern enterprises of Switzerland, France, and Italy, to recommend the system of partnership with limited liabilities.

Who among us are its opponents? The very wealthy firms, who are already in possession of colossal capital and credit, which enable them to carry out the most gigantic enterprises, and reap enormous profits. Against them competition is vain, and they are, in a practical point of view, monopolists, however loudly they may proclaim the principle of free trade in commodities. They resist the association of moderate capitals, which, united, might raise up a host of rivals in the market of production; though it is the interest of the nation that all impediments should be removed which obstruct the progress of industry. If a man who possesses a moderate competency embarks in trade, he perils his last shilling and his last acre; that risk he fears to encounter; but, if his liability were limited to a fixed sum, he would be disposed, for the benefit of his family, to invest it in business under the management of those whose judgment, experience, and honourable character entitled them to confidence. Money, says Lord Bacon, is like manure—it is valueless until it is spread. Now, the junction of small capitals, like the junction of small rivulets, invigorates the processes of productions, as the accumulated volume covers and fertilises a wider area, and by this union a space is covered which otherwise must remain void and barren. It is not long since that an application was made to Parliament to allow a steam navigation company to be established on the principles here recommended, to traffic between Canada and Liverpool; the Board of Trade had encouraged the project, but when it was brought into the House of Commons it was rejected on the opposition of members who were connected with the Cunard and Collins lines, both of which are actually receiving a subsidy—the former from the British, the latter from the United States Government. These gentlemen profess to be Free-traders, and were returned to Parliament on that principle; but they *protected* the monopoly from which they have derived enormous profits for many years, and a rising colony was deprived of the opportunity of developing its resources.

Of the nature of the Government scheme we are ignorant; for, although two bills have been printed—one entitled "The Partnership Amendment Act," the other, "The Limited Liability Bill"—it is said they have been withdrawn that some modifications may be introduced. We are, therefore, precluded from giving any decided opinion on their merits or demerits. The former, however, as printed, permits persons to lend money on loan without becoming partners, but clogs the freedom of the parties, which ought to be the vital principle of these enactments, by a variety of irksome conditions. Both borrower and lender must register the amount, their names, places of business, a full description of them, and the rate of profits to be derived from the loan; although it is plain that the rate of profits ought to be determined by the success of the business, as is now the case in all companies which have a fluctuating dividend, dependent on the enlargement or contraction, the greater or less prosperity, of their transactions. If the borrower become bankrupt, the claims of the lender are postponed to all other creditors receive twenty shillings in the pound.

The Limited Liability Bill embraces both existing and future companies. The former may adopt the new plan, provided they have a nominal capital of not less than £20,000, and three-fourths in number and value of the shareholders consent to its adoption. As regards future companies, they can only obtain the privilege where the nominal capital amounts to £20,000, in shares of not less than £25 each, of which twenty per cent must be paid up. Insurance companies are excepted. Every company is to be wound up, when three-fourths of the capital are lost. They are to have a seal, and the name of the company is to be painted outside the premises. We have already confessed ourselves unacquainted with the changes that are to be made; but as these bills are *enabling* bills, and profess to be based on Free-trade principles, we must protest against withholding the privilege until the responsible firm—that is the firm liable for the whole of their property—put down a capital of £20,000, since this is no boon to small traders, but a mere aristocratic indulgence. The pernicious hand of Government should not interfere in arrangements of this character. Either establish the principle fully and without restrictive exceptions, or let the measure be abandoned.

* "Partnership on Commandite." London: Effingham Wilson.

THE FRENCH GOVERNMENT AND THE EXHIBITION.—The Exhibition Company are, it is said, to be relieved of all trouble and apprehension touching the fate of the undertaking, by the Government. The French are great sightseers when the sight is to be seen gratis, but when even the modest sum of a franc is exacted to visit the Exhibition of Manufactures, and the sum to be admitted to the Exhibition of Fine Arts, the majority of the fine civilisation would certainly have contented themselves with visiting one of the two. The Emperor has therefore resolved to indemnify the company, and place the undertaking under the Ministry of State, when the public will be admitted *gratis*.—*Letter from Paris.*

"THE PIRATES," BY FRANCOIS BIARD.

M. BIARD is an artist of decidedly dramatic genius. Invention and expression are his forte. With a fertile imagination, and an eye for "effect" in whatever line it may present itself, he subjects a display endless variety—now serious, now comic, now serio-comic; and the realisation of the idea in all is complete and masterly. In the picture which we engrave and which forms part of the present year's exhibition of paintings of the French School, we have an incident of surpassing interest and animation, such as one has found described in the pages of Cooper, and other nautical novelists, and which one has read with eager avidity and suspended respiration:—A pirate ship in a tropical climate, waiting for its prey, which the crew are artfully luring into their clutches. At the side of the ship we behold some of them disguised: one with a bonnet and parasol, another as a female hanging on the shoulders of a well-dressed gentleman, the respectable-looking master with his speaking-trumpet under his arm—all earnestly hailing the American clipper, which, unsuspecting their real character, is nearing them. Every man of this vile crew is armed to the teeth, and all except the prominent actors are crouching to the deck for the sake of concealment until the word is given for the murderous attack. One fellow standing on a cask is playing very innocently on a fiddle; and a knowing-looking lad sits perched up with a book in his hand pretending to read obviously to help in keeping up the delusion that it is "all right" and pleasant on board. A broken spirit-chest shows that strong drinks have been pretty freely resorted to to bring up the courage or excite the ferocity of the ship's company. All who view this picture, after admiring the general dramatic effect, and the skilful grouping, will be struck with the great variety thrown into the expression of the faces, in which, however, the type of villany and brutal sensuality still prevails as the only living principle. The general effect of atmosphere and *locale* also are well rendered; M. Biard having, we believe, had much personal experience of sea-life.

François Biard is a pupil of Revoil, school of Lyons. He received the second-class medal (genre) in 1828, the first-class medal in 1836, and was made Chevalier of the Legion of Honour in 1838.

"THE PIRATES."

Slow sailing at ease on her fearless way,
With but half her broad canvas unfurled,
A right queenly vessel, she holdeth her away
On the throne of the watery world.
Say, what should her brave hearts of treachery know
On the waves where their fathers rode free?
Or how should they dream of a lurking foe
Mid the joys of a Tropic sea?

Yet, mark! where the dimpling billows leap
At the touch of her glancing keel,
A pirate rides dark like a storm o'er the deep,
And his timbers are bristling with steel!
With a hail and a cheer, like a friend well met,
He follows, like fate, on her lee,
And the shouts of his band, on her ruin set,
Ring wild o'er the Tropic sea!

O, guardian sun of the Tropic sky,
Glance bright on each cutlass grim!
The pirate is cunning, the pirate is sly,—
But thou art too keen for him.
In spite of his masking, in spite of his guile,
Betrayed by thy glance shall he be;
Where his blood-thirsting weapons reflect back thy smile,
Mid the gore of a Tropic sea.

The crew of the pirate may rest where they lie—
All vainly they crouch on the deck:
Like a bird the glad ship spreads her wings to the sky,
Faster-speeding, she holds them in check.
Borne afar on the breath of the freshening breeze,
She is flown—she is safe—she is free!
And the billows laugh round where she dances at ease,
In the light of the Tropic sea!

E. L. HERVEY.

EARTHWORKS AND MASONRY.—We have been unable to enfilade the Russian works to any extent, owing to the ravines and the skill of the Russian engineers. The great object of the attacking engineer is to place the line of his batteries at right angles to the prolongation of the faces of the batteries of the enemy, and by that means to obtain an enfilading fire. The Russian engineers have frustrated this object in the present instance by the judicious position of their defences. The prolongations of the faces of the Redan, of the Garden Battery, of the Flagstaff, of the Round Tower, and of the redoubts to the right, terminate, with few exceptions, in ravines, or run at right angles to positions inaccessible to us. Hence our fire has been "direct," and has lacked the advantages usually derivable from a choice of ground on the part of the besiegers, and the points of attack are so widely extended, that the Allies have not been able to obtain any considerable amount of concentrated fire. It must be remembered that earthworks, however admirable for the purpose of immediate attack or defence, are wanted for permanent defence. They are in a constant state of "breaking down," decay and decadence are their inseparable conditions; and, if we were to retire from Sebastopol to-morrow, and if the Russians were to leave their works unrepaired, a winter's snow and rain, and the action of the weather, in a few months, would soon destroy the works which now represent the aggressive force of four nations and the defensive power of one. It is probable, therefore, notwithstanding the enormous labour bestowed upon earthen works, that if the Allies were to break up their camp to-morrow and leave the Russians to themselves, they would find, on returning in a few years, that the ruins of the present works would be represented by solid stone, and that the Redan and Mamelon would be crowned with redoubts of masonry. It is in consequence of the rapidly decaying property of earthwork, that our batteries have been so great—they are also a London house, there is always something or other to be done, lesser trade good, despite effected—they cannot be left alone for twenty-four hours. The action of shot and shell upon the earthen parapets, the destructive influence of the weather and of time—almost are harassed to pieces in a moment. Instead of the willow and twig mat becoming rotten in sun and rain, and parapets fall down and ditches are filled up by the iron shower more rapidly, but not more surely, than by the rains of heaven.—*Letter from the Camp, May 21.*

RUSSIAN FOOLHARDINESS. A Russian exhibited remarkable coolness in the performance of a very daring, and, as far as could be understood, unnecessary, act about eleven o'clock on the morning of Saturday, the 31st last. The man alluded to walked out of a trench on the side of the Mamelon Vert, running nearly parallel with the ravine between the Mamelon and Frenchman's-hill. He was completely enveloped in a white covering, of linen or some such material, his head being wrapped round with it as well as his body. The object seemed to be to render himself as conspicuous as possible, for, as the sun was shining with a strong glare at the time, the contrast with the grass and dark ground was very marked. The upper part of his body was first seen, but as he walked coolly on to the open ground his beams fully exposed to view. When first observed he could not have been more than five hundred yards from the boys, at the sight of the advanced works, towards which his back was turned; but the men in this trench did not seemingly perceive him, as they did not fire. A party of Minié rifles, however, about two hundred yards further off along the advanced work saw him at once, and discharged altogether about thirty shots at him from their rifles. The first few bullets fell short; but, the range being altered, the remainder were observed to kick up the dust on all sides of him. The white gentleman of the Mamelon took no notice, beyond looking round twice; he neither hastened his pace, bent his body, nor in any way evinced a desire to elude the hasty messengers which were sent to arrest his progress. Six or seven minutes elapsed before he was again under shelter of the works. As there was a covered way at no great distance, along which he could have passed at once, this extraordinary exposure was undoubtedly voluntary, or, if forced, must have been as a punishment. Perhaps it was done for a wager.—*Letter from the Camp.*

THE FORTRESSES OF GERMANY.—A letter from Berlin in the *Constitutionnel* says:—"The Austrian Government has again proposed to the Diet of Frankfort to vote a credit of 8 millions and a half of florins for the completion of the fortresses of Ulm and Rastadt. With the credit of the same sum voted last year, the expense already entailed has been up to this time twenty-nine millions of florins. The Prussian Government will not, it is said, give its assent to this proposition, except on condition that the federal fortresses on the north-eastern and south-eastern frontiers of Germany be also put in a proper state of defence."

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

LAW OF BLOCKADE.

The Earl of ALBEMARLE wished to ask whether there was any objection on the part of the Government to state the exact words used by Captain Watson of the *Inconstant*, upon declaring the Baltic blockade upon the 28th April? and also whether it was true, as had been reported by the Russian Government, that the Government of this country intended to change the principle upon which they had hitherto acted with reference to blockade?

Earl GRANVILLE said, there was no foundation whatever in Captain Watson's statement for the construction which Russia had put upon it.

The Roman Catholic Charities Bill, and the Weights and Measures Bill were each read a second time.

The Newspaper-stamp Bill passed through Committee.

HOUSE OF COMMONS.—MONDAY.

NEW FRANCHISE.

Major REED, for 26th June, gave notice of a motion for a bill to extend the elective franchise to all persons assessed for income-tax, and not otherwise qualified

THE CONFERENCES AT VIENNA.

Lord PALMERSTON, in reply to Mr. Duncombe, stated that a Conference was to be held that day at Vienna, at which the representatives of the Four Powers were to attend, and from which the result anticipated by the Government was that all negotiation was at an end for the present. The actual conclusion arrived at in this meeting, however, could not be formally notified until a late hour that night or next morning.

THE WAR.—ADJOURNED DEBATE.

The order of the day having been read for resuming the debate on Sir F. Baring's motion, and Mr. Lowe's amendment,

Mr. M. GIBSON reopened the discussion. He had listened to the speeches of the leaders both of the opposition and of the Government, and, though both seemed to agree in the prolongation of the war, he had been unable to discover that either party had any definite views as to the ultimate object of that war. He recollected that an eminent political writer, speaking on one occasion of two well-known Reviews which were always opposing each other, but whose politics were much the same, said they reminded him of two opposition conveyances that were always running against each other, raising a cloud of dust, or bespattering each other with mud, but which were, nevertheless, travelling the same road, and would both arrive at the same destination. Among the various propositions offered to the House on the subject, he expressed a preference for the resolution moved by Mr. Disraeli, as presenting a better prospect for the speedy termination of the war. The amendment suggested by Sir F. Baring he considered vague and unmeaning in its terms, leading to a blind and implicit trust in the Government as to the great question of peace and war. To the proposition of Mr. Lowe he objected because it shut the door against negotiations, and pronounced a standstill, and, as he believed, a disastrous and uncalled-for repudiation of the offer made by the Russian Emperor as a basis for some satisfactory treaty of peace. If the Government were predetermined not to accept those terms, whose favour had been long anticipated, the mission of Lord John Russell to Vienna was nothing more than a costly and empty farce. But upon examining the nature and effects of the terms proposed on different sides, he pronounced the Russian basis much the best, declaring that, as a permanent arrangement, the suggestion of making the Black Sea a *mare apertum* was preferable to that of perpetuating in the observance of the old Ottoman tradition the result arbitrated it a *mare clausum*. The right hon. member then traced the external relationships of the Porte through the several phases they had undergone for many years, pointing out how the danger which once threatened the independence of Turkey had not always arrived from the East, and that the idea of providing for her security by rendering Russian aggression impossible was based upon a better and more permanent view of the political contingencies and national antagonisms that might hereafter supervene. Believing that all attempts at a permanent settlement were illusory, he advised the country to rest content with the results at present achieved, observing that already the invading troops had been repulsed, and all peril of aggression on the part of Russia against Turkey for the time removed. The right hon. member then entered at length into the condemned the persistence in a war of indefinite extent, pursued in the vain desire for military glory, and for which no termination could be foreseen, except in the total prostration of one or other of the two.

Sir W. MOLESWORTH combated the conclusion that, in the present stage of the war, the country was bound to accept the same terms which would be rejected in November last. What was the case? While the right hon gentleman the member for the University of Oxford the other night had that Russia conceded to us all that we asked before the commencement of hostilities, and though the noble Lord at the head of that a nation engaged in hostilities ought not to enlarge its demands. That, as a general rule, was a very bad one: it was contrary to common sense, and would lead to most pernicious consequences. What Government could be offered to a despot to persevere in doing wrong than to assure him beforehand that he should not be placed in any worse position than he was in before? He (Sir William) protested against the war rather this: "Beware of entrance into a quarrel; but, being in, so bear it that the opponent may beware of thee" (Cheers). In order to maintain peace and avoid the calumnies of the opposition, the Allied Governments in the first instance lowered their demands upon Russia, as long as they could do so with honour. But, having been once compelled to draw the sword, and having expended such a vast amount of treasure and sacrificed so many valuable lives, the chief reason for abating their demands as much as possible no longer existed, and they were now entitled to demand upon their own terms. Memorandum after Memorandum had been offered to them; they were even entitled, if they thought proper, to increase their demands in proportion to the continuance of the war and the success of their arms. And this right they had, and had often, distinctly, and repeatedly asserted by Lord Aberdeen's Government in their communications with foreign Powers. In the Note of the 8th of August, and in the Memorandum of the 28th of December, the power to add further conditions to the Four Guarantees was expressly reserved by Lord Aberdeen's Government. Now, what were the real objects of the war? The Allied Governments engaged in it, after a protracted and fruitless negotiation, which had proved their most earnest and sincere desire to maintain peace, in order to prevent the dangerous aggrandisement of Russia at the expense of the Ottoman Empire, and thereby the stability of the system of European States, of which, as the Allies maintained, the Ottoman empire was part and parcel; and in order to secure the European nations, and inflict punishment upon Russia for wantonly violating that law by her unjust invasion of the Danubian Principalities. The Allied Governments undertook the war to teach Russia that she should not with impunity disregard the rights and liberties of European States, and that there were at least two European Powers which were determined and ready to curb her unjust and insolent aggression. For these purposes the Crimea had been invaded, and the determination arrived at that an end must be put to the naval preponderance of Russia in the Black Sea. Towards this object, he contended, the proposal of Russia for the settlement of the Third Point offered no satisfactory basis the difference between that proposal and the suggestion of the Allies presenting the marked distinction of compelling the maintenance of Russia as a naval footing, instead of a peace establishment, in the Euxine. If the Russian scheme were adopted, not merely the independence of Turkey, put upon which the safety, as well as the glory, of the British empire would be purchased by any signs of cowardice or surrender of the principles which constituted the real bonds of union among the scattered elements of our national grandeur.

Mr. J. M'GREGOR thought that, considering the political crimes of Russia, and her unjust disregard of past treaties, we ought, in justice to the people of England and France, to insist upon a full indemnification for the whole expenses of the war. By that means we should permanently weaken the power of Russia, and prevent her from, for a long time, ever again disturbing the peace of Europe

THE HORTICULTURAL FETE AT THE CRYSTAL PALACE.

(*See the Engravings at pages* 548, 549.)

THE Horticultural Fête which, on Saturday last, attracted so large a concourse of fashionables to the Crystal Palace at Sydenham, had, in connection with it, many legitimate and some unique inducements for the visitors. In the first place, it was celebrated on the finest site for such a gala in the world, the sylvan Penge-hill overlooking an amphitheatre of rich, highly-cultivated, and picturesque scenery, such as could hardly be found anywhere else in Europe. Then, when we remember that for all previous exhibitions of rare flowers the most gorgeous receptacle had been one of Mr. Edgington's excellent marquees, it must be conceded that a Crystal Palace costing a million and a half of money formed a right royal temporary home for the gay and brilliant children of the garden or the hothouse collected in such vast numbers on this auspicious occasion. But the Fête of Saturday last had, besides all these attractions for the multitude, a truly English one for the philosophic observer, who, according to Dr. Johnson, looks on mighty London with a collective glance, and, without dividing himself with its details, pronounces it in the mass the greatest seat of wealth, intelligence, and political and commercial vitality in the world. We have often heard of the great shilling public, and a great shilling crowd may be collected almost anywhere; but here, at the bidding of Sir Joseph Paxton, a great *guinea* public awoke from its aristocratic lassitude, pouring itself in thousands upon thousands into the great conservatory which forms the triumph of his professional career. Thirty thousand people to get up one fine morning in one great city, and pay a guinea each to see a flower show, was an event which could not have happened anywhere out of London, and the fact says more for the pecuniary resources of the capital of the world than could be conve yed by the most laboured statistical table that ever emanated from the muddled brain of political economist. There they were, hustling each other, as if at the pit door of a theatre, every man looking as if his cheque for a thousand or so would not cause the slightest surprise at his banker's; every lady—the elder ones rustling in costly silks and satins, the younger revelling in all the taste and gaiety of the French toilet, and that brilliant English bloom which is at once their national peculiarity and their birthright. Sir Joseph waved his wand, and London sent forth its great guinea public, thirty thousand strong, to see his fruits and flowers at Sydenham.

When the gentlemen of the Imperial Court who accompanied the Emperor and Empress of the French on their recent visit to England first saw the Crystal Palace they exclaimed with one voice, "What a place for a fête!" It is said that the heads of our gallant neighbours are always running in fêtes or revolutions; but any one who saw the Palace and grounds on Saturday must have come to the same conclusion. The weather, which, as a general rule, makes it a point to frown on flower shows, had been most threatening for the whole of the previous week. There is no knowing how many times Sir Joseph must have exclaimed with Dr. Darwin, being of course intimate with "The Loves of the Plants":—

> Winds of the north! restrain your icy gales,
> Nor chill the bosom of these happy vales!
> Hence in dark heaps, ye gathering clouds, revolve!
> Disperse, ye lightnings, and ye mists dissolve
> Hither, emerging from yon orient skies,
> Botanic goddess, bend thy radiant eyes;
> O'er these soft scenes assume thy gentle reign,
> Romona, Ceres, Flora in thy train.

That the words were exactly the same we will not undertake to pledge ourselves; but the sentiment must have been identical, and the invocation, happily for the fortunes, was successful. On Saturday morning Boreas and Eolus had their unruly servants well in hand, and during the remainder of the day the weather was as fine as could be wished for. The authorities of the Brighton Railway had all their iron steeds ready by twelve o'clock, snorting, puffing, and impatient to be off; and the same hour found their roomy station filled with fashionably-dressed company—every man, woman, and child animated by a desire to get off by the first train. But the officers were accustomed to scenes of this kind; they had only very recently had their Derby Day, they knew to a very little boy the exact number that each train would hold, and inexorably slammed the doors at the proper moment, deaf to the entreaties of several fat ladies who were anxious to try their agility by jumping into the carriages when the train was in motion, and who would most probably have fallen under the wheels had the functionaries been less determined. Trains were subsequently run every five or ten minutes, during the earlier part of the day, with admirable regularity; and the result of good arrangements and good discipline was that about twenty thousand persons were conveyed to Sydenham and back without the slightest accident. An immense number also availed themselves of the beautiful road through Dulwich, filling the territories of Mr. Bowmer with elegant private equipages, to the great pecuniary advantage of the traffic department; and the result of keeping these two lines of communication so actively in use was that, at one period of the day, the interior of the Palace contained a greater amount of fashionable visitors than ever, perhaps, assembled within the precincts of Majesty, the prayers of the Church, and the musical direction of Signor Costa, the Chairman of the Company inaugurated the undertaking in an exceedingly eloquent oration.

The Flower Show itself was unequalled in the number of specimens exhibited, their rare beauty, and the admirable arrangement of the different classes, which the capabilities of the Building permitted the managers to achieve. The moment to see it in its full glory was about two o'clock, when the company had all arrived, and before the musical attractions had caused them to scatter in various directions. For the accommodation of these precious gems from Flora's casket, the two naves, a portion of the transept, and the long open corridor facing the terrace had been laid under contribution; and on every side the eye was dazzled with a perfect sea of colour, and the sense almost oppressed with the fragrant odours of the products of every clime. The splendid azalia—fit ornament for regal vestibule—glowed literally in piles upon the stands; and the stalwart cactus in all its varieties bristled in its last attire, attracting crowds of spectators, by the strange forms which its skilful cultivators had caused it to assume. The pelargoniums were of unusual extent and variety, but looked hardly more gay and brilliant than the parasols and costumes of the many ladies with whom they seemed to be especial favourites. But who except the initiated will dare to venture far into the mysteries of horticultural nomenclature? We must confess to having always looked up to the whole tribe of gardeners with a sort of silent reverence, as proofs of prodigious learning; who, not content with producing flowers beautiful enough to excite everybody's admiration, were learned enough to give them names which added the charm of mystery to their natural graces of form and colour. The orchid family—numerous as the sands of the sea-shore, but by no means clad—was well represented; and the innumerable tribe of geraniums contributed delicate little gems that sparkled in every convenient corner. The rose—the queen of flowers—the theme of the poet in every clime, and the chartered inamorata of the nightingales in the sunny land of Hafiz—sent representatives fit, though few—the breezes of the last month having been too rough in their wooing for the delicate texture of its corolla. Modest pansies twinkled in trim order; while the gaudy calceolaria flared like a rich Rosamond's wife in all the splendour of its summer finery. Beauty there was in abundance—a grace of form, glow of colour, and, here and there, delicacy of fragrance; but there was one drawback in our admiration—they were nearly all strangers to the land; flaunting haughtily, like the Norseman, courtiers of old, to the caresses of our simpler Saxon flowers. Would it not be possible to get up an attractive show of the indigenous *flores* of Great Britain? Who that has ever wandered over the mountainous districts of the three kingdoms does not remember being struck with the gorgeousness of the mantle of gold, and crimson, and purple, which bountiful Nature had thrown over their hardy surface? Have we not our roses—not the deep-tinted regalities of Provence or Tuscany—but our own modest moss-rose, the beauty of the cliffs, distant in hue as a young virgin's inexpressibly graceful in form, and with an odour which might fitly form the atmosphere of Paradise? There is the honeysuckle, too, on which many a noble mind has poured immortal verse, and which, humble and modest as it looks, is the blood relation of the grand azalia. The tulip is our own also, hemlock by race and pedigree; and what flower has a more remarkable history? Have not kings negotiated, great cities agitated, great merchants become bankrupt, and mighty nations been stirred to their lowest foundations, and all about tulips? Has not the production of a new colour been a European event; and is not the production of a black or blue flower still the philosopher's stone, the quadrature of the circle, the perpetual motion, of all enthusiastic gardeners? Is the mountain daisy, the honoured theme of Nature's true poet, to be ever left to languish in obscurity?—

> The flaunting flow'rs our gardens yield,
> High sheltering woods and wa's maun shield;
> But thou, beneath the random bield
> O' clod or stane,
> Adorns the histie stibble-field,
> Unseen, alane.

Many, nearly all the plants which now form the pride of our conservatories originally decked the wild prairies, or were fostered on the banks of the mighty rivers of America. We have not, it is true, the warm sun or luscious soil of those latitudes, but our meadows teem with floral varieties, our hills are covered with many-coloured heaths, and our old-fashioned cottage gardens nourish many a flower which, if treated with half the care that is bestowed on the gaudy strangers, would soon rival them in a beauty of their own. Be it remembered that as our birds, although wanting the brilliant plumage that dazzles the eye, have yet the song that fills the soul, so our island flowers, albeit paler in hue and less luxuriant in growth than the proud exotics, have the fragrance that charms the sense, and is of itself worth whole rainbows of gaudy colour. Our friend Sir Joseph is a man of strikingly original mind, and can soon see whether or no a suggestion has any value in it. Who knows but he may yet give us a show of British flowers, pansies, and education?

When the gay crowds of Saturday last had feasted their eyes on the wonders of the conservatories, there was another treat yet in store for them—the playing of the fountains, decidedly the greatest novelty that could be offered to an English public. The old Dutch gardeners, it is said, that came over with William III., gave us plenty of water in their horticultural arrangements; but, unhappily, it was all in the shape of stagnant fishponds, and was a terror and a nuisance, instead of a decoration. The East is the birthplace of fountains, where the rare, much-prized, bubbling well of the desert suggested them as the greatest of human luxuries. The Greeks learnt to make them from the Asiatics, and the Romans from the Greeks, although greatly cramped in their construction by their ignorance of the first law of hydrostatics. When the Goths poured like a torrent over the fair fields and queenly cities of Western Europe—as the Russians will now if we permit them—down went the fountains, like every other thing that spoke of refinement and civilisation—statues, temples, books, and pictures. Then, after a long and dreary pause, Louis XIV., having almost conquered Europe, and being in want of a sensation, spent six millions in making a grand revival at Versailles—and ever since the *Grands Eaux* have been the type, the *ne plus ultra*, of ornamental waterworks. The Crystal Palace Company promised in their prospectus that they would outdo Versailles; but they certainly have not done so as yet, nor, judging from the appearance of their still incomplete works, are they ever likely to do so. The display of Saturday was from the upper range of fountains; and, as far as it went, had an exceedingly pleasing effect. The jets were of a fair altitude, and a steady and continuous flow, and the play was kept up for nearly an hour without intermission. But they were merely so many gigantic squirts all going together, without the sea and river gods, the Tritons, and other poetic forms that give such infinite picturesque variety to the *Grands Eaux*. At Versailles the visitor wanders through endless park-like alleys, surprised at every turn by some new device in water, their beauty and extent culminating as he goes along, until at last he comes to the great "Basin of Neptune," the triumph of the artist, where the sovereign of the deep, enthroned in the centre of a vast platform, keeps court, surrounded by the lesser marine deities, and all pour forth in an innumerable variety of jets and streams; in short, a complete and beautiful design in water, which could hardly be realised by those who never saw anything beyond the monotonous upright projection of the fluid which formed the display of Saturday last, and seems to be the only thing contemplated in the general design. The Sydenham fountains then will not eclipse Versailles; our French friends need not fear the falling of their watery laurels; but they will form a very important addition to the other attractions of the place, and, being the only thing of the kind in England, may possibly draw enough of visitors on their own account to justify the enormous expense of their erection and maintenance. Their gala days, it is true, will be limited in number, for there is rarely one-third of every summer in this country in which the suggestion of artificial waterworks, as an amusement, would be considered an exceedingly unkind "cut" by the patrons of that truly English institution, the waterproof umbrella; but, when the day is very hot, and the company very numerous, the pipes all in order, and the aquatic purveyors sufficiently liberal in their supply, there is reason to hope that the fountains at Sydenham will form a welcome addition to the amusements of its fashionable visitors.

Then we had music, sounding brass and tinkling cymbal, from Mr. Schallehn and his troupe, the mild peal of a small organ from a distant gallery, and the sparkling performance of young Arthur Napoleon on Collard's splendid piano in the Transept. The unruly crowd that surrounded Herr Koenig's cornet-à-piston, it is true, did not flatter the tone of the instrument, but nearly the young prodigy also *in propria persona;* but this, of itself proved the attraction, as in the time of the Jenny Lind fever, when the people who were crushed and torn to pieces in the lobbies were unanimous in their praises of those who had succeeded in getting in and hearing the syren. Lastly—and what English merrymaking would be complete without it?—we had the well stocked refreshment gallery with its luxurious edibles, its sparkling champagne, and its widely-distributed wines; and, as the company upon thousands of the visitors flocked to the hospitable arms of the brothers Staples, and were there cherished with a care that was truly fraternal. Every one was fed, and no one went away dissatisfied, except that pleasant few who form, every day, the unfortunate exception to the rule, whom nothing is satisfactory but dissatisfaction. The viands were good and abundant, the wines were good, and the charges—although not quite so low as under the Company's management, when £30,000 worth of food was sold without profit or benefit—were moderate, and considering were such as no reasonable person could complain of—time, place, and circumstances considered. The substantial revelry of this department finished the amusements of the day, after which the company departed as best they might—hundreds of the more opulent striding in the long queue that led to the railway, and their more aristocratic fellow holiday-seekers to the excellent Mr. Bowmer, to claim as their own one of the 7000 elegant private equipages which, during the day, had been entrusted to his care.

CLASS I.—Thirty Stove and Greenhouse Plants, grouped for effect, in or out of flower: 1, Robison and Sons, Tooting, 30*l.*; 2, Veitch and Son, Exeter and Chelsea, 16*l.*; 3, James May, gardener to — Collier, Esq., Dartford, 10*l.* Two extras: C. Peed, Norwood, and James Morris, Bromley, 7*l.*

CLASS II.—Twenty Stove and Greenhouse Plants in flower: 1, James May, gardener to — Collier, Esq., Dartford, 10*l.*; 2, Mr. Green, gardener to Sir C. Anrobus, 20*l.*; 3, Messrs. Fraser, Lea-bridge-road, 10*l.* Extra prizes: G. Harter, gardener to A. Bassett, Esq., 6*l.*; Messrs. Pamplin and Son, Lea-bridge-road, 6*l.*

CLASS III.—Twelve Stove and Greenhouse Plants in flower: 1, G. Dods, gardener to Sir J. Cathcart, Bart., 18*l.*; 2, — Carson, gardener to Mr. W. F. Farmer, 12*l.*; 3, — Frost, gardener to Mr. J. C. Reiss, R. Kriwe, W. Cuthbush, of Barnet; W. May, gardener to Mrs. Lawrence; R. Dingle, gardener to Mr. A. Lawrence; W. Carmichael, gardener to G. C. Tugwell, Esq.; William Taylor, gardener to J. Costa, Esq.

CLASS IV.—Six Stove and Greenhouse Plants in flower: 1, Thomas Williams, gardener to Miss Trail, 10*l.*; 2, Osman Rhodes, gardener to J. Philpott, Esq.; S. E. A. Hamp, gardener to Mr. James Thorne, 6*l.*; 4, C. Ridler, gardener to Miss Wilson, 3*l.*; 5, G. Clarke, nurseryman, Brixton-hill, 2*l.* Extras: G. Brush, gardener to Mr. F. Tritton; C. Smith.

CLASS V.—Twenty Variegated Plants: 1, Veitch and Son, nurserymen, Exeter and Chelsea, 7*l.*; 2, R. Franklin, gardener to Mrs. Lawrence, 5*l.*; 3, G. Young, gardener to William Slane, Esq., 4*l.*; 4, J. and C. Lee, nurserymen, Hammersmith, 3*l.*

CLASS VI.—Ten Plants with fine foliage: 1, Veitch and Son, Exeter and Chelsea, 5*l.*; 2, Robison and Son, Tooting, 3*l.*; 3, — Oubridge, gardener to James Foster, Esq., 2*l.*

CLASS VII.—Twenty Orchids of exotic species: 1, J. Mylam, gardener to G. Reed, Esq., 30*l.*; 2, B. S. Williams, gardener to C. E. Warner, Esq., 20*l.*; 3, I. Hume, gardener to R. Hanbury, Esq., 10*l.* Extra: S. Woolley, gardener to R. B. Rev. Esq.

CLASS VIII.—Twenty Orchids of exotic species 1, Veitch and Son, Exeter and Chelsea, 30*l.*; 2, Robison and Sons, Tooting, 20*l.*

CLASS IX.—Twelve Orchids of exotic species: 1, Peter Bassett, gardener to R. S. Holford, Esq., 18*l.*; 2, J. R. Saunder, Stratford-green, 12*l.*; 3, M. Clarke, Hoddesdon, 6*l.*

CLASS X.—Six orchids of exotic species: 1, S. W. Carson, gardener to W. F. G. Farmer, Esq., 10*l.*; 2, G. Dods, gardener to Sir John Cathcart, 6*l.*; 3, — Green, gardener to Sir E. Anrobus, 3*l.*

CLASS XI.—One orchid, single specimen: 1 and 2, Veitch and Son, Exeter and Chelsea, 3*l.* and 2*l.*; 3, S. W. Carson, gardener to W. F. G. Farmer, Esq., 1*l.*

CLASS XII.—Twelve Greenhouse Azaleas: 1, Green, gardener to Sir E. Anrobus, 20*l.*; 2, J. and C. Lee, nurserymen, Lea-bridge-road, 15*l.*; 3, G. Clarke, nurseryman, Brixton-hall, 10*l.*

CLASS XIII.—Six Greenhouse Azaleas: 1, S. W. Carson, gardener to F. W. G. Farmer, Esq., 10*l.*; 2, W. Thayer, gardener to J. Costa, Esq., 7*l.*; 3, W. Keele, gardener to J. Butler, Esq., 4*l.*

CLASS XV.—Greenhouse Azalea, single specimen: 1, Ivery and Son, Dorking and Belgate, 2*l.*; 2, M. Calder, gardener to Mrs. Horsman, 1*l.*

CLASS XVI.—Ten Cape Heaths: 1, Robison and Son, Tooting, 10*l.*; 2, J. and J. Fraser, Lea-bridge-road, 7*l.*; 3, T. Frost, gardener to E. L. Betts, Esq., 4*l.* Extras: W. Williams, gardener to Miss Trail, 4*l.*; Mr. Baldock, gardener to T. Trendwell, Esq., 4*l.*; G. Clarke, Brixton-hall, 4*l.*; Jackson and Son, Kingston, 4*l.*

CLASS XVII.—Six Cape Heaths: 1, W. Broadler, gardener to Sir S. M. Peto, 6*l.*; R. Roser, gardener to J. Bradbury, Esq., 4*l.*; 3, W. Taylor, gardener to J. Costa, Esq., 3*l.* Extras: G. Harter, gardener to A. Bassett, Esq., 3*l.*; O. Rhodes, gardener to J. Philpott, Esq., 3*l.*; Green, gardener to Sir E. Anrobus, 3*l.*; J. Harlock, gardener to R. W. Nutter, Esq., 3*l.*

CLASS XVIII.—Six tall Cacti, species or varieties of, in flower: 1, — Green, gardener to Sir E. Anrobus, 7*l.*; 2, R. Gnx, gardener to A. Palmer, Esq., 5*l.*; 3, W. Mortimore, gardener to J. B. Scott, Esq., 3*l.*

CLASS XIX.—Six Rhododendrons (distinct kinds): 1, Lane and Son, Berkhampstead, 3*l.*; 2, W. Gaines, Surrey-lane, Battersea, 2*l.*

CLASS XX.—12 Roses, in pots (distinct kinds): 1, Lane and Son, Berkhampstead, 12*l.*; 2, C. G. Wilkinson, Ealing, 4*l.*

CLASS XXI.—Six Roses, in pots (distinct kinds): 1, Matthew Busby, gardener to J. S. Crawley, Esq.; 2, A. Rowland, Lewisham.

CLASS XXII.—Six Calceolarias, in pots (distinct varieties): 1, J. James, gardener to W. F. W., 6*l.*; 2, Mr. Gaines, Battersea, 4*l.*; 3, John Liley, gardener to C. King, Esq., 2*l.* Extra: W. Clarke, Hoddesdon, 3*l.*; W. Carmichael, gardener to C. Tugwell, Esq., 3*l.*

CLASS XXIII.—Six Fuchsias, in Pots (distinct varieties): 1, A Bousie, Stoke Park, 6*l.*; 2, Henry Carroll, gardener to F. C. Hill, Esq., 4*l.*; 3, Dobson and Co., Isleworth, 3*l.* Extra: John Wiggins.

CLASS XXIV.—Twelve Pelargoniums (distinct varieties): 1, Charles Turner, Royal Nursery, Slough, 12*l.*; 2, Dobson and Son, Isleworth, 8*l.*; J. and J. Fraser, Lea-bridge-road, 6*l.*; 4, Gaines, Battersea, 4*l.* Extra: John Wiggins, gardener to Rev. W. F. W., 6*l.*; J. Maher, gardener to J. M. Strachan, Esq.

CLASS XXV.—Six Pelargoniums (distinct varieties): 1, William Nye, gardener to E. Foster, Esq., 6*l.*; 2, T. Windsor, gardener to A. Blyth, Esq., 4*l.*; 3, G. W. Hope, Reading, 3*l.* Extra: William Holdyer, gardener to the Rev. E. Coleridge; W. Mockett, gardener to J. Allnutt, Esq.

CLASS XXVI.—Twelve Pelargoniums (distinct varieties): 1, Charles Turner, Slough, 12*l.*; 2, Gaines, Battersea, 8*l.*; 3, Fraser, Lea-bridge-road, 6*l.*

CLASS XXVII.—Six fancy Pelargoniums (distinct varieties): 1, Archibald Bolase, Slough, 6*l.*; T. Windsor, gardener to A. Blyth, Esq., 4*l.*; 3, W. Wackrill, gardener to H. Wheeler, Esq., 3*l.* Extras: James Weir, gardener to James Hodgson, Esq.; Joseph Robinson, gardener to J. Simpson, Esq.; W. Mockett, gardener to J. Allnutt, Esq.

CLASS XXVIII.—Twelve Pansies (distinct kinds), in eight-inch pots: 1, J. James, gardener to J. F. Watson, 3*l.*; 2, W. Holder, gardener to the Rev. E. Coleridge, 2*l.*; 3, W. Lovesey, gardener to J. Gregory, Esq., 1*l.* Extra: James Auguis, Beddington-lane, 1*l.*

CLASS XXIX.—Twelve Pansies (distinct kinds), in eight-inch pots: 1, Mr. C Turner, Slough, 3*l.*; 2, Dobson and Son, Isleworth, 2*l.*; 3, Mr. Bragge, Slough, 1*l.*

CLASS XXX.—Twelve Ferns (exotic species) cultivated in pots: 1, Fletcher, gardener to J. F. Young, Esq., 3*l.*; 2, Veitch, and Son, Exeter and Chelsea, 2*l.*; 3, L. Hume, gardener to R. Hanbury, Esq., 1*l.*; 4, Bassett, gardener to R. S. Holford, Esq.

CLASS XXXI.—Twenty Ferns (hardy cultivated) in Pots: 1, F. Fletcher, gardener to J. F. Young, Esq., 3*l.*; 2, B. S. Williams, gardener to C B. Warner, Esq., 2*l.*; 3, Bixby, gardener to Viscount Bevare, 1*l.*

CLASS XXXII.—Twelve Lycopodiums, not less than six species: 1, B. S. Williams, gardener to C. B. Warner, Esq., 3*l.*; 2, Veitch and Son, Exeter and Chelsea, 2*l.*; 3, T. Bassett, gardener to R. S. Holford, Esq., 1*l.*

CLASS XXXV.—New and extremely rare Orchids in flower: 1, Robinson and Son, Tooting, 3*l.*; 2, B. S. Williams, gardener to C. B. Warner, Esq., 2*l.* (In this class it will be seen that the same exhibitors competed for all the prizes.)

CLASS XXXVI.—Six plants of Nepenthes, with pitchers: 1, Veitch and Son, Exeter and Chelsea, 10*l.*

CLASS XXXVII.—Six plants of Anectochilus and Physicorus: 1, Veitch and Son, Exeter and Chelsea, 3*l.*; 2, L. Hume, gardener to — Hanbury, Esq., 2*l.*; 3, S. Woolley, 1*l.*

CLASS XXXVIII.—Six Begonias, not less than four species: 1, T. Frost, gardener to E. L. Betts, Esq., 4*l.*; 2, G. Young, gardener to W. Slam, Esq., 3*l.*

CLASS XXXIX.—Six Gloxinias, of distinct varieties: 1, Mr. Pullen, gardener to J. Allnutt, Esq., 4*l.*; 2, G. Young, gardener to W. Slam, Esq. 3*l.*; 3, A Young, gardener to J. Edwards, 2*l.* Extra, Mr. Taylor, gardener to J. Williams, Esq., 2*l.*

The Floral Fête on Saturday was followed by a Musical Fête on Monday. Great attraction was imparted to it by the announcement that Madame Alboni was to sing, and that this was to be her only appearance in London. This alone was sufficient to draw crowds to the Crystal Palace, and the extent of their disappointment may be imagined when they found that the fair prima donna was not forthcoming. She had been suddenly taken ill—an untoward event which was verified by the circulation of a medical certificate. The programme, however, was submitted to with good humour, and the assembly appeared to listen with great enjoyment to a very excellent concert. The vocalists were Madame Fiorentini, Madame Amadei, Mdlle. Jenny Bauer; Herr Formes, Signor Salvi, and Signor Lorenzo. The instrumentalists were Ernst, Baillé, and Bottesini. A very good selection of music was given; and, considering the weakness of the *locale*, both voices and instruments were heard with surprising clearness and effect

---

MR. HENRY RUSSELL, who has recently returned from Ireland, after a successful professional visit, is having painted a Panorama of his recent Tour through the United States and Canada, to be produced in the metropolis with a new entertainment in August next.

RUSSIAN SHORT COMMONS.—Letters from the Caucasus complain of the high prices of articles of consumption, which have risen enormously since the conveyance of them by sea has been terminated. A small wheaten loaf that used to cost no more than three copecks cannot be had now under ten copecks.

PIANORI.—A letter from Rome, in the *Messaggere* of Modena, states that further inquiries made by the Papal police about the man who lately attempted the life of the Emperor Napoleon show that his real name is Simesio, and not Pianori. He had been condemned to twelve years' imprisonment for a murder at Brisighella, and for arson committed at Foguano, but succeeded in making his escape from the prison of Cervia.

A SCENE AT CHURCH.—On Sunday last a great deal of excitement was occasioned at Watford by the attempt of the Vicar (the Rev. R. L. James) to introduce changes of a Puseyite character in the service. After the Morning Prayer and the Litany a bell was rung, contrary to custom, for five minutes before the Communion Service. As soon as the bell began to ring, the Hon. Mrs. Villiers rose from her seat, in a pew near the pulpit, and left the church—an example which was immediately followed by the whole of the congregation. Lord Lee James has held the living only since the recent demise of the Hon. and Rev. Mr. Capel.

THE AUSTRIAN RULE IN WALLACHIA.—A private letter from Bucharest of May 19 gives a curious instance of the peculiar way in which the Austrian occupators of the Principalities subserves the interests of the Western Powers. The semi-official journal called the *Poterea*, which tries to be independent, lately received a warning for publishing something likely to be disagreeable to the Russians, and was told that it might continue the Turkish Government as much as it pleased, but must say nothing about Russia. Lately, on the occasion of the last article in the French *Moniteur* on the policy of the French Government with regard to the Eastern Question, M. Lorent, the Hospodar's private secretary, who performs the duties of censor, desired to see the proof of the translation, and he cut out the passage which described Russia as prepared, if necessary, to follow a revolutionary policy, and also the conclusion of the article, which contained the interpretation of the Four Points, as understood by France and England

A ROMAN'S EPITAPH.—Some workmen, in making an excavation at Constantina, in Algeria, a short time back, came on an ancient tomb, which had evidently been that of a Roman citizen, from the following inscription; but the inscription, which is in well-written hexameters and pentameters, appears so curious that a translation of it seems worth giving. It runs thus:—"I, Julius Saturninus, whose remains repose here state the exact truth in these verses. I have spent a life, without annoyance, exercising the calling of silversmith in my house at Cirta. I have always been of the strictest probity, and of the most complete honour. I have no contests towards any one whatever to complain of, for I was always gay and always happy, until the death of my chaste Valeria. I have celebrated with honour and in prosperity one hundred anniversaries of my birthday; and, at last, my final day arrived when my enfeebled frame rendered it welcome. The lines which you are now reading I composed myself during my life-time, being permitted so to do by the kind goddess Fortune, who never forsook me. Follow the path which I have taken. I await you here below; come."

SIX YEARS IN SIBERIA.—A case has just come to my knowledge from which it would appear that the Russian authorities are not apt to relax the rigour of their despotic vigilance in favour of their "dear friends the Prussians." A young man has just returned after an absence of six years, having made an involuntary journey to that happy country Siberia, where the inhabitants live for six months for their own pleasure under ground, and prisoners are doomed for life to work in the mines from one end of the year to the other without seeing the light of day. It appears from his statement that this young man was a clerk in a commercial house at Thorn, in Prussian Poland; and, in the year 1848, made the acquaintance of Count Ferdinand Zamoisky, of Cracow, who was compromised in the disorders of that year, and induced by him to cross the frontiers, where he was arrested by the Russian authorities, and, being without a passport, was sent as a prisoner for being a supporter of the revolutionary movement, and sent with a caravan of other prisoners to Siberia. On his arrival there he was forced to serve as a common soldier for three years, at the end of which his condition was improved by being employed in the military hospital at Irkutsk, as a sort of assistant or nurse. In consequence of some trifling breach of the rules, he was, however, after a few months, dismissed from this situation, and sent back to his regiment, which was soon after marched to a little town in Asia, the name of which he never could ascertain. Here he took an opportunity to desert; but was arrested in the province of Tomsk, and condemned to penal servitude in the mines. It was not before the beginning of 1853 that he had an opportunity of taking a step to regain his liberty. The Adjutant-General of the Emperor, Lieut.-General Annenkoff, happening to pass through Kansk on an official tour of inspection of the troops, the young man succeeded in giving him a written petition, setting forth his unhappy position and laying great stress on the fact of his being a native of Prussia. The General made inquiries about him, and ordered him eventually to be set at liberty. On the 2nd of May last year he commenced his pilgrimage homewards, and following the great military road through Tobolsk, Casan, Vladimir, Minsk, Moscow, Wilna, and Konigsberg, arrived at Thorn on Easter-day, having been nearly a whole year on his journey, and performed the distance of 7000 versts (above a thousand miles) entirely on foot.—*Letter from Konigsberg.*

THE OPENING OF THE PARIS EXHIBITION

(See the Illustrations at pages 552–553, and 556.

THE opening of the Universal Exhibition was in no way so remarkable a ceremony as that which drew hundreds of thousands of people to Hyde-park on the 1st of May, 1851. The Champs Elysées were crowded by curious Parisians, ready to defy the bad weather for the chance of seeing the imperial cortége. Long tricolor streamers waved before the Palace of Industry; strong parties of the Paris police (who have all returned to the cocked hats of the olden time) were lounging about; and mounted dragoons charged at carriages inclined to go the wrong way with a daring generally considered to be misplaced. The tickets of admission, coloured according to the wing at which they gave admittance, were a source of constant annoyance. But these little annoyances were soon forgotten when the cards had been delivered at their proper destination. General visitors were congregated in the Galleries—the holders of white cards (which implied evening dress) being admitted to the ground floor rolled off round about the throne. This arrangement gave effect to the Building, at the expense of the visitors, who could see little of the opening ceremony, and who had, behind them generally, unfinished deal counters, garnished with packages of every description. But the view from a commanding position, either in the Eastern or the Western Gallery, was imposing.

At the central point of the Nave were the raised steps, upon which thrones stood ready to receive the Imperial couple. Above, from the Galleries, rich red velvet drapery floated in massive folds to the ground, being gathered at the top by a golden crown. On each side of the throne were the seats of the Senators and Deputies; and round about, those of the Diplomatic Corps, the Foreign Commissioners, and the Jurors. In the other parts of the Nave—rolled off from the state dignitaries—season-ticket-holders and exhibitors roamed amid statues, trophies, church carvings, fountains, and flowers, at their leisure, or desperately sought to perch themselves upon high counters to obtain a view of the proceedings. People who had been waiting for hours began to extract lumps of chocolate, or other popular Parisian refreshment, from their pockets, and to eat. The dignitaries, in all conceivable varieties of costume, from the bright green embroideries of the Institute to the blazing scarlet of London municipal grandeur, dropped in rapidly. Ladies in painfully light but pleasingly elegant evening dress, came leaning upon the arms of stately Senators. And then the Imperial Commissioners, with Prince Napoleon in a General's uniform, at their head, created great attention. You could see the agitation of the ladies, who beautifully fringed the light Galleries—you could hear it when the cannon of the Invalides reverberated through the Building, announcing the departure of the Emperor and Empress from the Tuileries. The cheers outside soon increased the buzz of expectation within, as the splendid state coaches, richly decorated, advanced, headed by outriders wonderfully dressed, and followed by the remarkable Cent Gardes.

With the building the excitement became intense—partly because it was obvious that the bad arrangements of the authorities would prevent at least half of the persons present from seeing anything whatever. People became desperate, and clambered into all kinds of dangerous positions—from which they were, however, dislodged by the police.

Presently Prince Napoleon, followed by the Imperial Commissioners, moved towards the northern or public entrance; one minute afterwards a band, beautifully conducted, struck up "Partant pour la Syrie." The Emperor and Empress were in the Building.

As soon as the Imperial couple had reached the seats provided for them, the Empress bowed to her Consort, and sat down—the Emperor remained standing. The band was hushed. At this moment Prince Napoleon advanced to the steps of the throne, and read an address of some length to his relative. This address included one sentiment which has, strangely enough, been passed by without remark, so far as I know, by the English press. The Prince, referring to the reduction of tariffs to twenty per cent on all foreign manufactures sent for exhibition, declared that he would not use the word prohibition in connection with the Exhibition. The Free-trade tendency of this remark is unequivocal. The Emperor who appeared to speak without preparation, addressed the Prince as his dear cousin; and said that, in opening the Exhibition he opened a temple of universal concord—or words to this effect. All this was soon over; and as people in the Galleries (except those directly opposite the throne) could neither see nor hear anything, they had amused themselves gossiping, waiting till the procession should begin its progress along the Nave.

The procession was rapidly formed; the band struck up a stirring march; and the Emperor, with the Empress leaning on his arm, followed by Prince Napoleon and the Princess Mathilde, and the officers of the Imperial household, turned to the east, up the southern side of the Nave. The Emperor, dressed in a general's uniform, and wearing the Grand Cordon, appeared ill, and not very content with the appearance of the Exhibition. The Empress, upon whom all eyes were turned, was universally admitted to be *charmante, ravissante!* Her toilet was excitedly discussed on all sides. It consisted of a green ball-dress, with deep flounces of white lace, and a wreath of jewels. All admired the tender smile, the graceful bow, the stately step of the lady who shares the Third Napoleon's throne. It was with the utmost difficulty that the police cleared the way for the procession; hundreds of people crowding on the Imperial footsteps; while from the galleries above crowds of pretty faces looked down curiously upon the scene. Prince Napoleon's stately figure was very conspicuous in the procession.

Having made the tour of the Nave, the Imperial couple advanced to the steps of the throne, saluted the assembled people, and proceeded slowly to the northern door, the band bursting forth with the stirring "Partant pour la Syrie." At the entrance (the returning page having been provided, apparently) the Empress covered her shoulders with an ermine tippet. And then the Imperial pair entered the splendid state carriage drawn by six horses, and made their way back to the Tuileries. The barriers were at once pulled down, and the brilliant crowd circulated about the Building. The variety of costumes was remarkable, because every public functionary in France has a state uniform.

Of the Exhibition, to which the 10,000 persons present at the opening ceremony were allowed access, little need be said. It was far from finished. Skilfully-disposed hangings had deal counters and carpenters' tools: the galleries generally, were about as attractive as Pickford's yard. Still, in the Nave there was a good effect, or rather a gay effect. The flags of all nations hanging from the Crystal roof; the naval trophy of England; the great lighthouse ornamented with Gerome's allegories of the maritime towns; the groups of English, French, and Prussian statuary; the great St. Gobain glass; the beautiful carved altars; the French and Belgian church sculpture; the mysterious transit circle from Greenwich (which a French writer has described as a model of the Greenwich Observatory); the Bohemian glass; the Berlin castings; the great carved bird-cage; Osler's huge crystal candelabrum; the fine candelabra exhibited by the French—all these contributions, skilfully disposed in the Nave, gave a holiday appearance to the Building—for the hour.

It was said that the Emperor was highly displeased with the state of the Building on the opening day, in spite of the endeavours of the Imperial Commissioners to replace the apathy of the Company by their own vigorous administration. Since the day on which this opening ceremony took place the Commissioners in power have been dismissed. General Morin and his factotum no longer govern the fortunes or misfortunes of the undertaking. A new set of men promise a vigorous remedy. Prince Napoleon himself may be seen in the Building, portfolio in hand, directing special managers, distributing various objects, and generally superintending the works of completion. This real government at once has promised for France those happy results which we read upon Prince Albert's personal attention to the Great Exhibition of 1851. Immediate have been made in connection with this Universal Exhibition, they are clearly traceable to individuals. The Government plan was large and liberal. It overruled custom-house—octroi everything. It gave every facility for the gratuitous transport of contributions over the French territory. It abolished the stamp upon all circulars distributed within the Exhibition walls, and, lastly, it afforded working men an opportunity of seeing the Industry of all Nations—gratis! Let us hope that this liberal spirit, sustained by the new energy infused into the Imperial Commission, will yet accomplish all the hopes which the friends of this Universal Exhibition entertained when they saw the Imperial decree authorising it in the *Moniteur*, bearing date the 8th of March, 1853.

THE FINE ARTS DEPARTMENT.

PRINCE NAPOLEON has declared that the French people owe the Fine Art Department of the Universal Exhibition to the Empress Eugénie. The idea of adding the graces of universal art to the splendours of universal industry was a most happy one, especially when applied in a nation celebrated for the fervour in which its industry has wooed art to its aid, for the production of elegant utilities. And undoubtedly this idea has, in its present realisation, been an eminently happy one. In the Dublin Exhibition there was a gallery of painting and sculpture, sent from various countries; but it was not an organised representation of the various schools of living nations. Now, the Exhibition open at the present moment in Paris is, in many respects, the most remarkable collection of paintings and sculpture ever brought within the walls of one building. The fine arts of twenty-eight nations are represented upon its walls, including Mexico, Peru, and Java. These twenty-eight nations are represented by 2054 artists, exhibiting in all 5113 works of art. Of these artists there are 1059 French, and 995 foreigners; and of the total number of works, 2810 belong to France. It is gratifying, however, to notice England at the head of foreign exhibitors; as regards numerical strength. British art is represented by 99 painters, 24 sculptors, 51 engravers, 19 architects, 9 lithographers, and 51 water-colour painters. These contributors have sent 232 oil-paintings, 76 pieces of sculpture, 164 engravings, 128 architectural drawings, 33 lithographs, and 144 water-colour drawings. Thus British art is represented by 777 works!

It must be evident at a glance that France has the fairest chance of losing triumphantly from this competition. She crushes all the other schools by the number and size of her contributions. In all the English collection there is not a canvas like Gerome's for size; it being some feet larger than the "Marriage of Cana." The first impression made upon the visitor, as he hastily walks through the vast galleries of this universal Art Exhibition, is that the English school looks small and feeble beside the daring and colossal pictures of France. Our paintings are said by the French artists to have all the effect of careful water-colour drawings. To Continental students they appear to lack force—freedom. Then, again, the familiar subjects chosen by English artists appear trifling in galleries, where the fall of Rome, the great passages of Scripture, the horrors of war and revolution, are dealt in to the exclusion of almost every other subject. Those students of art, in short, who would like to become acquainted with the prejudices and principles of our neighbours as applied to the British school, would do well to read Theophile Gautier's feuilletons on the subject, now in course of publication in the columns of the *Moniteur*. He will here find what the critic of a school headed by Ingres, Meissonier, Couture, and Delacroix, has to say of Mulready, Landseer, Millais, and the rest of the men prominent in the British school.

We may pass rapidly by the contributions from Spain, that once reared a Murillo and a Velasquez; even Italy sends from the great cradle of the arts only evidences of her second childhood. We pause, near the Spanish school, before some elegant portraits of beautiful women, as the Duchess de Medina Coeli, the Countess de Robersart, &c., perhaps to regret that subjects so promising have not genius of a high order to deal with them; although the Spanish portrait painter Madrazo is a more than average painter's. He has in moderation some of those popular qualities which are wonderfully developed in Winterhalter.

But we cannot linger in this part of the great Collection. We would even pass direct through the German Department, were we not attracted, in common with hundreds of visitors, to three remarkable pictures from Louis Knaus, of Wiesbaden. The subjects are not new, but the treatment is equal, fully equal, to Wilkie in his best moments. The first—"An Entanglement of Grimace, surprised by the Village Constable," who is reading to them, with great pomp, some prohibitory law—is an exquisitely conceived picture, full of character, most happily, most delicately rendered. But the second picture—"The Morrow Morning of a Village Festival"—is the artist's masterpiece: here, the sad young girl, holding the head of her senseless lover; the shrew pulling her husband homeward, the said husband insisting upon laying down some very abstruse law first, and the exhausted fiddler leering into an empty glass; while two fellows, more used to these scenes than the rest of the company, keep up a fierce discussion over a flaring light—all are touches most happily drawn from life. And then the force and harmony of the colours, the vigour of the drawing, and the breadth of the composition, are alike admirable. Wiesbaden should be proud of Herr Knaus.

As we pass through the Prussian room we are reminded of the genius of Cornelius—and are told to regard it with awe, as it lies against the walls. These cartoons, for the Campo Santo at Berlin, are, beyond doubt, finely drawn. But it appeared to us that the attitudes were strained—that every figure appeared determined to earn its place upon the canvas by the most painful activity. Some of the groups looked, to our irreverent eyes, like an exhibition of the industry of all models! We were rather inclined to turn from these pretentious performances to the sweet mountain landscape, only a little too hard and literal in the foreground, of Hindler, to the exquisitely-finished cabinet pictures of Jean-georges Meyer, especially "The Mother and Children"; or to Augusta Lea's Norwegian landscapes, with similar effects as good as those of Turner or Jeanron. But, after all, the contention in the Exhibition will remain between the English and French schools. The Americans have sent one or two good pictures; but then they appear to be by artists who study and live in Europe. Rossiter's "Venice" is a fine imitation of Turner, but his "Primitive Life in America"—a moonlight scene—is his happiest picture—full and pleasing in colour. The rest of the American contributions exhibit mediocrity, without promise. In the same way we may pass by the gallery devoted to Belgium—passing to note here one man who, more or less, successfully imitates Claude; then Joseph Stevens, successfully imitating Landseer. Holland, however, sends some pretty-finished studies, reminding the visitor of her old exquisitely literal school. There are, of course, Russia and Austria; Belgium and Holland, from the United States, and even from Sweden, Spain, and Italy, some good pictures; but none of these countries exhibits the strength of a local school. Now, when the visitor has passed through all these States, and arrives within the French or English province, he at once feels that he is in a region peculiar to itself. In France, for instance, he at once recognises the masterly little subjects, wonderfully touched, of the incomparable Meissonier; the daring drawing of Vernet; the majestic reveries of Ingres; the deep feeling for character and beautiful palette of Decamps; the originalities of Delacroix and De la Roche; the stately presences and happy rose-tints of the courtly Winterhalter; the mournful power of Muller, the Etty-like nudities of Diaz; the shore scenes of Jeanron.

In England, come the familiar subjects of Frith and Mulready; the elegances of Leslie; the peculiarities of palette, the property of Landseer, the high finish of Millais; the equal finish and additional tenderness of Holman Hunt; the green, fresh landscapes of Lee, studded with the wonderful goats and cows of Sidney Cooper; the broken-up landscapes of Creswick; the blood-red sunsets of Danby; and the severities of Maclise! To these should be added the humour of Egg and Webster, and the sweet flavours of Goodall; and the fine sea dramas of Stanfield. We may even make other additions to this long list, for we have the fresh sea-piece of Duncan, one of which we have engraved. These, our neighbours as vainly endeavour to imitate as they endeavour to imitate the English spirit who figure in them.

Between the English and French schools there are broad marks of distinct separation. As there is not an English artist who could paint those scenes which Decamps has brought home from Turkey (that rush from the Turkish boys' school, for instance; and that butcher's shop, with the wondrous white wall); so there is no French artist who could produce the sea of Stanfield, nor the glorious masses of foliage of Lee, Anthony, and others. Theophile Gautier has said, with truth, that the English school is completely original—original as the people among whom it has sprung up. Therefore, to our mind, it has strong vitality in it—even stronger vitality than that of France. For, as it is the very genius of Art to be born before the genius of Ingres; must acknowledge the great merits of Decamps and Deamps; must acknowledge gratefully masters like Delacroix, Delaroche, and even Vernet; must see strong originality in Jeanron and the beautiful landscapes of Rosa Bonheur; and must acknowledge the extraordinary promise that lies in young Gerome's enormous picture: but at the same time he may notice in the paintings of the younger men of the French school or at all events in those of the less prominent men—a tendency to the extra-severe and the extra-horrible. As a specimen of the former, we would refer the visitor to Flandrin's "Study of a Figure," marked 5076; which represents a youth—completely nude, his limbs marked with the rigidity of death—sitting, with his head upon his knees, at the edge of a precipice. As instances of the extra-horrible, we may cite "A Scene of the Inquisition," by Robert Fleury; and "An Inventor" (who lies dead, having been killed by an explosion), by Penguilly L'Haridon—a wretched, sickening horror. These are the extravagances of the Classic school for which the French professors of art contend. M. L. Desanges' picture, which we have engraved, may be noticed to illustrate, not the extravagance, but the care and drawing—the art, which our neighbours love beyond all poetry of subject or tenderness of colour.

We shall return to this subject; and endeavour to test, by careful and conscientious contrast, the artistic strength of the various countries represented in this most interesting and instructive Exhibition.

CHESS.

TO CORRESPONDENTS.

W. H., Bristol.—The composition is meritorious, but the solution too evident.

W. Sankey.—It can be solved in *three* moves easily—by 1. R. to Q B 2nd.

H. J. A.—We shall try to find space for your last in an early Number.

J. B.—The old Problem sadly loses point. Who is the author?

ALPHA, No. Two, M. G. W.—Intelligible all.

C. T.—Thy two not received.

E. B. D.—Your two problems shall have early attention.

Alpha, Beta, Gamma, Delta, Epsilon, Zeta, Eta, Theta, Iota, Kappa, Lambda, Mu, Nu, Xi, Omicron, Pi, Rho, Sigma, Tau, Upsilon, Phi, Chi, Psi, Omega.—Your communications will be published by Harrison, of Pall-mall, 2 Oct. next. Your solutions are correct. There are editions and translations without number.

[illegible] are indeed at fault by our Problem Makers are in active preparation for the Autumn.

TYRO.—1. You place the knight upon the square where the Pawn stood when promoted.

W. G.—The problem you send is not clear; the "hidden problem," but a stratagem of more [illegible]

R. [illegible] of the late Lord Astley, has at length come to sight, and is now in the hands of [illegible]

THE VILLAGE OF KARANJI, NEAR BALACLAVA.—(SEE PAGE 583.)

AALI PACHA, THE NEW TURKISH MINISTER OF FOREIGN AFFAIRS.—FROM A PHOTOGRAPH BY MILLER, OF VIENNA.

GENERAL OSTEN-SACKEN, COMMANDER OF A RUSSIAN DIVISION AT SEBASTOPOL.

RECENT MINISTERIAL CHANGES IN TURKEY.—THE NEW GRAND VIZIER, AALI PACHA.

BEFORE adverting to the career of this distinguished person, late Plenipotentiary Extraordinary of the Porte at the Court of Vienna, and now Grand Vizier, it may be as well to glance at that of the illustrious diplomatist whom he has supplanted. The services of Redschid Pacha to his country are universally acknowledged, and it is to be regretted that so able a Minister should be entirely removed from office. Men well acquainted with his talents, and with the spirit of the Turkish nation, consider his dismissal merely temporary. Whether this be the case or not, the good he has done will win for him honourable mention in history, and a place in the hearts of his countrymen.

MOUSTAFFA REDSCHID, the ex-Vizier of Turkey, was born at Constantinople in the year 1802. Nearly related to the Vizier Ali, he learnt at an early age the arts of war and diplomacy. After the death of that Minister he received a place under Government through the mediation of the new Vizier, Izza Pacha. A volume of meritorious poems, which he published about that time, won for him the friendship of the celebrated poet, Perten, then Minister of Foreign Affairs. In 1829 he accompanied the Ottoman Plenipotentiaries on their mission to Adrianople; and in the following year he was made Assesji, or reporter of the Divan, and went in that capacity to Egypt with Khalil Pacha's expedition. On his return to Constantinople he was sent to Kutahie to confer with the Baron de Varennes, Chargé d'Affaires of France, relative to the conditions of the armistice between the Sultan and Ibrahim Pacha. Fresh honours were heaped upon him successively, till at length he was made a Pacha, and sent in the year 1834 as Ambassador to the Court of France.

"The arrival of Redschid Pacha at Paris," says M. Ubicini, in his "History of Turkey," "caused a great deal of sensation, from the fact of his being the first Turkish Ambassador sent to France since the year 1802. The easy air, polished manners, and natural vivacity of the young diplomatist—so different from what had been expected in an Envoy of the Grand Turk—won for him the friendship of every member of the high circle in which he moved, as well as the favour of the people. Most attentive at the Court, and at diplomatic assemblies and soirées, he yet found time to cultivate the acquaintance of men of art and letters, and left Paris for London universally regretted." A year's residence in the quality of Ambassador at the latter city completed his European education. One morning, on opening his despatches, he discovered a letter, totally unexpected, but most important, worded in the following terms:—

The flower of thy friendship will unfold at the news I send thee.

Khorsed smokes his *narghilé* in his solitary palace at Stamboul, and I sit to-day upon the cushions where he slept last night.

In a word I am *Sadrazam*, and my dear son Redschid is Minister of Foreign Affairs. Let him hasten, then, to quit the land of the infidel and rejoin me.

May the roses and jasmines of our friendship flourish for ever.

PERTEN

Redschid wound up his affairs in London, and immediately took his departure for his native country. But great was his dismay and his grief at finding, on his arrival at Constantinople, that his kind protector was no more. Perten, overthrown by the intrigues of his rivals, had received at Adrianople the fatal *cordon*, and died like a hero of old.

This unexpected event, although it saddened, did not injure, the prospects of the young Minister. He retained the portfolio of Foreign Affairs until the year 1838, when he was sent to London as Envoy Extraordinary. In the following year he visited Rome, and was presented to the Pope. The death of the Sultan Mahmoud again called him to Constantinople (3rd September, 1839), and he resumed his post of Minister of Foreign Affairs. It was thought that the reforms begun by Mahmoud would follow him to his grave. But this was not the case; for the splendid reign of Abdul-Medjid was inaugurated by many wise acts. Redschid Pacha, to whom the best reforms are attributed, was again sent as Ambassador to France, and remained there for three years. In the autumn of 1845 he was again appointed Minister of Foreign Affairs, only, however, to be advanced, a few months afterwards, to a still more important office—that of Grand Vizier. He occupied this distinguished position till the year 1853, when he was for the fourth time elected Minister of Foreign Affairs. On the 23rd Nov., 1854, he was once more elevated to the Vizierat, which he has recently resigned in favour of Aali Pacha.

AALI PACHA, the new Grand Vizier of Turkey, was, in the earlier part of his career, Ambassador at the Court of London. He was recalled to Constantinople in 1846, to fill the post of Minister of Foreign Affairs, which he did for six years. In 1852 he found himself at the head of the Government, but was soon obliged to resign in favour of Mehemet Ali. After having been for several months Governor of Broussa, he was chosen President of the Council of Tanzimat. At the end of the year 1854 he was again made Foreign Minister; and at the commencement of

SUTLERS' WHARF, BALACLAVA.—(SEE PAGE 583.)

the present year he was sent to Vienna as Plenipotentiary to the Austrian Court, a post which he has recently resigned on his appointment to the Vizierat. He is a man of high character, and diplomatic ability.

Fuad Effendi, the New Minister for Foreign Affairs, is a post, with a whole pedigree of poetical ancestors. He commenced his political career a short time after the death of Mahmoud—his first office being that of Ambassador Extraordinary at the Court of Madrid on the occasion of the Queen's majority. From Madrid he went to Lisbon, and was received in the Peninsula as flatteringly as Redschid had been at the French and English capitals. In the year 1841 he was appointed Grand Interpreter of the Porte; in which quality he gained the friendship of the Duc de Montpensier, and, through his intervention, the title of Commander of the Legion of Honour. Three years afterwards he was chosen Commissary Extraordinary of the Porte in the Danubian Principalities; and was not successful in defending those unfortunate countries against the oppression of their Muscovite protectors. In 1850 he was charged with a mission to St. Petersburg. In 1852 he was made Minister for Foreign Affairs under the Vizierat of Aali Pacha, but sent in his resignation shortly afterwards, on account of the overbearing behaviour of Prince Menschikoff. He was then sent to the Grecian provinces, at that time in a state of insurrection, where, by his moderation and energy, he did much towards restoring the peace. Though abundantly occupied with military and diplomatic business, Fuad Effendi encouraged literature and arts, and became a member of the Imperial Academy, founded in 1851. He is one of the most remarkable men of Turkey; and, although his colleague, Aali Pacha, is not quite so liberal as might be wished, the Allies have no reason to be discontented with the change of Ministry in Turkey.

GENERAL OSTEN-SACKEN.

Of the internal organisation of the Russian army less is known than of the civil departments of the State. This may account for the frequent blunders of the English press, on the subject of the *personnel* and past history of commanders in the service of the Czar. General Osten-Sacken for a long time suffered under this species of misapprehension, having been confounded with another officer, General Osten, who fought against the Turks in the campaign on the Danube. General Osten-Sacken is older in the service, and higher in grade, and in the confidence of the Emperor, than his namesake. He ranks, however, among the younger Generals, of whom the Counts Lüders and Rüdiger are among the most remarkable members. Unlike other Generals now engaged in the Crimea, General Osten-Sacken cannot point to any laurels gained in the former wars of Russia, except those won in common with other officers who served in a subordinate capacity. The promotion, however, of the younger military chieftains to places of honour, is one of the characteristics of Russian policy especially developed during the present war. At all events our attention has been more drawn to this part of the system of the enemy than when we were mere observers of his campaigns, not sharers in the strife. General Osten-Sacken belongs to the German party in Russia. As his name implies, he is himself of German descent, and is one more instance of the wise policy by which Russia, when she incorporates the territory of other nations, also seeks to amalgamate with her own population and associate with her institutions the people whom she has conquered, and whom thus she seeks so easily to govern.

The past military career of General Osten-Sacken affords no salient points for biographical notice. His name does not appear in any prominent shape in the Russian campaign in Hungary, and his status in the army is too recent to permit his having been engaged in the wars of 1828-1831. He was Governor of Odessa at the time of its bombardment, and distinguished himself by the readiness with which he responded to the humane purpose of the Allies in sparing all those parts of the city that were not Imperial property. His treatment of the English who have fallen into his hands has evinced his appreciation of the motives which led the Allies to effect that change in the ancient modes of warfare In his government of Sebastopol, General Osten-Sacken has shown some of the rarest qualities of a military commander. In fertility of resource and indomitable perseverance he is not surpassed by any military commander of the present time. Should the war continue we may expect to see him hold a still more important command.

A Russian Picture of Sebastopol.—In spite of all the efforts which the enemy have made, our bulwarks stand as fast as ever. Long before the bombardment began, the journals of the fleet informed us that our walls and forts were speedily to be put to a new proof. This made us redouble our precautions, and we bore firmly the truly murderous (*ostalestvi*) fire which threatened all with destruction. Nevertheless, thousands were devoted to death, and it made one shudder to see the *Ekaterus* (the steam-boat) pass every two hours, during the bombardment, from the south to the north, with so many wounded that she could scarcely carry them. While standing in Bastion No. 4—the bastion which suffered most of all—I forgot the danger to which I was exposed in admiration of the cool and stoical conduct of our sailors. They fell and expired without a cry, though racked by the most fearful agonies. The southern side of our town has suffered most severely, and is scarcely to be recognised again. Five hundred houses have been totally destroyed, and grass is growing on their ruins. The beautiful theatre no longer exists. Though the upper districts of the town are not so much damaged, yet *there is not a single house to be seen which does not bear manifest traces of the bombardment.* The streets are everywhere ploughed up, and the pavement is totally destroyed, while at every corner stand whole pyramids of the enemy's cannon balls, and exploded shells, which were daily collected before the opening of the fire. In many streets five or six such pyramids are to be seen, each of them from eight to ten feet high. Nevertheless, business is continued, and booths are opened for the sale of goods. Prices, however, are enormously raised, and sugar costs one silver rouble (2s.) per lb. The supply of meat is more than abundant, but *bread is exceedingly scarce.* The streets are filled with people, and crowds of children run to and fro, assisting at the construction of barricades, and pelting each other with balls of clay. The life in Sebastopol is agreeable to us, for use is a second nature. The greatest accommodation prevails in the harbour of Kasterin, where cannon-balls, powder, fascines, sacks, and provisions are landed in unlimited quantities, as they are forwarded from the northern forts. In a word, neither the thunder of the enemy's cannon nor the siege of Sebastopol is suffered to disturb us any longer; we mourn over our adversaries, who are shedding their blood without profit before our brazen walls. We read many absurd statements about the condition of the besieged; but the absurdest of all is, undoubtedly, the news that we suffer from want of supplies, and that hundreds of us are daily cut off by death—of all which no trace is to be seen.—*Letter from a Russian Officer, May 13.*

The Russian Army for India.—It seems tolerably certain that Russia intended to have tried her hand at a diversion in the direction of India, had we not deranged her plans by the invasion of the Crimea. There is a Russian officer now at head-quarters who belonged to a regiment that was actually told off for a march to India last year. There were several other regiments destined for the same expedition, but they, too, found themselves encamped on the Alma on the 19th September, and no further road to India would the following morning. The officers had been provided with books relating to India, and had been studying "the manners and customs" of the Hindoos and Mussulmans of the great Empire of the East. It is said that Russia would impose on the Russians the obligation to transport an army over the torrid wastes which lie between them and India; but there was a certain Alexander, who once moved a troop of elephants in the same direction, through regions more sparely populated and less civilised than those of India, and the right to elect warfare is waged with more difficulty, and is attended with consequences so respecting *greater improvements*, we might find that, if a Russian Alexander the Great ever arose to these ruined cornfields and stone villages, as all calculations are which make nought of the inspirations and impulses of military genius. The officer in question "hails a pleasant war," and gives abundant proof, in the present temper of the members concerning the Czar, that the Russians are by no means destitute of humour. He sings one song anent the proceedings of Prince Menschikoff after the Alma, which is said by those who can appreciate it to be extremely funny. The Prince, after having fled to Zuidkoi, on the road to Bagtchesrai, out of the window of which he interrogates the passers-by respecting the fate of Sebastopol; and as he at last astonished to hear it has not been taken, and begins to dance with joy, to extol his grand flank march, and to boast of his splendid defence of the place. Another song, from the same mouth, puts the contest in a ludicrous light, and declares that the whole siege is only a struggle in order to see whether the Russians or the Allies are the best diggers and ditchers. "We build one redoubt, they build another; they make one trench, we make its brother, &c." The gentleman is a Pole, and was present at Alma and Inkermann. At the latter battle the commander of his regiment was killed at the head of 120. He then served with the external army, but got tired of Tchorgoum and *blasé* with the monotony of life in huts. He collected all his resources, and gave a grand ball to all his friends in the army of observation. Champagne at 30s. a bottle; claret at 20s., and pickles at 10s.; and next day came into our cavalry pickets, with a brother officer, on the day of the races at Karanji, and has been living here ever since. *Letter from the Camp.*

The Maine Liquor Law in New York.—An elaborate opinion has been given by Judge Edmonds as to the power of the New York Legislature to pass a prohibitory liquor law. He argues the point at great length, and sums up with the following conclusion:—1. That it is competent for the Legislature to prohibit the domestic traffic in intoxicating liquors. 2. That the Act passed is constitutional and valid, and as applicable to imported liquors after leaving the importer's hands as any other. 3. That the means provided by the statute for the enforcement of its enactments are lawful and valid. 4. That the duty of enforcing the law is not confined to the officers specially named in it, but is devolved upon all those whose general duty it is to enforce any of the laws of the State against crime.

THE ILLUSTRATED LONDON NEWS

LITERATURE OF THE WAR.*

Amongst the numerous busy pens which the Turkish question and the war have already called into operation—treating the subject in the manner historic, descriptive, critical, or speculative, or all combined, as the case may be—none has produced a more decided sensation than that of the gentleman who styles himself—appropriately enough we believe—the "Roving Englishman." With opportunities for observation, both of the diplomatic and military history of the question, beyond those enjoyed by most men, he brings to bear upon it a spirit of independent, unsparing stricture, and a graphic power which few even of our acknowledged classic writers have surpassed. With a humour to condemn rather than praise; to lash with bitter denunciation and pungent sarcasm abuses and blunders, great and small, wherever he finds them; incapable functionaries, regardless of their rank and prescriptive honours; and systems, however, sanctioned by time and authority; is it to be wondered at that his pages should be eagerly perused by a public who for nearly two years have been chafing with indignation at the incapacity and obstinacy of their rulers, and are now dearly paying the cost of their misdeeds? Truly and earnestly does the writer plead for those reforms which every friend of the country so earnestly calls for; but which our rulers appear not to appreciate—deaf to the solemn warnings which are daily pouring in their ears. "Ill does the family judge of the mournful but determined spirit of the times," says the writer in a powerfully-written preface to his "Pictures from the Battle-fields," "or they would quail before the strong clear intellects of those good and great men who are now so calmly and resolutely hostile to their corrupt and ignorant misrule. The writing which dismayed Belshazzar at his banquet is on their walls, but they read it not."

It is, perhaps, almost unnecessary to remark that in such a field, with such opportunities, and such inducements, there is always risk of overstepping the bounds of exact truth; of handling the lash a little too stoutly and too indiscriminately. This is the error which all will exercise power, without restraining influences, are liable to fall into; and from this error, we must add, the "Roving Englishman" is by no means free, and therefore it is somewhat to mar the general value of his labours—not merely as regards their moral influence, but their pictorial effect. The able and fearless manner in which he has attacked the larger abuses of our State machinery; drawing aside the dark curtain behind which a family government have endeavoured to conceal the disgraceful and deplorable results of the system of trick, favouritism, and imbecility to which the councils and material interests of the country have been so long sacrificed, is worthy of the cause, and entitles him to the highest honour; but, when he goes from generals to particulars, and rents the vials of his splenetic wrath upon individuals—which he does unsparingly on persons in every department and grade of the service—he somewhat spoils his case, and leads one to suspect personal pique, and the undue influence of a jaundiced idiosyncrasy, as the source and origin of his strictures. We agree in much that he says ("Rambles in Turkey") in condemnation of our diplomatic system in the East;—as to the organisation and personnel of our consular establishments, the inefficiency of the staff of the Embassy—particularly their ignorance of languages, which obliges us to resort to hireling foreigners, chiefly Levantine adventurers, as interpreters between us and the Porte; and the impertinent self-importance, the habit of meddling interference, and, too often, the the utter bad faith and recklessness, of those unemployed. But when we find an honest, able, and most laborious diplomatist, who has represented the interests of this country at the Porte, off and on, for the best part of half a century, and who, during that period, has always seen through, and succeeded in thwarting, the intriguing policy of the common enemy—when we find a statesman of this class and character ridiculed in an unseemly manner, under the soubriquet of Sir Hector Stubble—his whole public career sweepingly denounced as either useless or positively mischievous—his personal character and domestic habits made the subject of flippant, we had almost said ribald jests—ay, even to the recesses of his "lonely dressing-room," where, as is said, "he sat ungrily" the live-long day, whereas in that lonely dressing-room it would be more truthful to say that he laboured anxiously and unceasingly the live-long day, and often the live-long night;—we must turn the page with a feeling of deep resentment, that age and honoured service should be no protection against

has had to do with him. In the long he has had to digest the last sublimated essence of robbery: for in Russia the Commander-in-Chief robs the Generals, and the Generals, after their degree, rob the Colonels, and the Colonels rob the Majors, and the Majors rob the Captains, and the Captains rob the Lieutenants, but all rob the soldier together. Russia presents, perhaps, the only example in history of a country governed by a military despotism, and in which the soldiers have been successfully kept in the same state of slavery as the rest of the community.

We have said enough to induce the reader to search further into these rattling pages of the "Roving Englishman."

"A Trip to the Trenches," was undertaken by "An Amateur" in the middle of January, and extended over a space of about two months. The author states his object to have been mere "curiosity," but there was some worthier motive than that to induce him to undertake a rough journey, at an unpleasant season; and that we believe was a sincere anxiety to know how our brave army was faring in the Crimea, and whether all the sad stories of privation and misery and mismanagement which had become so rife, were true or not. The result of his observation is to confirm all these reports to their extremest limits; and half the pages of the volume before us are occupied with a methodical iteration of sad details, which most of us have from time to time read disjointedly in the letters of newspaper correspondents, or in the evidence adduced before the Sebastopol Committee. The author's observations are marked with great feeling and good sense; and scattered through the grave revelations are sketches of camp life, and remarks upon military discipline and the policy and prospects of the war now engaged in, which are worthy of attention.

We pass over the painful account of the state of things at the hospital at Scutari, which fully confirms the worst that had been reported of them by Messrs. Stafford and Osborn, and others, only expressing a hope that as "the sufferings of our noble sick at Scutari will fill one of the darkest pages in our history," the fearful warning afforded by them may lead to the prevention for the future of mismanagement which occasioned them.

The "Amateur," despite all his forebodings on the subject, is absolutely startled at the ragged and wretched condition of our brave soldiers when eye first fell upon some of them at Balaclava:—

"February 3rd.—The morning was bitterly cold—wind and snow, and twelve degrees of frost. The sight that met our eyes when we went on deck in the morning was really quite sickening. The stern of our vessel was about twenty yards from the shore, and there we saw scores of miserable, half-clothed, half-starved objects shivering on the wharfs, or trying in vain to keep their blood in circulation by shambling up and down; no workhouse could have shown a more abject set of paupers than did Balaclava that morning. Good heavens! was one's first thought, can these miserable objects, with sonnty ragged coats, clothes in tatters, and boots in holes, or with none at all, be British soldiers, whom the country is informed by their rulers are at this moment actually borne down with warm clothing, and furnished with every luxury that the mind of the soldier can conceive! How fearfully have the Government been deceived, or how cruelly have they deceived the people of England!

"The warm clothing was just now, on the 3rd of February, being served out, slowly enough, Heaven knows, and boots were being issued at the rate of six and seven pairs to each regiment. The distribution of warm clothing was not completed before the middle of February, and many officers' servants and batmen had not even received them by the 20th of the month!

"Such as the men were when I arrived, I was assured that their condition had wonderfully improved during the last three weeks. If that was true, in what a pitiable case must they have been during January!

"About one or ten o'clock fatigue parties began to drop in from the front; gaunt, haggard, haggid men, with a reckless, desperate look in that was indescribable. Many of these had sheep-skin coats; some of the artillery and cavalry good long thick great-coats, and even long boots; but the majority of the men, especially those of the line, were clothed in every imaginable shabby garment. In no garment it is possible to conceive, there was not an atom of uniform visible amongst the lot of them.

Of the operations of the siege, and the feeling and spirit of the troops, he says:—

"It is said that, when the fire opened on the 17th of last October, strict orders were given to spare the town! *Ca boon!* War cannot be a half-and-half measure. You cannot save both the enemy and your own men. We spared Odessa, to enable the army to receive Sebastopol; and we spare the latter in an equally unreasonable manner. And, moreover, it is rather bombastic to issue orders to spare buildings we cannot destroy.

"After walking through the trenches—which, however, nearly all the guns were dismounted, or the embrasures filled with sand-bags—we wended our way to the advanced trench. All these martial arrangements have been so fully described by the press, and so truthfully depicted by the ILLUSTRATED LONDON NEWS, that any further description would be superfluous. If I had thought the most wretched and squalid before, those I now saw in the trenches were ten times worse; yet hardened and reckless as they seemed, they could boast of some as noble spirits as ever animated human clay. Miserable, cold, half-clothed, ill-fed, over-worked, the greater portion bearing the seeds of certain dissolution, there was not one of them whose heart est desire was not to have a "go at them again," as they said. They were all sick of the work, but their thoughts did not turn to *peace*, as the conclusion of what had occupied them so many weary months—it was *victory* they required!

That was in January. Since then how many of these brave fellows, rendered reckless by disappointment and neglect, in the midst of severe privation, have been swept away by disease; insomuch that the whole army may have been said barely to have escaped annihilation. Yes, the old soldiers of six and ten years' service, the men who conquered at Alma and Inkerman; invaluable men, who can never be replaced, are more than half of them gone, and their places filled with boys and raw recruits; youths with sinews and joints scarcely set, with constitutions unformed, and who died off like rotten sheep before they had been many weeks in the Camps. "Of one draught of 150 which came out in January to the Scots Fusilier Guards (I think it was) all died; and many a regiment can tell the same sad tale of their recruits." However, it is to be hoped that this state of things has passed away never to return; and that the vigour and success of the coming campaign may compensate us in some sort for the disasters of the past, which is past.

Before we lay down the "Amateur's" small-sized but interesting volume, we must make one more extract, relating an anecdote of the Scots Fusiliers, which deserves to be remembered:—

Some anecdotes I heard (the author writes) of the constancy of the troops displayed a spirit that would have done credit to the noblest of Rome's noble sons. It appears that at the battle of the Alma, where the 23rd Fushers were almost annihilated, the order was given out, "Fushers retire." this order being heard by the Scots Fushers, who had always been drilled as Fushers, and knew no other regiment of that name, they thought applied to them, and they had retreated a few paces before they discovered their mistake. At Inkerman, an officer, perceiving his men exposed needlessly to fire, and falling in numbers, called out to them to retire behind a low wall that offered some kind of shelter; but on this occasion, although the object was so evident, the men refused point blank, saying, "No, Sir, we retreated at Alma, and found it was a mistake; we will never retreat again." And there these gallant spirits fought till all, or nearly all, were compelled to make that last long retreat from which they could never be rallied!

Mr. Oliphant, the author of the able volume on "The Russian Shores of the Black Sea," has just published a pamphlet on "The Coming Campaign," which will doubtless, and deservedly so, attract attention. Having read this production with some care, we say at once that we do not participate with the author in the views which he propounds; and we will proceed briefly to state the reasons for our disagreement with him. To put Mr. Oliphant's scheme into a nutshell it amounts to this—that the Crimea was not the best point for our first attack and occupation; that the Transcaucassian provinces in Asia was the field in which we ought to have commenced the war; Redoubt Kaleh and Poti being the places of landing, and the base of operations. The writer says:—

It will hardly be questioned that, had we originally landed in the Transcaucasian provinces, a much smaller army than that which has for seven months been cooped up in a corner of the Crimea would have sufficed to drive the Russians beyond those mountain ranges which form the natural boundary of the empire in this direction.

The Crimean expedition, however, having been already actually undertaken, the writer speculates upon the difficulties attendant upon the occupation of that territory, supposing we should succeed in taking it; and upon the expediency of a partial withdrawal of our troops at the first favourable opportunity, for the purpose of commencing the proposed Asiatic campaign:—

The Isthmus of Perekop (he says), at its narrowest point, is about five miles broad, unapproachable by sea, by no means well supplied with fresh water in winter, and exposed to the full force of a keen north wind, whose icy blasts from which our army has already, in a more sheltered situation, suffered so severely. The burning sun of summer, the malaria of autumn, the snows of winter, and the stench exhaled from the Putrid Sea, would render the camp at Perekop a most disagreeable place of abode at all times; while a glance at the map will suffice to show that upon the long narrow Isthmus of Arabat troops would be exposed to still greater inconveniences. The forces at these two points, however, must necessarily be enormous, as upon them would be concentrated the whole strength of the Russian army, enjoying a free and uninterrupted communication with the interior. While, therefore, it may not follow, from a consideration of these circumstances, that a campaign in the Crimea, and the ultimate occupation of that province, is impossible, it is not to be denied that it is encompassed with grave difficulties; and at this particular stage of the war it may not be ill-timed to suggest, whether the fall of Sebastopol might not be advantageously followed by a partial withdrawal of our forces from that district, which is the strongest point upon the whole Russian frontier, preparatory to a descent upon those outlying provinces, which have been universally regarded as its greatest weakness.

The reader need hardly be reminded that, since the above passage was written (about a fortnight ago), glorious successes have attended our arms, giving us the complete command of the Sea of Azoff, and of the whole eastern frontier of the Crimea; thus completely cutting off the Russian army from the source whence it has chiefly derived its supplies, and, at the same time, obviating the difficulties suggested in the way of our occupation. To proceed. Mr. Oliphant says:—

The Crimea might be temporarily occupied, but to hope permanently to annex to Turkey this distant peninsula which is now an integral portion of the Russian empire, would be as absurd as to imagine that it could be organised into an independent kingdom. But none of these objections exists in the case of the provinces beyond the Caucasus.

We apprehend that Mr. Oliphant's suggestions result from an erroneous impression as to the real scope and objects of the war, as far as they have been hitherto developed or propounded. It is not the object or intention of the Allies to permanently occupy the Crimea, much less would they be disposed to a permanent occupation of "the provinces beyond the Caucasus," engaged in an endless guerilla warfare, in company with the brave Schamyl and his mountain hordes. Neither is it their intention to "annex" that distant peninsula to the dominions of the Porte, which has already a greater extent of territory than it can well govern. The sole object now in view with the Allies is to destroy the supremacy of Russia in the Black Sea; and this will be effectually done by the destruction of Sebastopol, and the Russian fleet within its harbours and docks. This end would not even be approached or sided by a campaign in the Transcaucasian provinces; whilst, Sebastopol destroyed, and the Black Sea free from the terror of Russian armaments, apprehensions of further aggression in the Asiatic provinces of Turkey on the part of Russia, would be at an end. Sebastopol is the key to the occupation of the Black Sea, and the base of all contemplated Russian conquest; beside this, the Caucasus is a field of secondary and comparatively small importance. We wonder that when Mr. Oliphant stated that Sebastopol was "the strongest point upon the whole Russian frontier"—whilst the Transcaucasian provinces were "its greatest weakness"—he did not forsee the inevitable deduction to be drawn from this admission.

Mr. Oliphant urges his views not only in the interest of the Ottoman Integrity, but of our own Eastern empire; and revives the oft-repeated threat of a Russian invasion of Hindostan. But, after referring to the fact that Lord Metcalfe and many of the best-informed and most cautious observers of Eastern policy have said much to expound that apprehension—showing its utter impracticability, under any condition of affairs which may reasonably be supposed to occur—we need only observe that, as soon as the sting is taken out of Russia at Sebastopol, her powers for aggressive wrong in the East are gone.

A little volume, entitled "The Crimea; its Towns, Inhabitants, and Social Customs," by a Lady, resident near the Alma, although not properly speaking a war publication—making, indeed, no mention of the war, its causes, its policy, or its incidents—is entitled to notice under this head, inasmuch as it refers, and in a very useful and interesting manner too, to the grand seat of present operations. The authoress has resided during a period of nine years in different parts of the Crimea; and has travelled repeatedly over almost the whole of the peninsula; her store of information, therefore, is full and mature, not meagre and hastily collected. She is observant, has an eye to the picturesque, and to character; her style is lively, but unaffected; and those who wish for a genuine picture of the Crimea—its towns, its roads, its seasons, its natural resources, its historical associations, and the character and customs of its inhabitants, all combined within an extremely moderate compass—could not do better than procure this little volume.

THE RUSSIAN GARRISON IN SEBASTOPOL.—It is said that one of the privates of the 46th Regiment has given some very valuable information respecting the terrain of Sebastopol, and has corrected a serious misconception under which our engineers were labouring respecting the course of a creek in front of the left attack. The man had been for some years in Russia, and as a stonemason he laboured at the works of Sebastopol, and knows every street in it. He pointed out the position of the terminus of the water-works, and of the engines working it; and it is now stated that there are no less than 120 guns all hid from view, defending these works, and raking the Redan, so that, had we assaulted and carried that formidable work, we should have met a fire on which none of our officers had calculated. The mistaken reports we receive respecting the strength of the garrison are most perplexing. But how can it be otherwise? Is Ivan Iwanowitch or Stanislas Petrosky likely to be better informed respecting the strength of the force to which he belongs than John Smith, No 2,003 of the 88th, or Daniel O'Connor, No. 659 of the 41st Welsh, are with regard to our army? And what do they know? It is ten to one if they could tell you the names of their Generals; and many men, strange as it may seem, can scarcely pronounce the name of the captains of companies. There is a strong conviction that the large camp on the north side of Sebastopol, which has been recently augmented, has very much of a dummy about it, as very few men can be detected unit. On the other hand, it is said that it is a sanitarium we are looking at; if so, there must be many sick and wounded outside Sebastopol. But why should the Russians place their hospital tents in sight of us, and put them in a hollow instead of placing them on the hill above? If I were permitted to state my own opinion, I would say that no one knows how or where. It is not unlikely that, finding that we were not disposed to make an attempt to force the passes on our right and rear, the corps was withdrawn to Simpheropol, or to the forts near Kertch.—*Letter from the Camp, May 21.*

PORTERS OF THE PARISIAN MARKETS.

THE "PORTS" DE LA HALLE, AND THE "DAMES" DE LA HALLE.

In the twelfth century the Governor of the Lazaretto of St. Lazarre had the privilege of holding upon the high road from Paris to St. Denys, a grand fair, which lasted a week or ten days. Philippe Auguste bought them a monopoly in the year 1183, and tranferred the fair to the Champeaux, or *Campelli* in Paris—an open space between the Rue St. Denys and he Palais Royal. On the recommendation of one of his bailiffs, the King erected two covered halls or market-places, which were surrounded by a wall, and which in course of time became united to those of the city of Paris. Louis IX., who devoted himself to the encouragement of commerce and industry, made three proclamations relative to the [illegible] of fresh and salt fish brought to the Halles, by which no one was allowed to sell those articles of food without first paying a fee, and obtaining the express permission of the Government.

Near the Champeaux stood the Cemetery of the Innocents, along the walls of which, Philippe the Hardy, son of Louis IX., stationed a number of "poor and miserable persons" to sell shoes and leathers. Later a vaulted gallery was erected, called the *Charniers*, or Charnel-houses. The pavements of tombstones, ornamented with epitaphs, were lined with linendrapers' and other shops, and offices of publicscribes. Beneath that sombre roof the gay world came and went, "dancing over graves."

Originally this cemetery stood in the out-skirts of Paris; but, in the course of a few years it formed the centre of one of the most populous *quartiers*. It was soon found that fumes exhaled from this den of corruption, and that the health of the living was imperilled by so close a fellowship with the dead. Numerous and loud complaints at length awakened those in authority to a sense of the danger that was incurred; and in 1786 it was decided that the cemetery should be cleared out and converted into a public market for the sale of fruit and flowers. During several months the streets leading to it were thronged with carts conveying bones and loam towards the outskirts on the southern side

At the corner of the Rue St. Denys stood a fountain, built in 1551, by the celebrated architect Pierre Lescot, and decorated with excellent pieces of sculpture, by Jean Goujon—one of the most illustrious victims of the massacre of St. Bartholomew. In order to preserve so noble a memorial of early French art, the principal stones were employed for the decoration of the fountain which now forms the centre of the market-place. Around it stand the places where the provisions are sold, and which were formerly marked only by large umbrellas fastened in the ground. In 1813 the city of Paris caused wooden galleries to be constructed, of which vestiges still remain. In a short time these again will be replaced by Halles, regularly built and covered over, of which the Emperor Napoleon III. has laid the foundation-stone. "These picturesque stalls," says a French writer—"these primitive tents of umbrellas, will soon disappear, 'like the baseless fabric of a vision,' leaving in their place a fine stone colonnade. What a transformation for the time-honoured Charnier des Innocents!

A similar and not less necessary revolution is being brought about in the manners of the inhabitants of this quarter. An old author, referring to the Halles, says:—"They are thronged with rogues, who make it a practice to rob the passers-by, and cheat their customers. But, perhaps, the worst are those who take to singing lewd songs and to selling fruit. To a poor person these harpies (generally old women) are fair dealing enough; but to the luckless young gentleman who stops to purchase an orange or an apple, they behave most shamefully. Either he must pay ten times as much as the article is worth, or depart amidst sickening imprecations and slang, that brings the blush to the cheek." Berthand in his "Ville de Paris," affords a tolerably good idea of the baneful eloquence of the women of the Halles. Vadé, whom flatterers have surnamed the Teniers of poetry, was particularly fond of thearing this jargon, which by the way, he knew how to talk too, when he liked. The sedate Dumarsais himself, after a sitting of the Academy, is said to have repaired to the Halles that he might listen to the lively chat of the fishwives and the poissardes. It is to be hoped, however, that the purifying of their abodes will tend to the purification of their minds also, and that the time will come when the Halles will even be a respectable and a fashionable resort.

Already the greater part of the low taverns and places of vulgar haunt have fallen beneath the hands of the workmen. "Paul Niguet" is no more; and if the ragpickers and ballad-singers regret the downfal of that establishment, so famous for its vile *vin blanc*, the people of the Halles begin to appreciate the comfort and propriety of the new restaurant, and to accustom themselves to the manners of the bourgeoisie. It must not, however, be supposed that the dealers in fish, butter, fruits, and vegetables, are inferior in rank or in fortune to the bourgeoisie. Let any one who possesses the erroneous an idea cast a glance at those buxom fishwomen snugly ensconced in their stalls, their arms akimbo, and complacently awaiting the coming on of night. To see them in the exercise of their duties, few would imagine that among these women are fine dames who eclipse by the magnificence of their toilet and the lustre of their diamonds, the pretensions even of a *duchesse*.

This wealth, so laboriously acquired, is often squandered away in the most foolish manner by *parvenus*. Having been brought up in the faith that the chief object of life is the making of money, they find no pleasure when they retire from business, save in showing the world how much they have hoarded. But, although misers and prodigals are both abundant in the Halles, there are persons to be met with in that quarter who would be an honour to any society, and who really deserve knowledge, but practise, the divine precept of charity to the poor and the afflicted. "Mauvaise tête et bon cœur" might be the motto of this singular population.

A glance at the history of France will show us that the Halles, under the style of *régions*, furnished soldiers for all the insurrections, and that the women even have given the signal of resistance against the spendthrift Kings who exhausted the national Exchequer. During the fourteenth century Paris was the theatre of several revolts, excited by the exactions of Jean, Duke of the Gaul, and of Charles V. The Halles lent a firm support to the provost, Etienne Marcel, when that illustrious citizen attempted to obtain for his country a constitutional government. In 1731 it was the Halles that provided the first *maillotins*. Great excesses were committed by these bands, which were punished in the most cruel manner. The inhabitants of Paris were despoiled of their municipal institutions; while immense numbers of bourgeois perished beneath the axe. The wives of those who were still in prison are said to have rushed in disordered groups and tore their hair about their backs, and the muddy tears trickling down their cheeks—to beseech the King to have mercy on their families. Among these wretched suppliants were many market-women from the Charnier des Innocents.

The Halles, always ready for insurrection, took an active part in the struggle between the Armagnacs and the Bourgignons, at the time when the butcher Caboch ruled over Paris. In the sixteenth century, when the religious wars broke out, the Halles declared in favour of Catholicism, and openly supported the Guise party against the Royalists. From the year 1588 to the entry of Henri IV. into Paris, they remained faithful to the Sixteen, and supported—with a courage worthy of a better cause—the hardships of a siege which reduced the capital of France to the lowest extremity. During the administration of Richelieu, when the Spaniards were advancing towards the centre of Picardy, the inhabitants of the Halles, together with the lackeys and workmen of the town, put themselves in readiness to defend the frontiers. Other occasions were not wanting for the exercise of their energies. They did not remain neutral during the struggles between Mazarin and his enemies. They were, if not the first, certainly not the last, to exclaim "Vive Brouvel! the friend of France! the father of the people!" In 1648, when the mother of Louis XIV. was compelled to capitulate with the insurgents, the women of the Quartier des Innocents were seen to agitate with spears and flags. The Duke of Beaufort, the unworthy successor of the popularity of the Duke of Guise, was surnamed the King of the Halles. With the exception of a few small disturbances, Paris was tranquil after the defeat of the Fronde, and the Halles do not again figure in history till the time of the first Revolution. The women of the Halles, in particular, were distinguished by the ardour and enthusiasm with which they embraced the popular cause. On the 5th of October, 1789, they assembled at the Faubourg St. Antoine, and marched in order to the Hôtel de Ville, amidst the sound of fifes and drums, crying, with voices that rose clear above the din, "Du pain! du pain!" They forced open the gates of the Commune, seized whatever weapons lay within reach, sounded the tocsin, and, armed with "clubs, broomsticks, muskets, and knives," put themselves in readiness to do battle to the body-guard. Maillart was obliged to put himself at their head, and conduct them to Versailles—a movement which led to the return of Louis XVI. into Paris. Marat, the "Friend of the People," became in a short time the favourite hero of the dames of the Halles. They crowned him with laurel-leaves; they carried him about in triumph after he had been acquitted by the Revolutionary Tribunal; they mourned for him after his death as the Martyr of Liberty. Constant frequenters of the Jacobin assemblies, they were called the "Tricoteuses" of Robespierre. The revolution which put an end to the Reign of Terror only tended to exasperate their political fanaticism; and, on the the 1st of April, 1795, they were among the mob who penetrated, notwithstanding the soldiery into the midst of the Convention, crying, "Give us peace, and the Constitution of 1793!" The Jacobin party was definitively vanquished. The Directory succeeded the Convention, and the Consulate the Directory. When Napoleon made himself master of Paris the Halles were not behindhand in yielding him their votes. From that time they have invariably supported the uppermost cause. Their enthusiasm for Napoleon I. did not prevent them from manifesting joy on the occasion of the Restoration; nor have they been lukewarm in their adherence to the present Emperor,

"FORTS DE LA HALLE," PARIS.—DRAWN BY GAVARNI.

ADMINISTRATIVE REFORM.

THE disasters of war, a noble army wasted by overwork, disease, and the want of the common necessaries of life while within reach of our abundance of men and wealth—the national honour tarnished, and the national greatness diminished—ridicule abroad, and indignation at home, have apparently made the people forget the mal-administration of peace. It can, however, only be necessary to remind them of such matters as the public sewerage, as railway legislation, as our complicated and unequal system of taxation, to at once convince them that mal-administration of public affairs is our normal condition. War has only brought the mismanagement to a climax, and it can no longer be tolerated Private affairs are well managed. Commerce is successful, manufactures flourish, enterprise is ever renewed with vigour, knowledge is continually extended, and labour increases in skill; but the administration of public affairs satisfies nobody. Even those who administer them find many faults and before the war began, had proposed a great reform in the civil service. Long ago the Marquis of Lansdown admitted that every business understaken by the Government was mismanaged. Sir Robert Peel described the torpid hand of Government as unable to impart life to the things it touched. Mr. Macaulay, too, summed up an elaborate contrast between the exertions of our Government—which is in advance of other Governments—and the exertions of the people, and he emphatically and eloquently declared "that the barbarism of society belongs to the Government, and the civilisation to the people." The evil now complained of, and which it is now proposed to remedy, is not superficial and temporary but deep seated and long existing.

The contrast, be it remembered, which makes the nation dissatisfied and indignant is with the successful management of private affairs at home, not with the successful management of public affairs abroad. From the compliments continually made in the United States, we have reason to believe that public affairs are not better managed there than here. Referring to our ally and our enemy—and there are no other States in Europe in which the management of public affairs is not obviously worse than our own—it is notorious that a fine detachment of the French army perished in the Dobrutscha from mismanagement, and equally notorious, that in general public affairs are in greater disorder in France than in England. Every traveller in Russia, since Dr. Clarke, is utterly unworthy of trust, if public affairs there be not one mass of corruption. Great as are our losses, and orrowful our disasters, the sufferings and losses of the Russians from the time they entered the Principalities estimated at 250,000 men are ten times greater than ours. Even in peace, as we know from our own expe lence and from the testimony of others, public affairs are nowhere well and skilfully managed; and when nations go to war, in which General Napier say , "error is the rule, not the exception;" when they try to foil and defeat each other, their habitual mismanagement becomes, as we have lately experienced, terribly disastrous. Disorders so general must have a general cause; and, though found in details, must be traced up to principles. Not troubling ourselves further, however, with foreign nations—to which this brief reference is made merely as an illustration and as a warning against seeking improvement by following the system established in them—let us try, step by step, to trace our own faults to their source.

Our Commissariat has been deservedly blamed. What is the explanation of its deficiency? Is was numerous enough for its duties, or, if not, the persons in society capable of performing them are so plentiful, that the want of proper persons cannot be alleged. But the Commissariat were really ignorant and negligent. Their duties for a long time were trivial and matters of routine. Their pay was regular and assured to them, and they had no interest in performing their duties well. Merit was not the path to promotion in the Commissariat, but parliamentary or official influence. The bulk of the commissaries were, in consequence, ignorant and supine; and, when a necessity arose for exertions dictated by knowledge, the Commissariat was found to be ruinously inefficient

What is true of the Commissariat is equally true of every other branch of the public service. In no one is merit the invariable passport to success. In every branch, each public servant, unless he commit some flagrant offence, receives his salary regularly, and it is secured to him for life. In most offices, too, some kind of promotion goes on till it ends in a pension or superannuation allowance. In private life affairs are managed on a totally different principle. Merit there ensures success The industrious, the intelligent, the zealous, the skilful be they merchants, manufacturers, artists, or authors—as the rule, are sure to get on, and the reward of every man mainly depends on his own exertions. He receives what in his station and condition he honestly earns and neither more nor less. We do not mean to say there is no dishonesty in private life, that there is no fraud nor chicanery nor oppression amongst dealers and masters—but these cases are the exceptions. The business of society is, in the main, carried on honestly—and each man obtains what he deserves. The public servant is paid, whether he earns his salary or not. His reward depends very little, and often not at all, on his own exertions; and hence he does not exert himself, and the public service is ill done. In private life, whatever some unobserving grumblers may say, merit and reward go together; every man's fate depends mainly on himself. In the public service reward and merit are habitually disevered, and the consequence is the mal-administration now with so much justice complained of. This is not the fault of individuals; it is the inevitable result of the laws of human nature, and the false system on which public affairs have been managed for a considerable period.

We must not throw the blame on the hereditary principle: the Crown is hereditary; property is hereditary; but the monopoly of office and political power is a usurpation. It begins with the oligarchy, it is continued by Parliament, and is tolerated by the people. From the accession of William III.—followed, after the reign of Anne, by the house of Hanover—in consequence of the Sovereign having been a foreigner, and having had neither property nor influence in the country, of which, till George III., the Monarch did not understand the language, the Government has really been made a property of by a few families heading political parties. The members of Parliament were not chosen, the Ministers were not appointed, subsequent to the accession of William III., because they were men of great capacity—consummate public administrators, who could and ought to regulate all the departments of the State on some reasonable and homogeneous principle—but because they served the purposes and preserved the power of the oligarchy. To that the public service has been made entirely subservient Now and then an individual like the first Pitt or Mr. Huskisson forced himself by his merit to the top of the tree; but such cases were always exceptions to the general rule. The oligarchy which got hold of the Government when the foreign king came to the throne, kept it as long and as exclusively as possible in their own hands. They monopolised the bulk of the seats in the House of Commons, and still possess a large portion of them. They or their creatures always filled all the highest offices of the State, and appropriated to themselves all its emoluments. They were not appointed to these high places because they were efficient public servants, or men of commanding talents; but they seized them and kept them by means of their Parliamentary power. Thus the administration of public affairs has been for upwards of a century and a half vitiated at its source, and, in spite of considerable improvement continually introduced in its details, has now become the national opprobrium

[illegible] begins to be suppos[illegible] that [illegible] the inevitable consequences of Parliamentary government and of [illegible] the people to [illegible] largely in the public business. But this is a [illegible] error. [illegible] management prevails in Spain and Naples. The management [illegible] ning of the Revolutionary War, and all through the contest in the Peninsula, and the subsequent peace, before the Parliament was reformed and the liberties of the people were extended, than since. The Administration, in all its branches, is now purity, vigour, and perfection, compared to its condition under the Duke of Newcastle, Lord Bute, Lord North, or Lord Castlereagh. If the evil were an essential attribute of Parliamentary government or freedom, it would have increased in modern times; but unbearable as we find it, tested by our improved knowledge, it has very much diminished. In fact we are suffering from the neglect, ignorance, and corruption of our predecessors as much as from our own.

No persons have been more deservedly blamed, not even the Commissariat, than the Cabinet, which hastily despatched an expedition without any adequate comprehension of the services it would have to perform, and the difficulties it would have to encounter. In their negotiations, as well as in carrying on the war, they have shown themselves inefficient. They, like all the subordinate officers of the Government, receive and hold their appointments from some other reason than their capacity, fitness, and merit. The first Secretary of State for War never evinced any talent for the post; but he had high rank and many connexions. The Ministers, therefore, receive and are assured of receiving large salaries without deserving them. They are, consequently, careless and negligent in performing their duties. They act, too, in carrying on the public service on the same principle on which they acquire office, and bestow all the subordinate situations on their friends and connections. The whole public service is made private property. Ministers endeavour to serve themselves, to secure Parliamentary influence, and to enrich their friends—not to serve the public. Throughout the service, from top to bottom—from the Prime Minister to the humblest commissary—reward and merit are, as the rule, dissociated, and no man gets what he honestly earns. A great moral laxity is the consequence. The sense of duty and of responsibility, essential in public life, is weakened; exceptions are always limited, by the bare necessity of the case, and very often fall short of that. To get as much as possible out of the public, and do for it as little as possible—to plunder it whenever it can be safely plundered—has become a general rule for every class in society. This is the necessary consequence of the corrupt principle on which Ministers are appointed—on which they appoint all their subordinates, and on which the whole administration of public affairs is framed. To speak plainly of the system, but making no personal allusion, it is palpably dishonest from beginning to end, and totally at variance with the system which ensures success to private undertakings, and makes the rewards of every man mainly depend on his own exertions.

From this explanation of the origin of the disorder, the theory of the remedy, however difficult may be the cure in practice, is obvious; but, not to crowd our columns with one subject, we shall postpone further remarks to another opportunity.

THE POSTAGE ON NEWSPAPERS AND BOOKS.

(From the *Gazette* of Tuesday, June 5.)

TREASURY WARRANT.

Whereas, by an Act passed in the fourth year of the reign of her present Majesty, entitled "An Act for the Regulation of the Duties of Postage," certain scales of weight and rates of postage were fixed and made chargeable and payable upon, for, or in respect of, letters, newspapers, Parliamentary proceedings, and printed papers, transmitted and forwarded by the post, and various regulations were made for facilitating the transmission of such letters and papers by the post; and by the same Act powers were given to the Commissioners of her Majesty's Treasury, from time to time, by warrant under their hands, to alter and fix any of the rates of postage therein mentioned:

And whereas further powers were given to the Commissioners of her Majesty's Treasury by an Act passed in the eleventh year of the reign of her present Majesty, entitled "An Act for giving further facilities for the Transmission of Letters by Post, and for the Regulating the Duties of Postage thereon, and for other purposes relating to the Post-office;"

And whereas by a warrant under the hands of the Commissioners of her Majesty's Treasury, dated the 23rd day of January, 1855, it was ordered and directed that packets consisting of books, publications, or works of literature or art, might be transmitted by the post within the United Kingdom, subject to the several rates of postage and regulations therein contained;

And whereas it is expedient that the said warrant should be repealed, and that such other rates of postage should be charged, and such other regulations made, with respect to certain packets sent by the post as are hereinafter contained:

1. Now we, the Commissioners of her Majesty's Treasury, in exercise of the powers vested in us in and by the said before-mentioned Acts, or either of them, and of all other powers enabling us in this behalf, do by this warrant (under the hands of two of us, the said Commissioners, by the authority of the Statute in that case made and provided) order and direct that the said warrant, dated the 23rd day of January, 1855, and the several rates of postage and the several orders, directions, and regulations therein mentioned and set forth relating to the transmission by the post of packets consisting of books, publications, or works of literature and art within the United Kingdom shall cease and determine, and shall be, and the same are, hereby repealed and revoked. Nevertheless, no Treasury warrant repealed by the said warrant of the 23rd day of January, 1855, shall be revived by this warrant.

2. And we do further order and direct, that all packets consisting of books, publications, or works of literature or art, posted in the United Kingdom, may be transmitted by the post within the United Kingdom, subject to the several rates and regulations hereinafter contained; that is to say—

On every such packet, if not exceeding 4 oz. in weight, there shall be charged and taken one uniform rate of postage of 1d.

And on every such packet, if exceeding 4 oz., and not exceeding 8 oz. in weight, there shall be charged and taken one uniform rate of postage of 2d.

And on every such packet, if exceeding 8 oz., and not exceeding 1 lb. in weight, there shall be charged and taken one uniform rate of postage of 4d.

And on every such packet, if exceeding 1 lb. and not exceeding 1 lb. and one-half of another pound in weight, there shall be charged and taken one uniform rate of postage of 6d.

And on every such packet, if exceeding 1 lb. and one-half of another pound, and not exceeding 2 lb. in weight, there shall be charged and taken one uniform rate of postage of 8d.

And for every additional ½ lb. in weight of any such packet above the weight of 2 lb., there shall be charged and taken an additional rate of postage of 2d.

And every fractional part of every such additional ½ lb. in weight shall be charged as 1 lb in weight.

3. And we do further order and direct that the postage of all such packets as aforesaid shall in every case be paid at the time of the same being posted, not in money, but by being duly stamped with the proper postage stamp or stamps affixed thereto, which stamp or stamps shall in every case be affixed or applied on the outside of every such packet, near the address or direction, and shall be of the value or amount of the postage duly payable thereon under or by virtue of this warrant, unless any such packet be sent from any department or office in or connected with the public service of her Majesty which shall keep a postage account with the General Post-office in London, in which case the same shall be forwarded post-paid, and the postage thereof shall be charged in such postage account.

4. And we further order and direct that for the purposes of this warrant the terms "books, publications, or works of literature or art," shall mean, comprise, and include all books (whether printed, written, or plain), publications or compilations (whether in the form of books, pamphlets, magazines, parts, or numbers), and papers (whether printed or written), and any description of paper, parchment, or vellum (whether printed, written upon, or plain), and any music to be sung, (whether printed, written upon, or plain), and any cases or covers for together with any binding, mounting, or covering of or upon or belonging to any book or publication or work, or any portion thereof, or of or belonging to any paper, parchment, or vellum, and any cases or covers for prints or maps, and any number of paper or otherwise, pencils, pens, or other articles usually appertaining to any such book, publication, or work, paper, parchment, or vellum, or necessary for its use or reading, except where any such packet shall be transmitted by the post upon or in respect of which a less rate of postage than a minimum rate of 4d shall be paid, and in all cases where any such packet shall be transmitted by the post upon or in respect of which a less rate of postage than a minimum rate of 4d shall be paid, every such packet shall consist of and contain [illegible] such books, publications, or [illegible] only [illegible] shall be printed or [illegible] parchment, or vellum, only [illegible] shall be printed or [illegible] only (with the exception of [illegible] and shall not [illegible] any other articles.

6. And we do further order and direct, that every such packet shall be sent open at the ends or sides, and either without a cover or in a cover or envelope open at the ends or sides, and that there shall be no letter, or letter cloth or open, or any communication in the nature of a letter, nor any enclosure, sealed or otherwise closed against inspection, nor any other enclosure not authorised by this warrant, sent in or with any such packet, nor shall there be any letter or communication in the nature of a letter written or printed in or upon any such packet, or on the cover or envelope thereof, nor (unless a minimum rate of postage of 4d. shall be paid upon or in respect of such packet) any writing whatever written in or upon any such packet, or upon the cover or envelope thereof, except the address.

7. And, in order to prevent any obstacles to the due and regular transmission of letters by the post, we do further order and direct that it shall be lawful for any officer of the Post-office to delay the transmission of any packet posted or forwarded by the post under the provisions of this warrant for the space of twenty-four hours after the time at which the same ought to be dispatched in due course of the post, or (at his option) until the dispatch of the mail next after that by which the same ought, in due course of the post, to be forwarded by him.

8. And we do further order and direct that the transmission of the packets aforesaid under this present warrant shall be restricted to such as shall be sent by the post between places within the United Kingdom, and by the post of any post town in the United Kingdom, and that nothing herein contained shall be construed to extend to interfere with or in anywise to affect any privileges beyond those granted by this warrant which may relate to the transmission by the post of printed votes and proceedings of Parliament, or of newspapers or other periodical publications, which are allowed to pass by the post between places within the United Kingdom under the newspaper privilege, nor shall this present warrant be construed to extend to any packet sent by the post between the United Kingdom and places beyond the seas.

9. And we do further order and direct that if any packet, or the cover or envelope of any packet, sent or tendered, or delivered in order to be sent by the post, under the provisions of this present warrant shall not be open at the ends or sides, or shall in length or width or depth exceed the dimensions of two feet, or if there shall be any letter or any communication in the nature of a letter, written or printed in or upon any such packet, or on the cover or envelope thereof, every such packet shall and may be detained and opened, and at the option of the Postmaster-General shall be either returned or given up to the sender thereof, or be given up to the person to whom it shall be addressed, or be forwarded to the place of its destination; and every such packet, on being so returned, given up, or forwarded, shall be chargeable with a postage of double the amount of postage to which it would have been liable as a letter if the postage had been paid by stamps when posted, and such double postage may be either paid by the sender or be charged to the person to whom such packet shall be forwarded.

10. And we do further order and direct that, if any packet sent, or tendered or delivered in order to be sent, by the post, under the provisions of this warrant, shall contain any writing whatever (such writing not being a letter, or any communication in the nature of a letter), either enclosed in or written upon any such packet, or upon the cover or envelope thereof (except the address), and a rate of postage less than a minimum rate of 4d. shall have been paid upon or in respect of such packet, every such packet shall be forwarded charged with the amount of the difference between the postage paid thereon and the postage to which such packet would be liable as a book-packet under this warrant, together with a further and additional rate of 4d.

11. And we do further order and direct that, if any packet sent, or tendered or delivered in order to be sent, by the post, under the provisions of this warrant, shall contain any letter, or any communication in the nature of a letter, whether closed or open, or any inclosure sealed or otherwise closed against inspection, or any other inclosure not authorised by this warrant, every such letter or communication, or inclosure, may be taken out by any officer of the Post-office, and forwarded to the address on the packet, charged not only with the full rates of postage as an unpaid letter, but also with a further and additional rate of 4d., and the remainder of the packet, if duly prepaid with stamps, may be forwarded to the place of its address without any extra charge.

12. And we do further order and direct, that if any packet sent, or tendered or delivered in order to be sent, by the post, under the provisions of this warrant (any such packet sent from any department or office in or connected with the public service of her Majesty which shall keep a postage account with the General Post-office in London, and the postage thereof being charged in such account, only excepted), shall be posted, having thereon, or affixed thereto a stamp or stamps, the value of which shall be less in amount than the rate of postage to which such packet would be liable under and by virtue of the several regulations, orders, directions, and conditions hereinbefore contained, but equal in amount to 1d. at the least, every such last-mentioned packet shall be forwarded, charged with the amount of the difference between the value of such stamp or stamps so being thereon, or affixed thereto, and the postage to which such packet would be liable as aforesaid, together with a further and additional rate of 1d.; and if any such packet shall be posted without having thereon or affixed thereto any postage-stamp, every such last-mentioned packet shall be detained and opened at any place in the United Kingdom, and, at the option of the Postmaster-General, shall be dealt with and chargeable in like manner as is hereinbefore directed with respect to any packet not open at the ends or sides, or exceeding in length, or width, or depth, the dimensions of two feet.

13. And we do hereby further order and direct, that in every case in which the postage chargeable on any packet, under the provisions of this warrant, shall exceed the rates of postage to which any such packet would be liable as a letter, no higher amount than the letter rates shall be charged thereon.

14. And we do hereby further order and direct that the several packets transmitted by the post under the provisions of this warrant shall be subject to the general orders, directions, regulations, and rates of postage respectively contained in a certain warrant of the Commissioners of her Majesty's Treasury bearing date the 18th day of February, 1855, relating to the duties and rates of postage upon letters and packets which shall be re-directed and again forwarded by the post.

15. And we do further order and direct that the terms and expressions used in this present warrant shall be construed to have the like meaning in all respects as they would have had if inserted in the said Act passed in the fourth year of the reign of her present Majesty

16. And we do further order and direct that this warrant shall come into operation on the 11th day of June inst.

17. And we do further order and direct that it shall be lawful for the Commissioners for the time being of her Majesty's Treasury, by warrant duly made at any time hereafter, to alter or repeal any of the rates hereby fixed or altered, or the regulations hereby made, and to make and establish any new or other rates or regulations in lieu thereof, and from time to time to appoint at what time the rates that may be payable are to be paid.

MONCK.
Treasury-chambers, June 4, 1855 G. CORNEWALL LEWIS.

THE PRINCIPALITIES.—A letter from Constantinople, of the 24th May, in the *Semaphore* of Marseilles, says:—"The situation of Wallachia excites much anxiety here. In the evening of the 22nd the Ministers held a meeting on the subject; and M. Benedetti, Chargé d'Affaires of France, and other diplomatists, attended it. It is alleged that the Austrians expel from the Principalities all persons who, with the assent of their own country, have become naturalised. It is said that some French subjects have received orders to leave. Complaints are said to have been addressed on the subject to the French Embassy and to the Porte. It appears that the circumstance which is stated to have caused the presence of M. Benedetti at the last Ministerial Council. The English, on their part, are said to have made very strong complaints against Prince Stirby; so that this affair threatens to become a serious one. The Government is continuing to supply itself with a good deal of activity in obtaining recruits and horses in all the provinces of the empire."

MEDICAL PRACTICE IN THE EAST.—A very remarkable case, in which I was personally interested, has just come under my notice. My friend was lying ill in the Camp, pale, emaciated, and in a state of complete exhaustion. I never saw him; his breathing laborious, a dull pain on the right side, and his general aspect such as might lead a common observer to suspect the incipient stage of a consumption. I induced him to recur, without a moment's delay, to the advice of a civilian and experienced member of the Byzantine faculty. This was done, and, after examining the symptoms, the doctor pronounced, with the assured calmness of his art, that the case was rather serious, but hoped that, under proper treatment and strict regimen, he should be enabled in about three weeks to restore my friend to perfect health. The treatment he prescribed was one of intermittent fever, which had already assumed an almost continued form, and was complicated besides with an enlargement of the liver—all resulting, in his opinion, from general mismanagement and the constant use of opium, strong cathartics, as well as wine, medicinal and animal food, which, in the general run of acute disorders, are never employed in these latitudes. My friend was got promptly into bed on Sunday, with the assured calmness of his art, and having called in on the following Friday, to my inexpressible surprise, I found him in that short interval "almost again." Right on his legs and restored apparently to life and vigour. The following is the course of treatment to which he had been subject, notwithstanding the extreme degree of prostration whereof my friend complained, leeches were immediately supplied across the hepatic region, which was subsequently rubbed with mercurial ointment The pain was then treated, and subdued, and the fever likewise began to subside, and finally yielded, although of long standing, to light doses of quinine, which, however, during the last attack, was continued for several days in gradually diminishing proportions. No wine, brandy, nor stimulant of any description, was employed in this case to combat existing debility, nor was one morsel of animal food tasted; and the following is the fare consisted in a water decoction of rice and arrowroot, for which we understand about the fifth day weak chicken broth, and it was the sole sustenance allowed until my friend got finally out of dock and was triumphantly "launched into life." On that day I saw him, to my great delight, regaling in right spirits, and meditating an attack upon a potent dish of beef's broth, with a stout red mullet in the rear.—*Letter from Constantinople.*

NEW BOOKS, &c.

BOOKS POSTAGE FREE!—The New Order in Council runs the Postage of Books, which makes the publishing of them few and cheap. They are indeed valuable additions to our Educational Helps, and I shall not fail to recommend them throughout my various tours of inspection.—I am, Dear Sirs, yours very truly, T. WILKINSON.
To Messrs. Ingram and Co., Milford-house.

The above Series of Educational Works is intended to supply, at the cheapest possible rate, books adapted for Schools and Private Study. The old system of instruction, by which the names of things only were presented to the mind of the pupil, has long been admitted to have been imperfect and unsuccessful. When the young it is necessary to speak to the eye as we... as the mind: to give a picture of an object as well as a description: and the adoption of such a plan of tuition is not only by far the most effective, but also by far the cheapest in the... and more pleasant to the pupil. The great success which has attended the works published in this Series, is a sufficient proof that such a system of... has been required.

FOR INDIA, THE CRIMEA, ALDERSHOTT, AND TRAVELLERS GENERALLY
PATENT FUSEE CANDLE COOKING LAMP.—Will boil or stew a pound of meat in one hour; boil wat r, eggs, rice, soup, &c., giving as the same time a most brilliant light, is fitted with a mirror, forms a roasting-lamp and handwarmer.
The Patent Fusee Candles can be instantly ignited as a boiler; are made of tasteless materials; will keep good for years in any climate
The cost in burning is less than one halfpenny per hour, the weight of a large lamp with one canister of candles, sufficient to last a month, supposing the lamp to be in use eight hours per day—is under twelve pounds
The size of the two together is ten inches broad, ten inches high, and six inches wide, proving it to be the most portable, effective, and economical lamp that has yet been invented for the army and the public generally.
Sold Wholesale by the Patentee, at 50, Albany street, Regent's-Park, London, and Palmer and Co., Button-street, Clerkenwell; Exported by Burch, Son, and Seybrook, 37, Strand, City; Retail by Daniels, Lamp-makers, &c. Every Lamp is labelled "Patent Fusee Candle Cooking-Lamp."
"We strongly recommend it to military men and travellers in general, as being superior to anything we have yet seen."—Civil Service Gazette, April 7, 1855.
"To military and naval men it must prove invaluable; with it and a day's rations a man can laugh at the word "privation;" and in the stillness of the night he has at hand a real domestic friend—not only a powerful light, but one which will also minister to the wants of his tent or room in cold weather."—United Service Gazette.
"As a cooking lamp for travelling purposes, it is surely all prize, for not only will it cook a small luncheon, but it will also supply a most brilliant light, excellent in his tent or cabin. Need we say more than that the candle (or fuel) is exceedingly economical, to render the "Fusee Candle Cooking Lamp" a most acceptable boon to the army and navy, and all whose vocation may lead them to travel."—Naval and Military Gazette, April 7, 1855.
"The light afforded for writing or for the operations of the toilet, is most excellent, and he must be a sorry campaigner who could not, by the aid of these admirable Lamps, cook a very savoury mess. It is not only to the army that this Lamp will be valuable, but it will also be found to add greatly to the comfort of the staircase and sickroom, and to be highly useful to bachelors and emigrants."—British Army Despatch, April 6, 1855.

THE ILLUSTRATED LONDON NEWS.

No. 748.—VOL. XXVI.] SATURDAY, JUNE 16, 1855. [WITH A SUPPLEMENT, SIXPENCE.

PARTY AND PARLIAMENTARY GOVERNMENT.

THE Prince Consort has called public attention to the fact that the war has brought our system of Constitutional Government to "a heavy trial;" and the Prime Minister, while admitting the truth of the statement, has expressed his confidence that, notwithstanding all the difficulties created by our habit and privilege of free discussion, we shall be victorious in the struggle in which we are engaged, and conquer a peace "consistent not alone with the honour and glory but with the safety of the British nation." It would be both unpatriotic and unwise to doubt of this result, although it has become a fashion among a few at home, and among many abroad, to sneer at Constitutional Government in England as a system that works indifferently well in time of peace, but that either works intolerably ill, or does not work at all, in time of war. The enemies of popular freedom on the Continent affect to hold up our recent history as a warning to the too impatient nations of Europe, to deter them from imitating our example. They gloat over the disclosures before the Sebastopol Committee, as if neglect and mismanagement could only be found in a free country where the powers of Government are either dissipated or paralysed by the conflict of opinions and of authority. But, without stopping to prove, what every rational mind admits, that Despotic Governments have no immunity from error, even in the management of those wars which seem to be almost the only functions which they can decently perform, the British people can afford to let the sneerers continue to sneer at the liberty which they hate, and would crush if they dared. Englishmen may point with pride to the events now occurring in the Crimea, and in the Sea of Azoff, to show that there are a vigour and elasticity in the national spirit, and in the national institutions, which enable us to rectify error and mismanagement, wherever and whenever they display themselves; and to make the very obstacles and faults which might have been fatal to Governments less broadly based the stepping-stones to the noblest exertions and the most splendid triumphs. That our system of Government by Parliamentary parties has its defects, none know better than Englishmen themselves; but that that system, with all its defects, were they thrice as great as they are, can prevent, or even seriously impede, the progress of our arms when engaged in a just and necessary war, let no friend of Russia, or of the enslavement of humanity on the European Continent, be so foolish as to imagine. The freedom, if not licence, of discussion, which to them appears fraught with so much danger to our Government, is the safety of our institutions. Their abuses are hidden, and thereby perpetuated. Ours are disclosed, sometimes to our shame, but never to our discomfiture—for publicity of the evil, and the remedy to be sought, go hand in hand. Our national pride is often hurt by our own mismanagement, but we take care never to let it be hurt by anything which can be done by our enemies or our rivals. "We wash our dirty linen at home," as the old proverb recommends; and if those who see us engaged in the process fancy they are better off than we are because they have no linen, either to wash or to wear, they are welcome to the satisfaction which they may derive from their self-sufficiency—or their nudity.

Our Parliamentary and Party Government is a domestic matter; and for the benefit of those despotic rulers who fondly imagine that the populations they coerce have been cured of their admiration for British freedom by the spectacle of our mismanagement in the earlier stages of the war, and by the not very creditable displays of factious wrongheadedness which have been made in both Houses of the Legislature, but more especially in the House of Commons, it is well that they should know that the unsoundness which may be attributed to our Parliament does not extend to the popular heart. However we may squabble and dispute upon the great subject of the war, the nation would rather have such drawbacks to its complacency and comfort as its Gladstones, its Grahams, its Cobdens, its Brights, its Greys, its blundering officials, and its effete incapacities, plebeian or aristocratic, than be cursed for a single day or hour by the abrogation of its right of free discussion, and the establishment of such cut-and-dry despotisms as those under which the Russians are brutalised, and the Austrians repressed. However much its feelings may at times be outraged by the unpatriotic crotchets of some of its own children, from whom it hoped better things, the British nation, in its intercourse with the rest of the world, is true to itself. It may have occasion to be dissatisfied with many who presume to speak in its name from the benches of the Lords or Commons; but that is its private affair, and has no influence over its relationship to foreign States. These persons are in a decreasing minority, and our victorious fleets and armies are fast depriving them even of the little power which they once possessed. In the day of darkness and perplexity the voice of the croaker and the prophet of evil has a certain amount of potency derived from the temper of the people; but in the day of success the croaker and the grumbler share the fate of other anachronisms. Out of date, and out of place, their words fall powerless, and the people, proud even of their wayward children, can find time to admire the ability with which they argue a wrong cause, and the sturdy British courage, like that of John Bright, which can confront the sentiment and conviction of a whole nation.

It is quite true that our Parliamentary system is not exactly what it ought to be, and that the old dogma of Government by Party is somewhat inapplicable to our present necessities. But our Parliamentary system is in the course of purification; and Government by Party will again become possible and beneficial, when parties shall have assumed sound principle and not mere tradition as their guide of action. The old parties are broken up; but it was peace and not war which achieved their downfal. Neither Whigs nor Tories have a principle. The Whigs are not the friends *par excellence* of popular progress, as they pretend to be; nor are the Tories its enemies, as the Whigs assert. Neither do the names of Liberals and Conservatives express any real idea or governing principle. The Conservatives, so called, are often more liberal than those who arrogate the right to be called and thought true Liberals. The question of Parliamentary Reform first shattered and confounded the original elements of parties in the British Legislature;—that of the Repeal of the Corn Laws—carried into effect by a Conservative, and not by a man calling himself either a Liberal or a Reformer—achieved the destruction of Party. Perhaps the war—if, unfortunately, it last long enough—will lead to a reconstruction of parties, on a more sensible basis than these old and meaningless nicknames. But if not the war, some question of domestic and peaceful policy will afford the means whereby two parties may be formed and educated for a system of Parliamentary Government in accordance with the feelings and wishes of the people. At present parties are in the inchoate state of fermentation. They are forming—but are not formed. The old elements are so combined with new as to have lost their original characteristics and properties. But they will work themselves right in time, and this very confusion of parties and nice balancing of rival leadership, which despotic rulers, who do not understand our manners, consider as proofs of our weakness, are, in reality, the evidences of our strength. If such squabbles at home could dissolve the French alliance, or prevent the capture of Sebastopol and the discomfiture of Russia, the British nation might, perhaps, own that the ill-natured criticisms of foreign statesmen—or would-be statesmen—on our Constitutional form of Government, were justi-

GENERAL PELISSIER, COMMANDER-IN-CHIEF OF THE FRENCH TROOPS BEFORE SEBASTOPOL.—(SEE NEXT PAGE).

fied by its results. In the meantime, they are free to cavil if they will. They will neither disturb the equanimity of the British people, nor darken, in the eyes of their own subjects, the fair prospect of rational freedom, which shines before them, in a futurity, which may be distant, but which is certainly approaching.

GENERAL PELISSIER.

JEAN-JACQUES PELISSIER, the present Commander-in-Chief of the French Army in the Crimea, was born at Maromme, near Rouen, in the year 1796. His father was superintendent of the powder-magazines of that city, and had among his acquaintance a great number of military men, who early instilled into his mind a love of their profession. At that time young men of courage and intelligence rose quickly in France young Pelissier possessed both these qualities in an eminent degree, and on leaving college, at the age of eighteen, was made an officer of the Etat-Major. At the Restoration, he was made a captain, and shortly afterwards a chef of division. In 1842 he was elevated to the post of Lieutenant-Colonel of the Etat-Major; and from that time his career has been one of uninterrupted success. The Government of Louis Philippe recompensed the services of Pelissier in a worthy manner. He was sent to Africa to act under General Bugeaud, commanding the army there, and distinguished himself by his soldierly qualities. The Arabs, led on by Abd-el Kader allowed their conquerors no repose. From the frontiers of Morocco to those of Tunis, and from the sea-coast to the desert, all the country was in arms. General Bugeaud, in his expedition against them, resolved to avail himself of the talents of Pelissier, and gave him an important post. In the report which he sent home of a successful excursion which had been made against the natives, he spoke of his Lieutenant-Colonel in the following terms: "Among the officers who have particularly distinguished themselves, I ought to mention Lieutenant-Colonel Pelissier, who is always to be seen in the front of danger, and wherever there is anything important to be done. He is one of the best of our Chefs d'Etat Major." In a subsequent despatch he made further—and, if possible, still more favourable—mention of his Lieutenant.

Lieutenant Colonel Pelissier was promoted to a full Colonelcy in the year 1843, and made Chief of the Corps Royal of Etat Major in the African army. A short time after his elevation he attacked the Flittas, who were in turbulent revolt, and completely defeated them. A year afterwards the Kabyles obedient to the call of Si-el-Djoudi, rose in open revolt. Relying upon the natural strongholds of their country they braved the authority of France, and refused to pay the impost. General Bugeaud marched against them and defeated them, with little loss. In his despatches dated from the summits of the Flissar Mountains he again signalised the courage and intelligence of his Chef d'Etat Major. But the submission of the Kabyles was productive of little good. Abd-el Kader, always keeping to the mountains, harassed the French troops, and the tribes under their protection. General Bugeaud concentrated his forces in the province of Oran, gained the frontier, and encountered the Moorish army, under the Emperor Muley-Abderrahman, who was advancing to join the Arabs. The French General gained the most decisive victory leaving 800 of the enemy dead upon the field, and taking possession of eighteen of their flags and eleven pieces of artillery. In this brilliant engagement, which decided the fate of the Emir, Pelissier commanded the left column, and Colonel Cavaignac the centre. Scarcely a year had elapsed when the Arabs again broke out in open warfare. On this occasion Colonel Pelissier was vested with the command. In order to do justice to the character of the brave commander, it will be necessary to speak of that terrible drama which took place in the grottos of Ouled-Riah at that time, and which was the object of so much discussion in all parts of the world. On the 18th of June, 1846, Colonel Pelissier was engaged in a skirmish against the Ouled-Riah, a tribe whose country had never been subdued, owing to the number of inaccessible caverns which it contains. The retreating hordes fled to one of their natural strongholds. The messenger which Colonel Pelissier sent to them to propose a conference was, contrary to the laws of nations and humanity, massacred in the cruellest manner. Combustible materials were then placed at the entrance of the grotto, and a second envoy was sent to warn them of the danger they incurred if they refused to yield themselves prisoners. The death-cries of this unhappy man, whom they were treating like his predecessor, were the signal for their own destruction. The pile was set on fire, and in a short time the cavern was enveloped in flames. What took place in this furnace can never be ascertained, as not a soul survived. The cries of the women at length died away, and the soldiers with pity, and many, at the risk of their own lives, rushed through the flames to the interior of the cave. Nine hundred burnt bodies were afterwards found stretched in heaps along the ground; nearly two hundred still breathed, but all perished in the course of the day. The news of this terrible execution made a great sensation in all parts of Europe, and in France especially. The *National*, the *Courrier Français*, and other influential papers, pleaded earnestly for the dismissal of the Colonel; even the Chamber of Peers took the matter into consideration, and on the 15th July, 1846, the Prince de la Moskowa called upon the Minister of War publicly to express his disapproval of the proceeding. The Comte de Montalembert seconded the motion of his colleague, and Marshal Soult (the Minister of War) announced "his regret for and disapproval of the melancholy event." Marshal Bugeaud, however, came forward in defence of his lieutenant, and pleaded the inexorable necessities of war. The Government acknowledged the force of his arguments, and on the 22nd April, 1846, M. Pelissier was named Maréchal de Camp.

The new General continued his operations; and, after taking possession of several towns, put an end to the campaign by the defeat of the partisans of Bou Maza. In 1851 General Pelissier was promoted by Louis Napoleon (then President of the French Republic) to be a General of Division. In the same year he was temporarily vested with the authority of Governor General of Algiers, in place of General d'Hautpoul.

A tolerable idea of Pelissier's character may be gleaned from the following extract of a proclamation which he made to his soldiers on the 19th October, 1851:—"Remember," he said, "that you owe everything to your country. You should be ever ready to sacrifice yourselves, if need be, for the grandeur of her destinies, and the defence of her laws." On the news of the coup d'état of Louis Napoleon, he put the whole colony in a state of siege; and in a proclamation which he published, expressed himself "determined to preserve order by every means in his power both within and without." General Pelissier was named Grand Officer of the Legion of Honour, and, leaving the government of Algiers to General Randon, took his departure for Oran, 31st December, 1851.

It was there that he distributed (in July, 1852) the eagles to the soldiers of his division:—"It is beneath these eagles," he exclaimed to the assembled troops, "that I, the oldest soldier among all, began my career. Around these emblems glorious heroes have gathered; let them be our models Watch over these your inseparable companions. I feel sure that all of you would face ten hundred deaths sooner than abandon your banners!"

A short time after this solemnity General Pelissier marched upon Laghouat, and took it by storm. The Emperor Napoleon wrote him a friendly letter, congratulating him on his victory, of which the following is an extract:—"My dear General,—It is with great joy that I read the account of those brilliant feats of arms which have recently been executed under your able direction. I expected no less from so good a General and so brave an army."

In 1854, at the special request of the Emperor, General Pelissier accepted the command of the First Corps d'Armée of the French Army in the East, of which he is now the Commander-in-Chief. General Pelissier is in his fifty-ninth year, having spent forty-one years in active military service.

THE MAMELON.

The Mamelon, as shown in the above plan, stands on the same ridge as the Malakoff and the Victoria attack, directed by the French on the right of Gordon's attack, against these Russian works. The Mamelon is about 400 yards in front of Malakoff, and has a greater command, in consequence of its superior elevation, than that work. Its capture has been long deemed essential, and the brilliant exploits of the 7th June are the realisation of long-cherished plans on the part of the Allies.

Our guns, when mounted in this newly acquired position, will have a double advantage over those of the enemy, arising in some from the direction of the Mamelon—implied in its name—and the depression of the Malakoff batteries below the general level, lying, as they do, at the bottom of a hollow. At the second bombardment it was found that while the Mamelon was greatly injured by the guns of Gordon's battery, the Malakoff batteries, although 400 yards (according to Prince Gortschakoff) behind it, suffered much more.

The Mamelon itself is a steep rocky eminence, about a mile in circumference at the base, and about a quarter of a mile at the top. Its average height from what was lately our advanced parallel is about 100 feet. The approach to it was swept by about forty guns in the Malakoff works: its own guns made its truly formidable; and when it is added that its steep sides are covered with masses of rock and loose stones, the difficulty of the enterprise of July 7 becomes apparent, and its success more striking.

PLAN OF THE MAMELON AND MALAKOFF TOWER

DESPATCHES FROM LORD RAGLAN AND SIR EDMUND LYONS.

The following important despatches from Lord Raglan and Admiral Lyons, relating to the operations in the Sea of Azoff, have been received this week.

Before Sebastopol, June 2.

My Lord,—The reports which have been received from Kertch since I had the honour of writing to your Lordship on the 29th May, are of the most satisfactory character.

Five vessels, laden with corn, had come into Kertch, in ignorance of the capture of the place, and had fallen into the hands of the Allies.

The French and Engl sh squadron had appeared before Berdansk, and the enemy, in consequence, destroyed four of their war steamers, and considerable depôts of corn.

They then exchanged a cannonade with the Russian forts at Arabat, and were so fortunate as to blow up a magazine with shells, and since, Capt Lyons, R.N., of the *Miranda*, has performed a most successful operation upon Genitchi The Russian authorities of the town having refused to deliver up the Government depôt of corn and ninety vessels having on board supplies for their army in the Crimea, Captain Lyons bombarded the place with his squadron, and having driven the troops out of it, he landed the sailors and marines, and destroyed all the stores and the shipping

This brilliant and decisive success marks the resolution and daring of Captain Lyons, and fortunately was accomplished with no other loss than that of one man wounded

Admiral Sir Edmund Lyons states that in no longer a period than four days a squadron has destroyed 241 vessels, employed exclusively in transporting provisions to the Crimea; besides four war steamers and 6,000,000 of rations of flour and corn

I beg leave to offer to your Lordship my warmest congratulations on these important occurrences.

I have nothing of interest to report to your Lordship from hence, except that some more detachments of Sardinian troops have arrived.

A battery has arrived off the harbour.

I enclose the return of casualties to the 31st ult.

The Lord Panmure, &c., I have, &c., RAGLAN

DESTRUCTION OF STORES AT GENITCHI.

Her Majesty's ship *Miranda*, off the Town of Genitchi, May 29, 1855.

Sir,—I have the honour to inform you that I arrived here shortly after dark last night, with her Majesty's ships under my orders, and joined the *Swallow* and *Wrangler*, which ships had already destroyed or captured all the vessels in this neighbourhood outside the Straits of Genitchi; but a very great number had passed the Straits, which are only fifty yards wide, and are commanded by the low cliffs on which the town is built, and were moored inside, under the cliff.

At six o'clock this morning I sent Commander Craufurd with a flag of truce to demand the immediate surrender of all these vessels, and of the immense corn stores for the supply of the army in the Crimea, and of all Government property of every description; stating that if these terms were complied with I would spare the town and respect private property, but that, if not, the inhabitants were immediately to leave the town

Commander Craufurd was met by an officer of apparently high rank, who refused to accede to these terms, saying that any attempt to land or to destroy the vessels would be resisted.

The enemy at this time had six field-pieces in position, and with about 200 men with them, and, visible from the mast-head drawn up behind the town, a battalion of infantry, besides Cossacks.

Having allowed till nine a.m. for the reconsideration of the refusal to deliver up the vessels and stores, and receiving no answer, I at that time hauled down the flag of truce, and placed the steamers as near to the town and the passage into the Putrid Sea as the depth of the water would allow, but they were not able to approach within long range. Seeing that, if the enemy, who had removed his guns from their former position, could place them in the town, so as to command the passage, and that if he could place his infantry in a similar manner, it would be impossible for the boats to pass the channel and destroy the vessels and stores, I directed the ships to shell the town, which they did so effectually that the boats, as per enclosure, under the command of Lieutenant J. E. C. Mackenzie, got safely through the passage, and set fire to the corn stores did not catch fire; conceiving the destruction of this corn, as well as of some more distant vessels in the Straits, to be of the utmost importance, I sent the boats, again, commanded and officered as before, although I was aware that from the enemy having had time to make preparations, it would be a hazardous enterprise. The ships accordingly resumed their fire upon the town, and the boats proceeded. Lieutenant Cecil W. Buckley, of this ship, Lieutenant Hugh V. Burgoyne, of the *Swallow*, and Mr. John Roberts, gunner of the *Ardent*, volunteered to land alone and fire the stores; this offer I accepted, knowing the imminent risk there would be in landing a party in presence of such a superior force, and out of gunshot of the ships. This very dangerous service they most gallantly performed, narrowly escaping the Cossacks, who all the time were cut off from their boat at the same time Lieutenant Mackenzie pushed on and burned the remaining vessels, the enemy opening a fire from four field-guns and musketry, placed almost within point blank range of the boats. Everything being now effectually accomplished, the boats returned. Although several of them were struck by grape and case shot, most fortunately only one man was slightly wounded. Lieutenant Mackenzie speaks in high terms of the coolness and excellent behaviour of all employed under his orders; and I trust I may be allowed to bring to your notice the conspicuous merit of Lieut. Mackenzie himself on this occasion, when more than ninety vessels, and also corn for the Russian army of the value of £100,000 were destroyed, owing to his gallantry and ability, with so trifling a loss as one man slightly wounded.

Since the squadron entered the Sea of Azoff, four days ago, the enemy has lost four steamers of war, 246 merchant vessels, also corn and flour magazines to the value of at least £150,000. I have, &c.,

(Signed) E. M. LYONS, Captain.

NAVAL ENGAGEMENT IN KERTCH BAY.

Her Majesty's ship *Snake*, off Yenikale, 24th May, 1855.

Sir,—I have the honour to inform you that, in obedience to your signal granting me permission to intercept a Russian war-steamer, I proceeded into Kertch Bay, exchanging shots with the batteries at Akhourino in passing

I succeeded in cutting off the steamer and engaging her, but not until she had placed herself under the protection of the forts of Yenikale; after a sharp fire on both sides for three-quarters of an hour, I was fortunate in succeeding in setting her on fire with Lancaster shells, from which she blew up. She crew with a flotilla getting away. She had apparently soldiers on board. During this engagement the forts at Yenikale hulled the ship, and kept up a well-directed and continuous fire the whole time, which was returned with apparent good effect with our heavy shell

Three steamers also came down from the entrance (to the Sea of Azoff) and opened fire on us with very long range guns, their shot frequently passing over us at about 4000 yards. I continued to engage the batteries and steamers after the arrival of the ships sent up to my assistance, until recalled by signal from the *Miranda*.

The whole of the sailing-vessels standing towards the Sea of Azoff were intercepted, and afterwards captured; two steamers, also intercepted in Kertch Bay, were blown up by their own crews, and a gun-boat sunk

The batteries along the coast, which fired upon us whilst chasing the steamer, also were blown up.

I should feel I was neglecting my duty unless I mentioned the zealous and creditable manner in which the officers and crew performed their duties; being very short handed rendered working the guns for so many hours a work of great labour. I beg to recommend for your favourable consideration Mr N. B Herbert (second master in charge), who with much skill conducted the ship through the intricate and compa atively unknown passage, under the guns of Akhourno, and ins.de the shoal of Yenikale, without any accident.

I am equally indebted to Mr. Sydney E. Wright, assistant-paymaster (as officer of long and meritorious service) for his assistance as a volunteer executive, who, with Dr. Roche and Mr. George Wilson (senior engineer), manned and worked the 12-pounder howitzer, sinking a gun-boat.

I am happy that no casualties occurred, and the *Snake* received but little damage. One shot through the mizen rigging, carrying it away, and one through the hull at the water-line.—I have, &c.,

(Signed) H. F. M'KILLOP, Lieutenant and Commander.

Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief.

OPERATIONS IN THE STRAITS OF KERTCH.

Royal Albert, Straits, June 2, 1855.

Sir,—In my letter, No. 598, of the 26th ult., I stated that we had captured fifty of the enemy's guns It now appears that more than a hundred guns have been found on the heads of the Russian defences, many of them of heavy calibre, and remarkably well cast. Those which may not be required for the land defences which the Allied armies are now constructing, will be shipped and sent to England and France.

It has been ascertained from the Custom-house returns that the enemy, on evacuating Kertch, on the 24th ult., destroyed 4,166,000 lbs. of corn and 508,000 lbs. of flour. This quantity, taken together with what has been destroyed by the Allied squadrons in the Sea of Azoff, comprises nearly four months' ration for an army of a hundred thousand men; and it seems that shortly before our arrival the enemy had commenced sending towards Sebastopol daily convoys of about fifteen hundred waggons, each containing half a ton weight of grain or flour.

Admiral Sir George Brown confidently expects that by the 7th instant Yenikale will be in such a state of defence as fully to justify his leaving it in charge of the Ottoman troops now here, under the command of Hadji Reschid Pacha, and that the British and French forces will be at liberty to proceed to the attack of Fort Kinburn and Soujuk-Kaleh, in order to drive the enemy out of his last holds on the coast of Circassia. I am, &c., E. LYONS, Rear-Admiral.

To the Secretary of the Admiralty

LIST OF OFFICERS KILLED AND WOUNDED, AND NUMBER OF RANK AND FILE KILLED AND WOUNDED, ON THE 7TH AND 8TH INST.

KILLED.

Lieutenant-Colonel. 62nd Foot: Shearman

Majors 42nd Foot: Dickson. 88th Barclay

Captains —2nd Battalion Royals, Muller. 42nd Forster 88th Corbett, Wray.

Lieutenants—34th: Lawrence. 50th Stone. 62nd Machell. Royal Engineers: Lowry.

WOUNDED

Lieut-Colonel 99th Foot Campbell

Majors—7th Ml s 47th Villiers. 49th: Armstrong

Captains—Royal Artillery M Alex 38th Pennefather. 34th John Peel, Westhead 47th Sandilands Hitchcock 62nd Le Marchant. 88th Maynard. 3rd Ambrose A t ndon 7th Turner 41st Dixon 62nd Ingall 77th Gibby

Lieutenants 9th Evans 47th Hadfield 34th Sanders 49th: Young, Bustace 77th Dickson 89th Kenny. 97th Mackey 2nd Battalion 1st Royals: Bellew, Stewart. 47th Tribe 17th Boyd 48th Ives. 3rd Bredow 2nd Battalion 1st Royals: Legge. 7th Jones, J. F Jones, Walter 55th Scott 88th Grier 96th Anderson

Assistant-Engineer J. J. Keen

Mr. Rawlinson is going on very favourably

The loss of the English on the 7th and 8th amounted to—non-commissioned officers, drummers, and privates, killed, 127; wounded, 510; missing, 15.

RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED, WOUNDED, AND MISSING, FROM 25TH TO 31ST MAY, INCLUSIVE.

KILLED

Corporals Rifle Brigade: W. O Smith 41st Foot: John Lee

Privates 1st Foot: John Wynes 3rd John Dolan. 4th: Thomas Bassett 18th: John Lynch 47th John Thompson 49th William M'Manus 49th: Michael Deede 57th Daniel Dunn. 62nd Patrick Fitzgerald 77th George Woodward, Thomas Murphy, Alfred Dodd 97th James Ford

WOUNDED

Captains. 3rd Foot: W. Pownall, slightly. 34th: James Maxwell, severely.

Lieutenants—Rifle Brigade, F. C. Layne, severely.

Colour-Sergeant.—48th Foot: James Whelan, severely

Sergeant.—7th Foot: George Beddoe, slightly.

Lance-Sergeants 4th Foot: John Good, dangerously 34th John Simlas, severely

Corporal—18th Foot: Dennis Murphy, slightly

Privates. 3rd Foot: William Bartlett, severely; John Mitchell, Edmund Day, slightly; 4th Edward John Dangerously; Robert Norris, Henry Johnson, severely; Cornelius O Brien, slightly 7th: Thomas Graham, severely. 14th: Robert Dillon, severely. 17th: Andrew Nicholson, slightly. 18th: Owen Sweeney, severely; Peter Hughes, slightly. 28th: Samuel M'cmahon dangerously; 34th: James Wilson, slightly. 39th Thomas Gollogher, slightly 41st. Christopher Ferguson, dangerously; Henry Jackson, severely; William Mulachy, slightly; Allen M'Algles, slightly. 44th: John M'Manus, severely. 47th: James Ward, John Powell, severely; Denis M'Donald, slightly. 48th: Joseph Tomlar, severely. 49th: Thomas Walsh, James Harris, slightly. 50th: John Branghall, severely, Patrick Madden, James Atherton, William Hall, slightly. 62nd: Patrick Early, severely 77th George Greenway, slightly. 88th: John O'Hara, severely; George Smith, slightly 90th William Shaw, dangerously. Rifle Brigade. George Pitt, dangerously. Royal Sappers and Miners: George Clubb, slightly

Gunners Royal Artillery: William Evans, severely; Samuel Burton, slightly James Legg, A.B., *Rodney*, severely; William Darry 2nd, *Queen*, slightly.

Total—3 wounded.

MISSING

Private—68th Foot: Robert Wooler

Total—15 rank and file killed; 3 officers, 9 sergeants, 43 rank and file, wounded; 1 rank and file missing.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—MONDAY.

The Earl of DERBY called attention to the elevation to the Irish peerage of Mr. B. Roche under the title of Baron Fermoy. The Crown had the power of creating one Irish Peer for every three peerages which became extinct; but two of the titles, the extinction of which were presumed to authorise the creation of the peerage in question, were held by one person, and did not, in his opinion, warrant the course pursued.

A discussion ensued as to the legality of the new creation, in which Earl Granville, Lord St. Leonards, Lord Brougham, and other noble Lords took part; and ultimately the matter was referred to a Committee of Privileges.

HOUSE OF COMMONS.—MONDAY.

SWEARING IN OF NEW MEMBERS.

The SPEAKER, after thanking the House for their consideration in excusing his absence during his recent illness, drew attention to the fact that doubts had arisen as to whether Lord Haddo and Mr. Tite had taken the oaths and their seats according to law, in his absence—it being a fact of Parliament that the oaths should be taken at specified hours, and while the House was sitting, and *in the presence of the Speaker*. He offered no opinion on the point, but threw it out for the consideration of the House, as motions might be brought forward to censure hon. members for taking their seats without having taken the oaths according to law.

Sir G. GREY said, he had consulted several authorities, all of whom concurred that the point was doubtful, and under these circumstances he thought a bill should be immediately brought in to prevent any evil consequences resulting, and that it should be passed as rapidly as possible.

A short discussion took place, and, in the course of the evening, Sir G. GREY obtained leave to bring in a bill to enable Lord Haddo and Mr. Tite to vote their seats as soon as possible, and also to protect them against any proceedings which might be instituted against them.

The bill was read a first time.

ADMIRALTY DESPATCHES.

In reply to a question from Mr. Ellice, Sir C. WOOD said, he was prepared to lay upon the table the despatches to Admiral Dundas which, by leave of Lord Palmerston, had been read by Mr. S. Herbert in the recess, together with the correspondence of the war, together with extracts from letters from Admiral Dundas, in reply. (The right hon. Baronet subsequently laid the papers on the table.)

EDUCATION (NO. 2) BILL.

The adjourned debate on the second reading of this bill was resumed by Mr. ADDERLEY, who replied to some of the arguments of Mr. Henley, and, while supporting the bill, regretted that Sir J. Pakington had introduced the supplemental clauses for schools already in existence. The right hon. Baronet had sought for a theoretical perfection for his bill, which brought him to a practical contradiction. He bill of the right hon. Baronet and that of the noble Lord were founded on the same principle, and, if both were referred to a Select Committee, as had been suggested, he thought a very good bill might be the result of its labours.

Mr. A. Dawson said, the suggestion was to send all three bills (the two named and that of Mr. M. Gibson) to a Select Committee. He recommended to the attention of the House the last report of the Education Committee, from which it appeared that great expenses were incurred in the training-schools in order to have a few junior class of teachers and assistants on the one hand, while, on the other hand, the children in the schools were becoming younger and less suited to such acquirements as the parents imagining that the teaching was so very good that it was unnecessary to leave the children so long at school as before. He adverted to Mr. Price's factory at Vauxhall as an admirable example of the beneficial results of a mingled system of labour and instruction: and thought that the plan there in operation would be well worthy the consideration of the Committee to which those bills might be referred.

Lord J. MANNERS said, it gave him great pain to oppose the bill of his right hon. friend (Sir J. Pakington), but he could not understand his objections to the existing system, though he had given the utmost attention to his speech. If he were to have his choice amongst the three bills, he would unhesitatingly select that of Mr. M. Gibson; but he called upon the House to reject them all, as being no improvements on the present system.

Mr. W. J. FOX thought the best course would be to send all three bills to a Select Committee; and, by an amalgamation, an eligible one might be brought before the House.

Sir J. PAKINGTON replied to the arguments of Mr. H iley, which was, for purposes of reply to his (Sir J. Pakington's) published speech, and contended that, in those arguments, he passed over all the stronger points of that speech, upon which his bill was mainly founded, contenting himself with controverting points which were comparatively immaterial. He had brought forward his bill in no spirit of rivalry to Lord J. Russell, but because he thought that, owing to circumstances, the noble Lord had abandoned the subject. As each case, in his case, he did not feel most happy to act in conjunction with the noble Lord in performing a duty they owed to God and man, in removing the stain of such gross ignorance from the national character.

Mr. EWART moved the adjournment of the debate.

This was agreed to.

Lord J. RUSSELL moved that it be adjourned until Monday next.

Mr. HADFIELD moved, as an amendment, that it be adjourned until Monday four weeks, in order that more important public business might not be interfered with.

Eventually the adjournment until Monday was agreed to.

HOUSE OF LORDS.—TUESDAY.

RELIGIOUS WORSHIP BILL.

The report on the amendment of the Religious Worship Bill being brought up,

The Bishop of OXFORD opposed the further progress of the measure, which, he feared, would obliterate the line of demarcation between the Established Church and Dissent. He moved that the bill should be recommitted that day six months.

The Earl of CARNARVON, the Duke of Argyll, and the Earl of Shaftesbury supported the bill; which was opposed by Lord Canarvon.

On a division there appeared—For the bill, 31; for the amendment, 99: majority in favour of the bill, 1.

The bill was then ordered to stand for a third reading

The Administration of Oaths Bill was read a second time.

The Education of Poor Children Bill was passed through Committee

HOUSE OF COMMONS.—TUESDAY.

The Validity of Proceedings (House of Commons) Bill was read a second time.

Some further progress was made in Committee with the discussion of the clauses of the Metropolis Local Management Bill.

An arrangement was made by which Mr. Layard's proposition on the question of Administrative Reform would be brought forward as a substantive motion, to which Sir E. B. LYTTON announced his intention of moving an amendment.

DECIMAL COINAGE.

Resolutions on the subject of a decimal coinage were moved by Mr. BROWN, who, in the first place invited the House to express their opinion that the adoption of the principle, by the issue of the florin, had been eminently successful, and that the further extension of the system would be of great public advantage. Further, the honourable member proposed that an address should be presented to the Crown, praying for the completion of the decimal system, by authorising the issue of silver coins representing the value of one hundredth of a pound, and of copper coins to represent one thousandth of a pound, to be called cents and mils respectively, or such other names as her Majesty might deem advisable. Respecting the principle of a decimal scale, he contended no difference of opinion existed. All authorities in commerce and science coincided on this point, and nothing remained but to select the most expedient method of carrying the system into practical effect.

Lord STANLEY seconded the motion, remarking upon the large concurrence of authorities in favour of the decimal principle of computation.

Mr. J. B. SMITH moved, as an amendment, that a general congress of representatives of all nations should be invited to consider the practicability of adopting a common standard of money, weights, and measures. He considered that the suggestion of taking the pound sterling and the standard grain, and agreed that if the monetary system alone was altered, without a corresponding modification in the general system of mensuration, much confusion would ensue, and serious injustice be inflicted on the lower classes of purchasers.

Mr. LOWE contended that the natural standard of value was assigned rather by habit than by science. Infinite disturbance in the existing arrangements of business transactions must follow any attempt at a change, for which no theoretical advantages in the system of notation could compensate.

Mr. J. GREGSON advocated the immediate adoption of the decimal system of notation; as did

Mr. T. HANKEY, who considered the existing divisions of the English coinage to be altogether disgraceful—being utterly unsystematic in theory, and cumbrous in practice.

Mr. J. L. RICARDO supported the motion

Mr. HEBERLOW of the EXCHEQUER reviewed the various schemes proposed for bringing the decimal system into coincidence, as far as possible, with the existing denomination of coins in currency. Among them, the plan suggested by Mr. Brown did not seem the most free from difficulties or objections; and he recommended the withdrawal of the present motion on the distinct assurance that the Government were seriously considering the subject.

Mr. CARDWELL, defending the scheme proposed in the matter before the House, remarked that no opponent of that scheme had ventured to express a preference for any other. The question was complex, and the practical difficulties involved were considerable; but the alternative lay between the adoption of the suggested system of decimal coinage, or leaving matters as they stood at present. With due preparation, he thought that the public mind might be prepared for the great change that must ensue, but he acknowledged that the transition must be accomplished with extreme caution, for fear of hazardous consequences. For the impulse colonised in the recommendation of the Chancellor of the Exchequer, that the motion should be withdrawa, and the question left with the Government.

Mr. BROWN, after a long speech, consented to modify his resolution so as to have a simple enunciation of the opinion that the attempt to introduce the decimal system, by the issue of the florin, had proved successful.

After some discussion Mr. HADFIELD,

Lord PALMERSTON pointed out the inconvenience of pledging the House to a course which they were not ready at once to carry out in a practical shape. He urged the withdrawal of the motion.

On a division there appeared—For the resolution, 135; against it, 56: majority for the motion, 79.

NATIONAL EDUCATION IN IRELAND.

Mr. KENNEDY moved an address for a commission to inquire into the arrangements most desirable for rendering national education in Ireland more comprehensive and complete. The hon. member was proceeding to offer arguments in support of his motion when the House was counted out at half past eleven o'clock.

HOUSE OF COMMONS.—WEDNESDAY.

SUNDAY-TRADING METROPOLITAN BILL.

On the order of the day for the House going into Committee on this bill, Mr. MASSEY moved that the bill should be committed that day six months. He contended that the bill would affect most seriously the working classes. He regretted the absence of an honourable member for a Scotch borough, who could give the House information on the subject of the bill, to the effect that 999 out of every 1000 of the working classes were in a position to make their purchases on a Saturday night; but that honourable member did not go so far as to contend that the whole of the working population were similarly situated. Again, it was true that some large employers, like Messrs. Moudsley, paid their workpeople on a Friday night; but until it could be shown that such was a general practice the reverse of which was the case, no general argument could be founded upon it.

Lord STANLEY said that, notwithstanding what the hon. member who last addressed the House had said, he must support the bill. He contended that ample facilities were afforded to the working classes to purchase their provisions on a Saturday.

Mr. W. J. FOX supported the amendment.

Mr. L. SEYMER supported the committal of the bill; and said he had visited Spitalfields on Sunday, and he considered that nothing but the pen of Charles Dickens could describe the class of men who were frequenting the bazaar there, who were mostly of that class who were only seen in periods of political excitement. He learned from a policeman that there was nothing particularly immoral going on there except thieving (A laugh).

Mr. J. SIBTHORP thought there was a necessity, not for the prevention, but for the restriction, of Sunday trading. This bill was required as much for the working class as for the tradesmen, and he said that as the representative of a borough comprising a large number of the former class.

Mr. T. S. DUNCOMBE objected to an experiment being tried on the metropolis, containing, as it did, three millions of persons. He thought the hon. gentleman who had escaped from the dangers of Houndsditch, and from his contact with greasy persons in long-tailed coats, whom he had seen nowhere else, would have been much better employed in his parish church (A laugh). He thought the powers of the Lord Mayor were sufficient to put down the immorality the hon. gentleman described in that district where he had extended his Sunday researches. He admitted that in many parts of the metropolis the Sabbath was unnecessarily desecrated, and he thought the more common-sense way in which they should deal with the question would be not to prohibit all trading on a Sunday after eleven o'clock in the morning.

Mr. WILKINSON opposed the measure. The farther they proceeded in their attempts to legislate on the present question, the greater they would find their difficulties.

Sir G. GREY was in favour of going into Committee.

Mr. J. SMOLLETT would support any proper measure, but he must oppose the present.

Mr. BENTINCK said, the bill would increase, instead of diminishing, the evil it sought to remedy.

Mr. MAGUIRE contended that the tradesmen who kept open their shops on Sundays chiefly administered to the necessities of the very poorest classes; and he denounced the measure as severe, stringent, and unchristian.

Sir J. WALMSLEY said that this bill would really have the effect of preventing the poorer classes from buying their food at a convenient period.

Lord R. GROSVENOR asserted that the upper classes had set the working classes a good example on Sundays. He did not hesitate to show that on Hyde Park there was a large decrease in the number of private carriages and saddle-horses on Sundays, while the number of omnibuses and carriages in the same neighbourhood was undiminished. This he asserted corroborated his statement.

The House having divided, there were—For going into Committee, 153; against it, 31: majority, 107.

Mr. W. J. FOX moved the words "provided always that no person of the Jewish race and religion shall in any case whatever be liable to any of the penalties inflicted under this Act" should be added to clause 1. He thought that this measure would operate unjustly on members of the Jewish persuasion, by interfering with their profits and depriving them of two days of trade instead of one.

The amendment was negatived without a division.

Mr. WILKINSON moved that the words restricting the sale of milk to the hours before nine o'clock in the morning, and after one o'clock in the afternoon, should be omitted from the third clause.

A short discussion ensued, after which the House divided, and the amendment was negatived, there being—For the original motion, 109; against it, 123: majority, 14.

Mr. CRAWFORD moved that ten o'clock should be substituted for nine o'clock in the same clause.

The House divided, and the amendment was lost by a majority of 107 to 100.

In the clause limiting the sale of newspapers to ten o'clock in the morning on Sundays.

Lord J. MANNERS moved that the sale should be restricted to nine o'clock.

Mr. T. S. DUNCOMBE was opposed to any restriction at all.

Sir J. SHELLEY considered it would be better to omit the words *in toto*.

Mr. W. J. FOX was opposed to any such restriction.

Mr. SPOONER was in favour of the omission of the clause altogether, as he was opposed to the sale of newspapers or other periodicals on Sundays.

The House then divided, when there appeared—For the amendment, 51; against it, 169: majority, 116.

Mr. HADFIELD moved that the words "ten in the morning" should be left out, and the words ten in the afternoon be substituted (Laughter).

The House divided, when there appeared—For the amendment, 61; against it, 154: majority, 93.

Mr. CRAUFURD moved the insertion of the words in the clause, "or after two in the afternoon," which he thought would be only just with respect to newspapers. This would permit of newspapers being sold out of church time.

The House divided, and the numbers were—For the amendment 63; against it, 140: majority, 78.

The Chairman then reported progress, and obtained leave to sit again on the 4th of July.

SUMMER CIRCUITS OF THE JUDGES, 1855.

HOME CIRCUIT.—Judges, Mr. Justice Wightman and Mr. Justice Cresswell. Hertfordshire, July 10, at Hertford. Essex, July 13, at Chelmsford. Sussex, July 18, at Lewes. Kent, July 23, at Maidstone. Surrey, July 28, at Croydon.

NORTHERN CIRCUIT.—Judges, Mr. Baron Platt and Mr. Justice Crowder. Yorkshire, July 10, at the Castle of the City of York; City of York, the same day, at the Guildhall of the City. Northumberland, July 25, at Durham. Northumberland, July 30, at Newcastle-on-Tyne. Town of Newcastle, the same day, at the same place. Cumberland, August 2, at Carlisle. Westmoreland, August 4, at Appleby. North Division of Lancashire, August 8, at Lancaster Castle. South Division of Lancashire, August 11, at Liverpool.

NORFOLK CIRCUIT.—Judges, Mr. Baron Barke and Mr. Baron Alderson. Buckinghamshire, July 11, at Aylesbury. Bedfordshire, July 13, at Bedford. Huntingdonshire, July 18, at Huntingdon. Cambridgeshire, July 20, at the County Court of Cambridge. Norfolk, July 24, at the Castle at Norwich. City of Norwich, the same day, at the Guildhall of the city. Suffolk, July 28, at Ipswich.

MIDLAND CIRCUIT.—Judges, Mr. Justice Coleridge and Mr. Justice Maule. Northamptonshire, July 10, at Northampton. Leicestershire, July 13, at Leicester; Borough of Leicester, the same day. Rutlandshire, July 17, at Oakham. Lincolnshire, July 18, at the Castle of Lincoln. City of Lincoln, the same day, at the Guildhall. Nottinghamshire, July 21, at Nottingham; Town of Nottingham, the same day. Derbyshire, July 25, at Derby. Warwickshire, July 28, at the Castle of Warwick. The Coventry assize has been abolished.

OXFORD CIRCUIT.—Judges, Sir Frederick Pollock and Mr. Justice Erle. Berkshire, July 10, at Abingdon. Oxfordshire, July 12, at Oxford. Worcestershire, July 16, at Worcester; City of Worcester, the same day, at the Guildhall of the city. Staffordshire, July 19, at the Castle of Stafford. Shropshire, July 26, at Shrewsbury. Herefordshire, July 23, at Hereford. Monmouthshire, August 1, at Monmouth. Gloucestershire, August 4, at Gloucester; City of Gloucester, the same day.

WESTERN CIRCUIT.—Judges, Mr. Justice Williams and Mr. Justice Crompton. County of Southampton (Hants), July 10, at Winchester. Dorsetshire, July 16, at Dorchester. Devonshire, July 19, at the Castle of Exeter. City of Exeter, the same day, at the Guildhall. Cornwall, July 24, at Bodmin. Somersetshire, July 30, at Wells. Wiltshire, August 4, at Devizes. City of Bristol, August 8, at Bristol.

NORTH WALES AND CHESTER CIRCUIT.—Judge, Sir John Jervis. Montgomeryshire, July 17, at Newtown. Merionethshire, July 20, at Dolgelly. Carnarvonshire, July 23, at Carnarvon. Anglesea, July 26, at Beaumaris. Denbighshire, July 28, at Denbigh. Flintshire, August 1, at Mold. Cheshire and City, August 4, at Chester.

SOUTH WALES AND CHESTER CIRCUIT.—Judge, Lord Campbell; who, after proceeding through the Circuit, will join the Lord Chief Justice of the Common Pleas at Chester, and the assizes for that city and county. The following are his Lordship's arrangements:—Cardiganshire, July 19, at Cardigan. Pembrokeshire, July 18, at Haverford-west; Town of Haverfordwest, the same day. Carmarthenshire, July 15, at Carmarthen. Glamorganshire, July 20, at Cardiff. Brecknockshire, July 23, at Brecon. Radnorshire, August 2, at Presteigan. Cheshire, August 4, at the Castle of Chester; City of Chester, the same day, at the Guildhall.

VACATION JUDGE.—Mr. Baron Martin will remain in town as Vacation Judge, and preside daily at chambers during the absence of the Judges on Circuit.

NEWSPAPER AND PERIODICAL PUBLICATIONS.—The Board of Inland Revenue has issued the following notice:—"The Board of Inland Revenue, presuming that a misconception exists as to the period at which newspapers may come under the bill which has passed the House of Lords, but has not yet received the Royal assent—be printed without stamps, think it right to give notice that they will not be lawful to print any newspaper which may be published fourteen days from that on which the bill mentioned shall have received the Royal assent, and that the bill will not, as seems to be supposed, take effect in that respect from the passing thereof."

SUCCESSFUL ENTERPRISE IN THE IRON TRADE.—The following estates have been purchased by Messrs. Baird, of Gartsherrie Iron Works, in the central iron district of Scotland, within the last five years:—The late Mr. Douglas Baird, Cleeburn and Stane estate, £325,000; Mr. William Baird, Elie, £146,000; ditto, Rosemount and Whitefield, £60,000; Mr. Alexander Baird, Ury, £120,000; Mr. James Baird, Cambusdoon, £50,000; Mr. George Baird, Muirlaw, £140,000; Mr. David Baird, Seamill, £—; Messrs. Alexander Baird, Auchmedden, £9,000: total, £965,000. The Messrs. Baird have been in all respects the architects of their own fortune. The sons of a respectable farmer in Lanarkshire, their patrimony was but small; but small as it was, aided and guided by judicious enterprise, courage, integrity, and perseverance, they have fought their way manfully to fortune, and are at present among the largest iron manufacturers in the British empire.

SPANISH MULETEERS FOR THE CRIMEA.

Of the innumerable deficiencies by which the machinery of the Crimean expedition in its early stages was so unfortunately impeded, probably not one has been so prominent, or productive of so many evils, as the imperfect, or rather non-existent, subsidiance, or help to transport corps. All the witnesses who were examined on this point before the Sebastopol Committee were unanimous in their lamentations of the oversight which left so essential an auxiliary to the efficient working of the army unprovided for; and, though some of the home officials ostensibly responsible for the duty alleged that every precaution had been taken at the War and Ordnance and Commissariat Offices to ensure what was required, there can be little doubt that the forthcoming report of the Committee will stigmatise the neglect, incompetency, and perversity of these departments in a manner commensurate with the evils chargeable upon them in the respect we speak of. However, when these evils became so glaring that it was impossible for even official stolidity any longer to ignore them, it was resolved to make what provision for the shortcomings complained of that circumstances would permit. Accordingly, one of the first quarters turned to, both on account of its comparative proximity to the scene of operations, and its fruitfulness in the commodity desired, was Spain, whose mules and muleteers were obviously well suited to the nature of the ground to be traversed, and of whose utility, under somewhat similar exigencies, the records of the Peninsular War furnished ample evidence. It was resolved, therefore, to organise a complete corps of animals and drivers, and it is to be hoped that, if the war continues, they will fully answer a purpose which it is lamentable to think they had not been long ago employed for. Our Sketch represents a group of muleteers on board the Peninsular and Oriental Steam Navigation Company's vessel, the *Iberia*, in which, during the Arctic, Mr. Mahony, was a passenger on his way to Lisbon. These men come for the most part from Gallicia, and certainly seem to have but small affinity, either in look or bearing, to those "young muleteers of Granada," of whom Moore sings as the embodiment of Iberian picturesqueness and animal vivacity; still less do they conjure up the Byronic portraiture:—

> How carols now the lusty muleteer!
> Of love, romance, devotion, is his lay,
> As whilom he was wont the leagues to cheer,
> His quick bells wildly jingling on the way.

They do not carol at all; nor do they look as if they ever did or could carol; though they have unaccustomed incentives to hilarity, for the £3 bounty which they each receive is regarded as quite a little fortune, many of them never having seen so much money in their lives before, and deeming it quite inexhaustible, especially in connection with good wages ensured them, and the liberal scale of diet of excellent, and to them wholly unaccustomed, quality, provided gratuitously by the Company on the passage from Vigo to Gibraltar; from which latter place they are conveyed to the Crimea in the transports constantly proceeding to Balaclava. Up to the present time three detachments of these men have been forwarded from Vigo: the first consisting of only thirteen, the second a larger number, and the third of thirty—of whom the group represented in Mr. Mahony's Sketch forms a part.

These Spaniards will almost complete the representatives of the European nationalities which the fortunes of the present extraordinary contest have brought before Sebastopol and within its beleaguered walls. Already there are Russians, Poles, Finns, Cossacks of the Don and the Black Sea, with varieties of the nations subject to the Muscovite rule from the White Sea to the Caspian, and probably to the very borders of China; whilst the lines which now almost enclose the doomed city bristle with the bayonets and glitter with the British and French and Turkish regiments; the latter containing a most miscellaneous assemblage of Africans and Asiatics, as well as of Europeans—including Egyptians, Tunisians, Arabs, Tartars, and Moslem races of one kind or another; besides the Sardinian Contingent, the Swiss officers of the Anglo-French Legion, Germans, Maltese, Ionians, and other delegates to the great military congress now assembled to solve the old Napoleonic problem, whether the Cossack or the Liberal element shall be in the ascendant in the world during the remainder of the nineteenth century at all events. Add to these the reinforcements now being raised in Roumelia and Anatolia, under the recently promulgated Hatti-scherif of the Sultan for enrolling the Christian subjects of the Porte, and the number rises individual specimens of Teutonic humanity constantly being contributed from the German States, and we may form something like a notion of the Babel in the Taurie Peninsula at the present moment.

EMBARKATION OF THE KING OF PORTUGAL AT LISBON FOR FRANCE.

As was expected, the recent visit of his Portuguese Majesty to our own and his countrymen's fleet in Cawsand Bay has led the prelude to a renewed and more prolonged tour. Upon this the King set out from his capital on Sunday, the 19th of May, under circumstances of great éclat and impressiveness—one feature of which our Sketch represents. The Lisbonians are passionately enamoured of all such spectacles, and certainly see often with more justice than on this occasion. Seldom has the glorious old Castle of Belem, overhanging the river, looked out upon a scene more picturesque. The day was beautiful, and the coup d'œil all that could be desired by the most fastidious spectators, and there are few more exigeant than those who witnessed this. They possess one invaluable ingredient in the formation of a judgment on such a matter, viz., patience. They are content to wait, uncomplainingly, any reasonable, or rather unreasonable, time for an exhibition, but then they expect it will be worth the delay. Although well aware of official dilatoriness, they themselves are always punctual in their attendance at the advertised time. Thus they flocked in great crowds, and in their ultra-gala finery, to the vicinage of the Arsenal before nine o'clock in the morning, being apprised that that was the period for which the steamers were ordered to be off the gardens of the Castle; and the steamers accordingly were so, and with their steam up, prompt to the minute. But it was half-past eleven before his young Majesty, his brother, the Duke of Oporto, the King Regent (their father), and a numerous and brilliant staff, made their appearance, when they were greeted with tumultuous vivas, which the august personages acknowledged very graciously.

The Royal brothers were very plainly dressed; but the costumes of

SPANISH MULETEERS ON THEIR WAY TO THE CRIMEA.—SKETCHED ON BOARD THE "IBERIA" STEAM-SHIP.

the attendants of the Court, the great officers of the household, the uniforms of the military officials, and the sumptuous robes of a Bishop and of some minor ecclesiastics, presented an array of stars, crosses, laces, bijouterie, embroidery, and decoration of one sort or other, that the sense of sight almost ached at the effulgence. In the Sketch the figure on the right, conspicuous from his black beard, is the King Regent, who was greatly gratified by the cordiality of the reception of his sons; next him is the young King; behind whom is seen the Duke of Oporto; and below those Royal personages are two ecclesiastics, on the steps leading to the Royal barge. This antique vessel was canopied with crimson damask, embroidered with gold in the most elaborate manner; the state cabin being fitted up in a style of splendour truly regal, the gilded furniture covered with crimson satin, while the rose-coloured silk curtains were relieved by white and gold caryatides. Externally the barge was a mass of carving and gilding to the river's edge, and might truly be said to "burn on the water," like Cleopatra's galley on the Cydnus. The rowers, no less than eighty in number, were attired in scarlet jackets, slashed with yellow, and having badges on the breast; with crimson velvet caps, and white trousers, with a broad stripe of blue down the outer seam of the leg. There were two other state barges, less sumptuously decorated, however; and three Portuguese and two French steamers were awaiting the Royal party in the river, with steam up, anchors weighed, and the flags of their respective nations flaunting gaily in the sunlight.

Having taken leave of those who were not to accompany them on the voyage, and having received the episcopal benediction, the young King and the Duke entered the principal barge; at which moment the flag-ship, moored directly in front of the Arsenal, fired a Royal salute, which was responded to enthusiastically by the multitude on shore, with all the usual demonstrations of waving of hats and handkerchiefs. The three barges, glittering in the sunbeams, then rowed into the stream and round the flag-ship, to the steamers. The *Mendilla* had the honour of receiving his Majesty and his brother, with a few attendants, the remaining portion of their suite being divided between the other two Portuguese vessels. The two French steamers were sent by the Emperor to convoy his illustrious guests to Bordeaux; from which port, as the reader is already aware, they proceeded to Paris by railway; and one of these vessels, which kept steaming up and down the river while waiting for the Royal party, was a principal object of attraction until the King and his brother made their appearance. As soon as the Royal travellers were aboard the *Mendilla*, the French convoys placed themselves on each side, and the squadron immediately steamed down the Tagus, the two Portuguese steamers bearing the Royal suite following in the wake of the others. The whole affair was exceedingly brilliant; the charming weather, the gay attire of the spectators on the quays, especially the feminine portion, enhancing the general effect.

EMBARKATION OF THE KING OF PORTUGAL, AT LISBON.

THE "MAGICIENNE" OFF CRONSTADT, WITH RUSSIAN PRIZES IN TOW.

CAPTURE AND DESTRUCTION OF RUSSIAN VESSELS IN THE BALTIC.

WE have been favoured by a Correspondent with the accompanying Sketch of H.M.S. *Magicienne*, with four prizes astern, captured on the preceding day by her and the *Merlin*, destroying in Riskopo Sound, near Wyborg, two Russian transports, laden with huge blocks of granite for a casemate battery at Cronstadt. The transports were, on Monday morning, the 28th May, towed by a small Russian man-of-war steamer to within three miles of where the *Magicienne* and her prizes lay hidden. On observing the English man-of-war, the Russian immediately cast off the transports, and made away with all speed towards the narrows leading to Wyborg, distant not more than six or eight miles. The navigation of the Bay of Wyborg being dangerous from numerous sunken rocks, and the narrows altogether impracticable for a vessel of the *Magicienne's* size, prevented the chase being continued, which alone saved the Russian from capture.

On taking possession of the transports they were found to be unfit to be sent to England, and were consequently destroyed on the spot; one of them being for a time made a target for the *Magicienne's* gunners. The prizes taken were chiefly laden with ryemeal for the use of the troops at Cronstadt, and are now on their way to England for condemnation.

ANTIQUITIES FROM KERTCH.

THE curious relics which we have engraved are from Kertch (the ancient Panticapæum), and form part of a collection which was brought to this country a few years since by Mrs. Cazley, and deposited in the British Museum; and they may be said to have acquired a new interest by our recent capture of the locality in which they were discovered. They were procured from tombs opened during some extensive excavations in the immediate vicinity of the present town, and consist of the following specimens:—1. Necklace of glass beads. 2. Copper coin of Mithridates. 3. Part of a wooden comb. 4. Fragment of stone moulding. 5. Silver coin of an ancient King of Kertch. 6. Plate-moulding, coloured. 7. Piece of wood-carving. 8. Ancient gold fibula, found in a tomb. 9. Ancient gold ear-ring, found in a tomb. 10. Wood-carved leg of a chair.

According to history it appears that the kingdom of the Cimmerian Bosphorus was founded by Archæanax, about 483 B.C., and passed, in 438 B.C., into the hands of the Thracian Spartacus, whose descendants reigned over it till the year 115 B.C., when Mithridates the Great, at that time King of the neighbouring country of Pontus, received it from the last of the preceding dynasty.

Panticapæum itself was probably founded in the sixth century B.C

ANTIQUITIES BROUGHT FROM KERTCH DEPOSITED IN THE BRITISH MUSEUM.

and continued under the kings of the Bosphorus, the capital of the country, down to the time of Justinian. Under Justinian, the town was surrounded by new walls; and, though it was taken twice (in the years A.D. 625, and A.D. 738) by the Hungarians and the Huns, it was too valuable an appanage of the Constantinopolitan empire, not to be immediately retaken by the Emperors of the East.

From the time of the Council of Nice, Panticapæum became the seat of a bishopric, and was the residence of the especial Bishop of the Goths, which in the ninth century was erected into an archiepiscopacy. In A.D 1333 this town was the seat of a Latin archbishopric, whose jurisdiction comprehended Georgia. In the fourteenth century the Genoese took possession of it, and from that time Panticapæum bore the differing titles of Cerco, Bospro, Pandico, and Aspromonte: in 1746 the Turks obtained it, and changed the name again to Ghersèe, whence is probably derived its present title of Kertsch, or Kertché, which it has borne since its last capture by the Russians, in 1771.

The position of Kertch is peculiarly beautiful. It is situated at the foot of a small hill, called Mount Mithridates, on the shores of the Cimmerian Bosphorus leading from the Sea of Azoff into the Black Sea, and the cupboard of the traveller who comes by that route is overloaded, the town, the coolnade of the Museum built half-way up the hill, and a cenotaph raised to the memory of a former governor, Stempkowsky. The new Museum is itself a remarkable building for a place so remote. It is an exact copy of the Temple of Theseus at Athens, and is approached by five successive terraces of stone. It is ornamented with griffins, one of the most common symbols on the coins of ancient Panticapæum. This handsome structure was erected a few years since by the Governor, Prince Khorkeonlidseff.

The whole of the ground around the town of Kertch bears testimony, in the number of its *tumuli*, or graves, to the long existence on that spot of a numerous and wealthy population; while the whole of the part of Mount Mithridates which fronts the sea is one immense mass of broken pottery, proving beyond a doubt that, as at Samos and Miletus, whence the first Greek colonists are said to have come to Panticapæum, this town, too, must in ancient times have had very extensive establishments for the manufacture of pottery. During recent years very considerable excavations have been made round Panticapæum, and a vast collection of valuable objects have been discovered in some of the larger tombs. The two most celebrated bear the local names of Tearky-kourgan and Koulaba. In these a vast quantity of golden and other valuable antiquities have been met with—some of which appear to have gone to St. Petersburg, some to have been placed in the Museum at Kertch, but the greater part to have been secreted by those who first broke into the tombs, and to have subsequently been sold piecemeal to strangers.

An excellent work has been published at St. Petersburg, by M. Sabatier, entitled "Souvenirs de Kertch," in which are several admirable engravings of some of the finest things which have been discovered there, and especially of a splendid sarcophagus of wood which is preserved in the Museum at that place, and is a unique specimen of antique work

We may be allowed to express a hope that the late attack on Kertch by the Allies has not resulted in the wanton destruction of any works of ancient or modern art in the town itself; but think, at the same time, a careful search will be it situated in the private houses of the inhabitants, in which it is well known that there are still a great number of valuable objects, originally taken from the tombs.

PRINCE ALBERT ON PUBLIC AFFAIRS.

At the annual dinner of the Trinity Corporation on Saturday evening last, at the Trinity-House, his Royal Highness Prince Albert proposed the health of her Majesty's Ministers in the following terms:—

Gentlemen, The toast which I have now to propose to you is that of her Majesty's Ministers (Cheers). If there was ever a time at which her Majesty's government, by whomsoever conducted, required the support, by, not the support alone, but the confidence, good will, and sympathy of their fellow-countrymen, it is surely the present (Loud cheers). It is not the way to success in war, to support it, however earnestly and enthusiastically, and at the same time to tie down and weaken the hands of those who have to conduct it (Cheering). We are engaged with a mighty enemy, who is using against us all those wonderful powers which have sprung up under the generating influence of our liberty and our civilisation. You find him with all that force which unity of purpose and action, unscrupulous energy, and unbridled despotism can command; while we have to contend with under a state of things intended for peace, and for the promotion of that very civilisation, the offspring of public discussion, of the friction of parties, and of the popular control on the Government and the State (Hear). The Queen has no power to levy troops, nor has she any at her command but such as offer their voluntary services (Hear). Her Government can take no measure for the prosecution of the war which it has not beforehand to explain in Parliament. Her armies and fleet can make no movements, nor even prepare for any, without their being publicly announced in the papers. No mistake, however trifling, can occur, no want or weakness exist, which is not at once denounced and even sometimes exaggerated with a kind of morbid satisfaction (Loud and continued cheering). The Queen's ambassador can enter into no negotiations without the Government having to defend him by entering into all the arguments which that negotiation or, in order to be successful, ought to be able to drop in the uttermost recesses of his heart (Loud cheers). Nay, at the most critical position, when war and diplomatic relations may be at their height, an adverse vote in Parliament may at a moment deprive the Queen in the whole of her confidential servants. Gentlemen, our Constitutional Government is undergoing a heavy trial, and we shall not get successfully through it unless the country will grant its confidence—patriotic, intelligent, and self-denying confidence—to her Majesty's Government (Loud cheers). Gentlemen, I propose to you to drink the health of Viscount Palmerston and her Majesty's Ministers

The toast was drunk with great cheering.

Viscount Palmerston replied: May it please your Royal Highness, my Lords, and Gentlemen—I beg, on the part of my colleagues and myself, to return to you our best and most sincere thanks for the honour you have done us in drinking the toast which his Royal Highness has been kind enough to propose, and for the flattering manner in which you have been kind enough to receive it. I can assure you that there is no roof under which that toast could be more agreeable to our feelings than the roof under which we have now had the honour to have it proposed. We are assembled under the roof of a body whose duties are immately connected with those arrangements which form one of the most important elements of our national wealth, and which also lay the foundation for one of the most important sources of our national strength. There is, indeed, a unity of operation between the Government that may have to administer the affairs of this country and the body which has done us the honour to receive us, which tends to make that honour which has been conferred more agreeable to us, for it is the function of the Trinity Corporation to provide pilots for those thousands of keels that plough the waves that wash our shores; and, on the other hand, to erect those lights which warn navigators from dangers which they would otherwise have to encounter, and which point out to them the havens where safety is to be obtained (Hear, hear). Well, gentlemen, the duty of Ministers is of a somewhat similar description. It is the duty of Ministers to guide and to enlighten, and we well know, taking the example from the quarter that I propose to guide, we must begin by enlightening. Gentlemen, we are now entrusted with the command of the vessel of the state, and I am proud to say that that noble vessel was never in better trim. was never better formed, never had on board more noble crew than at the present moment. It is full of men animated by the most exalted devotion to their duty, and determined to bear in the "battle and the breeze," with honour and safety, that Royal standard which floats nobly and gloriously over their heads (Cheers). We have certainly up to the present moment had storms and difficulties to encounter, which I am convinced that, with the assistance of that crew which I have mention ed, those difficulties and disasters will be surmounted, and that by a "strong pull, a long pull, and a pull altogether," we shall be enabled to bring the vessel of the state safely through and anchor her in the harbour of honourable and permanent peace. His Royal Highness had been pleased to say that a Government, especially in such persons as the present, ought to receive the generous confidence and support of the nation. I am bound to say that we have received that support, honourably and generously, from the country, and that the unanimous feeling of the nation is in favour of the war, which we feel it our duty to pursue; and we should indeed be unworthy of that support—we should be little deserving the high position in which it has pleased her Majesty to place us, and in which we are supported by the confidence of the Parliament and by the support of the whole British nation—we should be unworthy of that confidence and support, if we were not determined to exert our best energies, and to direct the best energies of the country towards obtaining that victorious result of the conflict in which we are engaged, which alone can be consistent, I will not say with the honour and glory, but with the safety, of the British nation.—The noble Lord resumed his seat amid much cheering.—*Daily News*

The King of Portugal and the Duke of Oporto, accompanied by their suite, and attended by the Count de Niewerkerke, visited Versailles on Tuesday, and, after going over the Château and the Great and Little Trianon, were present at the playing of the grand water-works.

The Princess de Sagan has commenced an action, at Berlin, against Geivinus, for having stated, in his "History of the Nineteenth Century," that she had been seen on horseback, seated *en croupe* behind a Cossack!

ADMINISTRATIVE REFORM.—THE REMEDIAL PRINCIPLE.

To trace the errors of our Administration to their source is obviously easier than to reform them. One reason of this is that the real power of the State has silently passed out of the hands of the oligarchy; and the public, which has acquired it, though the victim of the old and mischievous practices, has never till now taken into consideration the means of reforming them. As the body moves obedient to the mind, not of itself, so nations are moved by opinion as it "points the path to good or evil." Putting aside all technicalities, therefore, and assuming that public opinion as declared by the press is now the real governing power—and we have of late seen the Ministers, and even Lord Hardinge, very obedient to it—the first thing needful in order to obtain Administrative Reform is to enlighten public opinion. The process is slow but sure, the fruit may be long in ripening, but by no other mode can it be successfully matured. Such, too, seems to be the view of the Administrative Reform Association, for it says few people know anything about Government offices, and it proposes—auxiliary to the newspapers—to get information and lay it before the public. At the enthusiastic meeting held at Drury Lane on Wednesday this was stated to be its great object; and hoping, by this means, to promote reform in the Army, in the Navy, in our Diplomacy, and in the Civil Service. On all these subjects we cannot enter: we only aspire to elucidate a principle, which must be carried out, according to times and circumstances

It is apparent that—subordinate to the separation of men into different classes and conditions, a point essential to be remembered—public opinion, now to be brought systematically to bear on the administration of public affairs, is the means of securing to each individual in private life his proper reward. All exchangeable value, by means of which every kind of mutual service is paid for, is always settled by the conflicting estimates of buyers and sellers. A certain definite proportion of the produce of the national industry by the higgling of the market is given to the landowner as rent, to the capitalist as profit, and to workmen as salaries or wages. The smallest sum of money which pays for the bread, cheese, tea, or sugar, sold in pennyworths over the counter, is divided amongst these classes, each in proportion to the public estimate of the value of the services rendered. New classes such as bankers, engineers, authors, artists—as society progresses, continually rise to wealth and honour, and their rewards are, in all cases, determined by the value which the public, well served by the banker and the engineer, and delighted by the author and the artist, sets on their respective labours. Public opinion can, and must, in like manner, determine the rewards if not the functions of all public officers. Roused at this time, and on this topic, into unwonted activity, if judiciously directed it will achieve, to the public benefit, the much-desired Administrative Reform; if not judiciously directed it may ere long stagnate in hopeless disenjointment or explode into ruin. What we are about to propose is auxiliary to the reform suggested at the meeting, or the means of obtaining them, and is definite and precise.

One principle of the Constitution is, that the money for all administrative purposes is to be voted by the House of Commons, and, in fact, it does actually hold the purse-strings of the nation. The portion of the national resources devoted to pay the National Debt is placed beyond its power; but all the money which pays the Army and Navy, and the Civil Service, is by it annually voted. Here is the means by which public opinion can exercise a minute and effective control. Hitherto, no part of the Administration has been so slovenly and negligently performed as that of imposing taxes and disbursing the public money. No principle has dictated its proceedings; and hence, at the end of thirty years' peace, we have a multitude of incongruous taxes—direct and indirect, unfair to individuals and unjust to the nation—which hamper industry and promote fraud. Now, this is the essential duty of the House of Commons, and, as a notable example of the manner in which it has been performed, let us mention that it ordains three kinds of rates—the Property-tax, the County-rate, and the Poor-rate—to be all levied from the same property, and for each rate the same property is estimated at a different value. The House of Commons works a sum in addition three different ways, and obtains three different results—two must be wrong—and it sanctions and ordains all three.

Again, as to the Estimates—the Minister brings down his thick folios, in which the whole sums required are stated at the beginning, and distributed into numberless minute details through many pages, throws them on the table, and the investigation of them is left to chance. They are, in due time, put to the House, are read hastily short by the almost breathless Chairman of the Committee of Supply, and hurriedly assented to by members who are chattering, talking, and running backward and forward the majority of whom are generally mere hangers-on of the Government. As the money is voted that the Minister asks for, so the means of raising it are also adopted at his recommendation and thus the most important part of the duty of the House of Commons, the basis of all administration, is actually done by the Ministers and their clerks. This is a scandalous deviation from what is right. Every part of administration suffers from it: control and responsibility are alike destroyed. By money the services which men render to one another are measured and rewarded; and only by dealing carefully and justly with the national funds can the public, operating by the House of Commons as its instrument, mete out for public services encouragement and reward as they are meted out in private life. A reform of this great neglect, the practical source of every administrative abuse, should at once be demanded. Some persons may suppose that till the Parliament be reformed, in a democratic sense, it will never take effectual care of the public money; but even in its unreformed state it is obedient, like the Ministers, to public opinion, when distinctly expressed. Till now the public has not taken—as was admitted by Mr. Layard on Wednesday—sufficient interest on the subject. When it does, the House of Commons, badly as it is constituted, will obey its voice. We are not disposed, therefore, though friendly to Parliamentary Reform, to wait for that before we urge the public to require our present representatives to use the power they rightfully possess over the national revenues, to secure a reform in every branch of administration.

At the beginning of every Parliament, the House of Commons appoints certain standing committees—as one of privileges, one for the library, one to arrange petitions, and other matters that in relation to the public welfare are utterly insignificant. Let the public insist on its appointing every session a Finance Committee, including merchants and others, with clever well paid accountants as clerks; and insist on the House making a rule that it will vote no money whatever until the estimate for it has been examined by the standing Finance Committee. To this Committee the Ministers, as the condition of receiving any money, should be required to submit both an account of the expenditure of the money previously voted, and their estimate of the money required to be voted; and both should be carefully examined by the Committee before a single new estimate should be submitted to the House. At present the House neither knows what it votes nor why the money is voted. There is no real check on the outlay of the Ministers. Preserving to itself the full power to control the Committee, only adopting its recommendations if approved of, the House of Commons ought to find means by some delegation of its supreme authority—which, for want of such an organisation, is now wasted and lost—to exercise its power in a suitable and worthy manner.

The control of the Commons over the public money neither does nor ought to end with voting the Supplies and the Ways and Means. By the continuance of an old custom, after the reason for it has come to an end, the revenue is claimed as belonging to the Sovereign, and is paid into the Exchequer. Ministers are answerable to the Commons for expending it according to each Appropriation Act as it is passed every year; but otherwise the Commons part with the control after voting the Supplies. By this means the Treasury, combined with the Exchequer, gets into its possession all the money voted and all the revenues; and thus all the means of corruption, and a control over all the other departments, which necessarily follows the possession of the money, are all centred in one board This should be altered. Leaving for the present the collection of the revenue in the hands which now gather it, though this much requires improvement, and causing all the money to be paid as collected into the Bank of England become by the progress of society the real Treasury and Exchequer—the House of Commons could and should give to each officer who submits the estimates the control, independent of the Treasury, of the money which it votes for each special service. Thus, instead of placing all the national funds in the hands of the First Lord of the Treasury, the chief of the Ministers who cannot be to. ched without breaking up the Government—they would be placed by the House of Commons under separate and several accounts in the Bank of England, to be drawn on by the chiefs of the several departments. and each of these chiefs would become directly accountable to the House of Commons, through the instrumentality of its Finance Committee, for every shilling he expended.

The Chancellor of the Exchequer, instead of being answerable for the whole revenue, should be answerable only for the sums paid to the Customs and other departments immediately under his orders: or perhaps for a portion of the Miscellaneous Expenditure, some portion of which should belong to the Board of Trade, and another portion to the Home office. The First Lord of the Admiralty should be answerable for every shilling of the naval expenditure, without any reference to the Treasury: the Minister for War should in like manner be answerable for the Army and Ordnance expenditure; the Home Secretary for the expenditure on Courts of Justice and domestic institutions, &c.; and so every chief of a department who came to the House for money by an estimate should be exclusively entrusted with the expenditure voted to carry his duties into execution. Partially, such an appropriation to each service now takes place; but it is necessary, in order to make it complete, to remove the public money from under the authority of the Treasury, and make each chief of a department stringently responsible for the expenditure in his department to the House of Commons. Without entering into details, this seems to us the spirit of the reform that is required. The bulk of the public money should be removed from under the control of the Treasury, and be placed by the House of Commons under the control of the several Ministers authorised to disburse it. Instead of now having too little, we have on this point too much, centralisation, the centralisation of the power of governing by corruption.

Some difficulty may be supposed to arise from the fact that the Treasury now plans the expenditure as a whole, and selects the taxes to meet it, but under such a system as we recommend these duties would fall to the active Finance Committee of the House of Commons, in conjunction with the Ministers, working in open day, having no motives for corrupting any body, and not being itself liable to corruption. The Committee would —as is the duty of the House of Commons, not of the Ministers—select and ordain taxes, settle loans if necessary, and be the substitute for the Treasury in every thing that concerned the regulation of the national finances as a whole. Each chief of a department, being openly responsible to the House for the whole expenditure and the whole management of his department, would have, and ought to have, the disappointment of every one of his subordinates; and the Secretary of Treasury would cease to exercise that undivided patronage now so deservedly execrated, on which Ministers rely rather than on an efficient performance of their duties, to secure the votes of the House of Commons. Each chief, too, being supreme in his own department, but strictly responsible to the House of Commons, we might expect that between the several chiefs a spirit of emulation and of competition would arise, and they would all try to give satisfaction to their great master the public, operating through the Finance Committee, by each conducting that portion of the public service entrusted to him in the most efficient and most economic manner. We should have much better public servants, but fewer of them. We want, and we must have, Ministers more alive to their responsibility before we can have the public affairs reasonably well administered; and to have such Ministers we must have Departmental Ministers, each of whom, instead of answering to the Treasury and the Crown for the money expended, shall be responsible to the House of Commons. Noble Lords and right hon. gentlemen will then have an opportunity of showing their administrative skill, and of acquiring, according to their merit, the public approbation

Such a principle implies that every head of a department responsible for the public money should be a member of the House of Commons It would, however, by no means deprive the Peers of their fair share of the Government. The First Lord of the Treasury considered as the Prime Minister, and having no longer any control over the funds devoted to particular departments might be a Peer, retaining the patronage of the Church, and directing the exertions of the heads of all the departments to one common end Where he is deprived of the power of bribing the Commons the necessity for his sitting amongst them would cease. The Lord Chancellor would necessarily be a Peer. The Chancellor of the Duchy of Lancaster, the Lord President of the Council, and even the Secretary of State for the Colonies, who ought not to have much of our money to spend, might be Peers. But the Chancellor of the Exchequer, the Minister of War, the First Lord of the Admiralty, the Home Secretary, the President of the Board of Trade, the Foreign Secretary, every great officer who has to propose an estimate and to disburse the public money, should be a member of the House of Commons, and strictly answerable to the Commons and the people for every shilling of the public revenue of which he sanctioned the expenditure.

It is asserted that this or any such scheme would put an end to the maladministration of which the public justly complain. All laws, it must be remembered, depend for their efficacy on the spirit and patriotism of the people; and a self-denying ordinance on their part, as has been said, is necessary to give effect to any scheme of reform. It is, however, evident that the real power of the State has passed from the oligarchy to the whole people; that it is their money which is misspent and their power which is misemployed; that they suffer and are thus made responsible for the wrong. They, therefore, must apply the remedy; and we believe that only from carrying out with vigour the great Democratic principle in all its integrity, of the Commons controlling the expenditure, can our popular Government be saved from discredit and shame. Any reform which does not begin by placing the Ministers more under the House of Commons and more under the public—which is confined to subordinates and clerks, and expects to procure efficient service by scholastic examinations—will be nugatory, and will cheat the public with hopes never to be realised.

To have the right man in the right place we must have good Ministers; for, though the public may occasionally designate some individual as suitable to some specific office, it is not practicable nor desirable for the public to watch over, still less to make, every appointment. This implies eminently interference between the public and individuals very often in an humble sphere. The public should confine itself mainly to securing a good House of Commons and efficient and responsible Ministers, by some such scheme as the one we propose, and must trust to them to select proper persons for all the subordinate offices. Any reform, however, which leaves the Ministers to determine what they shall undertake, and how much money they shall spend, will be a mere mockery. It is quite consistent with the national manners, and with the general principles on which all the business of private life is successfully conducted, to consider the Government as a bargain to which the Ministers and all their subordinates are one party, and the public, represented by the Commons, are the other. As long as one party to the bargain decides both what he shall do, and how much money the other party shall give him, the bargain is essentially unfair and unsatisfactory, and the business never will be honestly done. Our suggestion goes, therefore, to make the public, through the House of Commons, and through a permanent Finance Committee, effectively a party, always active and watchful, which it is not now, to this great bargain. By means of controlling the estimates for all work it would have something to say both as to what should be done, as well as what money the people should pay.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE meeting this day of the Royal Corporation of the Literary Fund is the first that has been held for legislative purposes in the broad daylight of public opinion, and therefore the first that has been removed from the Bloomsbury-square influence—so detrimental to the interests of the Society. The meeting is one at which it especially behoves all authors who are members of the Corporation to be present; nay, it is one at which it is incumbent on all well-wishers to the real welfare of authors and of literature to attend and vote. The move for administrative reform in this smug borough of well-meaning people is made by authors in favour of authors—by authors (nor let this be forgotten) who are liberal contributors to the funds of the institution—by authors who are never likely to ask one penny from the funds for themselves. We cannot but regard the upshot of this gathering as one in every way important to the advancement of letters. Successful authors were never in a better position than now; but there are many unsuccessful but most meritorious authors (unblameable in every relation of life) who are unwilling to seek contribution from a society that is managed as the Royal Literary Fund is at present managed. The meeting of this day is to determine the way in which thirty thousand pounds in the Funds, two hundred pounds a year in land, a large annual subscription, and a large public sympathy, can be best administered. These are more than Town and Table Talk subjects on Literature and Art.

An old friend of the late Mr. Lockhart reminds us that Mr. L. enumerated two Sir Henry Ellises in his list of friends; and that one Sir Henry Ellis—though not *he* of the Museum, and of Letters Illustrative of English History; but one less known in letters, though a Privy Councillor—is a contributor, with many others, to the Lockhart Monument. The *Athenæum* is therefore right in including "the Right Hon. Sir Henry Ellis" among the contributors to the Lockhart Monument, though not in giving such undue prominence to his name when copying, under pretence of correcting, a paragraph from this paper. We will add, while on this subject, that the friends of Mr. Lockhart north of the river Tweed are not altogether satisfied with the exclusive nature of the subscription.

The week has given birth though not as yet printed publicity—to an anecdote connected with letters and the examination of clerks for the Civil Service. The *Times* has been referring to some slips committed by candidates under examination for the public service, and it was in connection with the *Times* examples that the anecdote we refer to reached our own ears. One of the subjects, very properly, of examination is writing from dictation as a test of orthography and of something more. A wretched candidate wrote measure and pleasure in every instance without the letter *a*, on which one examiner remarked to the other, "This candidate in his spelling gives us neither full measure or full pleasure." We relate what we heard, and while we attest to the accuracy of the remark we will leave our readers to decide on its brilliancy.

One of the best printing presses in England has just put forth its last work—we allude to the Shakspeare press of Bulmer and Nicol, to which we are indebted for that magnificent edition of our great poet edited by Steevens, and known as Boydell's Shakspeare. The last production is before us while we write. It is in verse, and entitled "A Fragment; a State Bedchamber in the Castle of Fan. Napoleon III. asleep; the Shade of Henry IV. appears and speaks." The imprint will be read with interest:—

Written and printed by William Nicol,
Shakspeare Press.
October, 1854.

This, the last issue from the above Press, affords a specimen of the page and type (cut by William Martin) of the great edition of Shakspeare's Dramatic Works, edited by George Steevens, and projected and published by John and Josiah Boydell and George Nicol, for the printing of which the office was established, under the management of William Bulmer, who successfully competed with Bodoni and Didot, and who now stands with them in the annals of Typography.

There is a vein of poetry throughout the "Fragment" which makes us regret that we have no room for an extract. Mr. Nicol—now, we suppect, in his eighteenth year—has continued with the authors of the last and present era that intimacy which his father held with Dr. Johnson and his friends. The author of the "Fragment" from whose *now* scattered types the verses before us are printed, remembers to have seen Gibbon in Lall-mall.

Our contemporaries, in common with ourselves, have fallen into an error in attributing a clever landscape in the present Royal Academy Exhibition to the elder Linnell, and not to William Linnell, a younger son of a very favourite painter. "I have no doubt," says the elder Linnell, in a letter to ourselves, "that the mistake has arisen through my not sending any work this season to the Royal Academy." Mr. Linnell not sending any work this season to the Royal Academy." Mr. Linnell with, we are sure, pardon us in saying that the mistake has arisen through my hereditary excellences so apparent in the picture. It is not often that an eminent father has an eminent son—"like trees too closely planted (the image is in Ben Jonson), the shadow kills the growth."

Within a very narrow circle there may have been seen during the present week a complete overflow of canvas and panel, covered with the creations of ancient and modern masters. The British Institution opened on Monday last its always interesting and instructive collection of pictures of deceased artists. Messrs. Christie and Manson have had on sale the late Mr. Dennistoun's gatherings in early art; and Messrs. Foster and Son have been exhibiting and scattering, at great prices, sixty examples of our English school. The collection at the Institution added another great evidence to what Dr. Waagen calls the treasures of art in England. Messrs. Christie's distribution showed to what excess a really able man could carry his fondness for early examples of Italian schools; and the sale at Foster's evinced most remarkably that the Turner mania in England is by no means on the decline. Let us quote the prices given for the two Turner pictures. Of course they were submitted as the last lots in the sale. And how did they sell? Lot 59, "The Burning of the Houses of Parliament," exhibited in 1835, sold for 810 guineas; and Lot 60, exhibited in 1841, "The State Barges conveying the Pictures of Gian Bellini to the Church of the Redeemer," brought, for such a picture, the fabulous price of 1360 guineas. Both were bought by Mr. Wallace, descendant (of course) of that

Great patriot hero, ill-requited chief,

of whom (in Sir Robert Peel's language of the present Prime Minister) "we are all proud." What does Mr. Ruskin think of these Turners, when taken in connection with his savage criticisms on Mr. Boxall's portraits in the present Exhibition? The froth of Miss Copley's dress is of the same *frite*-like character so offensively conspicuous in the Turner pictures.

A HORSE TAMER.—On the voyage to England the *Simla* experienced some heavy weather in the Bay of Biscay, in which the horses suffered severely, and some, including a charger of General Scarlett, became unmanageable. A valuable mare was so very bad that a pistol was got ready to shoot her to end her misery, when a Russian officer recommended a Cossack prisoner to be sent for, as he was a "juggler," and could, by charms, cure any malady in a horse. He was sent for, and immediately said he would cure it at once. He was closely watched, but the only thing they could observe him do was to take his cash off, and tie a knot in it three several times. However, the mare in a few minutes got on her feet and began to eat heartily, and rapidly recovered.

PENNY STAMPS.—A Parliamentary return issued this week supplies some statistics regarding the new penny receipt and draft stamps since their first issue in October, 1853. Of the penny receipt stamps there were sold in the last quarter of 1853, 21,078,886; in the first quarter of 1854, 14,856,887; in the second, 12,756,493; in the third, 13,940,138: making a total during the year of 62,320,603, at a cost of £260,670 0s. 3d. Of the penny draft stamps, there were sold in each of the above four quarters respectively—3,122,474, 1,520,873, 697,688, and 1,332,065: making a total of 6,462,900, at a cost of £27,403 15s. Of the penny receipt and draft stamps first issued in October, 1854, there were sold up to the 31st of March, 30,906,213—viz., 15,884,125 in the last quarter of 1854, and 14,522,088 in the first of 1855. The cost of this six months' issue was £128,369 4s. 5d.

CHESS.

SAINTHILDE.—It would save us much trouble, and, what we grudge more, space, if correspondents would: first a little before writing. There is no error in Problem 569 if Wh is play K to E 7th, and the Black King obviously goes to his K 2 5th.

ANDRE, Havre.—Your Solutions are, unfortunately, all failures.

SIGMA.—Such a discourse as you recommend might possibly prove of interest to many of the quarters assembled at the Leamington meeting; but we doubt the gentleman named to deliver it will have quite enough upon his hands without so serious an addition to his labours.

ALEXANDER, Antwerp.—Drawn games are not counted in matches "X" has not, therefore, won his wager.

P. H. L., and J. H., Canandaigua.—The true Solution

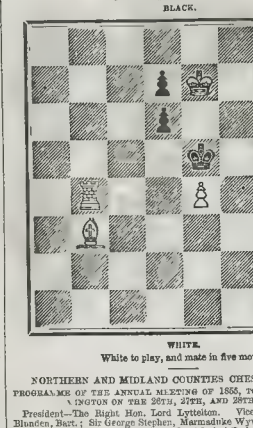
SOLUTION OF PROBLEM No. 567, by Digby, Somerset, B. B., Fehr, J. A. M. of Fakenham, A. J. H. Mayo, is correct. All others are wrong.

SOLUTIONS OF PROBLEM No. 569, by Medieus, Felix, Ernest, F. R., Norwich, J. A. M., Lerieus, C. W., Sunbury, T. W. F., Cheltenham, J. F. W., Mox, F. R. S., D. F. M., O. F., Brevets, are correct. All others are wrong.

*** Press of other matter obliges us to defer the answers to many Chess Correspondents until next week.

PROBLEM No. 571.
By E. B. C., of New Jersey, U. S.

BLACK.



WHITE.

White to play, and mate in five moves.

NORTHERN AND MIDLAND COUNTIES CHESS ASSOCIATION.

PROGRAMME OF THE ANNUAL MEETING OF 1855, TO BE HELD AT LEAMINGTON ON THE 26TH, 27TH, AND 28TH OF JUNE.

President—The Right Hon. Lord Lyttelton. Vice-Presidents—Sir John Blunden, Bart.; Sir George Stephen, Marmaduke Wyvill, Esq., M.P.; W. J. Evelyn, Esq., M.P.; Rev. Dr. Kennedy, Admiral Bagland, T. C. Morton, Esq.; C. Fox, Esq.; H. T. Buckle, Esq.

The meeting for the present year will be held in the Public-hall at Leamington, Warwickshire, on the 26th, 27th, and 28th of June, and the committee chosen to conduct the arrangements have exerted themselves unremittingly, and they trust effectively, to render the assemblage of 1855 not only attractive and interesting to the members and supporters of the Association, but of permanent service to the cause of Chess. In pursuance of these objects, they have, in the first place, issued invitations to many of the most distinguished players both in this country and abroad. These invitations have been responded to in a manner highly flattering and satisfactory. Some of the most eminent of our own amateurs have pledged themselves to attend and take part in the contest; and among the foreign celebrities upon whose presence the committee confidently calculate may be mentioned MM. St. Amant, De Rivière, Löwenthal, Falkbeer, and Thelen.

In the second place, the committee have been at considerable pains to arrange a series of consultation matches among the more prominent of the provincial Chess Societies, and they are gratified in being enabled to announce the following as determined upon, and the terms of play settled:—Consultation Matches: Oxford *v.* Manchester, Cambridge *v.* Cheltenham, Birmingham and Edgbaston *v.* Leamington, Birmingham *v.* Worcester, Kidderminster *v.* Nottingham, Coventry *v.* Northampton. In addition to these contests between rival clubs, they are endeavouring to negotiate other matches of the same description, in which the clubs of Liverpool, Leeds, Hull, Brighton, &c., &c., are expected to take part.

In the third place, they have for some time been occupied in carrying out arrangements for a Match by Electric Telegraph, to be played between four or five of the best players of Scotland, to be stationed at Edinburgh, and an equal number of English amateurs, of the same force, at Leamington. The obstacles in the way of this very novel *partie* are not entirely surmounted, but they are not invincible, and the committee confidently hope to succeed in their object.

In the fourth place, the committee have completed arrangements for a Grand Consultation Match, in which their foreign visitors, MM. St. Amant, Falkbeer, Löwenthal, and De Rivière, and Mr. Wyvill, Captain Kennedy, and Mr. Buckle, and the Rev. Mr. Buckle, will take part.

The committee are further anxious to improve a Ladies' Tournament, and have appointed a further prize for competition. They are gratified in being able to announce that four ladies have already entered the field, and others are expected to join them before the contest. The gallery of the hall will be set apart exclusively for lady combatants.

To add to the attractiveness of the various matches, the committee have ventured on the experiment of raising a limited subscription among the unattached friends of the Leamington Club, for the purchase of prizes to be presented to the victors in each match, and the success attending this experiment, together with the funds arising therefrom as the inevidential increase of new members, already numbering nearly 200, has been such, that they have been enabled not only to add to the number and value of these prizes, but to procure translations of the excellent treatises on the "Laws of Chess," by Messrs. Von Jaenisch and Von Heydebrand der Lasa, an opinion of which, embodying the opinions of their gentlemen and of their colleague Mr. Staunton on this interesting subject, will be read to the Association on Thursday, the 28th, at two o'clock in the afternoon, and form a subject for discussion at the general session.

The meeting will open and the play begin on each day at 10 in the morning.

Finally, the committee, mindful of the importance, in meetings of this description, of securing to the visitors the accommodation requisite for refreshment at reasonable charges, have taken pains themselves to make arrangements with the proprietor of the Chief Hotel, the "Regent," to supply everything that may be required, sparingly included, upon terms which are strictly moderate. A tariff of charges will be exhibited in the hall of meeting.

For the greater convenience of non-residents, a luncheon will be prepared each day at one o'clock in the public hall, and on Tuesday the 26th, and Wednesday the 27th, a table d'hote will be provided at the Regent Hotel, at half-past six.

Upon the termination of the play on Thursday the 28th a dinner will take place at the same hotel, at seven o'clock, the Right Hon. Lord Lyttelton in the chair.

(Signed) WILSON BIGLAND, H. STAUNTON,
G. M. GOWAN, W. S. TEMPLE.

June, 1855.

THE CLOSE OF OLD SMITHFIELD.

ON Monday, the 11th of June, the last market (a more than usually crowded one) was held on this memorable site, which for many centuries has been so well known as the scene of historical events, and a place of bustling commerce.

Wishing to see the last of this ancient institution, we progressed at midday to the spot, and found the place occupied by hundreds of sheep and oxen. To the uninitiated, mysterious processes seemed going on, and scores of animals and hundreds of pounds of sterling currency changed hands hourly. Men learned in the qualities of meat were seemingly mesmerising the devoted beasts, most of which bore the handling with innocent patience. We have never been able to get accustomed to old Smithfield; and, notwithstanding the unfitness of the position and space for its purposes, it has never failed in interest. The immense area was bustling with life. Looking from the quarter nearest to Snow-hill towards Long-lane, almost as far as the eye could reach, it was dotted with blue coats and grey, nicely set off and so strongly relieved by the brownish red of the cattle—the colour, in fact, very like one of the cold coloured pictures of Teniers. The scarlet coat of the postman, hurrying through the crowd, was too powerful even for the rich deep red of the oxen to harmonise with. Wandering in a dreamy manner from pen to pen, the lowing and bleating might have taken us in memory to green pastures, but for the strange and strong oaths of the drovers, and the peculiar bark of the vulture-headed sheep-dogs. The mind became confused with calculations as to how many millions' worth of human food had here been sold? How many pounds of good English roast beef at Christmas time in the days of "good Queen Bess"? How much in those of Queen Victoria? What in the interval between, and what since? How many noble men, and even women, have perished not far distant from the Priory Gate? How many witches and others? Who e ashes were they which we saw turned up a few years since on the ancient place of execution? Tournaments —— * * * "*Pubs cure of your pockets, Sir!*" whispered to us by a policeman, together with sundry hustles we have had from both animals and passengers, served to bring us back to everyday life.

Although the Market was comparatively emptied, the scene of confusion would have been to a stranger overwhelming. Hacks and other carriages were stopped. "Why did you back, Jack? You'll be run over if you do not get out of that! Mind yourself! Whoop! whoop!" Dogs yelped and ran over the backs of flocks of sheep. One of the most unpleasant sounds which helped to make the Babel-like confusion was the sharp knocking on the tender part, the horns of the oxen. "Why, Mr. Drover, do you strike the animals so sharply when it seems so unnecessary; why prick them so savagely in the tender parts near the eye; why twist their tail? That poor animal has stood there tied to the stake without food or water and not allowed to lie down since one o'clock this morning, it is now two in the afternoon?" "Mind yourself, mister. Heup; heup!" and off goes Mr. Drover, more savagely than ever bent upon his business.

The old women who sell substantial leather and other purses the vendors of periwinkles, whelks, and such like dainties—who have, from time immemorial, pitched in old Smithfield, wondered if they would be allowed in the new one. The shopkeepers, with somewhat solemn faces, popped out in front, and conversed gloomily together—a great deal of handshaking went on between them and well-known customers. As the market began to clear, very small boys—and some of larger growth, of the Whitechapel cut—began to disport themselves in the empty pens; Sergeant A., from a well-chosen position, kept a watchful eye over the ground—notwithstanding, a great deal of pitch-and-toss was going on.

Three o'clock.—Still many animals left—some of Pharaoh's lean kine—and long legged, razor-backed sheep, so thin as almost to be transparent, and which a butcher from the eastern parts pronounced to be "rum uns."

Great and beneficial as will be the change effected by the removal of Old Smithfield market—as the time came for the ringing of the last bell—we felt a sort of indescribable regret, something like that occasioned by the necessity which causes us in its old age to change our hack horse for a young one, or of adopting the swift, strong, and wonderful locomotive for the pleasant and sociable stage-coach. This feeling, in different degrees, seemed to be shared by all, but generally in a somewhat jolly manner. The countenances of the drovers had, by numerous potations, become more like the animals who were beside them.

"The last day of the Old Market!" was repeated on all sides; some obstinate individuals, however, persisted that it was not the last, and bet half a sovereign to that effect

"Good by, old man! we shan't see you any more in the Old Market—come, old fellow!" and friends rushed into the Rose and other neighbouring hostelries.

A quarter-past three.—The last bell of Old Smithfield-market was rung. Soon after the stock on hand slowly moved off, the sweepers began to clean the ground, the six or seven banking-houses were closed, and this immense space was left in as much silence as such a place can be in this great and populous city. This, which has been a Fair and Market for more than 800 years, was closed without any ceremony—a printed order from the Home Secretary, stuck amongst the notices of dead bodies found, &c., on the door of the police-station, was all that we saw of an official character.

Leaning on our staff, and pondering over these matters, a voice said, "What is to be done with Smithfield?" This question we repeat; and considering the form and meaning of the charter which granted this ground to the Corporation, it must only be for such a purpose as will be evidently beneficial to the metropolis at large that a single building should be allowed to be here placed. Dwellings are, however, wanted for those who have been driven from Clerkenwell, &c., by the demolition of habitations of a wretched nature, but which were suitable in rent to their means. Dwellings are wanted suitable for the families of porters, warehousemen, &c., employed in the City—for married clerks, &c., with an income of £100 a year. We want more baths and washhouses, schools, and similar establishments. Here is an area which, if wisely occupied, may not only be made profitable to the Corporation and to the surrounding neighbourhood, but also to the community at large.

We strongly ask those in whom the power rests to consider carefully—
WHAT IS TO BE DONE WITH SMITHFIELD?

THE LAST DAY—SMITHFIELD.

BADGE No. 79 *loq.*

Don't speak to me, Nat—I can't bear it! I'm fifty-four year old come to-morrow;
And of course, in my time, in this walley of tears, I've had my 'lowance of sorrow.
I've buried three wives, but that's nothink—I mean nothink at all in comparasin—
To the high-pressure-burster-of-biler-like feelings that now is my bosom a harrassin',
To think that old Smiffield's done up! that the days of its glory is over!
As Miss Carrolwell sings at the consart, in her beautiful song, "The Disconsolate Drover."
Why doesn't I like the new market! Why, Nat, bless my heart, can you ask it?
Warn't I born here, in Smiffield? or, at least, what's as good, a Long-lane a goading
The bullocks as would lag behind, and make themselves so incommoding;
Or else hunting young pigs up the courts, which there is not a doubt had misled 'em,
Being much dirtier than the pigsties where their country sowvereigns had bred 'em;
Or twisting calves' tails to make 'em go straight, being a sort of boy at the weal a steering—
(Now I dont mean that for a joke, Mister Nat, so let's have none of your jeering);
Or else "prodding" the sheep which had come up to town for the first time that season,
And whose wits had gone wool-gatherin', though I don't think sheep is actuwated by reason,
'Cos they will run a-muck. Let 'em see a cart, cab, or coal-waggon, and under they scrambles,
As though they wanted sudden death and a inquest, and not a slaughterhouse and the shambles.
I knew how 'twould be when they was about to do away with the fair of old Bartlemy,
And I says to a medical stud (as stands early purl) "Bartlemee's worted vulgar, so after that nothing'll startle me."
"Well," says he, "that's a blister; and was I a man in your highly respectable station
I'd do what Wat Tyler did years ago here in Smiffield—pitch into the Lord Mayor and Corporation.
Why," says he, "they've done horrid things here afore burnt heretics when con—trary!"
"Heresies," says I, "what was they?" "O," says he, "a breed that went out with Queen Mary."
"But what was that to bursting up Bartlemy Fair? It's really past bearin':
They'll move Smiffield Market next, and we shall lose the true art of swearing."
And they've done it! The last market-day is to-morrow, and I can't speak for exasperation.
But mark my words, Nat—we may take Sebastopol, but we've lost Smiffield, and it's up with the British nation!
I'm a "down pin," Nat—Yes I am! When I croak will you go to the Ram Inn and ask Mr. Farey,
If he'll let you nail up my badge in the tap-room, and find room for me in his arey?
I think I might rest there, but if my ghost should walk it shall ask his pardon.
But I've heard—THE WEDGETARIANS HAS BOUGHT SMIFFIELD AND INTENDS TO CONWERT IT INTO A KITCHEN GARDEN.

THE LAST DAY OF OLD SMITHFIELD MARKET.—(SEE PRECEDING PAGE.)

THE NEW METROPOLITAN CATTLE-MARKET, COPENHAGEN-FIELDS.

THE MARKET-BANKS, PENS FOR CATTLE AND SHEEP, SHEDS FOR CALVES, PIGS, ETC.

A A—Sheds for Butchers' Carts.
B B—Future Lairage.
C—Lairage for Sheep.
D—Abreuvoirs for Sheep
E—Sheds for Calves.
F—Ditto for Pigs.

U—Maiden-lane.
V—New River Reservoir.

GROUND-PLAN OF THE NEW METROPOLITAN CATTLE-MARKET.

MARKET-FOUNTAIN, WATER-TANKS, LAIRAGE FOR BULLOCKS, ETC.

THE METROPOLITAN CATTLE-MARKET.

THE New Market, which will, for the future, take the place and rank of ancient Smithfield, is situated in Copenhagen-fields—fields no longer, except brick-fields—on the summit of the hill overlooking Camden-town, east of the Brecknock-road, and subject to the Brecknock turnpike:—a very few years ago a truly rural situation; but at present surrounded by a plentiful crop of streets, in a more or less advanced stage of progress.

The Market, or rather the whole space laid out by the City authorities, consists of a quadrangle of about thirty acres, rendered accessible by two broad cross-roads, and effectually protected from the intrusion of persons or animals not connected with the trade by four substantial walls. It will be remembered that Smithfield contains little more than six acres; and that limited space includes one principal thoroughfare to the Barbican, and many minor streets.

The bricks used in the construction of the New Market have been mostly supplied by Messrs. Wood and Son, from their works at Portway, near Ilburg; they are the Staffordshire blue bricks, made entirely by machinery; and upwards of three millions have been employed in this great metropolitan improvement.

The thirty acres of the New Market include not only separate sections for the sale of cattle, sheep, calves, and pigs, but vast rows of sheds for the lairage of those animals, a series of slaughter-houses, a dead-meat market, a hide and skin market, a house for bankers, and many other accommodations for the trades interested in the meat supply of London, which will thus be all conveniently concentrated in one space, easily accessible from the chief railway stations.

The cattle market (with upwards of 13,000 feet of rail, to which about 6000 beasts can be tied comfortably) and 1800 pens (in which 25,000 sheep can be penned) are finished, as well as a considerable extent of sheds for lairage, and two spacious slaughter-houses, arranged on a very good plan. A complete system of drainage and sewerage has been executed, which will be assisted by a supply of water ample for all purposes.

The London and North-Western Railway Company is preparing to erect a cattle station on a space close adjoining the Market; the Great Northern will follow the same example; and the City Junction Lines, uniting at Bow, will enable the Eastern Counties—the greatest cattle line of all—to do the same. When these arrangements are complete, the live stock arriving on Saturday from distant counties will be able to rest and feed in the lairage without distances until market-day, instead of being herded in confined town yards, or goaded into market from suburban pastures on the morning of the sale. Of these lairages, one for horned cattle includes eight acres, divided into yards with five sheds, supported on iron pillars, with troughs with a constant supply of fresh water, and will accommodate 3000 head—or more than the supply of an ordinary market-day; while six acres, also supplied with sheds and water-troughs, will accommodate 8000 sheep.

Two hotels, the Queen's Arms and the City Arms, and several public-houses within the Market, beside a number flanking the communicating roads, already afford the refreshment which will be required by hungry graziers and thirsty drovers, from four a.m. to five p.m.

The total cost of the Market and its adjuncts has been stated at £300,000, but we should think that it must be more, as the contract for paving fourteen acres was taken at sixty thousand pounds.

There will be ample room to receive and advantageously display 30,000 sheep and 5000 head of cattle, the largest number ever sent to a Christmas market, and enable all the graziers, head drovers, carcase and retail butchers, and others whose business lies in the live-meat market, to transact their varied business in an orderly manner.

Live stock sold and not slaughtered on the spot which may be required for the south side of the Thames will still be driven through London; but the abominable nuisance of driving thousands of sheep and bullocks through the heart of the City to Smithfield, and all the injury and cruelty inflicted in order to pack three in the space for two, will be rendered unnecessary, if not impossible.

The accompanying Ground plan shows the arrangement of the Market, as it will appear when completed; from details by Mr. F. Fenton, by permission of Mr Bunning, architect of the Market.

The transfer from Smithfield to Copenhagen fields has not been effected without a long and stoutly contested struggle. In 1818 a bill was introduced into the House of Commons by the Aldermen and Court of Common Council for removing Smithfield to the then suburbs. Had it passed, the Market would have been again surrounded by houses. But no violent opposition was raised by the parties who had property round Smithfield, and the carcase and other butchers, that the measure was withdrawn. In 1828 a Committee of the House of Commons heard evidence on the insufficient extent of Smithfield market, and the cruelty of drovers. At this time the Market was only three acres and a half in extent, and much blocked up by butchers' carts. Vested interests were too strong for the removers; but the Market was somewhat enlarged, butchers' carts were ordered to be excluded, and drovers and their stocks were put under certain regulations. In 1848 a Committee was again appointed to investigate the state and abuses of Smithfield. In the intermediate twenty years several changes of importance, in addition to the increase in the number of population, had taken place. Steam boats and railroads had brought oxen and sheep from regions which were quite beyond the influence of London prices, as long as the high road was the only way to London. Ten days' travel were reduced to twelve hours, and a bullock fed fat in the Lothians could meet black-faced sheep from Aberdeenshire, neither having passed to feed on grass on their way. Our ports had been opened to foreign cattle. The attempt to establish a competing market at Islington had failed, after an enormous expenditure in building and Parliamentary contests. Smithfield enlarged to six acres, was obviously insufficient for the live stock of London.

The decided Report of the Committee in favour of removing the cattle market from Smithfield not being sufficient to overcome City influence, a Commission was appointed to make further inquiry, and, on the strength of the confirmatory report of the Commission, a bill was introduced and passed through both Houses of Parliament in spite of City resistance, by which Smithfield-market was to be abolished within three years and six months, and power was given to the Government to appoint three Commissioners to establish and manage a new market in case the Corporation of the city of London declined to act. But the City authorities, after a little coy consideration, decided to accept the transplanted authority which they had exercised in Smithfield for more than three hundred years; and the result is the work of which we give an illustration decidedly one of the most creditable, in design, execution, and practical utility, which has hitherto originated in the City.

It was indeed high time that something like system was introduced into the live-stock market of London, where packing sheep into hayloft, slaughtering them in cellars, filling, driving and goading mad bullocks down the Old Bailey, and blocking up the Barbican with footsore, worn-out beasts had become an intolerable nuisance.

The mere figures of annual cattle sales prove the necessity of a radical change. The first year that we have any return of the sales in Smithfield—or Smoothfield, as it was once called—is 1632, when 31,200 oxen were sold; of sheep we have no return. In 1731 the number of oxen had increased to 83,200; sheep, 480,000. In 1822 the numbers stood—oxen, 161,600; sheep, 1,624,000. In 1847: oxen, 213,000; sheep, 1,527,000. And, in 1853: oxen, 234,500; sheep, 1,500,000; calves, 26,700; pigs, 29,500—in round numbers.

These numbers are by no means in proportion with the increase of the population, in addition to the live stock sold in Smithfield, a considerable number are consigned direct to butchers and slaughtered in the suburbs, besides a trade in dead meat which has sprung up since steam-boats from Scotland and railroads from various parts of England have afforded easy means for the carcases and prime joints. 36,000 tons of dead meat are brought by railways, and nearly 1000 tons by steam-boats. The increase of the London dead-meat market may be judged from the facts, that forty years ago there were but 26 salesmen in Newgate-market, and that now there are 250.

Since the extension of railroads to our manufacturing districts it commonly happen in the height of the London season that the prime joints are retained for metropolitan consumption, and the cheaper parts sent off to the inns of the aboulding districts. Tons of saddles of mutton are sent by rail to supply the demand of the London chop-houses. The author of the amusing article on the "Commissariat of London," which appeared lately in the *Quarterly Review*, calculates that the meat consumed in London would make, if ranged each in its class ten abreast, the cattle a procession 72 miles long; the sheep, 121 miles long; the calves, 7½ miles; and the swine, 5 miles. Of these, speaking in round numbers—

	Oxen.	Sheep.
The Eastern Counties Railway brings	81,000	270,000
London and North-Western	70,000	240,000
Great Northern	15,000	120,000
Great Western	6,200	104,000
South-Western	4,000	100,000
South-Eastern	800	58,000
South Coast and Brighton	800	13,800
By steam-packet, from North of England and Scotland	14,000	11,000
Imported from the Continent	7,000	520,000
Driven by road	15,000	450,000

It will be seen from these figures that the Eastern Counties line—which, after traversing the rich feeding counties of Essex, Cambridge, and Norfolk, at Peterborough, affords the readiest way to Smithfield for Lincolnshire and the north—stands at the top of the list. But this pre-eminence will probably be shortly disputed by the Great Northern. All the railways on the north side of the Thames will have cattle stations at the Copenhagen market, except the Great Western. The South-Western, if needful, can communicate by the North London Junction.

The importation of foreign live stock, which was very insignificant for several years after Sir Robert Peel's tariff removed the prohibitive duty, is assuming considerable importance. The greatest export (40,500 oxen, and 172,000 sheep) is from the Dutch ports at present, but probably will include many head from the Rhine. The completion of the railroad system of Denmark and Holstein will tend to increase the live-stock exports of that country; but a very considerable number will find their way by the North of Europe Steam Navigation and Grimsby to the Midland manufacturing districts without touching London. With few exceptions the foreign cattle are very coarse, and bad feeders; but the steady demand for the English market is leading to great improvement, by the introduction of male animals of our best breeds.

Railroads, again, have had an important effect on the calf and lamb trade, as those animals could not travel by road. The consumption of lamb has, it is supposed, increased tenfold in the last century; but as lambs are named with sheep, there are no means of obtaining accurate returns.

The consumption of London, to a certain degree, affords a gauge of the increased meat consumption of other districts. The percentage of increase per head of population has been much greater in the country than in London. London has always been a great meat-devourer; but in the country thousands of head of stock formerly sent to the London market are now consumed at home.

Agricultural improvement and successful breeding have enabled the supply to keep pace with the demand without any serious enhancement of price. The quantity of beef has been multiplied by the art of breeding, which sends beasts to market at three years, which were left to walk well and well nigh, and frequently four, only a few years ago. We may calculate the increase of weight by comparing the Short-horn or Hereford and their crosses with the Highland cattle as to gross weight and as to percentage of meat in the carcase. The Short-horn and Hereford will weigh from 1000 lbs. to 1200 lbs.; Highland about 560 lb. The latter will have 44 per cent of offal—the former only 37 per cent. Now, at the present day the Highland Kyloe is an improved beast, and it is fair to presume that 100 years ago the majority of the cattle slaughtered weighed less than 500 lb.—so that is the average weight of grass-fed Australian cattle of the best breeds.

At present the herd is sent to market fat every two years, which a hundred years ago was only sent every four or six years, and the flock which was fed and sold once in three years is now sold fat every fourteen months. Mutton has been increased in weight on an average at least 25 per cent; while early maturity has been also obtained. But early maturity would have been useless if we had continued dependent on grass for fattening our stock, since grass grows only in the summer. Root crops, in the shape of turnips in their varieties, carrots, mangold-wurtzel, and green crops, like rape and lucerne, were introduced to aid the grass crops, and feed stock fat in winter, spring, summer, and autumn. To help them out commerce gave us oil-cake and linseed, and guano to stimulate our root crops. Finally, and most important of all, the art of under drainage rendered it possible to feed sheep and grow crops on thousands of acres which were once strong wet clay. But all our art, science, and ingenuity can only multiply, it cannot exceed nature. The best Short-horns are the best and nutliest for the million; but the indigenous Kyloe, or Highland Scot, are the favourites with the West-end butchers, and can only be competed with by the North Devons, another ancient pure breed. And the Southdown, an improved indigenous breed, retains its unique superiority in flavour over the Leicester varieties; but none over mountain sheep, Welsh or Dartmoor if fat.

THE INAUGURATION.

The inauguration took place on Wednesday, under the most auspicious circumstances. His Royal Highness Prince Albert—who is known to take the deepest interest in agricultural matters, and who is himself one of our most successful cattle breeders, having recently won the first prize at the Paris Exhibition—presided, supported by the Lord Mayor and the whole of the Corporation, a large circle of distinguished personages, and numbers of provincial mayors in their official robes. A spacious marquee had been erected by Mr. Benjamin Edgington on one side of the market, capable of accommodating 1700 persons, and the decorative skill of Mr. Fenton had been called in to supply it with appropriate decorations. Amongst the arms were the medallions which decorated the Guildhall on the occasion of the Emperor's visit, and in addition fanciful designs of ploughs, sickles, scythes, and other agricultural implements. Heterogeneous trophies of the prize farm-implements of countries prominently displayed, as also those of the foreign countries from which of late years we have, thanks to Free-trade, drawn such abundant supplies of cattle; and within the tent, the various supports and poles were decorated with rosettes in which the national Jack and the friendly tricolor were tastefully intermingled. Music was provided by the band of the Caledonian and Chelsea Asylums and Foundling Hospital, and the performance of the juvenile artists was highly creditable both to themselves and to their teachers. Messrs. Staples, of the Albion, furnished the long tables with a substantial and elegant repast, which was partaken of by considerably upwards of 1000 visitors.

The Common Council arrived early in an imposing cortège of forty-seven carriages, and at one o'clock the Lord Mayor and Corporation proceeded to the principal entrance of the Market, to receive H.R.H. Prince Albert, who was attended by several persons of distinction, and a numerous suite. They then proceeded slowly round the market, amid the cheers of the vast concourse of well-dressed persons that filled the area. Having inspected the arrangements, as minutely as time would permit, the whole of the distinguished party repaired to the pavilion, in the upper end of which a spacious estrade had been re-erved, upon which was placed the magnificent chair of state recently used at the Guildhall. On arriving here his Royal Highness stood in front of the chair, and a semicircle of the civic functionaries having been formed, the Recorder proceeded to read the following address:—

TO HIS ROYAL HIGHNESS PRINCE ALBERT.

MAY it please your Royal Highness,—We, her Majesty's dutiful and loyal subjects, the Lord Mayor, Aldermen, and Commons of the City of London, in Common Council assembled, desire, by the warmest expression of our gratitude, to testify to your Royal Highness the value which we attribute to your gracious presence on this occasion. The proceedings of this day are of deep interest and importance to the great community of the metropolis, and to the country at large. These costly and extensive works have been undertaken by the Corporation of the City of London in deference to the suggestions of the national Legislature, and under a strong sense of the responsibility appertaining the powers and means confided to them by the fellow-citizens. If the transfer of the chief metropolitan market to the new and spacious locality shall be successful, it will not only have removed all ground of complaint arising from the character of its ancient site, but will also have conferred essential benefits upon the population of this vast capital, as well as on those important branches of our national industry which are concerned in supplying with food the increasing masses of its inhabitants and the countless numbers who frequent it. In the happiness and prosperity of all classes of her Majesty's subjects your Royal Highness has always evinced the warmest and most active interest, and we know nothing more likely to secure success to this great undertaking than the sanction and encouragement afforded to it on the inauguration by the illustrious consort of the Queen. We, therefore, humbly rejoice in the opportunity thus given us of welcoming your Royal Highness on the spot, and expressing our heartfelt gratitude for your Royal Highness's attendance, and of manifesting anew our affectionate and respectful attachment to the person and family of the beloved Sovereign of these realms.

His Royal Highness Prince Albert replied as follows:—

My Lord Mayor and Gentlemen,—Accept the expression of my hearty thanks for your kind welcome, and for the gratifying assurance of your loyal and affectionate attachment to the Queen and her family.

I have been much pleased by the community which your kind invitation has afforded me of seeing and admiring the great work which you this day open to the public—a work which not only deserves all admiration in itself, on account of the excellence of the arrangements and the magnificence of the design, but which will, I trust, be found eminently conducive to the comfort and health of the City of London. That its success will be commensurate with the spirit in which it has been undertaken and carried out I cannot doubt. A certain association of habits and interests must inevitably attend the removal of the great City market from the site it has occupied for so many centuries, and this may possibly retard for the moment the fullest development of the undertaking. But any opposition arising from such causes will soon cease, and the farmers will doubtless soon learn to appreciate the boon thus conferred upon them by the London Corporation, in the increased facility which will be afforded to them for the transaction of their business, and the comparative security with which they will be enabled to bring up and dispose their valuable stock in the Great Metropolitan Cattle-market.

This reply which was beautifully delivered by his Royal Highness, elicited loud and repeated cheering. His Royal Highness, accompanied by the Lord Mayor, proceeded to the head table, which was most tastefully arranged, and abundantly decorated with natural flowers; and, grace having been said by the Rev. F. Moon, chaplain to the Lord Mayor, the company proceeded to discuss the *déjeuner*. Amongst the more distinguished visitors were—Right Hon. G. C. Lewis, Bart., M.P., the Earl Spencer, the Marquis of Breadalbane, Viscount Monck, Viscount Dasent, the Hon. H. B. W. Brand, Lord Stanley of Alderley, Rear-Admiral Hon. M. F. F. Berkeley, Rear-Admiral Henry Eden, Capt. A. Milne, Marquis of Salisbury, Lord Redesdale, Right Hon. W. G. Hayter, M.P., J. Wilson, Esq., M.P.; Hon. W. F. Cowper, M.P.; R. Waddington, Esq., John Masterman, Esq., M.P.; the Solicitor-General, Hon. Frederick Byng, Robert Ellis, Esq.; the Duke of Newcastle, the Marquis of Westminster, Earl of Macclesfield, Earl Lonsdale, Earl Yarborough, Lord Berners, Lord Portman, Lord Feversham, Lord Southampton, Lord Wenlock, the Belgian Minister, the Bavarian Minister, the Sicilian Minister, the American Minister, the Prussian Minister, the Right Hon. Sir J. Pakington, Bart., M.P.; R. A. Christopher, Esq., M.P.; W. A. Mackinnon, Esq., M.P.; W. Ormsby Gore, Esq., M.P.; Sir Edward Sherlock Gooch, Bart., M.P.; Melville Portal, Esq., M.P.; Edward Bail, Esq., M.P.; T. W. Bramstone, Esq., M.P.; Sir E. Filmer, Bart., M.P.; W. Masters Smith, Esq., M.P.; Hon. P. J. Irby, M.P.; W. J. Evelyn, Esq., M.P.; W. W. E. Wynn, Esq., M.P.; Hinchingbrook Fruncis, Esq., M.P.; W. A. Williamson, Esq., M.P.; Sir W. Clay, Bart., M.P.; C. S. Butler, Esq., M.P.; Right Hon. Sir B. Hall, Bart., M.P.; Sir John V. Shelley, Bart., M.P.; Apsley Pellatt, Esq., M.P.; H. J. Knyvett, Esq.; C. R. Fitzgerald, C. Erskine, Esq., Hon. A. Dillon, G. Everest, Esq., S. Redgrave, Esq., the Mayors of Southampton, Plymouth, Tiverton, Barnstaple, South Molton, Torrington, Birmingham, Norwich, Leicester, Windsor, Ipswich, Colchester, Brighton, Lewes, Salisbury, Yarmouth, Lincoln, Northampton, Cambridge, Reading, Oxford, Eye, the Lord Mayor of Dublin, &c.

The first toast was "The Health of the Queen, proposed in appropriate terms by the Lord Mayor, and which was received with the most enthusiastic cheering.

In reply to the Royal Highness said—

My Lord Mayor, my Lords, and Gentlemen,—For the very kind and flattering manner in which you have received this toast I sincerely thank you. I have had the greatest pleasure in accepting the invitation of the Lord Mayor to be present at the opening of this splendid and useful work.—(Cheers)—and I beg to assure him that I consider the invitation to me to the inauguration of similar undertakings the better I shall be pleased (Continued cheering and laughter). Such enterprises can only be undertaken by public bodies, and carried out to success by public spirit. (Hear, hear.) I accept the present instance, therefore, as an earnest of your determination to perform the duties which your position has imposed on you, and as a proof that success will at all times follow skilful conception and prompt and vigorous execution (Cheers). I beg to propose "The Health of the Lord Mayor and Corporation of London, and Prosperity to the Metropolitan Cattle-market" (Loud cheers)

His Royal Highness retired immediately after this toast; and, one or two other toasts having been disposed of, the company separated.

MUSIC.

THE performances of "Il Trovatore," interrupted by the long and severe illness of Mdlle. Jenny Ney, have been resumed. This opera was given on Saturday last, and repeated on Tuesday, to crowded houses both nights. The fair prima donna had regained the full possession of her vocal powers, and was received with greater enthusiasm than ever. This opera, though very unequal, certainly contains some of the finest music that Verdi has ever written; but the permanent success of the piece will be prevented by the revolting horrors of the subject, which is fitter for the delphi melodrama than a tragic opera. A remark somewhat similar may be applied to Mr. Henry Smart's new opera, "Berta." Its music, beautiful as it is, can never keep afloat such a mass of dulness and absurdity as its dreary libretto. In the wretched state of our musical stage no dramatic poet will now condescend to write an opera; and our English musicians, if they compose for the stage at all, must take what they can get. Not having, like their more fortunate Parisian brethren, a Scribe to write for them, they must content themselves with a Fitzball.

THE Philharmonic Society's Concert, on Monday evening, was honoured by the presence of the Queen and Prince Albert, with the Prince of Wales, Prince Alfred, and the Princesses of Hohenlohe. The Royal party were attended by a numerous and brilliant suite. The concert being "by command," the programme, of course, was accommodated to the wishes of the illustrious visitors, and hence Wagner's overture to "The Flying Dutchman" was repeated, though it had been performed only a few weeks before. In regard to it we have only to add to what we have already said, that it was admirably executed, and more favourably received than before. The Royal visitors were evidently gratified. After the performance they sent for the composer, with whom they conversed for a considerable time. The novelty of the evening was Macfarren's overture, "Chevy Chase;" a piece which has hitherto remained unknown to the public. It is a great pity, and very unjust to our native composers, that works of such merit should be allowed to remain unknown. It is a piece of musical painting, on the subject of the fine old Border ballad on the "wasteful hunting," where the best blood of the English and Scottish chivalry was spilled in feudal strife. The way in which Mr. Macfarren has made use of the ancient ballad tune, working it into the heart of his subject, is most ingenious and effective. This overture received the greatest justice from the conductor of the band, and was warmly applauded. The rest of the concert consisted of well known pieces, but of the highest order, including Mozart's "Jupiter" symphony, Beethoven's eighth symphony in F; the grand scena, "Ocean, thou mighty monster," from "Oberon," sung by Madame Clara Novello with transcendant power; the air, "Di mattari orori," from "Faust," sung by Signor Beletti; Cherubini's "Ave Maria," sung by Madame Novello, with Mr. Williams's fine clarinet accompaniment; and the beautiful and expressive duet, "Quel sepolcro," from the "Agnese" of Paer. The room was crowded; and the concert, taken altogether, was the most brilliant and successful of the season.

THE ENGLISH GLEE AND MADRIGAL UNION terminated their series of concerts at Willis's Rooms on Monday morning last. The room was not merely crowded it was full to overflowing, many people finding it impossible to get within the doors. It gives us the greatest pleasure to notice the gradual and now splendid success of this excellent society, the members of which—it is scarcely necessary to tell our musical readers are Mrs. Enderohm, Mr. and Mrs. Lockey, Mr. Hobbs, and Mr. H. Phillips. It is a pity that they should ever confine their London performances so early, and while they are at the height of their attraction; but they are compelled to do so, we understand, by the long course of provincial engagements on which they are now about to enter.

THE CONCERT of the MUSICAL UNION, on Tuesday morning, was of even more than usual interest. It consisted of Mozart's sixth quartet, in C—one of the most graceful and melodious of his works; Beethoven's pianoforte trio, in B flat (Opera 97), in which, by means of three instruments, the composer has produced the grand effects of a great orchestra; and Mendelssohn's posthumous quartet, in E—a fragment, consisting of an andante and a scherzo, found unfinished at his death, and containing some of his most beautiful thoughts. The performers (or executants, as Mr. Ella calls them) were Ernst and Cooper, first and second violin; Hill, tenor; Piatti, violoncello; and Charles Halle, pianoforte. As is always the case at these concerts, Willis's great room was crowded to the doors.

HERR KUHE AND MADAME BASSANO gave their annual concert on Monday morning. It was an elegant selection of vocal and instrumental music, admirably performed. Herr Kuhe is an accomplished pianist, and a good composer for his instrument; and he appeared to great advantage in his capacities in a grand fantasia on airs from the "Etoile du Nord." Madame Bassano's fine contralto voice was displayed in several well-chosen solo and concerted pieces, especially in Beethoven's "In questa tomba oscura," and Mozart's terzetto, "*Le Nozze in inchino.*" The other lady-performers were Madame Clara Novello, Madame Gassier, Mdlle. Krall, Miss Stabbach, and Madame Weiss. Mdlle. Krall (newly arrived in England) delighted the audience by her charming performance of German songs by Mozart and Mendelssohn. Herr Reichardt obtained immense success in an air by Donizetti, and a German song by Holquet. Reichardt stands in the first rank among the tenor singers of the day: his voice, his taste, his expression, his style, are all of the highest order. His concert attracted a great concourse of fashionable company.

THE CROPS IN THE UNITED STATES.—From all quarters at the north and west and the middle States, the accounts of the growing crops are full of promise. If the season should continue as favourable as it has been hitherto, a much larger aggregate of breadstuffs will be raised this year in the country at large than was ever known before. The mouths of the croakers will be stopped with abundance, and prices will come down.—*New York Journal of Commerce.*

THE THEATRES, &c.

HAYMARKET.—Once more the poetic drama has gained a footing on these boards, and this time we hope with better assurance of success than hitherto. Mr. John Saunders's play of "Love's Martyrdom," which was produced on Monday, is a step in the right direction. It is a poem full of beauties, which should be permitted to compensate such defects of structure as necessarily belong to a tentative drama, and ensure a hearty welcome to the experiment. We also trace marks of imitation, which should be excused on the same score. A hunchback is the hero of the piece—not a father, but a lover—and in this the character differs from Knowles's celebrated hero. The deformity of *Franklyn* is the source of doubt and jealousy to more than himself. *Margaret*, whom he passionately loves, grateful as she is for his having taught her to think, begins to suspect that, after all, she does not feel towards him as his affianced bride ought to do, and may, perhaps, cherish a lurking preference for his handsome brother, who had once professed an affection for herself. Out of these doubts arise vague apprehensions and desires, and an attempt to renew the relations of an earlier time, until, at length, the brothers are hurried into a duel. But *Franklyn* is as generous as he is irascible; and, having wounded his brother *Clarence*, gives way to his paternal tenderness, and resigns to him the disputed maiden. Now comes the turn of *Margaret*, who, having on a sudden impulse rejected the magnanimous Hunchback, begins now to reflect on her situation, and with too evident reluctance transfers her hand to *Clarence*. Gradually her state of mind clears, and she finds that she not only esteems, but profoundly loves, the deformed *Franklyn*, as the teacher of her mind, and trusty interpreter of her heart. But her fate seems fixed. Meanwhile *Franklyn* has wandered into the solitudes of nature; and in the midst of a storm reveals influences which convulse and purify his inner spirit—a scene improperly omitted in representation. He resolves on the noblest of sacrifices, and to be present at his rival's wedding, that *Margaret's* reputation may not suffer from his apparent displeasure. *Margaret*, too, has her martyrdom. She would not be free. *Franklyn* the wrong to impose so fickle a woman as herself on him, and, therefore, consents to complete the contract with *Clarence*. But other events are transpiring. The state of miscreations from the beginning of the drama has been produced by one *Freelove*, from a selfish motive; and, through his contrivance, a lady whom *Clarence* had deserted for *Margaret* is removed from the scene of the marriage. But an artist-friend of *Franklyn* discovers the fraud, and arrives in time to forbid the banns. By this discovery *Margaret* is released from all obligation; and *Franklyn*, more free, bestows her hand, "with her heart in it," on the worthy, though deformed *Franklyn*. Built on a slender basis of domestic intrigue, rather comic of its kind, this drama, in consequence of the vehement nature and passionate nobility of the deformed hero, grows into a tragic expression which furnishes scope for the finest action. *Franklyn* is a part for a first-rate performer. Both in its subtlety and its energy it challenges the power of his intellect and the strength of his physique. *Margaret*, too, is a character of great force, but also of great difficulty. The fault is impaired by the irresolution of her will, and her ignorance of the state of her heart; and this dramatic weakness has to be supplied by the psychological insight of her professional representative. Miss Faucit fully entered into the character, and, in all its phases, performed with a subtlety and precision such as only genius for the demonstrative art and long practice in it can supply. The fourth act, where she discovers the state of her affection towards *Franklyn*, was a triumph, and, it may be truly said, saved the play. It was, indeed, a glorious redeeming of the author's shortcomings both on the part of the author and some of the actors, who were painfully inferior. This is partly owing to there being a great number of full-length characters in the play, which always increases the difficulty of the cast. Yet, surely, some person more efficient than Miss Walters might have been found for *Freelove*, who not only understated, but was unintelligible throughout; in a word, a gentleman wholly incompetent for his profession at present, and who ought not to have been permitted to imperil a new and original work by any participation in the honours of its success. Mr. Sullivan, as the deformed hero, laboured hard, and gave a mechanical outline correct enough to a part which, in the hands of Edmund Kean, would have been instinct with fire and electricity. For his diligence and good intentions he shall receive full praise from us, and we trust that, by steady practice and submission to criticism, he may become an improving actor. Let him, however, above all, resist a tendency to exaggeration. Mr. Howe shone on the occasion like "a bright particular star;" and as an artist-friend of the Hunchback gave an energy and a pathos to some of the situations, which went far to conciliate the audience. The new drama has been placed on the boards with due regard to costume and scenery, with admirable taste: and this, with the poetic excellence that pervaded much of the dialogue, obtained the approbation of the audience. Miss Faucit, at the end of the fourth and fifth acts, was summoned before the curtain; and the author was vigorously called for, but was prevented from appearing; and thus ended an evening of considerable excitement, doubt, and difficulty, but of ultimate success. Mr. Saunders must have learned something from the progress of this his first trial before an audience; and, having so far proved his possession of a dramatic gift, may proceed with confidence to study the laws of dramatic structure, and practise dramatic production as an art.

MARYLEBONE.—"The Lady of Lyons" was produced on Wednesday, with an excellent cast. Miss Edith Heraud, in the character of *Pauline*, so gradually won on the admiration of the house, that she was summoned before the curtain at the end of the fourth, as well as of the fifth, act. It was, indeed, a performance of great power and beauty, and frequently told with electric effect on the audience. Mr. Charles Pitt, who enacted *Claude Melnotte*, played with energy and taste, and deserves metropolitan encouragement. There is much in his acting that reminds us of Edmund Kean, without any positive imitation of his style. His transitions are skilfully managed; his voice is fine in tone, and his bearing thoroughly artistic. A permanent place ought to be found for him on our London boards. Mr. W. H. and Mr. T. Lee, in the duties of "Very Suspicious" and "The Omnibus," exhibited a fund of humour which seemed inexhaustible. The latter is one of the few Irishmen we have left who personate the character with discretion as well as unction. The boxes on this occasion were very fashionably attended.

THE CITY THEATRES.—We can only note this week the appearance of Mr. C. Mathews at the City of London, and of Mr. Wright and Paul Bedford at the Standard. The former has introduced to an East-end audience "The Game of Speculation," with "Patter *v.* Clatter;" and the latter, the pastoral drama of "Harvest Home," and "Jack Sheppard." We regret the recent reproductions of this objectionable criminal drama, and trust that it will find without delay its place, not on the stage, but on the shelf, where its previous slumbers should not have been disturbed.

BERLIN GOSSIP.—Yesterday being the anniversary of the late King's death, the Royal family repaired to Berlin from Potsdam at an early hour, and were present at the commemorative funereal service held in the new chapel of the Schloss here. The whole Royal party, among whom were also the Crown Prince and Princess of Wurtemberg, just arrived on their return from St. Petersburg, repaired to Charlottenburg, where, as in their wont, they visited the Mausoleum, in Charlottenburg garden, where the remains of the late King, and beside him his Queen Louise, lie interred. The state of the King's health is still such that his physicians forbade him entering the Temple, in which are the well-known marble statues of the late King and Queen, and he was therefore compelled to remain behind in the palace, while the rest of the family performed their filial devotions—a duty which the King has never before failed to do. His complaint appears to be certain ague, but the return of the fever seems not to be in all cases regular. His medical advisers have succeeded in overcoming the whole plan of the Royal visit to the Rhine, and in prevailing on the King to agree to stay at the Royal Schloss at Erdmannsdorff at the foot of the Giant Mountains in Silesia. The statement that has been so long and so perseveringly circulated, that while on his travels the King would have an interview with his Imperial nephew of Russia on the sly, is in a fair way of vanishing at last; another, also, that the Empress of Russia is about to visit Berlin or some part of Germany. The information is now put forward officially that the Empress not only will not come, but never had any intention of coming, it being contrary to Imperial Russian etiquette that the Dowager Empress should travel during the year of mourning.—*Letter from Berlin, June 8*

IDIOTCY FROM EXCITEMENT.—The Military Commission instituted to judge the prisoners accused of the late conspiracy in San Domingo, sentenced General Pelletier (a Frenchman born), and formerly Minister of War, to death. Foreign Affairs to the Dominican Republic), as well as Generals Aybar and Francisco Ruiz, to death. In the morning of the 2nd May priests were sent to the prisoners, to confess them. At three o'clock in the afternoon the military marched to the usual place of execution. General Santana, with his Staff, was at the place when they arrived, and, having made his arrangements, he ordered the prisoners to kneel down. Their sentence was read over to them, and the firing party were commanded to load, and to point their muskets upon the unfortunates, when Santana cried "Halt!" and ordered his Aide-de-Camp to read a proclamation pardoning the three accused. The horrible of the soldiery could not subdue the horror that the preceding moments had caused. Francisco Ruiz, one of the persons condemned to death, rose from his knees an idiot.

THE UNIVERSAL EXHIBITION OF FINE ARTS.

(From our Special Correspondent.)

THE BELGIAN CONTRIBUTIONS.

We have already noticed, in our general observations on this remarkable Exhibition, that there are, in the various *salons* into which it is divided, hardly more than two distinct, broadly-marked schools, viz., the French school and the English school. There are infinite varieties of these; but beyond them nothing really greatly original. They appear here, in the teeth of all the artists of the world, undoubted leaders. If they can be said to be closely followed—to be in danger of successful rivalry from without—this danger is apparent in the German space. Neither the Italians, the Spaniards, the Swedes, the Americans, nor the Dutch offer the strength of a body of disciplined artists, painting with fixed principles, peculiar to themselves. Nor can it be said that our friends of Belgium may claim to rank as a school. They have some excellent painters—men who are practised draughtsmen—artists with fresh and pleasant palettes. But there is not a canvas among the two hundred and twenty-three which they exhibit that shadows forth an original view of art—that reveals a mind which approaches Nature as no other mind has approached her. The three walls devoted to Belgian paintings exhibit the successes of mediocrity—in some instances accomplished and conscientious; in others flat and poor, to the level of ice-tray art. We find nearly every school, ancient and modern, more or less successfully imitated. The sacred subjects look like raw copies from the Louvre. There are little panels reminding us, in spirit and manipulation, of Ostade Landseer's palette tricks are imitated, while his spirit and freedom are lost. This latter observation applies particularly to Charles Verlat's large picture, representing "Buffaloes Attacked by a Tiger." To us the tiger looks like a stuffed animal, the buffaloes are unreal, the accessories coarse and hard. There is vigour in the drawing, but you are constantly reminded of the care which must have been taken to get these convulsive attitudes correctly. There is no free force in the picture; the painter has not seen through his own eyes, but has looked on as a mimic fight through the spectacles of Landseer. He is, we repeat, a careful and an ambitious artist: but he is not an original thinker, with a palette of his own, to interpret the novelty of his thoughts.

We will pass carefully along the Belgian lines. We are first attracted to some queer landscapes, hard and angular in outline, and raw in colour, into the authorship of which we are not anxious to inquire. But we may pause before the "Misty Morning" of Theodore Fourmois. It is a carefully-painted effect. The silver greys of early sunrise float over the scene: every point is touched, is almost frosted, with the pale eastern light. There is a rich penetrable atmosphere over the view. This would be a charming work if the foreground were better broken up, and had a little more variety of colour about it. As it is, its weakness gives a little flatness to the distance. A close study of nature, and an avoidance of schools, would, we believe, raise this artist to the rank of an original landscape-painter. But we entreat the visitor to glance upward, and a little to the right, from M. Fourmois' performance to that of M. De Jonghe, marked 288. It is entitled "La Musique." Be pleased to observe, in the first place, the composition—a straight, horizontal line. Three women and a boy are sitting across the picture, listening to the musical performance of a conventionally enraptured youth at the piano. They are all backed by opaque shades; the pervading colour is muddy; and the inquirer, having examined every separate part of the performance, really pauses to ask himself why such a picture has been conveyed all the way from Brussels to Paris, in all of the reputation of Belgium art. The subject is old; the composition and colour are indisputably bad. Let us at once turn from it to examine Dyckmans' pair of cabinet pictures, viz.—"The Marquise," and "The Embroideress." Undoubtedly these little pictures are charmingly painted. The colours are fresh and pleasing: and Dyckmans' touch has the smoothness and finish of enamel. The "Embroideress" especially pleases us. The mechanical way in which her work proceeds, while she looks over it with tender eyes fixed upon some happy fellow the spectator is not allowed to see, are touches of real art, most charmingly rendered. She may well wear this contented look, surrounded by these elegant accessories; her pretty head relieved by that rich amber silken curtain, most minutely and truthfully rendered, and her shoulders covered with a lace tippet, picked out with a marvellously minute pencil. We should have preferred a little more carelessness in the figure, which appears to be posed expressly for the artist. It wants some simple touch of nature to make it perfect. But the Belgians may be proud of M. Dyckmans.

From these bright little revelations of elegant life we turn to a homely subject, where the picturesque qualities of humble life and humble homes lend a charm to the artist. The scene before which we now pause represents the "New Year" Flanders, by Henri Leys, a Belgian artist, who studied, we believe, in Paris, and has indisputably paid considerable attention to the smooth and finished intricalities of the Dutch school. In this picture we have a most picturesque old house front: at the door are an old couple greeting children, who have come to pay the compliments of the season. The incident is in no way remarkable, save as giving the artist an opportunity of rendering the character, the costume, and an exterior to be found in Flanders, and perhaps in Flanders only. There is an unmistakably Flemish aspect about the group: the painting is careful and correct; the colour fresh, and relieved by the dark grey shades peculiar to the Dutch school; and the effect is pleasing, if not striking. We shall meet M. Leys again. From his Flemish subject we turn to a view in the Ardennes, by Wilem Roelofs, a Dutch subject, apparently resident at Brussels. His landscape may be remarked for some good passages of colour; it may also be remarked for its general heaviness—its want of atmosphere. From its unequal surface we turn to some of Alfred Stevens' performances. This artist, with a certain power that might be promising in a beginner, presents to the visitors of all nations pictures which are not simple promises. They exhibit to us the artist confirmed in his artistic principles, who is presenting to us works as good as any he intends to produce. Of these, the two important pictures are what is called "Vagabondage," and the "First Day's Application." The first is an elaborated bit of sentimentality. Some Chasseurs de Vincennes are conducting a poor woman, obviously accused of begging, with her haggard children, to the police-office. The snow is deep upon the ground—the poor woman looks very cold and very unhappy. The scene is peculiarly French, let us notice. Winter visitors may have remarked groups of fierce little soldiers, their bayonets ominously fixed, surrounding groups of forlorn children accompanied by women of unhappy aspect—all very closely resembling the group marching before us. The fierce soldiers about the weak and trembling prisoners are a good contrast, at once excellently illustrative of the social laws of the time, and capable of producing a most interesting picture of character. This material has been sentimentally handled by the artist. He has introduced a lady, comfortably covered in crimson velvet mantle and bonnet, who is in the act of giving her purse to the woman, *en passant*. A carpenter, who looks on at the strange episode, and, alas! it is a strange one—is, perhaps, the best figure in the composition. This figure of Charity in velvet is a mistake; an ugly mistake, too, for it is ill-drawn, or awkward, or both. Still, there are points to commend The Chasseur in the left-hand corner of the picture, who has half turned round to see what is going on, is a good study from life. There is force, also, in the general treatment; but the straight, horizontal line, unbroken, save by the Charity in velvet, is an ugliness which it is difficult to get over. The "First Day's Application," by the same artist, is a good study of a thoughtful head, and is painted with an originality of touch that is more effective in other pictures by the same hand. The indistinctness of outline—which reminds us strongly of Inskipp—has its charm, because it cheats by giving a sense of the artist's power, just as the random touches of a field sketch charm. But let the spectator once suspect that this careless outline is a trick, a hardly-studied trick, and it ceases to be pleasing, if it does not become completely repulsive. There are points of undoubted strength about Alfred Stevens to render these hints worth the trouble we are at in making them.

In the neighbourhood of "The Good Shepherdess," in red velvet, is a glowing picture. The air is heavy with the mid-day heat. We have the desert before us, as it has been before us in some shape every year, at the Royal Academy, in Suffolk street, or elsewhere. The scene is tempting to the colourist—the appropriate figures attract the pictorial draughtsman. The golden sands—the dun camel, laden with a richly-tinted burden—the folds of the Arab dress—the white linen contrast to the swarthy features of the wearer; these are among the Eastern effects with which hundreds of modern artists have familiarised Art-exhibition visitors. M. Portaels has added a "Caravan in Syria" and a "Funeral in the Desert of Suez" to the long list of sand pictures. His "Funeral in the Desert" is a carefully-painted picture; in no way strikingly original, but pleasing for certain good touches. Sand and sky are not new, as represented by the pupil of Delaroche; but the woman who tenderly supports the head of the body which lies across the camel's back, is happily conceived. The drawing is careful—as becomes the pupil of a French master. There are, however, mistakes. The Arab boy has the conventional grief of the undertaker about him; and the Arab at a distance, with his bowed head, is too sad. Had the artist shown the women grieving, without thought of the spectators; while the boy, forgetting the occasion, grasped at some bauble upon the ground, he would have made a nearer approach to nature. Children never nurse their grief, they cast it from them, after a burst of tears, and go again to their toys.

From M. Portaels we may turn to another artist, into whose mind the methods of other men have sunk deep. "The Trouble-Fête"—a Flemish scene, at the end of the 18th century—is a picture crammed with figures, all grouped as we have seen figures grouped a hundred times before. We look in vain into every part of the peopled scene for some happy thought—some real human episode. Each figure appears to be wondering what on earth its neighbour does there. There are the overturned household utensils filling up a corner in the foreground just as they have filled up foregrounds in every exhibition we can remember. And then the colour is as conventional as the drawing: it wants life, thought; just as the portrait of Mme. B. de C., by De Keyser, the accessories of which are well painted, wants but some touches to make it a really fine portrait. The coral bracelets and the black lace shawl are well rendered; the head is solid and pleasing, but the flesh wants transparency; the colour is good and the drawing exact, but the flesh texture is untrue to nature.

We pass on to the "Interior of a Silk Mercer's Shop in 1660"—a charming picture, by Florent Willems, who is a Belgian by birth, but appears to be a French artist by education. The whole charm of this composition is centred in the figure of the young woman, who, with a piece of silk in her hand, is appealing to the taste of her seated companion; while a young man looks on from a distant part of the shop, and a boy hastens to hand the fair purchaser a seat. The head of the old mercer, with its expression of eagerness, is capital. But still, as we have declared, we hold, that the charm of the picture is centred in the purchaser, whose face and attitude are delightfully natural. The simple story lies broadly told in her sweet inquiring face. This is, indeed, the most truthful bit of nature we have yet noticed in the Belgian Saloon. But Willems is hung near the view of the "Cathedral of Seville," by Bossuet—a piece of painting, parts of which are equal to Decamps—and this is not giving the painter faint praise. "Il est assez difficile de s'appeler Bossuet," said a Frenchman who peered over our shoulder at the glowing walls of the crumbling cathedral. Finely the great mass of red wall here and there broken down, stands out from the distant parts of the building. And then let the visitor closely observe how excellently minute the parts are without detracting from the broad strength of these parts when taken in the mass. Bossuet has triumphed over the difficulty said to lie in his name.

We are now near a clever imitator of Ostade. It is difficult to believe that this little village scene is not absolutely copied line for line by Ignace Van Regemorter. The copy would be generally accepted as clever; just as this picture, miscalled original, and therefore exhibited here, may be called a clever imitation. A careful student of Pope, who has studied only to copy him, if he have ordinary intelligence, will, in the course of his imitations, probably hit upon some good lines of sharp and humorous antithesis; but this accident will not entitle him to take place either as a poet or as a humourist. Let us say that M. Van Regemorter has stumbled upon some good passages of colour, in the course of his imitative struggles; and we shall say all that he deserves to have said about him.

We shall close with the Belgian contributors next week.

ROYAL LONDON YACHT-CLUB.

THE first match of the season of this distinguished club took place on Saturday last; and, viewed either in a sporting light or in a maritime point of view, as presenting the finest nursery for seamen, yachting races and yachting possess, at the present moment, a more than ordinary claim to patronage and support; and the recent important and large additions to the ranks of the various sailing clubs indicate, beyond all doubt, the general appreciation of the advantages to be derived from such institutions, not only as promoting and encouraging a feeling of honourable emulation amongst owners, but as giving an impetus to science in the construction, rig, and navigation of craft. Amongst those whose advancement has made rapid strides within the last two years, is the Royal London Yacht-club, whose sporting début took place as above, with all those advantages which attention to the comfort of the visitors and their friends could throw around it.

The course to be sailed was, from Erith round the Nore Light and back to Erith, a distance of nearly sixty-two miles, which was considerably increased by the boards necessarily made on the return home. The prizes were in specie—the first being for a purse of fifty sovereigns, and the second a ditto of thirty sovereigns, besides five guineas as the second prize in each class. The following were the entries:—

Name.	Tons.	Owner
FIRST CLASS.		
Phantom	31	S. Lade, Esq.
Water Lily	28	J. Fancourt, Esq.
SECOND CLASS.		
Kitten	14	R. Losch, Esq.
Vampire	60	C. Wheeler, jun., Esq

All those who take an interest in yachting matters must long ere this have been familiar with the celebrity of the *Phantom*, and of her many beautiful races on the London river, and in the regattas at the westward. Opposed to her was the *Water Lily*, a fine boat, which acquitted herself most creditably under the disadvantages of being anything but in trim, and out of which, by judicious alteration and management, there is little doubt more in pace might be got. Her owner is certainly entitled to great compliment for his spirit in bringing her out against so powerful a rival.

In the second class the *Vampire* had decidedly the call, for though the half-minute handicap allowed for difference of tonnage was instituted to promote a degree of equality, the great power of the *Vampire* rendered her chance of success far superior to that of the *Kitten*.

The club had provided the *Mora* steamer to accompany the race, and the prospect of more settled weather than that which it has been our lot to experience till within the last few days, aided by the high position and influence of the club, produced an assemblage on board of ladies and gentlemen numerous and fashionable. The deck of the club was decorated by the following schooner and cutter yachts, accompanying the race—The *Novice*, *Aqualine*, *May Fly*, *Amazon*, *Valentine*, *Thought*, *Antagonist*, *Maud*, and several others.

Captain Andrews, Vice-Commodore of the club, was the commander of the day; and on the arrival of the steamer at Erith the competing yachts were found at their moorings, the *Kitten* to windward, but neither possessing any advantage in station worth speaking of.

At 10 a.m. a gun was fired to get in readiness. There was a fine stiff breeze from S.W., with occasional squalls, accompanied by heavy showers, until noon. There was consequently but little work to do in going down, there not being the necessity even for a single board. At 11 h. 33 m. 20 s. the starting signal was given, and they all canted round in the next moment. The *Kitten* was first in trim, the *Vampire* next, followed by the *Water Lily*, the *Phantom* having stuff work to perform in getting her enormous mainsail up. Topsails there were none, as it was too squally to try the experiment. With a leading wind all the way down, the boats retained these relative positions, the interest of the scene being materially aided by the *Amazon* and *Thought* suddenly making their appearance near the leading

ROYAL LONDON YACHT-CLUB MATCH.—THE START FROM ERITH.

yacht in the race. No change or any sort occurred down to the Nore light, where they rounded in the following order :—

	h.	m.	s.
FIRST CLASS.			
Phantom	2	7	30
Water Lily	2	15	23
SECOND CLASS.			
Kitten	2	22	0
Vampyre	2	24	0

After jibing round they proceeded with a leading wind up Sea Reach, and at the Lower Hope began to beat to windward. In the running and reaching the little *Kitten* had done wonders, but when it came to the turning she was overmatched by the *Vampire*, which weathered her at Holehaven. At Gravesend, Grays, and Purfleet they were all about at the same distance as at the finish, which was as follows :—

	h.	m.	s.
FIRST CLASS.			
Phantom (the winner)	5	26	40
Water Lily	5	45	0
SECOND CLASS.			
Vampire (the winner)	6	6	0
Kitten	6	12	30

The prizes were subsequently presented to their respective owners by Captain Andrews, with appropriate encomiums upon the skill they had displayed. The *Mars*, on board of which there was the very excellent band of the Royal Artillery, then proceeded to Blackwall and London-bridge, to land her passengers, which was done at a very convenient and early hour of the evening. The fineness of the weather from midday rendered the trip altogether a most agreeable one, to say nothing of the pleasurable excitement occasioned by the sport itself.

Mr. Gore, the Soyer of the deep, catered, as usual, with the utmost satisfaction.

In the course of the day, a gun-boat, bound for the East, was an object of interest and admiration, and followed in the wake of the steamer, for some time.

DESTRUCTIVE STORM AT HASTINGS.

On the morning of the 7th inst. the town and neighbourhood of Hastings were visited, between six and seven o'clock, by a thunderstorm, which, though of short duration, was of extraordinary violence. A small house situate on an eminence about half a mile from the town, was struck by the lightning, which completely destroyed the chimney and staircase, shivered all the windows, displaced a stove in an upper room; and, although a woman and her four children were in bed at the time, in one house, and one woman in the adjoining dwelling (it being a double house) they escaped uninjured, one of the women being only stunned for a short time. Their preservation is, perhaps, attributable to their being in bed—the clothes acting as a non-conductor, and the walls of the house, being of wood, offering little resistance to the passage of the lightning. A pair of scissors and umbrella were broken—the latter set on fire; the window-curtains and a woman's mantle were torn to shreds, and every bit of crockery in both houses was smashed.

REMAINS OF A HOUSE STRUCK BY LIGHTNING AT HASTINGS.

MADEMOISELLE JENNY NEY.

MADEMOISELLE JENNY NEY was born in Presburg (Hungary). Her mother, an excellent artist, educated her and her elder sister with great care for the stage, where Mdlle. Ney made her début as a mere child. Her sister, meanwhile, having enjoyed great reputation as a singer, she endeavoured to emulate her; and, after laborious studies under the sole care of her mother, entered into a favourable engagement with the Imperial Opera at Vienna in 1851, where she remained for three years, becoming every day a more decided favourite of the public. Perhaps she would never have thought of leaving the Austrian capital, but in 1853 her mother, with whom she had lived till then, died. She felt lonely and miserable amongst all that reminded her of her loss, and resolved to leave Vienna, the scene of her first great triumphs, of her first and greatest sorrow.

Her fame having spread throughout Germany, there was no lack of engagements. She decided upon Dresden, where an engagement was offered

MDLLE. JENNY NEY, OF THE ROYAL ITALIAN OPERA.

to her for seven years on terms so flattering and lucrative as hitherto hardly any German prima donna could boast of in her native country. From Dresden she made her first excursions to Hamburg, Frankfort, Cologne, Brunswick, Berlin, &c. In all these towns she was greeted as the first living singer of the German stage; and on her last return to Dresden, shortly before Mr. Lyon engaged her for the present London season, she was honoured with the title of *kammer-sangerin* (chamber singer) of the Court of Saxony.

The severe and dangerous illness with which Mdlle. Ney was seized after her brilliant appearance in the "Trovatore," at the Royal Italian Opera, interrupted for a time the successful performances of that opera; but they have now been resumed with more éclat than ever. She has been requested to prolong her engagement (now near its close) to the end of the season; but this she is prevented from doing by her duties at Dresden

SCENE FROM THE NEW OPERA OF "BERTA," AT THE HAYMARKET THEATRE.

MR. SMART'S OPERA OF "BERTA."

Of the success of this meritorious opera we gave a review in our Journal of last week. We now engrave the last scene, the "Cave of the Gnome-King;" in which the *Count* (Mr. Weiss), disguised as the *Demon*, suddenly appears before the terrified lovers (Mr. and Mrs. Sims Reeves), who have taken refuge in the haunted ruins.

ROYAL GEOGRAPHICAL SOCIETY.

At a recent meeting of this Society, Sir R. I. Murchison, Vice-President, in the chair, announced that the Geographical Society of Paris had very

MEDAL, PRESENTED TO CAPTAIN M'CLURE BY THE PARIS GEOGRAPHICAL SOCIETY.

courteously submitted to the Council, through its Vice-President M. Jomard, in Roquette, three medals, for presentation to three members of the Society, to whom they had been awarded by the French geographers. To Captain M'Clure, R.N., the gold medal had been awarded, for his discovery of the North-West passage; to Captain Inglefield, R.N., a silver medal had been awarded, for his discoveries of the Arctic regions; and to Mr. Francis Galton a silver medal had been awarded, for his explorations in the Namaqua, Damara, and Ovampo countries, northward of the Orange River, in South-west Africa. The Chairman expressed his conviction that the Society would join in the cordial feelings with which the Council appreciated the honours which France had so liberally conferred; and the meeting had the gratification of witnessing the presentation of the medals to Captain M'Clure, Captain Inglefield, and Mr. Galton—who severally offered their acknowledgments.

HOLOTHURIDÆ, OR SEA-CUCUMBERS, IN THE MARINE AQUARIUM OF THE ZOOLOGICAL SOCIETY.

Several fine specimens of these interesting and little-known animals are now exhibited in the Aquarium of the Zoological Society, in the Gardens in the Regent's-park, having been sent up from Shetland by Mr. M'Andre, and safely placed in the tanks

The *Holothuridæ* belong to the same order of the animal kingdom as the star-fish and sea-urchin (*Echinodermata*); but, although they accord with the radiate type in the disposition of their dentritic oral tentacles, and retain the ambulacra, or suctorial feet, of the sea star, their general form, as well as internal structure, indicate an approximation to the lower forms of the next great division of invertebrate animals (*Articulata*)

Species of *Holothuridæ* are found in almost every sea, and some are esteemed highly as food. The *Holothuria Anaxas*, which attains a length of upwards of eighteen inches, is eaten in the Moluccas; the trepang (*Holothuria edulis*) is considered quite a delicacy in China; and some of the Mediterranean species are eaten by the poorer classes on the coast of Naples

Highly interesting to the scientific observer, these animals appear also to claim much attention from the numerous visitors to the Marine Aquarium; and we trust that they will become permanent residents in its submarine pasture-grounds—to the many attractions of which they are a considerable addition.

SEA-CUCUMBER, IN THE AQUARIUM OF THE ZOOLOGICAL SOCIETY, REGENT'S-PARK.

American Intervention in Europe.—A rumour has been going the rounds of the newspapers to the effect that ex-President Tyler was about to proceed to Europe, there to join Messrs. Van Buren and Fillmore, and that the three were to mediate between Russia and the Western Powers. Of course there was no truth in it. The idea was seriously entertained at one time by several leading personages in Congress, and was briefly discussed in that body But it was understood from the representatives of the Western Powers that no intervention in the quarrel was desired or could be entertained; and the project was dropped immediately. It is doubtful, had it been carried into effect, whether anything could have been achieved by the ex-Presidents. A knot which the ablest intellects in Europe have been unable to unloose would present some difficulty to three gentlemen, one of whom has been very many years out of public life, and the other two never possessed any intimate acquaintance with foreign politics. There are many men in this country who would be better able to conduct a mediation between the belligerent Powers than the ex-Presidents —*New York Herald*.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Her Majesty's second State Concert takes place on the 20th, which is also the day for the second Chiswick Horticultural Fete. The last Levee for the season is appointed for the 27th inst.

The Emperor and Empress of Austria have left Vienna for the Castle of Laxenburg, where they will pass the summer.

The Princess Royal and the Princess Alice honoured the Crystal Palace with a visit on Saturday morning.

The Duke and Duchess of Brabant are expected to arrive at Brussels on the 20th.

King Leopold has received an autograph letter from the King of Portugal, announcing the intention of his Majesty to visit Brussels with the Duke of Oporto on leaving Paris.

Her Majesty will visit Fort Pitt in a few days, to distribute the Crimean medals.

The Archduke Maximilian returned to Ancona on the 2nd inst., to reassume the command of his squadron.

The Princess Charlotte of Belgium completed her fifteenth year last week—having been born at Laeken on the 7th June, 1840.

On Saturday last, when the French Emperor was going to Vincennes, a courier overtook his Majesty with despatches from Sebastopol. The Emperor immediately announced the news of the taking of the Mamelon Vert, &c., and handed the despatch to the King of Portugal, who, after reading it, put it in his pocket as a souvenir.

The Marquis of Salisbury, as Lord-Lieutenant of the county of Middlesex, gave an entertainment on Saturday evening, at his residence in Arlington-street, to the magistrates of the county and the officers of the several regiments of local militia.

The Count de Chambord goes to Bohemia this month. He intends taking the baths at Toplitz, and will remain there about six weeks.

M. Fould has gone to Biarritz, to take apartments there for the Empress Eugenie.

The Lord Mayor and the members of the City Corporation were presented to the Emperor of France by Lord Cowley on Sunday last. On Monday the grand water-works of Versailles played *par extraordinaire*, in honour of the deputation.

Prince Frederick William of Prussia, only son of the Prince of Prussia, intends to visit Paris on the 20th inst.

The King of Naples makes open court to Russia, and longs to welcome the fleets of the Czar in the Mediterranean. His Sicilian Majesty has conferred the order of St. Januarius on a Russian Grand Duke, and the tone of the Court is as Muscovite and anti-English as it well can be.

The anniversary dinner of the noblemen and gentlemen educated at Eton College was celebrated on Saturday evening, at Willis's. The Earl of Malmesbury presided, and a very large number of Etonians supported the noble Earl in the chair.

The King of Portugal is about to visit Turin. It is said he will be betrothed to the Princess Matilde, eldest daughter of the King of Sardinia, who is now in her thirteenth year.

Mr. W. Atherton, Q.C., is appointed to the office of Judge-Advocate of the Fleet, as well as Counsel to the Admiralty, vacant by the resignation of Mr. Phinn, appointed the permanent Secretary to the board.

During the visit of the King of Sardinia to Paris, the Regency of the kingdom will be entrusted to his Royal Highness Prince Eugène of Carignan.

Prince Alexander of Hesse-Darmstadt, brother of the Empress of Russia, has arrived at Berlin from St. Petersburg.

The Right Hon. Sir George Cornewall Lewis, Bart., was sworn into office on Saturday last, in his own Court of the Exchequer, before the Deputy Chancellor of the Exchequer.

His Royal Highness Louis of Bavaria has returned to Munich from his tour in Italy.

The Prince and Princess of Prussia are staying at Coblentz.

Field Marshal Prince de Schwartzenburg, Civil Governor of Transylvania, and Count Jellachich, the Ban of Croatia, have arrived at Vienna.

Captain Fox Maule Ramsay, of the 56 h Regiment, is appointed private secretary to Lord Panmure, and has entered upon his duties at the War Department, in conjunction with Lord Griffin.

Mr. Soulé, the late American Minister to Spain, is going to Mexico with a mission supposed to have connection with the affair of Spain and Cuba.

A correspondent of the *Dumfries Courier* hints that Lord Murray is the generous donor of the annuity of £1200 to Mr. T. P. Kennedy.

M. Lamartine is about to become a "redacteur" of the *Siècle*. He will merely contribute philosophical and literary articles.

Aali Pacha has had a private audience of the Emperor of Austria, at which he received the Grand Cross of the Order of St. Stephen. Aali Pacha was to leave Vienna on Saturday.

The beautiful estate of Lauriston, the property of the late Lord Rutherfurd, has been sold to Mr. C. H. Ingalls, of Cramond, for £22,000.

Redschid Pacha has been reconciled to Mehemet Pacha, who is said to have received 500,000 piastres from the Sultan as an indemnity.

The British Association for the Advancement of Science will hold its twenty-fifth meeting in Glasgow on Wednesday, September 12, 1855.

The *Journal de St. Petersbourg* publishes above four columns of "les passages les plus remarquables," in the "éloquent discours" lately delivered in Parliament by Mr. Gladstone.

The indefatigable Barnum has just favoured the prodigy-loving public of New York with the announcement of a new marvel, *i.e.* the "Infant Esau, two years old, covered with hair, and has already a full beard and whiskers!"

The heaviest India Overland mail ever dispatched from this country was conveyed from Dover to Calais on Monday in the French and English mail steam-packet *Queen*.

On the 20th ult. there were 210 cases of cholera at St. Petersburg.

The British subject arrested at Hamburg on suspicion of being a recruiting agent has been released.

The publishers of the *Melbourne Argus* have raised the price of that paper from ten to twenty dollars per year. They say it costs them half a million of dollars per year to carry on their establishment.

Messrs. Edward T. Bellhouse and Co., of Manchester, have undertaken the contract to light the whole of the city of Buenos Ayres with gas, amounting to nearly 4,000 lamps.

The Vienna garrison is to be henceforth 30,000 infantry and cavalry.

The harvest in Van Diemen's Land had been completed and got in with little difficulty. For labour the wages generally paid have been 12s. per week and rations.

The old soldiers belonging to Switzerland who claim legacies under the will of the Emperor Napoleon amount in number to 1417.

The third and final Report of the Cathedral Commission, just issued, recommends twelve new bishoprics.

The growth of pineapples in the Bahamas is checked for want of rain.

The amount of East India Five per Cent Stock converted into Four per Cents during the last two years is returned at over £22,000,000 sterling.

The Canada Government has agreed to grant £500 to the Agricultural Societies of Lower Canada, by way of loan, to enable them to furnish seeds to farmers.

The French Government has granted a fresh delay of three years for the completion of the two dictionaries—French and Arabic, and Arabic and French—for which two prizes of 5000f. each were offered by a decree of the 49th November, 1852.

During the thunderstorm in Lancashire last week a boy, aged eleven years, was struck by lightning, at Turton, near Bolton, and died instantly.

A steam company has been formed for the purpose of a regular communication between Lisbon and the Azores—a line that was much required.

The shops were all open in Kertch when the Allies went in, and the ladies walking about.

An Order in Council appoints Western Australia as a place to which felons and other offenders may be transported.

The Government of Saxony has informed the Chambers that the session will close on the 19th of next month.

A convention between Greece and Turkey to put down brigandage on the frontier has been discussed at Constantinople.

A free library is in course of formation at Kidderminster, the Corporation having furnished a room for that purpose.

FINE ARTS

THE BRITISH INSTITUTION.—WORKS OF ANCIENT MASTERS.—The Exhibition of the Works of Ancient Masters and Deceased British Artists, just opened, is as miscellaneous as, and even more unsatisfactory in character than, usual. The works by artists of the highest renown are comparatively few, and, individually, by no means superior class. Mediocrity is the prevailing quality, and disappointment is the inevitable result of the inspection. We confess we are at a loss to account for this, unless upon the principle that what is everybody's business is nobody's business, and that the contributions to the Gallery are regarded very much by chance. Surely if the noble Governors of this once-influential Institution were sincerely devoted to the accomplishment of its professed object—that of "Promoting the Fine Arts in the United Kingdom," and if they considered that an exhibition of chefs d'œuvre of ancient masters would be conducive to that end, they might find material ample in the galleries of noble and wealthy patrons to form a display—a succession of displays—at once gratifying, elevating, and instructive in character. Surely, too, the owners of private collections, if they had a proper pride in their art-possessions, a proper sympathy for the art-aspirations of the public, and a proper sense of the responsibilities which possession of such treasures involves, of the influences which they would undoubtedly exercise when utilised in an extended sphere; surely, if these things were considered by them, they would wish to see their collections represented by the very best examples they contained, and not by specimens purposeless in themselves, and very often of doubtful genuineness.

Apart from the considerations of the intrinsic demerits of the great bulk of the pictures here exhibited, we have to repeat our regret at their miscellaneous character, when viewed as a collection. Amongst the 168 pieces, we find specimens of every possible age and school (except only the very best), from the age immediately preceding Raphael down to that of Collins, and placed in juxtaposition with the most extraordinary disregard of propriety in the arrangement;—Guido, surrounded by Terburghs, Vander Neers, and Ruysdaels—a dry, formal Panturicchio next door to a more than usually florid Correggio; two small Raphaels (attributed) in his first manner, close to a tame and pale production ("Saying Grace"), by Sir W. Allan; and these, as well as a small "Virgin and Child," by Fra Bartolomeo, smothered under gigantic full-length portraits, by Lawrence. The effect is only to bewilder the sense, and to offend the eye with sudden shocks of contrast. How much might be done, even in this small, but well-proportioned and admirably-lighted Gallery, if the Directors would only take the trouble to organise a series of exhibitions of art in schools; and if, in addition, they would accompany them by catalogues, in which something more than the meagre information of name and ownership was vouchsafed. Who knows—perhaps the hint may be taken; and if it be, we will engage that the experiment will be amply rewarded by the plaudits and shillings of the public.

In proceeding to take a survey of the walls of the Exhibition, we observe at the outset that the specimens of Italian art form but a small proportion of the mass; in which the Dutch, Flemish, and Spanish schools, and modern English art, vastly preponderate. Over the chimney piece in the first room is a Guido, the "Meeting of David and Abigail," belonging to Lord Feversham, a fair specimen of the master, and of this mannered transitional style which preceded the rapid decline of Italian art. Two full-length portraits of the Earl of Strafford, by Vandyke, are in this room: one belonging to the Countess of Jersey, in which a dog is introduced; the other to the Duke of Portland. The latter is the finer picture of the two; the head admirably expressive of courage, resolution, and firmness; and the hands, particularly the right, which is elevated, finished in the artist's best manner. Beneath the Guido is a very pretty Terburgh, from the collection of Mr. H. T. Hope: it represents "A Lady with a Guitar," and is remarkable for that quite expression of real life which the artist so happily hit off, and for the successful execution of a rich white satin dress, a textural surface which he was so fond of representing. Two small and unimportant Claudes, also the collection of the Duke of Wellington, and a Ruysdael, belonging to Mr. J. E. Fordham, are also seen at this end of the room. In other parts of the room we noticed a clever Cuyp. "The Advocate," belonging to Mr. C. S. Bate; "The Temptation of St. Anthony," by Teniers, belonging to the Hon. C. C. Cavendish; several portraits by Velasquez, and a landscape by the same artist (belonging to W. Ellis, Esq.)—a composition of trees, and a ruin in a wild mountain district, remarkably sombre in tone, with a little light in the distance on the left; two small "Vue de Venise" pieces by Wouvermans, from the collection of the Duke of Wellington; a questionable Rubens representing "An Old Woman and Boy, by candle light," contributed by Lord Feversham; and a large picture attributed to A. Carracci, belonging to the Duke d'Aumale, subject, "Venus Asleep," the ungrateful figure, surrounded by a whole family of Cupids, disporting in various ways—some flying, some swimming; the whole garish and unsatisfactory in effect.

In the Middle Room are two Salvator Rosas; one of "A Soldier," he longing to the Duke of Northumberland, the other, a magnificent picture of "Job and his Friends"—an extraordinary conception, full of expression and power, but painful from the severe truth with which the sores which cover the body of Job are realised. Next to this is an equally remarkable specimen of Rembrandt's treatment of Scriptural subjects—"Joseph's Garment brought to Jacob;" belonging to the Earl of Derby. It is well known that this wayward and original genius took a pride in resisting the claims of the ideal, and in introducing, even into the most sacred subjects, the coarsest and most commonplace specimens of humanity which he met with in every-day life. This principle he has in the present picture carried to an extreme which almost provokes a feeling of irreverence. Jacob, a little square-built Dutchman, sprawls on his back on the ground, in a paroxysm of vulgar grief, whilst those of his household blubber in concert, their homely features displaying every variety of extravagant contortion—the Patriarch's dog, too, joining in with a piteous howl; on the other side stand the brothers of Joseph, with strongly marked Jewish physiognomies, putting a good face on the matter, and gravely asserting the truth of their story. By N. Poussin, the Earl of Derby contributes two pictures, which will illustrate his peculiar sculpturesque style, and his love of architectural *accessoires*:—"The Arts inquiring of the Genius of Modern Rome why they do not flourish as in the Days of Ancient Rome;" and "The Woman of Megara Gathering the Ashes of Phocion." Mr. H. T. Hope contributes two good Teniers—the "Corps de Garde" and "Backgammon Players;" Earl Spencer, a "Venus and Adonis," attributed to Titian, and if so, after—a long way after—the brilliant picture of the same subject in our National Gallery; and Mr. S. Rogers, the venerable poet, a spirited Velasquez—"The Infant Son of Philip IV. at the Manège"—the figure of the little princely equestrian being similar in treatment to the well known picture on the same subject, by the same artist, in the Dulwich Gallery.

In the South Room, with the exception of the fine cartoon of "The Virgin and Child, St. Elizabeth and St. John," by Leonardo da Vinci, justly prized by the Royal Academy as one of their noblest treasures, and three or four comparatively unimportant specimens, attributed to Raphael, Fra Bartolomeo, Piccole, Mola, dotted in here and there like plums in a "milestone pudding"—modern British, or quasi-modern British, art bears usual the domain to itself, and portrait is in the ascendant. Her Majesty contributes two Zoffanys, curious specimens of the dry Dutch style of that fortunate Royal protegé. That of "Queen Charlotte, the Prince of Wales, and the Duke of York," is a formal group, the Queen sitting, her face seen nearly in full, and again in profile in the looking-glass; the young Princes are in fancy costume, the Prince of Wales with a helmet and feathers, the Duke of York in Turkish garb, with a turban. The other group of the "Princess Royal and the Duke of Clarence" is of less pretensions; the execution crude in the extreme. In contrast with this work we observe near at hand a very masterly sketch, the "Princess Elizabeth and the Duke of Gloucester" (heads only), by Vandyke, contributed by the Hon. C. C. Cavendish.

To conclude. The Landseer family contribute a striking view of the "Falls of Niagara," by Wilson; the Duke of Sutherland, a "Panoramic View from Richmond hill," painted in 1760 by Tillemans; and the Royal Academy, selections from their presentation pictures, by Lawrence, Collins, Stothard, &c.

M. MONTI'S LECTURES ON SCULPTURE.—M. Monti's third lecture on Sculpture brought us to the period of pure Greek art. The lecturer commenced by expatiating upon the noble character of the early colonisers of Greece—their spirit of enterprise, their fine poetic sentiment, their just appreciation of the beautiful, their veneration for the great and heroic—which rendered them the civilisers of surrounding contemporary peoples, and the admiration of the world in all succeeding ages. Importing with them the traditions of art from Egypt, from Assyria, and other parts, they speedily modified them according to the dictates of their spontaneous genius, preserving all that was grand in those ancient creations, but adding to it the beautiful, and infusing into it a majesty, a poetry, and a truthfulness which commanded the admiration whilst it addressed the sympathies and convictions of men. The warm, bright clime of Greece was well adapted both for the development of the human form in the perfection of proportion, whether in the symmetry of muscular strength, or the delicate outline of female beauty; and, as if to acknowledge the special favour of Heaven in this respect, no people ever had a keener sense of the beautiful, or attached higher honours to the possession of it. The establishment of the Olympic Games tended much to promote that ripe appreciation of beauty and proprie ty in the representation of the human form, whether in action or repose, which enabled the sculptors of those days to represent bodies in the very transitional attitudes of action with a truthfulness which made them almost seem endowed with life—a thing which could never be done from the study of a model attempting to imitate the position. In a word, the Greeks were endowed, by nature and position, with an instinctive sense of the beautiful in form, the true poetry of living and expressive form. In adopting the principle of the ideal in the forms and proportions, they were guided by no vain imaginings or arbitrary rules, but that comprehensive appreciation of general beauty which constituted the very essence of their intellectual character. With such a people, art—the sculptor's art—became a matter of natural necessity; and all over Greece the architect and the sculptor were employed erecting temples and statues to gods and heroes; that being the highest honour that could be shown to the most eminent merit. It was in the middle of the sixth century before the Christian era, at the time when Assyrian art had disappeared, and that of Egypt was on the decline, whilst that of India had reached its climax, that art in Greece asserted its position: soon attaining a point of excellence from which it bade defiance to the rest of the world. Phidias, Polycletus, Scopas, Alcamenes, and Myron were the chief masters of this grand style, the influence of which was soon spread over all the isles of Greece, and the colonies where their renown was felt. This style was distinguished for its power, its dignity, its exact truth, its direct appeal to the intelligence in those who knew the duty was always used as a means, not as the end, it never obtruded itself upon the eye as the essence and purpose of the work. Types of this style, in its finest manifestations, survive in the ruins of the Parthenon, the Temple of Olympia, &c. After the close of the Second Peloponnesian War a new style prevailed, in which roundness, softness of outline, grace of action, and beauty of form were the chief essentials a style more adventurous and florid in all respects than any which had preceded it. Of this style Praxiteles and Lysippus were the great the unrivalled exponents. Praxiteles was the first who presumed to represent Venus unrobed, and in the hands of the masters of this school that deity lost much of the heroism of her character, as the goddess of valour and fecundity, and degenerated simply into the ideal of feminine beauty. From this date, which was little more than a century later than that of the grand style, art began to lose daily more and more its simplicity and severe purpose; until finally, on the misfortunes which overtook the Greek nation, it took refuge in Asia Minor, where it suffered a still further decline. M. Monti took occasion to expatiate warmly upon the beauty and importance of the Elgin marbles, the value of which could not be over-estimated. He illustrated his lecture with numerous drawings and casts after the principal works of Greek sculpture in the British Museum, the Louvre, and the principal galleries of Italy.

BUST OF MR. LAYARD, M.P., BY PATRICK PARK.—Mr. Park has just completed a very fine model for a bust of Mr. Layard, M.P., which is now temporarily on view at the rooms of Messrs Colnaghi, Pall-mall East. The bust is quite simple in treatment, without drapery or addition of any kind. The head is turned a little upward to the right, the brows slightly knit, as in thought, and the mouth compressed. The expression altogether is extremely animated, and the likeness is a very good one.

THE CORPUS CHRISTI PROCESSION.—Although the Emperor and Empress walked this morning in the Corpus Christi procession it was less brilliant than in olden times, when Vienna was itself, which it has never been since the Revolution. The fine figure and the military bearing of the Emperor greatly attracted the attention of foreigners, of whom there are now great numbers in Vienna; but the Empress was the principal *point-de-mire* of the Viennese. Her Majesty, who had on a Court dress of white damask, wore some magnificent new jewels, consisting of a diadem, a pendant necklace with tassels, and a stomacher of diamonds and rubies. Although somewhat pale, her Majesty looked quite the word employed by the French—*charmante*. It may be observed that some of the centre rubies in the crown, necklace, and girdle, are nearly as large as a five shilling piece. The sixteen or eighteen ladies who were in the suite of the Empress also wore splendid jewels, and as the sun shone brightly on them they reflected all the colours of the rainbow. All the trades were in their full gala dress, and directly before them Count Buol and Baron Bruck, the Ministers of the Foreign and Finance Departments. Immediately after the Archbishop came the Emperor, and behind him the Empress; Baron Bach, the Minister of the Interior, walked somewhat to the right of her Majesty. The German Guard closed the procession, but the lady-world certainly have preferred to see the Hungarian and the Italian Guards with their handsome and fiery horses, and equally handsome and fiery riders. The two latter corps in question fell to pieces during the revolution, and have never been reformed. No cavalry of the line, excepting some ten Dragoons, were present on the occasion this morning. Let us hope, however, that the Austrian Government will not neglect its cavalry, and will speedily recruit and send such fellows to assist them after the battle of the Alma.—*Letter from Vienna, June 7.*

THE WILKINSON TESTIMONIAL.—Totteridge Park was the scene on Thursday of a festival in honour of the learned president of the school—Robert Wilkinson, Esq., M.C.P., M.R.I.M.S., whose educational career presents features of considerable interest. The meeting was presided over by Dr. Lee, of Doctors' Commons, when, after the annual recitations of the scholars had taken place, a portrait of Mr. Wilkinson, painted by Mr. Sayer, was presented to his wife and family, as the gift of his pupils and friends. In doing so, an address, stated that Mr. Wilkinson had devoted his great energies and learning to the cause of education for twenty-eight years, as a Licentiate of the Royal College of Preceptors, and had imparted worthy feelings among the boys while awakening them to honourable emulation. Other speakers followed, particularly G. Thompson, Esq., late M.P. for the Tower Hamlets, who dilated in eloquent terms upon the high character of the educator in question. Among the guests were two of the Indian Princes now in this country and ex-President Fillmore; and the company in general much admired the very beautiful park and grounds, which formed during the day a varied and highly-picturesque promenade. The fine estate, it seems, is the property of Dr. Lee, who has thus consecrated it to educational purposes of an unsectarian character.

The present war footing of the Austrian army is said to involve an expense of £650,000 florins (say £65,000) a day. The annual cost, therefore, it is calculated, will carry the deficit in the Budget to about 300,000,000 florins (say 30 millions sterling).

CHART OF THE SEA OF AZOFF.

THAT inland lake of salt water known to antiquity as the Palus Mæotis, and to the moderns as the Sea of Azoff, scarcely noticed by ancient geographers, and rarely explored by ancient navigators, has suddenly started into fame, and become to all classes of politicians one of the most interesting regions of the globe. The victorious flags of united England and France now float over this *mare incognitum*, and invest it with an historical character. The accompanying Chart not only illustrates the scenes of the late naval operations, but exhibits a distinct and accurate view of all the bays and headlands of the Sea of Azoff, and of the most prominent points on the coasts of Taurida and the Caucasian provinces. For the purpose of illustrating the Chart we shall avail ourselves of the latest nautical survey embodied in the work of M. Coreard, and then make some historical remarks on the principal towns which stud the shore.

The bed of the Sea of Azoff is muddy and slimy, and has a tendency to rise; and it is highly probable, this elevation continuing, that the whole may become dry land in the course of a few centuries. According to M. Coreard, the depth of water has diminished three feet between the years 1766 and 1808; in the succeeding quarter of a century the shallowing was two feet; and in the last seventeen years another foot: making a total of six feet in a period of 144 years. The sandbanks are increasing, and new ones are in a state of formation. The greatest depth, as marked in our Chart, is 7½ fathoms, or 44 feet. From Kertch to Taganrog the distance is 200 miles, and from Genitchi to the latter about 250 miles. In the Gulf of the Don the water shoals to 24 feet, which is the roadstead of Taganrog, which lies within that gulf, it falls to nine or 8 or 10 feet. The water is thick and turbid, and in many places has a scum resembling pea-soup. This sea was well named by antiquity as a *Palus*, or marsh. It is bounded on the south by the Crimea and the isle of Taman, between which lies the straits of Kertch or Yenikale, called by the ancients the Cimmerian Bosphorus.

(*Continued on page 608.*)

AMUSEMENTS, &c.

THEATRE ROYAL HAYMARKET.—Monday, Wednesday, and Friday, LOVE'S MARTYRDOM, in which Miss HELEN FAUCIT will appear. Tuesday, Thursday, and Saturday, last nights but three of the new opera of ROSINA, and Mr SIMS REEVES. ONLY A HALFPENNY, every evening and Mr SIMS REEVES. ONLY A HALFPENNY, every evening. Mr. Buckstone's Benefit, Friday, June 29th.

MR. SIMS REEVES begs respectfully to announce that his BENEFIT and last appearance at the THEATRE ROYAL HAYMARKET will take place on SATURDAY EVENING, JUNE 23, on which occasion will be performed Henry Bertram's most successful Opera of BERTA, to be followed by a favourite Farce, in which Mr. Buckstone will appear, to conclude with (for the first time) LUCIA DE LAMMERMOOR. Tickets and Private Boxes to be had of Mr. Sims Reeves, 123 Gloucester-street, Hyde-park gardens, and at the Box-office.

ROYAL PRINCESS' THEATRE.—Under the Management of Mr. Charles Kean.—On MONDAY, and during the week, will be presented HENRY VIII., preceded by AWAY WITH MELANCHOLY.

ROYAL GALLERY of ILLUSTRATION, 14, Regent-street. The DIORAMA illustrating Events of the WAR is nightly exhibiting daily at Three and Eight. The Lectures by Mr Stoppelaer. Admission 1s., 2s., and 3s.

MRS. FANNY KEMBLE will give TWO READINGS from Shakespeare's Plays TWELFTH NIGHT, and the second Part of HENRY IV., at the MARLBRO' INSTITUTION, 17 Newman-street, Portman-square. The first-mentioned will be given on FRIDAY, 19th JUNE; and the latter one is appointed for FRIDAY EVENING, 29th INST., at Eight o'clock precisely. Tickets—to Reserved Seats, 7s. 6d.—may be had in the Library and of JOHN H. WARREN, Secretary.

NOTICE.—GRESHAM LIFE ASSURANCE SOCIETY, 26, Old Jewry, London. The Board of Directors return their thanks to the many gentlemen who have kindly offered their services in the formation of the Company, and will represent for a principal office.

After mature investigation of the several applications, the choice has fallen on Edward James Farren, from a list of nearly one hundred names, and from the written and personal testimony of the very highest character received in his favour.

The testimonials of other gentlemen have been sealed up, and will be forwarded in due course. (Signed) W. TAYLOR, Chairman.

June 5th, 1855.

ECONOMIC FUNERAL COMPANY, 28, New Bridge-street, Blackfriars

The resources of this Company enable it to conduct Funerals of all classes with strict economy in the most satisfactory manner.

Estimates upon application

West-End Branch, 238, Oxford-street, Hyde-park.

THE NEW ASYLUM for FATHERLESS CHILDREN, Stamford-hill.—The INTERESTS of the Subscribers to very earnestly request all on behalf of EMMA JANE CLARE, who was left in a most distressing case, and possesses powerful claims on the sympathy of the public at the present time. Her father was a fireman on the Eastern Counties Railway, and from which funded and all funds, in the lamentable wreck upon the line at Romford. The Committee of the Fatherless Fund have not admitted the claims of the family for assistance, and the widow with five children, one at years old, is dependent on her precarious earnings at shirt-making. The Board of the Charity have at once received it as a case of emergency subject to the decision of the next successful, she must, by the rules leave the Institution. Proxies will be thankfully received by Edward Lacy, Esq., Lavender-hill.

THE ROYAL-EXCHANGE ASSURANCE CORPORATION.—For Fire, Life, and Marine Assurances, and for Annuities. Established A.D. 1720, by Charter of King George the First, and confirmed by special Act of Parliament. Offices in the Royal Exchange, London, Branch, 29, Pall-mall.

Persons desirous of this Corporation in or to liabilities of partnership. Payment of their claims is secured by a large income and Capital Stock. The advantages of security in the undoubted wealth and stability of an office which has been tested by the experience of nearly a century and a half.

Tables of the Premiums, and of the Bonus in the Life Department, may be obtained at the offices of the Corporation, or from its Agents in the principal towns of the Kingdom.

JOHN A. HIGHAM, Actuary and Secretary.

TO MEDICAL MEN and OTHERS. — Provision against Permanent Debility by Sickness or Accident. Example.—A gentleman, aged 30, may secure a Yearly payment of £175 7d., secure £100 per annum for life, during the continuance of such disability.

Part rates sent free, on application to the Law, Property and Life Assurance Society, 30, Essex-street, Strand.

EDWARD S. BAINES, Secretary.

FOREIGN VINEYARD ASSOCIATION.—(Capital £200,000.)

President—Right Hon. Lord MURKERRY.

A Joint-Stock Company, formed for the purpose of supplying private families and establishments with foreign wines and spirits, in large or small quantities, at really wholesale prices—that is, from 25 to 50 per cent under those of wine-merchants. Example: the Association supplies, at £5 6s. per three-dozen case, instead of £10 10s., Clarets, finest Chateau Rt Margaux wines, at 4/- the, instead of 7/-; Sherries, at 30s., 36s., 42s., and 48s. the dozen (duty 10s. and 26s.); Ports, same rates, and the finest pale or brown Cognac, per gallon. Apply to T. W. STAPLETON, Esq., Secretary and Manager, 15, King-street, Regent-street, for prospectuses and detailed price lists. The principal clubs in London supplied. All wines sent out on approval, or samples forwarded free if desired. Terms, cash or reference.—And at 6, Boulevard des Italiens, Paris.

THE HONOURABLE ARTILLERY COMPANY of LONDON, the most ancient Corps of Volunteers in England, is desirous of obtaining a REINFORCEMENT of GENTLEMEN who are willing to give a portion of their time as Military Services

The Corps is composed entirely of Gentlemen, and receives from her present Most Gracious Majesty, and her Majesty's Royal predecessors, to train persons to the use of arms, and to the practice of military exercises.

The Corps possesses a Parade-ground of several acres, a Rifle-gallery for Cadets, a Band, Drum-and-Fife-band, Arms, and every facility for efficient military training.

The Officers are selected from the Corps, and hold her Majesty's Commissions.

Gentlemen under twenty-one years of age are admitted as Cadets, but must produce the consent of their parents or guardians.

Gentlemen desirous of joining the Corps, are to obtain any further information on application, by letter, to Mr William H. White, Secretary, 16, Artillery-place, Finsbury.

FOREIGN BIRDS for SALE.—Thirty species of splendid Parrots, from 12s. to £8 each; Virginian Nightingales in song, and other Australian; also, Monkeys. Apply at 3 Prince's Place, Bow Rd. C. A. LAW, Naturalist, 12a, Edwards-street, Portman-square.

SOUTH DEVON.—Mansion and Lands for Sale, about seven miles from Plymouth, and two miles from the Plympton and Cornwood Stations of the South Devon Railway. Eligible Investment for Capitalists and Lodging-house Keepers.

TO BE SOLD by PRIVATE CONTRACT, the MANSION-HOUSE and GROUNDS called BERCHWOOD the Residence of the late Mrs. ELLIS, in the Parish of Bitterne, near Southampton, situate in the Parish of Plympton St. Mary, and containing about 12 Acres of Meadow and Pleasure-ground, about 237 Acres.

The Mansion comprises a spacious entrance hall, bath-room, library, drawing and dining-rooms, housekeeper's room, and all requisite domestic offices, seven bed-rooms (besides servants' apartments), and three dressing-rooms. The stably yard (which is attended) comprises double coach-houses, two three-stalled stables, and loose boxes. The Gardens contain double green-houses, melon, cucumber, and other frames and forcing houses, lofty walled fruit, and other walls. The Gardens are well walled fully stocked, and in good cultivation. The House, which stands in an elevated situation, commands a southern aspect, commands picturesque views of the adjoining country, and is connected with woods and pleasure-grounds by a private carriage-drive. The beautiful residence (of which immediate possession may be obtained) will be found to be well adapted for either a large or small family.

Rent, while eligible tenants may be readily found for the Mansion and Gardens, not required for the personal occupation of the owner, apportion the property presents peculiar attractions. The game on the estate has been preserved, while the pond-are well known as the winter resort of almost every description of wild fowl. Fox-hounds and harriers are kept in the neighbourhood.

Cards of admission for viewing the house will be furnished on application to Messrs. Roger and Hewes, at the Manor office, Stonehouse, from whom and from Messrs. Herbert Dymond and Sons, Surveyors, 16, Bedford circus, Exeter plans and further particulars may be obtained.—Dated June 6th, 1855.

SMEE, Rand and Long, Opticians, &c., 153, Fleet-street, London.

HAWLEYS, Watchmakers and Goldsmiths, 123, City-road, corner of, and 284, High Holborn (from 78, Strand, and Coventry-street), established upwards of half a century. Bargain GOLD WATCHES, jewelled in four holes, horizontal movement, 63 10s.; Gold Lever and Duplex Watches, highly finished, from Twelve Guineas to Thirty-five Guineas; Silver Watches, jewelled in four holes, maintaining power, richly-engraved cases and dials, £2 2s.; fitted Lever Watches, from £3 10s. to Ten Guineas. Fine Gold Chains, unwearing as 18 ct. ones. Messrs. Hawley respectfully inform the nobility and the public that they are the only genuine manufacturers of the name in London. Gold, plate, watches and diamonds, purchased or taken in exchange. Chronometers, clocks, and watches, cleaned, rated, and adjusted by scientific workmen.

D. HULETT and CO., Manufacturers of GAS CHANDELIERS, Hall Lanterns, Glass Lustres, and every description of Gas Fittings. A large Assortment always on hand. Every Article marked in plain figures. Patentees of the Mercurial Gas Regulator—59 and 60, High Holborn.

DR. ARNOTT'S SMOKE-CONSUMING FIRE-GRATE is manufactured by F. EDWARDS, SON, and CO., 42, Poland-street, Oxford-street, where one may be seen in daily use. The advantages of this Grate consist in the smoke being perfectly consumed, no chimney-sweeping being required, and a saving of from 40 to 50 per cent being effected in the cost of fuel. Prospectuses, with Testimonials, sent on application.

DINNEFORD'S FAMILY MEDICINE DIRECTORY, containing a variety of prescriptions, especially adapted for the clergy, ladies, schools, and heads of families, in the absence of professional assistance. New edition, price 8s. 6d.; by post, 9s.

MEDICINE CHESTS in great variety, comprising a large assortment of patents, at prices from 10s. to £10.—179, New Bond-street, London.

BARON LIEBIG on ALLSOPP'S PALE ALE.

"I am myself an admirer of your beverage, and my own experience enables me to recommend it, in accordance with the opinion of the most eminent medical men, as a light and wholesome tonic beer, both bitter and agreeable. The styles will be found all that is unique and unadulterated. Sold by Wine Merchants, Grocers, Tea and Breakfast Dealers, and Agents throughout the Country. Also at the Show-rooms, comprising every description and quality, from the lowest pennyworth of pickles up to the most costly marmalade. The Glass Department is replete with every article of ornament and Europe can produce, together with a large assortment of the most useful and cheaper Goods required for the table or for domestic purposes. 42 and 43, Oxford-street, Pantechnicon Bazaar, Langham-place.

GENUINE COCOA of the FINEST QUALITY.—Cocoa has been designated by physicians of eminence as one of the richest productions of the vegetable kingdom, and, when properly prepared, is justly celebrated for its peculiarly invaluable nutritive properties. So keen, however, has been the activity to supply the public with an article at a cheaper rate than the more expensive offers thinly existed, that the most flagrant adulterations have been resorted to.

The evils with which so baneful a system is fraught are strikingly manifest in the melancholy statistics of the day. Highly-nitrogenised and easily assimilated as an article of diet, frequently recommend it to invalids as a remedial agent in promoting health. The result are, however, too often rendered nugatory by the impurity of the article supplied.

The magnitude of our legitimate business as tea-dealers necessarily precludes our devoting a strict supervision to the manufacture of Cocoa; we have, therefore, completed arrangements with the highly-respectable firm of Messrs. Henry Thorne and Co., Leeds, whose many years experience in the preparation of this article, and their unsurpassing determination to manufacture only from the choicest nuts, and to rigidly eschew adulteration in any shape, warrant us in recommending their "Genuine Trinidad Cocoa," to our Tonpenny per pound.

RIDGWAY, WELLS, and CO., Family Tea-men, 8, Ludgate-hill.

(*Continued from page 606.*)

Kertch, the ancient Panticopæum, was founded by the Greeks 2000 years ago, though the modern town was built by the late Czar Nicholas, and it contains 12,000 inhabitants. It was a most important place under the Kings of the Bosphorus. When it was in the possession of the Turks they kept a strong garrison there under a Pacha.

Taman, on the opposite side of the strait, was the ancient Phanagoria Kopil is now the capital of the island, and was formerly the residence of a Seraskier, who commanded all the Tartars of the Kouban for the Khan of the Crimea. The Kouban is the Hypanis of the Greeks, and one of the largest rivers of the Caucasus, having its source in the Spat or Elborus, one of the largest mountains in this part of the earth. Between the Kouban and its branch, the Tchernoi and Protok, Taman is completely insulated. Protok means a rivulet, and Tchernoi black; and, in comparison with the Kouban, it may be called a rivulet.

Arabat is built on the sands between the Sea of Azoff and the Sirwash, or Putrid Sea. A sort of natural dyke, starting from the very foot of the ramparts of Arabat, runs directly northwards, between dashing waves on one side, and, on the other, stagnant and pestilential waters. This narrow causeway is intersected towards the northern extremity by a canal of about 300 feet long, forming a communication between the two seas, and is designated a strait. This dyke is known as the Tongue of Arabat, and called Tonks. It is fifty-two miles long, and is but a few feet above the level of the sea. "The Sirwash is divided into two sorts of gulfs, one of which to the west bounds the Isthmus of Perekop; and the other, which is called Sikis, bends to the south towards Theolosia.

Perekop is the portal of the Crimea, and in the days of Tartar rule was called Or-Gapy, or the Golden Gate. Its present name, derived from a Russian word, signifies "a trench between two seas," and exactly describes its position in the geography of Taurida. Herodotus, Strabo, and Pliny were of opinion that, in former ages, Taurida was completely severed from the Caucasus, which is highly probable, for the Isthmus of Perekop is now only five miles in length.

Kaffa is the ancient Theodosia. In very early times it was named Ardenda, or the Town of the Seven Gods. While in possession of the Genoese, it was styled Crim Stamboul, or the Constantinople of the Crimea.

At the end of the tongue of Arabat, and on the other side of the canal or strait, is Genitchi—a modern town, growing into commercial importance. Berdiansk also is a new emporium of trade: and, higher up on the coast of the government Ekaterinoslaf so named in compliment to the Empress Catharine II.—stands the rising city of Mariompol, on the embouchures of the rivers Kaltchouk and Kalmious, backed by a productive territory.

Taganrog is situated at the head of the Sea of Azoff, and celebrated for its salubrity. Here Alexander I. died, having repaired it, in the hope of renovating his shattered health. In a letter from Catharine II. to Voltaire, dated 14th March, 1771, she says that "After the capture of Azoff, Peter the Great, wishing to have a port on the Sea of that name, fixed on Taganrog. He hesitated for some time after its foundation as to whether he should build the city of St Petersburg on the Baltic, or raise one at Taganrog. Circumstances finally decided for the former, but no advantage was gained with respect to climate: at Taganrog there is scarcely any winter, while ours is exceedingly long."

Rostoff is washed by the Don before the waters of that river are divided and distributed among the channels which form its mouth, and is a great emporium of trade. This region is one of the most important in the Russian empire. Among other cities it contains Voronetz, seated on the high banks of the river from which its name is derived, and a few versts from the spot where it falls into the Don. It is one of the largest, finest, and most populous towns within the dominions of the Czar, and lends its name to a government characterised for its fruitfulness, especially in corn. It is accounted one of the most ancient towns; but the exact epoch of its foundation is unknown. It is spoken of, however, as existing in the twelfth century. Its importance dates from the reign of Peter the Great, who resided there for some time to superintend the construction of his ship. From Voronetz a few vessels were floated into the Don, and thence into the Sea of Azoff, which were of great service in the expedition against the town of that name. The dock was afterwards removed to Ustis, at the confluence of the Voronetz and the Don, and finally to the fortress of Rostoff, at the embouchure of the Don. Voronetz contains some cloth manufactories, tanneries, and soap and tallow works, and, during peace, carries on a considerable commerce with the Black Sea.

The town of Azoff lies south-east of Rostoff, and its possession was the earliest military and naval exploit of Peter the Great; but he was repulsed from its walls after losing 30,000 men. Two years afterwards, or in 1695, he made a second and completely successful attack; but was obliged to surrender his conquest to Sultan Achmet III., in 1711, by the treaty of the Pruth. It was again ceded to Russia, in 1774, by the treaty of Kainardji; by virtue of which, and the subsequent convention of 1799, Russian vessels were allowed to navigate the Black Sea, and the passage of the Dardanelles was opened to them. From that period the commerce of Russia spread itself extensively and rapidly both in the Sea of Azoff and in the Euxine.

The eastern shores of the Sea or Azoff are guarded by a military line, which extends from the mouth of the Kouban to the mouth of the Terek, which empties itself into the Caspian. This line is guarded by the Cossacks, now called Tchernomorskii. By the ukase of the 30th June, 1792, the Empress Catharine gave up to them the peninsula of Taman, which depends on the government of Taurida, and all the territories lying between the river Kouban and the Sea of Azoff, up to the rivers Yea and Laba. Ekaterinodar, marked on our Chart, is the capital of these Cossacks

The success of our fleets in these waters has given us as complete command of the Sea of Azoff as we have possessed of the Euxine; and the export trade of the whole of the territory bordering its shores, and far away into the interior—whether it be the produce which finds its way down the Don into the Palus Mæotis, or into the Black Sea down the Dnieper, or the Dniesterlies—at the mercy of the Allied fleets.

ANAPA—SOUJAK-KALE—GHELENDJIK.

The evacuation of Anapa by the Russians, as reported by the Electric Telegraph, is one of the most satisfactory proofs of the breaking down of the great Northern despotism. In surrendering Anapa to the Circassians, the Russian General abandons not merely a strong fortress, but breaks up one of the chief lines of communication with the Transcaucasian provinces. A few weeks ago the *Invalide Russe* contained a report from General Khotomontoff, in which he stated that he had inspected the fortifications of Novorossisk (Soujak-Kalé) and of Anapa, and found them in good order, and "the troops full of ardour, and ready to receive the enemy." A very short time has shown what reliance to place on such reports. After twenty-five years of incessant warfare, in which the Russians are said to have lost 20,000 men annually, they have been forced to give up Circassia to its brave inhabitants.

The position of Anapa is of very considerable importance, both in a military and commercial point of view. The fortress occupies the northern extremity of the Circassian mountains on the shore of the Euxine, and is only forty-six miles from Kertch, at the entrance of the Sea of Azoff. The fortifications consists of a long sea-wall, a citadel on a perpendicular calcareous rock, and some bastions on the land side. The town is inhabited by a miscellaneous population of Circassians, Tartars, Greeks, Jews, Armenians, Russians, and others, to the number of five thousand. The adverse relations of its masters with the tribes inhabiting the mountain country in its rear have almost neutralised the great advantages offered by its situation, and prevented its growth. Its exports are at present grain, tallow, butter, hides, peltries, wax, &c. It is, however, as a military post that it has been most prized by Russia, most deplored by Turkey. The fort, built by the Turks in 1784, was taken by the Russians in 1791 and in 1807, and only given up with the greatest reluctance. In May, 1828, a detached Russian corps, under Prince Menschikoff, assisted by the fleet, consisting of eight ships of the line, four frigates, and twenty-one corvettes, laid siege to Anapa, and with great difficulty surrounded the place with a strong line of circumvallation, intersecting the neck of land on which Anapa is situated, and extending on each side to the sea. In a few days the works were advanced to the glacis, and, three breaches having been made, the Governor was summoned to surrender. The garrison had consisted of three thousand men; they had defended the fort for forty days; the "untoward event" at Navarino had destroyed the fleet which might have brought them relief; and nothing remained but to surrender.

Upon the conclusion of the war Anapa was not restored; at the peace of Adrianople it was ceded to Russia, with all the coast towns and forts, from the Kouban to Fort St. Nicholas. The name of this last fort will be remembered (although its Turkish denomination of Shaf-katil is, perhaps, better known) as having been taken by the Turks at the opening of last year's Asiatic campaign. Anapa, at the other extremity of the coast line, closes the list. At any other time the transfer of this military position from the Russians to the Circassians—the most vigorous and constant of their enemies—might have been deemed an event of considerable importance; but its evacuation at the present moment is important.

Soujak-Kalé, or Novorossisk, as the Russians call it, was abandoned by the Russian garrison a few weeks ago, the troops falling back on Anapa, and, not finding themselves safe even there, they are said to have retreated beyond the Kuban, that is, if the Circassians allowed them to do so, as a retreating army would find some difficulty in fighting its way through a hostile population.

Baron Haxthausen, in his "Transcaucasia," speaks of the first view of the harbour of Soujak-Kalé as extremely beautiful. It lies very advantageously, the sea forming a small and deep bay, surrounded by lofty mountains, the narrow entrance being formed by two projecting headlands. As a harbour it possesses little value, the bottom of the sea within it being so rocky that anchors have difficulty in holding. The Bora, or north-east wind, is also said to set in frequently with unexpected fury, and strand the vessels with a fearful shock.

Ghelend jk, another of the Russian military posts on the Circassian shore, of which we have given an Engraving this week, was abandoned to the natives last summer. It is described as being a place of more importance in a military point of view than Novorossisk, and as possessing the advantage of a more secure anchorage than is to be found at some of the other harbours on that coast.

The accompanying Views are from sketches by Captain Gordon, of the Royal Engineers.

RUSSIAN FORTRESSES ON THE COAST OF CIRCASSIA.

GHELENDJIK.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

THE King of Portugal and the Lord Mayor stand as rival lions in the estimation of the Parisian public: both are alike followed and féted, both have alike their sayings and doings chronicled in the *salons* and the papers, and both enjoy in a pretty equal degree the attention and interest of society. A magnificent ball has been offered to the King of Portugal and the Duc de Porto by the Préfet de la Seine; and a variety of other fêtes are taking place, or are in contemplation. Last week, after the presentation of the Lord Mayor's address to the Préfet and the Municipal Commission of the Seine, took place a magnificent banquet of nearly 400 covers; at which appeared—besides the Lord Mayor and Aldermen, and the French Civic authorities—the English Ambassador, the Ministers, the high functionaries, and various foreigners of distinction. The orchestra and a chorus, on the health of our Queen being proposed, struck up "God Save the Queen;" and a cantata was performed, composed by M. Gounod expressly for the occasion. Nothing could be more complete than the *entente cordiale*, which has manifested itself on all occasions, between our municipal authorities and the French of all classes with whom they have come in contact. The King of Portugal and his brother, attended by the officers who accompanied them, went to visit the Lord Mayor and the Préfet de la Seine, at the Hôtel de Ville. The young King and the Duc de Porto have already visited nearly all the principal public monuments and institutions in Paris, and show the most intelligent interest in all that is displayed to them; they have also appeared at several of the theatres, in company with the Emperor and Empress.

It is announced that the young Archduke Ferdinand of Tuscany is about to visit this capital.

It appears that change of air being considered necessary for the health of the Empress, she purposes, on the departure of the King of Portugal, which is expected to take place on or about the 25th, to proceed to the Eaux Bonnes, for a month or five weeks. She will return to complete the preparations for the arrival of Queen Victoria, whose visit is looked forward to with the utmost anxiety.

On Sunday, on the occasion of the display of the Grandes Eaux at Versailles, took place a curious assemblage of the physiognomies, languages, and costumes of the various nations now assembled here. The day was lovely, and nothing could exceed the gaiety and brilliancy of the scene. In fact Paris, since the arrival of the fine weather, has assumed a new aspect, and looks as gay as before it was gloomy; and since the revolution of 1848 it has never worn the same outward aspect of prosperity and luxury as it at present displays, despite war calamities and war prices.

The Cattle and Poultry Show in the Champ de Mars has created great interest and attention among the public here, though the high price of entrance, three francs, has had the evil effect of preventing its proving useful to the class most interested in such exhibitions—the cultivators and country people. The English exhibitors were, as may be supposed, peculiarly successful. The fancy fowls, which are, for the most part, almost unknown in France, were the objects of particular interest and attention, especially those of Prince Albert

Grievous accounts arrive from some of the provinces of the inundations taking place there. At Toulouse, in the department of Cher, at Tarbes, Albé, Carcassonne, Pau, &c., crops, buildings, and bridges have in many places been destroyed, railroads damaged, and communication, for the moment, entirely obstructed.

The plan, mentioned some time since, of establishing subterranean railways in Paris has been brought before the Minister of Public Works, the Préfet de la Seine, and the Préfet de la Police. The object of this plan is to establish a communication, for the transport of heavy merchandise, with all the principal quarters and all the railway stations. The traction is to be operated by means of cables or chains, which will prevent the possibility of any of the accidents occurring where steam is employed as a propeller.

On Saturday evening the Emperor, the Empress, the King of Portugal, and the Duc de Porto, attended a brilliant soirée offered them by the Prince Napoleon, the honours of which were as usual performed by the Princess Mathilde. The King of Portugal presented to the Prince the grand cordon of the Order of the Tower and the Sword, which the latter wore during the evening. The reception was most brilliant.

The preparations for the Queen's reception are already far advanced—the choice of furniture, liveries, and persons to attend upon her Majesty being already decided upon. The Préfet de la Seine, the Municipal Councillors, and some of the Aides-de-Camp of the Emperor, are to proceed to meet the Queen on her landing at Calais

On Sunday took place the opening of a new *restaurant* which promises to have a prodigious success. This is in the *salle* Montesquieu, built some years since for a bazaar; it is capable of containing upwards of 500 to dine with ease. The dinner is simple, but reasonable in price, and served with the utmost celerity. The bill is presented, paid at a counter, receipted, and serves as a passport at the door of *sortie*. On the first day upwards of 1000 persons breakfasted and dined in the establishment

THE FINAL VIENNA CONFERENCE.

The last of the Vienna Conferences took place on the 4th inst, and was attended by the following parties: For Austria, Count Buol-Schauenstein and Baron Prokesch-Osten; for France, Baron Bourqueney; for Great Britain, the Earl of Westmoreland; for Russia, Prince Gortschakoff and M. de Titoff; for Turkey, Aali Pacha and Sharif Effendi. Count Buol stated that, as a last resource, Austria was prepared to make another proposition intended to settle by way of compromise the disputed point of the limitation of the naval forces of Russia in the Black Sea. In the eleventh Conference, held on the 19th of April, M. Drouyn de Lhuys had suggested that, as Russia peremptorily objected to treat with the other great Powers on the limitation of her own naval forces, an expedient might be found to meet this difficulty, by bringing about a direct arrangement between Russia and the Porte to adjust the balance of their respective forces, which arrangement should have the same validity and effect as the general acts of the Conference. To this was added Lord John Russell's most unfortunate declaration of the 19th of March, that the best and most admissible conditions of peace would be those which should be most consistent with the honour of Russia, as well as with the security of Europe. Upon these hints, which certainly do no credit to the sagacity or firmness of our negotiators, the Austrian Cabinet set to work to construct its final scheme, to the following effect:—It proposed, in the first place, that the great Powers should bind themselves to respect the independence and territorial integrity of the Ottoman empire, and should bind themselves to consider every act or event of a nature to infringe upon it *as a question of European interest*. Secondly, that the Plenipotentiaries of Russia and Turkey should propose by common agreement to the Conference the equal amount of the effective naval forces to be kept up by them in the Black Sea, such amount not to exceed the number of Russian ships now afloat in that sea, and that this agreement should form an integral part of the general treaty; the Straits to remain closed, but each of the other Powers to be authorised by firman to station two frigates in the Black Sea, and in case of attack the Sultan to open the passage to all the naval forces of his allies.

A considerable amount of diplomatic tongue-fence took place, the net result of which was that Prince Gortschakoff condescended to say that "he finds in the general principles of Count Buol's project the basis of a possible solution of the third guarantee." The English and French Ambassadors both declared that their instructions were exhausted; and thus the solemn farce ended.

THE WAR IN THE CRIMEA.

The retreat of the Russian army across the Kouban appears to have been in consequence of an apprehended attack by the natives, assisted by a detachment of French troops. A private letter from the Crimea, dated the 2nd inst., states that the Allied Admirals in the Sea of Azoff had demanded of General Pelissier a reinforcement of troops, in order to continue their operations on the coast of Asia. Their demand had been complied with, and four battalions of French troops had embarked at Kamiesch on the 31st ult. The object of the Admirals was said to be to attack Anapa, where the Russians had concentrated all their forces. It was on the 5th inst. that the Russians evacuated the last of their strongholds in Circassia, and the news of their having done so would, no doubt, enable the four battalions of French troops to return to Kamiesch, where their services will, probably, soon be required in a much more hazardous undertaking than the storming of Anapa. It appears, however, that the Allies now see their way to the accomplishment of the great object upon which they have been so long engaged. The letter of the 2nd inst. states that the division which crossed the Tchernaya, under the command of General Canrobert, supported by General Bosquet, had established and fortified a *tête du pont* in front of the Russian fortifications. The Turks were encamped to the right of the hillock in front of the Tchernaya, while the Piedmontese occupied the heights which extend from the Tchernaya to the sea. It was said that General Pelissier would advance when he had received a sufficient supply of horses and mules. In the meantime the garrison of Sebastopol is described as having become demoralised. The troops now perceive that they are losing ground every day, and that, notwithstanding their tenacity, the town must fall at no distant period.

The correspondence between the Governors of Sebastopol and Kertch, found in the latter town, shows the Russians to be very tired of the war, and that there is much sickness among them. One of the letters found orders the preparation of 5,000 beds in the different hospitals of the peninsula. The *Presse d'Orient* of the 4th states that the French prisoners who have returned from Odessa estimate the total number of Russian invalids throughout the Crimea at 100,000. They say that the typhus fever, which broke out at Sebastopol in the spring, carried off an immense number. They confirm the fact that all the provisions for the Russian army were drawn from Kertch and Kaffa, while the reinforcements arrive from Perekop.

General D'Autemarre, who has been left in command of Kertch, corroborates this statement, which must be very discouraging to the Anglo-Russian party. He says:—"The Russian army, deprived of Kertch, and disturbed at Arabat, will be reduced to the Perekop road only, which is insufficient for their supplies." Rear-Admiral Lyons states also that the transit of rations from the Sea of Azoff to Sebastopol, which is now put down, has been going on at the rate of fifteen hundred carts daily. The quantity of Government stores destroyed by the Allies he estimates at four months' rations for 100,000 men. If the soldiers in Sebastopol were actually short of bread six weeks ago, as the letter of a Russian officer in that place represented them to be, we may be quite sure that they will have to give in very soon, if a general engagement do not take place.

As regards the total number of Russian troops in the Crimea, they seem to have been greatly exaggerated. General D'Autemarre says—

The force which had been charged with the defence of the [illegible] of Kertch] may be estimated at 6000 men. General Wrangel, who commanded them, had several times applied for reinforcements. A letter from General Gortschakoff which has fallen into our hands informs him that not only will no reinforcements be sent to him, but orders him to send all his cavalry to Sebastopol.

CAPTURE OF THE MAMELON.

The brief announcement in our last publication that the bombardment was recommenced on the afternoon of the 6th was speedily followed by news of a most important and brilliant movement by our gallant Allies on the Mamelon and its supporting works, which were carried, in a short but bloody fight, on the evening of the 7th. The Mamelon, as most of our readers must be aware from the frequent references made to it in the course of the siege, was one of the most formidable of the exterior defences of the town. It is a hill, in front of the famous Malakoff Tower and batteries, strongly fortified by the Russians, and before which many of the extensive rifle-pits, recently captured by the French, were situated On the eastern side of the Mamelon knows as the Careening Bay, and therefore to the north east of the Mamelon, the external defences of the town were completed by two formidable redoubts which figure in the Russian despatches as the Selinghunsk and Volhynian Redoubts, and these also were attacked and carried on the 7th. The assault was made at the unusually early hour of half-past six in the evening, and in the course of an hour the assailants were masters of the entire works, having captured no fewer than 73 guns and 502 prisoners, of whom 20 are officers. The battle seems to have been desperate, but the importance of the position attained justifies even the risk and the loss on the side of the Allies. General Pelissier had apparently been guided in his decision to attack early in the course of the bombardment, and in force, by the fact of the Russians on former occasions so speedily repairing damages to their works, and then recommencing to annoy the Allies by night sorties. The latest despatch from General Pelissier is of the 9th inst, announcing that "all the demonstrations of the enemy against the conquered works have been fruitless," and that they had completely abandoned to us the right shore of the Careening Bay," while we were also ready to harass or destroy by the fire of our mortars the Russian vessels which had sought refuge in the Artillery Bay, near the mouth of the harbour.

The line of the defences of Sebastopol on the eastern face were, as our readers probably know, confined, previously to February last, to the grounds south of the Careening Bay. The whole south coast of the Great Harbour had, up to that time, been quite in the power of the enemy; but when the French broke ground from the hills above Inkerman, and began to erect batteries intended to command the Great Harbour, the Russians threw up these redoubts on Mount Sapoune. This is a steep hill, with a slope towards Inkerman, and a precipitous descent in its rear towards the waters of the roadstead. At the time they were begun the operation was regarded as one of great daring, because there was no retreat from the position; at the same time its occupation was a decided and annoying check to the advance of our Allies. Consequently General Canrobert ordered an attack upon the redoubts in February and March last, but without success, because it was found that the works were exposed "on every side to the Russian artillery." We therefore conclude that the faces of the Russian batteries which swept this rugged hill were silenced by the heavy fire of the 6th and 7th June.

Nor have the English force been without their share of honour, risks, and losses. They attacked a position in front of the Redan, known as "the Quarries," and succeeded in taking and maintaining the place, though not without considerable loss, including, it is said, ten officers. The result of these operations is to bring the besieging force nearer and nearer to the town, and to hem the garrison closer within the line of batteries that girt it, and to bring these, of course, more immediately under the influence of our fire.

THE BALTIC FLEET.

The only events to be recorded in the Baltic this week are the taking of a few coasting vessels belonging to the enemy, and a reconnaissance of Cronstadt by Admiral Dundas and his French colleague. From the survey taken, the position of the submarine piles outside the entrance to the harbour on the north side is said to have been ascertained. Three line-of battle ships and two frigates are moored across the harbour's mouth. Along the line of coast leading to it several additional earthworks have been thrown up, and the defences generally have been materially strengthened since the fleet was at anchor off Cronstadt in 1854. In addition to the line-of battle ships lying under shelter of the forts, there is a large flotilla of gun-boats; the harbour is so thickly studded with them that it is impossible to count them accurately, but their number is estimated at little short of 200.

On a previous occasion the two British Rear-Admirals made a reconnaissance on the northern side of Constradt. The *Merlin* having stood in shore as far as practicable, they embarked in their respective gigs and proceeded within 1400 yards of the spot where the enemy's vessels blockading the channel leading to Cronstadt lay at anchor. The latter, however, did not fire on them, their object being to make them prisoners, which they attempted, but fortunately were prevented in accomplishing by the officers on board the *Merlin*, who, observing the enemy's intention, promptly made signal "that two Russian boats were in chase," hoisted the "recall" for all boats, and fired a gun to enforce immediate obedience to the signal, as is the custom in the service on important occasions. This circumstance was sufficient to convince the Admirals that their opponents were making some important movement, and induced them to return to the *Merlin*, where they were apprised of their narrow escape.

It appears that not one of the larger class of vessels can approach the north side of Cronstadt nearer than two and a half miles, a distance far too great for the heaviest shot they can throw to produce any impression on the batteries. The class of ships required is such as can carry four of Nasmyth's wrought-iron guns, now in course of formation, which are to throw shot 14 inches in diameter, of a cylindrical shape, and of a weight of from 4 cwt. to 10 cwt., with a maximum charge of powder of 50 lb. A dozen of these ships, constructed to draw not more than ten feet of water, in conjunction with an adequate number of steam-gun-boats, will be able to penetrate the narrow channels and creeks, and soon smash to atoms the strongest works of masonry built by the hands of man.

AMERICA.

The Mail steam ship *Baltic*, which left New York on the 30th ult., arrived at Liverpool on Sunday.

Several persons, who had been committed to gaol charged with enlisting recruits within the United States for the purpose of serving in the war in the Crimea, had been examined before the United States Commissioners' Court. The result was an adjournment. Three persons had also been examined in the same Court, charged with fitting out a brig at the port of New York for the purpose of the African slave trade. This case was also adjourned, on the parties finding bail to a large amount.

The election held to fill vacancies in the Legislature for Kansas had resulted in favour of the pro slavery candidate.

Accounts from the plains, received through various channels, agree that the Indian tribes were assuming a very hostile attitude against the whites, the combination of the Sioux Indians for this object was confirmed.

The Canadian Legislature had been prorogued by his Excellency Sir Edmund Head. A bill for applying the principle of popular elections to the House had been thrown out.

THE OVERLAND MAIL.

On Monday last the steamer *Calcutta* arrived at Trieste, in 118 hours, from Alexandria, with advices from Calcutta to May 4th; Madras, 9th; Bombay, 12th

There is nothing new from India. Lord Dalhousie's health was indifferent. Trade was very depressed, and limited.

THE COURT.

The Court has been again enlivened this week by a Drawing-room—the last of the season—which took place on Thursday.

On Saturday her Majesty received a visit from the Duchess of Cambridge, and afterwards drove out in an open landau. Prince Albert visited Sir Edwin Landseer's studio in the afternoon, and in the evening went to the Opera house, on Tower-hill, and presided, as Master of the Corporation, at the dinner of the Elder Brethren. His Royal Highness afterwards joined her Majesty at the Royal Italian Opera

On Sunday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, and Prince Alfred, the Duchess of Kent, the Princess of Hohenlohe Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe, attended Divine service in the private chapel of Buckingham Palace. The Hon. and Very Rev. the Dean of Windsor officiated

On Monday Prince Albert, with the Prince of Wales and Prince Alfred, rode on horseback and visited the Surrey Zoological Gardens. His Royal Highness drove out with her Majesty in the afternoon, and in the evening the Queen and the Prince honoured the concert of the Philharmonic Society at the Hanover-square Rooms with their presence The Princess Royal, and Prince Alfred, were accompanied by the Prince of Wales, Prince Alfred, the Princess of Hohenlohe-Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe

On Tuesday the Queen held a Court at Buckingham Palace, at which the Hon. Mildred Fillmore, late President of the United States, was presented to her Majesty, at an audience [illegible] by the Earl of Clarendon, the Queen's Principal Secretary of State for Foreign Affairs. Mr. James Hudson, the Queen's Minister Plenipotentiary to the Court of Sardinia, and Mr. Percy Doyle, her Majesty's Minister Plenipotentiary to the Republic of Texico, were also presented to the Queen, by the Earl of Clarendon. In the afternoon her Majesty and Prince Albert went to Twickenham, to visit the Duke and Duchess d'Aumale, accompanied by the Princess of Hohenlohe-Langenburg

HER MAJESTY'S DRAWING-ROOM

The Queen held a Drawing-room on Thursday afternoon, in St. James's Palace. Her Majesty and his Royal Highness Prince Albert arrived from Buckingham Palace at twenty minutes past two o'clock, escorted by a detachment of Life Guards

The Queen wore a train of alternate stripes of light blue moiré antique and white satin, the whole embroidered in a running pattern of blue and white flowers, trimmed with white blonde and bouquets of red, white, and yellow carnations. The petticoat was white satin, trimmed with white blonde, bows of white satin ribbon, and bouquets of carnations to match the train. Her Majesty's head-dress was composed of diamonds and feathers

The Hereditary Grand Duchess of Mecklenburg-Strelitz wore a train of blue and white striped moiré antique, trimmed with point lace and bows of white satin ribbon. The petticoat, of blue silk, was entirely covered with white point lace. The stomacher of the dress was ornamented with diamonds and pearls. Her Royal Highness wore a pearl diadem, and also white ostrich feathers and lace lappets.

The Foreign Ministers were first introduced; and afterwards the general circle, which was very numerous

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Archdeaconry:* The Archdeaconry of Carlisle has been conferred upon the Rev. Dr. William Jackson, Rector of Lowther, and domestic chaplain to the Earl of Lonsdale. *Rectory:* The Rev. W. P. Goode to Earsham, otherwise Earsham All Saints', in Norfolk. *Vicarages:* The Rev. W. W. Trumpeter Clifford, Herefordshire, the Rev. A. Boodle to Little Allington, Northamptonshire; the Rev. R. O. J. Thorpe to [illegible] Cheshire, the Rev. W. H. Blunt to Bracby, near Grantham. *Perpetual Curacies:* The Rev. T. B. Simpson to Bassenthwaite, near Keswick; the Rev. J. J. Manley to Horsham, Surrey

CONSECRATION OF ST. ANDREW'S CHURCH, WESTMINSTER.—A new church, the foundation stone of which was laid on the 26th of May, 1854 (Ascension-day), situate in Ashley-place, at the western end of Victoria-street, Pimlico, was consecrated on Tuesday morning by the Bishop of London.

WATFORD CHURCH.—We regret to record the repetition on Sunday last of the painful scenes presented on the 3rd instant at Watford Church. At seven o'clock all the school children left the church, and with them many families. Immediately following the sermon the move became general, and the minister had but at most fifty of his flock left out of a densely crowded congregation.

NAVAL AND MILITARY INTELLIGENCE.

ANOTHER ship-of-war, of the largest dimensions, is about to be laid down the Dockyard at Pembroke. She is to carry 130 guns, and one pivot-gun, and is to be called the *Howe*, in the room of the ship of that name of 120 guns, broken up a few years since. The *Howe* will be several feet longer than the *Duke of Wellington*, and, in order to lay her down, one of the slips is to be lengthened; and this is being rapidly effected, and when completed her building will be immediately proceeded with.

NEW barracks are to be erected in the immediate vicinity of Hobbs' Point, and it is said that a contract for huts to accommodate 1000 men has been taken by the Ordnance, such erection to be finished in two months, it being the intention of Government to concentrate a large Militia force at this point.

ORDERS have arrived at Sheerness for the *Geyser*, 6 guns, paddle-wheel steam-ship, to receive on board, in addition to her present armament, one 42-pounder 10 feet 6 inches, 85 cwt., gun, to be used as a bow chaser between decks. During the use of this gun the men will be entirely under cover from the fire of an enemy. The *Geyser* is under sailing orders. She is to take with her the *Blade* gun-boat, Lord Edward Henry Cecil, Acting Lieutenant, in command. The *Blade* is armed with two 32-pounder guns, pivots—one forward, the other aft. She also takes the mortar-vessels, *Blazer* and *Surly*, with her direct to the Baltic.

A NEW Dock was opened in Portsmouth Dockyard on Tuesday, by the entrance into it of her Majesty's new yacht, to be coppered. Its length is 335 feet; breadth, 82 feet; ditto, at high water, 23 feet (spring tides); width of the entrance, 70 feet. It is 50 feet longer than any other in her Majesty's docks, and has cost in the aggregate £63,000.

THE British Foreign Legion is now being vigorously recruited by detachments arriving daily from the Continent. The depôt is to be removed from Dover to the Camp at Shorncliffe.

ORDERS were received at Portsmouth Dockyard on Tuesday to prepare and render fit for immediate service the whole of the ships' boats and others capable of carrying guns or armed men as a boat expedition being wanted for the shallow waters of the Sea of Azoff. The utmost activity prevails in their equipment. The dockyard battalion's armed launches are already pressed into this important service. Powerful steamers will carry out this formidable and numerous flotilla to the scene of their contemplated operations.

IMPERIAL PARLIAMENT.

(Continued from page 595.)

HOUSE OF LORDS. THURSDAY.

The Earl of SHAFTESBURY, in moving to refer his bill to limit the hours of work in respect to needlewomen to the Select Committee on bills for regulating trade, gave an appalling account of the sufferings endured by those poor women, who were frequently obliged to labour for seventeen or eighteen hours a day, and who were, consequently, victims to consumption, loss of sight, and other dreadful casualties.

Earl GRANVILLE would not object to the motion of the noble Earl; but he thought that the same principle which justified legislation on behalf of milliners and needlewomen would equally justify legislation in respect to domestic servants

After some conversation the motion was agreed to.

The Gold Finger Rings Bill was read a second time.

The Cambridge University Bill was read a third time and passed.

The Administration of Oaths Abroad Bill passed through Committee.

The Brighton Incorporation Bill and the Ecclesiastical Courts Bill were severally read a third time and passed.

The County Palatine of Lancaster Bill passed through Committee.

HOUSE OF COMMONS.—THURSDAY.

The House met at twelve o'clock, and was occupied up to four o'clock discussing the Scotch Education Bill. The preamble, after much opposition, having been agreed to, the first clause was under discussion when the House adjourned at four o'clock.

The House resumed business at six o'clock.

THE VICTORIA GOVERNMENT BILL.

Lord J. RUSSELL moved the second reading of this bill.

Mr. BELL asserted that the bill was opposed to the wishes of the majority of the colonists, and moved, as an amendment, that it be read a second this day six months

Mr. MIALL seconded the amendment.

Mr LOWE objected that in the bill this House encroached upon the functions of the Colonial Legislature and it allowed the Colonial Legislature to encroach upon the Imperial functions. The noble Lord called upon the House to legislate upon matters of which they knew nothing, and upon which they ought to take evidence, or they would be legislating altogether in the dark. He thought that they ought not to proceed further with this bill, but to send it out for the consideration of the Colonial Legislature.

Mr. J. BALL defended the bill

Mr. ADDERLEY said, his objections to the measure would be removed if power were given to the Colonial Legislature to alter the bill so far as related to the portion contained in the bill of 1850, without being again obliged to send it home for approval; otherwise he would give the measure his unqualified opposition, believing that it would create disaffection in the colony, and eventually, perhaps, its alienation.

Sir J. PARINGTON supported the bill, as he considered it a measure in conformity with the arrangement entered into between the colony and the Government of Lord Derby a few years ago.

Mr DUFFY had many objections to urge to the bill, but would reserve them until the measure was in Committee

Lord J. RUSSELL replied to the objections that had been urged.

After a few words from Mr. A. PELLATT and Mr. HADFIELD,

Mr. PEEL withdrew his amendment, and the bill was read a second time.

The New South Wales Government Bill was read a second time, after considerable opposition on the part of Mr. Lowe (who moved the postponement of the measure for six months) and on that of several other hon. members.

Several other bills on the paper were advanced a stage.

HOUSE OF LORDS.—FRIDAY.

Their Lordships met at half-past ten o'clock this morning, when the Validity of Proceedings (House of Commons) Bill. which came up from the other House, was passed through all its stages

ROYAL COMMISSION.

At four o'clock their Lordships again met, when the Royal assent was given, by commission, to the following bills, viz., Newspaper Stamp Duties, Sewers (House Drainage), Registration of Births (Scotland), Ecclesiastical Property (Ireland), Brighton Incorporation, Validity of Proceedings (House of Commons), and about forty other local or private bills.

The Royal Commissioners were the Lord Chancellor, the Duke of Argyll, and the Earl of Harrowby.

RELIGIOUS WORSHIP BILL.

The Earl of SHAFTESBURY having moved the recommittal of this bill,

The Earl of DERBY moved, as an amendment, that the whole question as to the expediency of repealing or relaxing the law, prohibiting more than twenty persons assembling in a house for the purpose of prayer, be referred to a Select Committee. He thought that the bill of the noble Earl, however well intended involved a question of the gravest importance. The noble Earl, in his chivalry to clear away any obstacles in his path, was prepared to attack any object he cared not whether it was a windmill or a giant. He (the Earl of Derby) thought it would be much the safer course to refer the question to a Select Committee.

After some discussion, their Lordships divided: when the numbers were—For Lord Derby's amendment, 47: against it, 91: majority in favour of the amendment, 17.

The bill was then ordered to be referred to a Select Committee.

The Edmonton Parper Children Bill was read a third time.

The Administration of Oaths Abroad Bill, and the County Palatine of Lancaster Trials Bill were also severally read a third time and passed.

The Gold Finger-Ring Bill passed through Committee.

HOUSE OF COMMONS.—FRIDAY.

Lord NAAS asked whether the Government had sent out instructions to the Governor-General of Canada to make application to the Colonial Legislature for a grant of 1,000,000 acres of land, to enable her Majesty to offer settlements to such of her Majesty's foreign Legionaries as might be willing to settle in Canada? and, if so, whether it was the intention of the Government to offer similar settlements to the officers and soldiers of her Majesty's own army?

Lord J. RUSSELL, referring to the first portion of the inquiry, said that the matter was under the consideration of the Canadian Assembly.

Mr. F. PEEL, in reply to the latter portion of the question, said there was no such intention in the mind of the Government.

Mr. BRIGHT asked whether it was intended by the Government to rescind the order of Sir R. Gardiner, prohibiting, under heavy penalties, all unlicensed printing in the town and garrison of Gibraltar?

Lord J. RUSSELL could not give any distinct answer to the question. At the same time, he might observe that it was perfectly competent for the governor of a fortified place to suppress any printing operations which he considered dangerous to the place.

MINISTERIAL EXPLANATIONS.

Lord PALMERSTON, in reply to Mr. Otway, admitted that, on the subject of the settlement of the war, certain communications had taken place between himself and those members who had seceded from his Government at the time his Administration was formed; but, at the same time, he expressed his unwillingness to reopen the question.

Mr. DISRAELI thought that the noble Lord should have been prepared with a more satisfactory answer to the question.

Mr. GLADSTONE agreed with Mr. Disraeli, and expressed his regret at the repeated explanations which took place in that House, and which went up to a certain point and then stopped short, on the plea of official reserve. Speaking for himself, however, he begged to say that, at no time, either directly or indirectly, had he stipulated with the noble Lord or the head of the Government as to what conditions should or should not be kept in view in treating with Russia.

ADMINISTRATIVE REFORM.

Mr. LAYARD rose to bring forward his resolution on the subject of Administrative Reform, and which was as follows—Viz.: "That this House views with deep and increasing concern the state of the nation, and is of opinion that the manner in which merit and efficiency have been sacrificed in public appointments, to party and family influences, and to a blind adherence to routine, has given rise to great misfortunes, and threatens to bring discredit upon the national character and to involve the country in grave disasters." The hon. member, in commending his resolution to the favour of the House, proceeded to state, in the first place, that there were in this country many men of talent and efficiency who had been sacrificed to those family influences which had of late years been found to work so prejudicially to the State, and which many powerful parties out of doors were at length beginning to distrust which had crippled our Army abroad, and brought about many grave national disasters. He felt it his duty to bring on his motion, because there was a deep feeling prevalent abroad that there was something essentially wrong in our administrative system. The country, indeed, was beginning to grow distrustful of Parliament and of public men. He was the less reluctant to press his views upon the consideration of all parties, inasmuch as he had received numerous letters from the highest military officers, thanking him for bringing the matter forward, and exhorting him to persevere in the object he had taken in hand. The hon gentleman then proceeded to clear himself from the imputations that had been cast upon him in reference to the cases of Colonel Hardinge, Lord Burghersh, and Col. Wilson; and informed the House that in the observations he had made he had not made any personal attack, his object being only to attack a system. He then entered into a variety of illustrations with the view of showing how poor men, in all departments of the public service, and particularly in the Army, laboured in vain for promotion, while the sons and relatives of the dignitaries of the State were promoted with the most reckless disregard of their efficiency and previous achievements. Favouritism and partiality existed in high quarters. He next proceeded to analyse the constitution of the staff of the Army and to show that in several instances the Army Regulations as to the examination were totally disregarded only seven of the members of the body had obtained certificates from any military colleges, and out of nine other officers promoted during the Crimean war sixty-five were on the staff and the great majority of these had been promoted to the rank of colonel at once. Such promotion ought to be looked to, as he knew from personal knowledge that the officers were in many instances the most distinguished for gallantry and good conduct, but how could it be otherwise, when only one out of the whole staff of the army could never it might be found? What was the situation of Army Reform was mooted, it was always met with the cry of "vested interests." This objection, however, could not apply to the present question, putting an end to the purchase system. The Government had made nothing on the matter except and this was forced upon them—opening the Artillery service. In the face of such a significant apathy he felt himself fully justified in the course he was then taking

Mr TITE seconded the motion.

Sir S. NORTHCOTE admitted the inefficiency of the civil Service. but pointed out the difficulties in the way of a reforming Government from the short period which the heads of departments were allowed to remain in office, and partly from the outcry which would be made in the House itself if one man were raised over the heads of his seniors, or if a man were dismissed from what his chief considered incapacity. The great evil in the Civil Service was this—that there was no promotion from office to the higher appointments, and the consequence was that there was no energy or ability among the clerks. He condemned the scale of remuneration by which the young man was paid much below what his duty ought to receive. He also found fault with the superannuation system, and expressed his opinion that unless the system was altered in these respects the public could feel no confidence in the Government.

Mr. LEVESON GOWER, although an advocate for Administrative Reform, could not support the resolution before the House; because, in the first place, it speaks in a tone of despondency, which he thought most objectionable at that moment; and, in the next place, it does not point out any remedy to meet the evil complained of.

Mr. PEACOCKE supported the resolution.

Mr. GLADSTONE said that, though friendly to Administrative Reform, he could not support either the resolution or the amendment. He contended that the Civil Service could have a satisfactory system if the principle of patronage or nomination was destroyed, and an efficient examination instituted before admitting young men into the service. It was only by such examination that they could decide on the fact that that prevailed among the Civil servants themselves, that they were entitled to promotion according to their length of service and not according to merit.

Sir E. B. LYTTON then rose to submit the following amendment—"That this House recommends to the earliest attention of her Majesty's Ministers the necessity of a careful revision of our various official establishments with a view to simplify and to facilitate the transaction of public business; and, by instituting judicious tests of merit, as well as by removing obstructions in the fair promotion and legitimate reward, to secure to the service of the State the largest available proportion of the energy and intelligence for which the people of this country are distinguished."

The hon. baronet referred to the possession of power by the Whigs for the last twenty-four years, during which period the Cabinets were of a most exclusive character.

Mr. LABOUCHERE defended the appointments he had made when presiding over the Board of Trade.

The CHANCELLOR of the EXCHEQUER was glad that the question of Administrative Reform was brought before the House, where it would meet with a fairer examination than it would have at a public meeting to which admission could only be obtained by ticket, and where of course there could be but one opinion expressed. The resolution of Mr. Layard was practical enough, for its success must be the resignation of Ministers, because it would be fully equivalent to a declaration of want of confidence. The right hon. gentleman then went into details, to show that the Government were proceeding in the right direction, and he assured the House that they would make every exertion to remedy the evils complained of

Lord GODERICH moved the adjournment of the debate.

The House having divided, the motion for adjournment was carried by a majority of 240 to 29. The debate was then adjourned.

ADMINISTRATIVE REFORM.

MEETING IN DRURY-LANE THEATRE.

On Wednesday evening a public meeting, convened by the Association for the Promotion of Administrative Reform, was held at Drury-lane Theatre. The pit, boxes, and galleries were well filled, and the stage was occupied by a number of members of Parliament and gentlemen, supporters of the movement, among whom were Austin H. Layard, M.P.; James Bell, M.P.; Jacob Bell, Esq.; W. K. Norway, Esq., Secretary to the Reform Club; A. G. Otway, M.P.; Joseph Pellatt, Esq.; George Stagg, John Lowrie, E. Lovaine, W. Tite, M.P.; F. Bennoch. Mr. Critchley, M.P.; D. Mackenzie, W. Jackson, Esq., Hartlepool; Leigh Smith, B. Brown, W. Leaf, J. A. Nicholay, R. Harris, H. Ingram, Esq.; George Stagg, H. Bateman, R. Henderson, Sir Charles Napier, Norman Wilson, Joan Lupton, F. Hooton, W. A. Lyon, Captain Dawson, George Moore, J. B. Bentens, W. Chamberlain, W. Edgar, jun., Edwin Jones, C. D. Sibson, F.R.S.; W. Jackson, M.P.; Major Reed, M.P.; Captain Eastwick, Rev. J. B. Gray, M. Hullah, W. Kirk, Peter Graham, — Whalley, Esq., Johnston Neal, &c

Samuel Morley, Esq., who occupied the chair, said he had little idea a month ago that he should have been called to occupy his present position. He was one of a few earnest thoughtful men who believed that there was positive danger in the excitement of the public mind with regard to the existing state of things, and that there would be safety only in concentrating the danger with reference to that state of things which as a nation they complained of. They had consequently taken on themselves to call a meeting at the London Tavern, and how that invitation was responded to was well known. He denied that they had any wish to injure the aristocracy. A member of a noble family said to a friend of his, "If Administrative Reform goes on, what is to become of our younger sons?" Now, he (Mr. Morley) believed that question was not in the right solution of which the people was deeply interested. He would ask the question, if the present state of things of which we complain was not altered, what was to become of our younger sons? At the same time he denied that there was any desire to attack the aristocracy, but held that it was a duty to their children to remedy the existing evil, and if they let the opportunity pass it would be difficult to say what would become of their sons. The best thing the youthful aristocracy could do was to fit themselves for the government of the country.

Mr. Layard, who was hailed with immense and long-continued cheering, said, the present movement represented the intelligence, the wealth, and the enterprise of England. If he were called upon to divide England into two parties in connection with that movement, he should say, "On the one side you have all men of common sense and of good sense, all men of responsibility and of wealth, all men who, by their own toil, by their own intelligence, and by the sweat of their brow, have sought to raise themselves, and to do good public service; on the other side you have a small party who claim for themselves a monopoly of government, and who live, grow fat, and vegetate upon those exemptions and evils, which we, please God, are determined if possible to reform." Why, if that were not the case, was the chairman there that evening? As he (Mr. Layard) knew, he was a man of business—he was a man who essentially depended upon tranquillity and public quiet to enable him to accumulate that wealth, and to acquire that position, to which he was so justly entitled. And yet from him he saw around them assembled men who, he saw there representatives of literature, of art, and of science; and the chairman had read a letter from a gentleman who was the most distinguished man in the country, in the country, assuring them of his sympathy in the movement. What was it that drew such persons from their ordinary avocations? It was the conviction that these were times when agitation, however dangerous it might be, was necessary to correct greater evils than agitation itself produced. After referring to the doctrines of the Peace party as un-English and dangerous, Mr. Layard contended that even those politicians who were the most earnest in their desire for peace must see the necessity of carrying the war on with vigour and efficiency, so as to bring it most speedily to a safe and honourable conclusion. It was agreed by some that the late successes in the Crimea had done away with the necessity for the present association, but it must not be forgotten that many of these successes had been owing to the adoption of the grand rule which they urged upon Government—putting the right man in the right place. After a long period of inactivity, a new and vigorous man was appointed to the command of the French army. What followed? His name was scarcely mentioned in the united camps till success followed. The fact of the right man having been appointed encouraged the troops, and success followed, and would always follow if things were to go on the same principle. In following out the principles of the association the people must do their part. In every large town where a committee was organised they ought to call upon their representatives to the words of Lord Goderich, "not to cross the floors of Mr. Hayter." The House of Commons had hitherto been divided into two parties, neither of whom relied upon popular support. He wanted to see a third party—a national party—which would look after the interests of the people. Hitherto the House of Commons had been carrying on a great struggle unmindful of the people. The members were struggling for place, and knew nothing of what happened out of doors. They were like gamblers; everything was staked upon a throw; but the police were already at the door, and, if they went on much longer, the cards, the players, the lights, and the dice would all be taken. The Whigs had staked very heavily on the Liberal card, and they had won; but they showed no gratitude to the Liberal card. The moment they had pocketed the stakes they left the card to its fate.

The meeting having been afterwards addressed by Mr. Lindsay, Mr. Tite, M.P., Mr. Otway, M.P., and Sir C Napier, the chairman announced that the next meeting would be held on that day fortnight.

THE SILENT MEMBER. (No. XXI.)

PUBLIC opinion expressed itself long ago on the case of practical joking among the officers at Canterbury, but the opinion of the Commander-in-Chief has only just been published. As no new facts seem to have been brought under the notice of the authorities, there appears to be no very good reason for the delay that has occurred in coming to a decision at the War-office. Of course the habit of practical joking is condemned, and while two of those officers who have been guilty of it are to be punished by removal from the Army, a third in consideration of the punishment inflicted on the other two—is permitted to retain his commission. This mode of apportioning a penalty between three offenders, on a principle which involves the exercise of great severity upon two culprits as a reason for leniency towards a third, is not very satisfactory.

The law reports of the past week do not present a very encouraging view of the morality of the legal profession. Now and then we hear of the desire of the Judges to purify the practice of the law; but we are continually meeting with cases which prove that this desire is not very earnestly gratified. A few days ago the conduct of an attorney who had sworn a false affidavit was brought under the notice of the Court of Queen's Bench; when the Lord Chief Justice pronounced the judgment of the Court, that, after the lapse of a year, the attorney might be readmitted. It would, perhaps, be thought harsh to object to this decision, which implies a charitable hope that the false swearer may yet become worthy of the confidence of clients. That he will be quite as trustworthy as many other practitioners whose names are allowed to remain on the roll of attorneys is probable enough, for in the newspapers of a single day there are reports which show that lawyers may misconduct themselves, and that their misdeeds may be brought in vain under the notice of the Judges.

In one of the cases alluded to, an attorney had been entrusted with a bill to get it discounted, which he declared himself unable to do, though he pawned it for twenty pounds, which he put into his own pocket. Another attorney was employed to prosecute for the fraud—a duty he performed with all the zeal of virtuous indignation till the bill was restored to its right owner. At this point a lull came over the feelings of the attorney employed to prosecute, who made out his bill for the steps he had taken in the vindication of public morality. Finding himself unable to get his costs, the storm of virtuous indignation arose once more in his breast, and raged to such an extent that he could not reconcile it to his conscience to consent to the compromise between the owner of the bill and the attorney who had made an improper use of it. The Court of Queen's Bench refused to interfere against the original delinquent on the ground that others had committed faults subsequently to the offence of the first evil-doer. According to this principle it would seem to be the doctrine of the courts that an accumulation of wrong is a diminution of evil, and that, while in logic two negatives make an affirmative, two affirmatives in law constitute a negative. The fact of a plurality of delinquents shows a necessity for severity rather than for laxity, inasmuch as society would become rapidly demoralised if impunity were to be allowed to evil-doers on the plea that "one's as bad as the other." It is true that one attorney may have sought to bring another attorney to justice, because the former was disappointed of his costs. And this is no reason why justice should refuse to deal with a matter so brought before it, and thus repudiate the advantage which the quarrels of knaves are said to confer on the cause of honesty.

While on the subject of the morality of the legal profession, I cannot help alluding to a rather amusing incident which occurred the other day in the Court of Queen's Bench, when a barrister was urging the release of a tailor who had been committed to prison for not completing a contract he had entered into with his employer. Of course there was a learned gentleman on the other side; for where is the question that has not two sides, when a fee may be given on either? In arguing for the imprisoned tailor, the barrister exclaimed, "It might as well be contended that his learned friend on the other side came within the Acts and might be committed to gaol for not attending to his client's case." This was no doubt intended as a *reductio ad absurdum*; for what can be more ridiculous, in the eyes of a barrister, than the notion of committing counsel to prison for neglecting the interest, after having pocketed the money, of a client? The question, however, is rather suggestive to the non-professional mind, which is strongly disposed to ask why a tailor should be sent to prison for disappointing his master's customer of a suit, while there is no penalty whatever on a barrister who neglects a suit of a far more important character. The tailor's omission may have postponed the putting on of a new coat, but the barrister's neglect may have stripped the coat from the back of the unfortunate victim. The Court decided in support of the legal obligation on the tailor to complete his work; but at present there is nothing more binding than a moral obligation on the part of the barrister to fulfil his contract. Should the more stringent mode be adopted with reference to the gentlemen of the bar, there must either be a reform in the habits of many professional men, or the committals of learned culprits would be numerous.

As the season for travelling will soon be coming on, it is as well to bear in mind a decision that has just been given in favour of the right to refuse a steward's fee on a steam-boat, or rather in opposition to the assumed right of a Steam-boat Company to detain a passenger who refuses the payment of such an exaction. A student, traveling without luggage, was called on to pay eighteenpence for landing some imaginary luggage which he did not possess, and was detained on board the boat, just as a visitor to a tavern, after ordering and paying for a pint of sherry, might find himself arrested for a shilling for a bottle of stout which he had never had and never asked for. The people on board the boat, acting, as they believed, in the interest of their employers, not only detained the passenger, but abused him into the bargain, for which the Steam-boat Company will have to pay seventy-five pounds damages, and probably as much again to the lawyers on both sides; for some of these gentlemen "advised an attempt,—which failed,—to disturb the verdict. The jury appeared to think seventy-five pounds not at all too much by way of compensation for a couple of hours' detention on the deck of a steam-boat, with the running accompaniment of a volley of abuse from the authorities on board, who pointed him out as a "shabby fellow" to the lookers-on, because he did not exactly see why he should pay a fee for the imaginary landing of some mythic luggage. Let companies charge what they please for what they really do—taking it for granted, however, that people are always free to wait on themselves if they are disposed to do so; but it is carrying matters with somewhat too high and too exorbitant a hand to insist on a payment of eighteenpence for doing nothing. I will leave it to the company to calculate how many eighteenpences will be absorbed by the payment of damages and costs in this little affair, and the result may teach them that, while a fixed charge for a fixed service is a very good thing, it will be safer in future to make no charge at all where no service has been rendered.

THE OFFICERS' CEMETERY, CATHCART-HILL.

THE large Engraving upon the next page represents a spot in the Encampment before Sebastopol which is imbued with melancholy interest. It is named from its being the earthly resting place of a few of the brave officers who have fallen in the war. The group of memorials is picturesque, while it is affecting from its very simplicity. We need only state the names which these unpretending monuments bear. Commencing from the left, the grave with the pointed headstone and the low cross at the feet is the "narrow home" of Brigadier-General Fox Strangways. Next, with the head-cross and the plain footstone, is the grave of Sir George Cathcart, after whom the hill is named. The column, surmounted with a cross, is inscribed to Lieutenant-Colonel Seymour, of the Scots Fusilier Guards. Beyond it, leftward, is the grave of Brigadier-General Thomas Leigh Goldie; and that to the right is the resting-place of Lieut. Tryon, of the Rifle Brigade. Beyond the tombs a group are on the look out. How impressive is the juxtaposition of life and death!

THE OFFICERS' CEMETERY, CATHCART-HILL, BEFORE SEBASTOPOL.—(SEE PRECEDING PAGE.)

BEFORE SEBASTOPOL—ZOUAVES MAKING GABIONS.—(SEE NEXT PAGE.)

GABION-MAKING BEFORE SEBASTOPOL.

GABIONS are a very important material in the structure of field-works. They are large hollow cylinders of basket-work, which, being placed on end, and filled with earth, serve to strengthen the faces of batteries. They are generally placed in two rows, one above the other, and should reach to a height sufficient to protect the men in the batteries. In the siege of places where the ground is light and stony, as at Sebastopol, gabions come more largely into demand, than in places where the soil is better adapted for the construction of solid embankments. Our Engraving represents a party of Zouaves occupied in making gabions. The process will be easily understood. The staves forming the ribs of the gabion are fixed in the earth, in a circle of the required size, and the osiers are then interlaced through them, as in basket-work: when completed they are carried off to the field of active operations.

The illustration upon the preceding page has been engraved from a sketch by Mr. Armitage, by permission of Messrs. Gambart, who have dispatched this clever artist to the Crimea, to sketch the most eventful scenes of the war.

CALENDAR FOR THE WEEK.

SUNDAY, June 17.—2nd Sunday after Trinity.
MONDAY, 18.—Battle of Waterloo, 1815.
TUESDAY, 19.—Inigo Jones died, 1652.
WEDNESDAY, 20.—Queen Victoria's Accession, 1837.
THURSDAY, 21.—Quarter Day. Midsummer Day.
FRIDAY, 22.—Battle of Vittoria, 1813.
SATURDAY, 23. Leibnitz born, 1646: Akenside died, 1770.

TIMES OF HIGH WATER AT LONDON-BRIDGE,

FOR THE WEEK ENDING JUNE 23, 1855.

Sunday.		Monday.		Tuesday.		Wednesday.		Thursday.		Friday.		Saturday.

GREAT NATIONAL STANDARD THEATRE, Shoreditch. Engagement of the glorious WEBSTER and PAUL BEDFORD, of the Adelphi; miss JULIA POWER, of the Lyceum; and Mr. CHARLES VERNON, Adelph. Pieces, with Adelphi effects, including the immense favourite, "Harvest Home."

SIGNOR GIULIO REGONDI'S MATINEE MUSICALE will take place at WILLIS'S ROOMS on FRIDAY, JUNE 22, to commence at Three o'Clock precisely. Vocalists, Madme. Clara Novello, Madlle Emilie Krals (Her opera engagements Mr. Wilcox), Miss Lascelles, and Sig. or Marras. Instrumentalists: Harp, Mr. Boleyne Reeves; Concertina, Mr. R. Blagrove; Violoncello, W. Evans, Jr. Lake, and Sig. Gio in Regondi; Guitar, Sig. Giulio Regondi; Pianiste-Accompagnateur, Sig. Li Calsi. Reserved Seats Half-a-Guinea, to be had only of Signor Regondi, 36, Upper George-street, Bryanston-square; Unreserved Seats 2s. 6d. to be had at the principal music sellers.

ROYAL POLYTECHNIC INSTITUTION.—For One Night only, TUESDAY, the 19th inst., at Eight o'clock.—A grand MUSICAL ENTERTAINMENT will be given by Mr. GEORGE BUCKLAND, assisted by the following talented artists:—Messrs. T. Young, Montem Smith, Henry Buckland, and George Lane, consisting of selections from the Glees and Songs of the late Sir Henry Bishop, and other Composers.

THE ZOOLOGICAL GARDENS, REGENT'S-PARK. The collection of Living Animals includes a magnificent series of Lions, Lion Whelps, Clouded Tigers Hunting Dogs, and other Carnivora. Lizards, Tortoises, Rattlesnakes, and a pair of Hippopotami, together with an immense number of Birds, Reptiles, Fish, and other Marine Animals. The Gems of the Bat Life towards will perform (by permission of Colonel Parker) every Saturday, at four o'clock, until further notice. Admission 1s.; Monday, 6d.

ROYAL SURREY ZOOLOGICAL GARDENS.—Danson's Colossal Picture of the Assault. Extensive Menagerie. Marine Aquarium. Godfrey's Camival. Floral Carnival Spectacle of the Siege of Sebastopol. In which the various nations are represented by a party of our wounded soldiers from the Crimea. For full particulars see bills of the day.

ADAM and EVE.—This great original Work, by JOSEPH VAN LERIUS is now on VIEW at 52, PALL-MALL, opposite Marlborough-house, from Eleven to Six daily. Admission, One Shilling.

LONDON SEASON, BY DAY.—SATURDAY, at Three, Mr. LOVE in his New Entertainment called The London Season, by Day. Mr. Love appears every Evening at Eight, except Saturday.—Saturday at Three. UPPER HALL, EGYPTIAN GALLERY, 67, Quadrant.

MONTI'S LECTURES on ANCIENT and MODERN SCULPTURE.—The FOURTH of these Lectures will be delivered on WEDNESDAY, June 20th. Subscribers' and Single Night Tickets to be had at Messrs. Colnaghi's, Pall-Mall East.

WESTBOURNE COLLEGE, Porchester Lodge, Bayswater-road commenced on the 23rd of April, 1855, under the most Fashionable and Liberal Patronage. The PUBLIC OPENING of the NEW ROOMS of this College will take place on TUESDAY, the 19th inst. The grounds will be open from Five till Six, and at Three o'clock an Inaugural Address will be delivered by the Rev the Principal. Invitations will be sent to any one who may desire to be present.
June 1, 1855. C. MACKENZIE, A.M., Principal.
By permission of the Board of the Royal Caledonian Asylum their Band will play on the lawn from Two to six o'clock.

LONDON and WESTMINSTER BANK.—Notice is hereby given that a SPECIAL GENERAL MEETING of the Proprietors of the London and Westminster Bank will be held at the BANK-HOUSE, in Lothbury, on WEDNESDAY, the 20th day of JULY next, at One o'clock precisely, for the purpose of receiving a Half-yearly Report from the Directors, and to declare a Dividend. By order of the Board,
Lothbury, June 1, 1855. J. W. GILBART, General Manager.
The Transfer-books of the Company will be Closed from the 1st to the 22nd July, to prepare for the Dividend.

WEST LONDON DISPENSARY, 29, Duke-street, Manchester-square. President, EARL FITZWILLIAM, K.G. With a view to raising a Fund of Two Hundred Pounds, to meet the preliminary expenses of furnishing the Charity, fitting it up, and furnishing the Dispensary, a Gentleman has promised Five Pounds, if Twenty more there be subscribed in equal amounts. In addition to this benevolent object, the Committee rely on the good will of their friends, and they feel assured that the whole sum required in aid of the new undertaking will be forthcoming, as Two Hundred and Fifty have already agreed, and the whole Number is to be complete by Monday next, the day of the Festival.
29, Duke-street, June 14, 1855.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JUNE 16, 1855.

THE electric wire has been well charged from the Crimean batteries since we last wrote. Success upon success, bloodless and the reverse, has been signalled with a speed unparalleled in history, even in the glorious Peninsular days—

> When in the mart the busy couriers met,
> When the loud cannon and the merry chime
> Told news on news, as field on field was won.

While the House of Commons, after multitudinous talk, was agreeing that the war ought to be carried on with vigour, Pelissier had closed with the Russians, and thrust them, with fierce slaughter, out of their strongest positions; and Lyons had swept the Azoff, and "crowned the fray" with a ring of burning cities.

Gallant as have been the exploits of the soldiery, and steady as is the advance of the Allies upon the doomed stronghold, the effect of the operations in the Azoff will have most influence upon the people of Russia. The nation receives such information as to the events of the campaign in the Crimea as the authorities choose to issue; the Russian journals have no Special Correspondents, nor is the Russian soldier the kind of person capable of producing those letters from the ranks which have proved so interesting an illustration both of the condition of the war, and of the improvement of the English soldier. Except among a certain class in the capital, a very general and inadequate idea of the relative positions of the Allies and of their enemy is believed to prevail throughout the empire. The impression is that the maddened heretics and infidels are dashing themselves to pieces against the adamantine ramparts of Sebastopol; and that, though the cunning of the Russian commanders prevents their immediately annihilating the invaders, one of these days they will be swept into the sea. Such is, assuredly, the conviction which the Government has sought to propagate; and though some truths must have oozed upwards into the provinces south of Moscow, and though the servile system of the Court of St. Petersburg has been unable to compel entire suppression of facts there, "it is felt that the less said about the Alma and Inkerman the better." Still, the millions whose sons, brothers, and lovers are being torn away by the new levy have a belief that at all events these unlucky conscripts are departing for a scene of glory. The fires of Taganrog, of Mariupol, and of Kertch will kindle a new set of emotions in the heart of Russia. A city set upon a hill cannot be hidden; and when in a blaze is specially a candle not to be put under a bushel. The moral effect of this revelation of the real state of the war, and of the inability of the Russian Government to protect its cities, will, of course, be incalculably less than it would be in a nation where men were permitted to think. But the reports which will henceforth be constantly ascending and diffusing themselves throughout the southern provinces will tend to shake the faith of the people in the divinity of the Emperor's mission; and the result may be no unimportant adjunct to the revolutionary element in the day when beggared nobles join with bankrupt traders in denouncing a ruinous war.

The direct action of the Azoff operations will be very important in spite of the cavils of the mortified Cobden, who affects to consider the success slight, and the destruction of property unjust. Looking over the inventory to be gathered from the Despatches, especially those published on Thursday, it is difficult to say what necessary of war has not been destroyed—to an amount enormous in the abstract, but ten times more valuable from its position and from the circumstances of the time. Cannon, gunpowder, vessels of war, transports, small-arms, naval stores, and food for man and beast, have all been taken or sacrificed—taken at the points where they were most wanted by the enemy, sacrificed at the crisis when most of them became most costly and needful. Looking at what has been done, in practical fashion, and with due regard to military requirement, and it may be said unhesitatingly, that it would have been better for Russia had an army of 50,000 men been slaughtered by the Allies than that this sea should have been forced and these posts destroyed. Military authority will, ere long, confirm this view of the case with technical proof and evidence. The destruction of public buildings and other edifices is rather an item of humiliation than of profit, and Mr. Gladstone may be left to make his lamentations over it. The year 1774 formally ceded to Russia the sea of which the year 1855 has, for the time at least, deprived her, and the first retributive blow has been struck at the empire of violence and fraud. Considered, both strategetically and in connection with the grander question, the seizure of the Sea of Azoff is the most important event which has yet marked the war. We insist upon this the rather because a bloodless victory produces less impression upon the popular mind than a triumph to which the victors have waded in blood—such a triumph as we fear France and England will learn has been achieved elsewhere.

Pelissier is more than vindicating his reputation for energy; and the brief, stern story of the recent assault upon the Russian works indicates to Europe that the leadership of the French army is at length in the right hands. He has closed in fierce earnest with his foe—the struggle was long, and its fortune was various—but the French were in hands that master fortune, the works were finally wrenched from the Russians, and their own guns have been turned upon them. The Mamelon is crushed, and by this time it is probable that the bombardment has cleared other obstacles away. All now betokens the speedy coming of the final struggle; and, direful as may be its incidents, the heart is a poor one that does not feel, in the last events of the strife, an assurance that the cause of right and of liberty is on the eve of triumph.

The gallant achievements of our own soldiers in the last affray must not be forgotten. They have already been acknowledged by the French General in terms of admiration. We await the details, but we know that the work was stern, and the list of the fallen officers shows that it was accomplished at a heavy price. But the magnificent advantages which have been gained by these late operations are recognised by all who are watching the siege; and our noble countrymen (happier, though not more meritorious, than the thousands sent to their last sleep by the crimes of an accursed system) have not flung away their lives in vain. Let those who mourn them remember that their funeral guns are dealing ruin on Sebastopol.

A SENSE of weariness comes over the mind at the bare mention of any new protocols from Vienna, or of any new diplomatic notes from Berlin. Yet, notwithstanding this weariness, we must confess to a feeling, certainly not of overpowering interest or of edification, but of something akin to that with which we regard a clever mountebank or charlatan when he seems to have exhausted agility in the one case, or impudence in the other, when we hear that Count Buol has issued a new circular, or that M. de Manteuffel has once more darted the rays of his dark lantern into the obfuscated corners of German diplomacy. Two such documents have seen the light during the present week, and, as bearing in some degree upon the history of our time, they demand a certain amount of notice from those who study it. First in order of merit—shall we say demerit?—is the circular of Count Buol, to which we directed attention last week, and which has since been published *in extenso*. This document becomes more intelligible than it would otherwise have been, if we read it in conjunction with the papers presented to Parliament containing the *procès verbal* of the final sitting of the Vienna Conference on the 4th inst., at which were present the representatives of Great Britain, France, Austria, Turkey, and Russia. From these we learn that an unlucky proposition of M. Drouyn de Lhuys, supported as it was by a still more unlucky *lapsus* on the part of Lord John Russell some weeks previously, to the effect that the Allies ought to consider the "honour" of Russia, gave satisfaction to the cowardly councillors of the Court of Vienna. This proposition was that Russia and Turkey might be trusted to draw up together the terms of a compromise by which the future navigation and occupation of the Black Sea might be arranged to their mutual satisfaction, and to be afterwards submitted for the approval of the Allies and of Europe generally. This proposition, when formally brought forward, was as formally rejected by Lord Westmoreland and Baron de Bourqueney; and the Conferences closed in due course, in default of anything further to debate about. This notable proposition (which very naturally and properly led to the retirement of M. Drouyn de Lhuys from the Ministry of Foreign Affairs) having been unceremoniously rejected—much to the credit of M. de Bourqueney and Lord Westmoreland—the Austrian Government appears to have considered it expedient to hold back, and, if not to disavow its participation in the Treaty of the 2nd of December, to take no further steps in redemption of its pledged promise. Count Buol, in his circular, declines further responsibility—leaving that to the Western Powers; but declares that Austria "maintains the principles admitted in the Conferences, and will continue to protect the integrity of the Ottoman empire against any fresh attack. In this state of things Austria will wait for the moment when she can throw all her weight in favour of peace at the time when negotiations shall be reopened. She will support the execution of the Four Points of guarantee, *such as she interprets them*." In other words, Austria expects to have as much weight in the final settlement of Europe, when Great Britain and France have conquered peace without her assistance, as she would have had if she had courageously and honestly borne her share of the struggle. But Austria reckons without her host. She must stand aside—like Prussia, or Holland, or Portugal, or Switzerland. As she has chosen to be neutral in war, she must take her proper place, and learn to be neutral in peace also. She will have reason to be thankful if she comes off without material damage in the fray, which she might have ended if she had been true to her instincts and to common honesty, but which she has exasperated by her hesitation, and confused by her blundering.

M. de Manteuffel's despatch is chiefly interesting for the hard hits which it deals against the Court of Vienna. When Austria appears as if it would join the Western Allies, Prussia leans to Russia; but when Prussia suspects Austria of an intention of aiding the Russians, Prussia leans to the side of Great Britain and France. "If Austria," says M. de Manteuffel, "reserves to herself to judge in her own point of view of what the interests of Europe and of Germany demand, we also shall have to form a similar appreciation, and also to judge how far the views of Austria and the arrangements which the Cabinet of Vienna may have entered into without consulting us may be in accordance with our convictions, and consequently be calculated to prepare the way for that active union of Germany and the two great Allied Powers, a union in which not only the efforts of the German Governments, but the hopes of the nation, would find their accomplishment."

"A plague on the houses!" both of Hohenzollern and of Hapsburg, is the exclamation that might be wrung from England and France on the perusal of such documents. Germany has indeed sunk low, and deserves to be the vassal of Russia that she is. Perhaps, however, when the master is humiliated and downstricken, the slave may think the time come for the assertion of his independence. When Sebastopol is taken, the Governments of Austria and Prussia—or one of the two—will seek to make common cause with the Allies; but, if we can do without both or one of them now, why not then?

OBITUARY OF EMINENT PERSONS.

ADMIRAL BOXER, C.B.

REAR-ADMIRAL EDWARD BOXER, C.B., one of the heroes of the present war, died of cholera, at Balaclava, on the 6th inst. The gallant Admiral had spent a life of energy and ability in the service of his country. He entered the British Navy, as Midshipman of the *Doris*, at the beginning of the present century; he assisted in 1801 in cutting out a French 20-gun corvette from Cancale Bay; he commanded, as Lieutenant of the *Tigre*, a detachment of the seamen who landed in Egypt in 1807; and he was at the destruction of the convoy at Rosas, in 1809. Boxer also directed the gun-boats at the siege of Tarragona in 1813. He was Captain of the *Pique* in the operations on the coast of Syria, and at the bombardment of St. Jean d'Acre in 1840, and at that year he was made a C.B. He became Rear-Admiral of the Blue in 1853, and subsequently Rear-Admiral of the White. His recent valuable, but too brief, services in the Black Sea and the Crimea are familiar to all. His death is generally felt as a sad and severe naval loss.

J. J. HEYWOOD, ESQ.

JOHN JOSEPH HEYWOOD, Esq., late her Majesty's First Deemster, or Chief Judge of the Criminal and Civil Law Courts of the Isle of Man, died at his residence, Bemahague, near Douglas, on Saturday, the 26th ult., having held his office, with high honour and ability, for the extended period of thirty-four years, a term of judicial service which has, perhaps, never been exceeded by any British judge. Deemster Heywood was the second son of the late Robert Heywood, Esq., of Glencrutchery, near Douglas, whose sister, Mary Heywood, married the distinguished Admiral, Sir Thomas Pasley, Bart. The Deemster descended from Robert Heywood, of Heywood, Lancashire, who was appointed Governor of the Isle of Man in 1678* by William, ninth Earl of Derby, from which time to the present several members of the Heywood family have held important positions in the insular legislature. The late Deemster was the head of the elder branch of that family resident in the island. He was married to Eleanor, sister of the present General Rowan, and the late Sir Charles Rowan, by whom he leaves issue two daughters, Deemster Heywood was nephew of the late Captain Peter Heywood, R.N., a name familiar in naval annals and familiar to our readers. The remains of the Deemster were interred in the family vault in Kirk Onchan parish churchyard, Isle of Man. The Lieutenant-Governor of the island, the Council, the members of the House of Keys, those of the Insular Bar, and many of the respectable merchants and tradesmen of Douglas, as well as numerous country gentlemen farmers, and peasantry from various parts of the island, attended the funeral, at which the Bishop of Sodor and Man officiated.

* In the American edition of Sir Walter Scott's novel, "Peveril of the Peak," there is reference made to an old document of that date, by which it appears that horse races occurred even at that time in the Isle of Man, and that the prize—a piece of plate—was awarded to "Loggerhead, ace horse of R. Heywood, Esq., ye governor."

WILLS AND PERSONALTY.—The will of George Heathcote, Esq., of Conduit Manor, Yorkshire, was proved in London under £80,000, within the province of Canterbury. William Clowes, Esq., of Bloomsbury, £50,000. Chas. Webb, Esq., of Streatham and Coleman-street, £45,000. Joseph Ellis, Esq., Streatham, £30,000. David Riddal. Roper, Esq., £25,000 Samuel Ferris, Esq., Bukington, £20,000. George Henderson, Esq., Southampton, £30,000.

A MILITIA armoury and storehouse are to be provided by the county of Flint, and it is intended that they should be enclosed within an acre of ground. The accommodation will embrace orderly and guard-rooms, magazine, and good apartments for the permanent staff, rooms being provided for a sergeant-major and four sergeants. The whole will be surrounded by a wall nine feet in height. A new Militia armoury and barracks are also to be erected by the county of Carnarvon, the sum of £4000 being applied by the county for the purpose; and similar buildings are to be provided by the county of Denbigh.

The Prefect of Police has just issued an ordinance which enacts that in the Champs Elysées ordinary chairs shall be let for 10c. and arm-chairs for 20c.

Attempts are making by the Customs department to compel the water-side patrol force to wear gilt crowns in front of their caps. It is opposed by the force on account of the expense, which falls on the men, and not on the Government.

The number of pilgrims from Algeria who have visited Mecca this spring amounts to 4000; in former years it has only been from 1200 to 1500.

LATEST INTELLIGENCE.

THE WAR IN THE CRIMEA.

The only news from the Crimea yesterday (Friday) was a despatch from Varna, dated Wednesday, June 13, which says that the French troops had been recalled from Kertch, probably to assist in some great blow against Sebastopol.

Letters from the Crimea to the 5th state that General Morris had made another reconnaissance, in which he captured a Russian convoy of spirits, flour, and tobacco, and two pieces of cannon.

The walls of Arabat have been filled up and the road destroyed. The losses suffered by the Russians at Berdiansk were considerable. The corn destroyed was worth more than 18,000,000 francs. The number of vessels destroyed in the Sea of Azoff amounts to 240, besides six steam ro

St. Petersburg, June 13.—General Gorschakoff writes from the Crimea, under date of the 9th, that on that day the cannonade of the Allies against the Kornilloff Bastion No 3 continued. "The enemy," says the General, "has demanded an armistice to bury his dead. His losses in the combat of the 7th are more severe than I at first imagined."

THE BALTIC FLEET.

A letter from Elsinore of the 24th ult., in the *Moniteur*, says:

The day before yesterday twelve more vessels, captured by the squadron of Admiral Dundas, arrived here in charge of the *Cygnet* corvette which has since left with them for England. Among these prizes seven were sailing under the Mecklenburg flag, four under the Danish, and one under that of Holstein. They are all more or less large, and loaded.

Yesterday, June 14, Her Majesty's steam frigate *Retribution*, 24, carrying the flag of Rear-Admiral Baynes, has arrived in the Belt, with the 60 gun screw block-ships *Hawke*, *Cornwallis*, *Hastings*, *Pembroke*, *Russell*, and nine gun boats. The squadron is at anchor in Kiöge Bay.

Helsingfors, June 14.—An Imperial Manifesto, dated St. Petersburg, June 2nd, ordains that, in case of the decease of the present Emperor, the Grand Duke Constantine shall be Regent during the minority of the Crown Prince. The Regency is to continue during the minority of the second son, should the eldest die. The Empress is to be guardian.

THE OVERLAND MAIL.

Papers in advance of the Overland Mail have reached town, but they are destitute of interest. India was generally tranquil. The disputed between Rajah Goolab Singh and his nephew have been amicably arranged. Irregularities in the Nizam's dominions continue, and the Government troops are constantly engaged in suppressing them. The news from Burmah is to the effect that the chief Moung Bo had declared against the English, but nothing serious was expected to arise out of such a circumstance. The camp belonging to the Meeranzaie expedition had been attacked by 2000 hill men, who were repulsed with the loss of fifteen killed and a great number wounded.

The reports from China are, as usual, very contradictory; but the Imperialists appear, on the whole, to have obtained some trifling advantages over the insurgents.

The *Gazette* of yesterday (Friday) evening contains a first report from the Patriotic Fund Commissioners, on their proceedings at the result. They state that they have now lodged a sum exceeding a million sterling in the Bank of England. All classes, all parts of the country, the Colonies, British subjects resident abroad, natives of India, North American Indians, and natives of many foreign countries, have contributed liberally. The number of applicants is considerable and is increasing daily, whereas the amounts for distribution in relief; and, in most cases, through recent bereavement, but through recent *information* of the bereavement. The total number now is 1487 widows, 1802 children, and 33 children who have lost both parents. Steps have been taken for the effectual education of the children

---

NATIONAL SPORTS.

The prices of the Royal yearlings at Tattersall's last Monday present a marked contrast to those obtained last year. Fourteen of them in 1854 produced 6183 guineas, or 441 guineas a piece; whereas the seventeen this year only realised 2871 guineas, or 169 guineas a piece! The blood of Iago and Alarm is by no means popular; and the indifferent Derby settling, added to the mediocre qualities which have been displayed by some of the high-priced ones of last season, not a little contributed to depress the market. Lord Derby bid in person for two or three of the lots, and there was also some sharp competition between Lord Maidstone and Admiral Rous. A filly by Orlando out of Eulogy realised the highest price, viz., 400 guineas; and the produce value of the seventeen lots by Orlando out of Iodine's dam fell to Mr. R. E. Cooper, the owner of Autocrat, for 350 guineas. The Flea filly went into John Scott's stable for 320 guineas: Sister to Grapeshot was bought by Mr. Kirwan, and Sister to Antelope by Admiral Rous, each being 300 guineas.

Although the Ascot Cup produced a very exciting finish, it was one of the most slowest races of the kind on record. Teddington and Stockwell ran the distance in about 35 seconds less time: but we consider that the absence of a severe contest Pandemonium from the Widows an incapacity. We do not expect that he will be stripped again before the Great Yorkshire Stakes, at Ratitz (St. 5lb.) is a serious impediment to all comers in the Goodwood Cup. Knight of St. George and Andover, neither of whom likes a long distance when fast, might have been suited at Ascot this year, but both of them shrunk from essaying that great Cup test of Derby and St. Leger winners which brought fresh laurels to Meunion, Touchstone (twice), Van Tromp, Flying Dutchman, Teddington, and West Australian, while Mameluke, Cotland, Pleniipo, Bloomsbury, Attila, Cossack, Faugh-a-ballagh, The Colonel, Voltigeur, Rowton, and Rockingham, essayed it in vain. Virago is, we fear, a confirmed roarer; but her performances in the Ascot Hunt Cup under St. 7lb. proves that she has still much of her old form left. Very little betting has as yet taken place about the St. Leger, and it seems just a fine point whether Rifleman can be got ready in time for it

Aquatics will be well represented in all parts of the kingdom during the ensuing week. Monday will be a busy day for Father Thames, as there are some four-oared races at Wandsworth, and a regatta at Chelsea. Durham Regatta is also fixed for Monday and Tuesday, with thirteen prizes between the two days. On Tuesday the Nautilus Club will have four-oar races from Putney to Chelsea at seven p.m.; and on Saturday the Birkenhead Model Yacht Club gives a £10 prize for a sailing-match. The Etonians have also their sculling matches on Wednesday and Friday; and on the former of these days the Marylebone Cricket club come down to Eton to play their school eleven. The Universities inaugurate their long vacations by matches at Lord's. On Monday sixteen Cantabs play the United All-England eleven; and on Thursday the elevens of Cambridge and Oxford will meet for the annual combat. After a week's rest the All-England eleven (among whom G. Parr is as good a man with the bat as ever) will take the field on Monday at Nottingham, and on Thursday at Broughton.

HAMPTON RACES.—WEDNESDAY.

Stand Plate.—Cranbourne, 1. Banstead, 2.
Claremont Stakes.—Sugarcane, 1. Lumps Dutton, 2.
Hurst Plate.—Spunaway, 1. Usurer, 2.
Surrey and Middlesex Produce Stakes.—Cock Pheasant, 1. Rodo-Mell, 2.
Innkeepers' Plate.—New Inglington, 1. Punchbox, 2.

THURSDAY

Bushy Plate.—Spinaway, 1. Adeline, 2.
Queen's Guineas.—Whitefield, 1. Hambleton, 2
Railway Plate.—Usurer, 1. Swallowfield, 2.
Richmond Plate.—Palmerston, 1. Warwick, 2
Visitors' Plate.—Rodo-Mell, 1. Palmerston, 2

The Plymouth Royal Hotel, the property of the Corporation of that borough, was let on Tuesday to Mr Bate, of the Golden Lion, Ashburton, at a rental of £1165 per annum, being an increase of £406 a year over the sum paid by the retiring lessee.

ERRATUM.—The inscription line of the Engraving of Mr. Desanges' picture, at page 581 of the ILLUSTRATED LONDON NEWS of last week, should be the Encampment of "*Robert, King of France*," and not "Philip, King of France," as stated there.

NEW WROUGHT-IRON GUN. On Monday was shown on the open space before the War-office a beautiful nine-pounder gun, of polished steel, on its carriage, with limber complete. This gun, which in the course of the day was minutely examined by Lord Panmure and by many members of both Houses of Parliament, is of malleable or wrought iron, invented and manufactured by Mr. Dundas, of Dundas Castle, North Britain. The principle is such that it can be extended to cannon of the largest calibre, and the inventor is confident that he can construct with ease and rapidity guns to throw shot of a ton weight, if desired. In the course of Monday evening the gun was, by Lord Panmure's order, conveyed to Woolwich, under the charge of a party of artillerymen. At Woolwich, it is understood, the gun will undergo a severe ordeal to test its efficiency.

It is said that the concordat between Austria and the Pope is already signed.

Note.—The sign + denotes above the average and the sign — below the average.

The reading of the barometer increased from 29.80 in. at the beginning of the week to 30.18 in. by noon on the 11th; decreased to 29.73 in by the 14th; and increased to 29.80 in. by the end of the week The mean for the week, at the height of 82 feet above the level of the sea, was 29.980 inches.

The mean temperature of the week was 57½°, being 1° below its average value.

The range of temperature during the week was 34½° being the difference between the highest and lowest readings of the thermometer, on the 10th.

The mean daily range of temperature during the week was 22·4. The greatest was 34·9° on the 10th; and the least, 10½°, on the 14th.

Rain fell during the week to the depth of two-tenths of an inch.

The weather during the week was showery and changeable; and the mean daily temperatures were about average values.

Lewisham, June 15, 1855. JAMES GLAISHER.

HEALTH OF LONDON. During the week ending last Saturday the births of 1710 children were registered within the metropolitan districts: of these, 870 were boys, and 840 were girls, exceeding the average of the ten corresponding weeks of the ten preceding years by 144 and 151 respectively. The number of deaths during the week was 1067, of which 525 were males, and 522 were females; exceeding the averages of the ten corresponding weeks of the ten preceding years—corrected for increase of population—by 29 and 54 respectively

ROYAL HORTICULTURAL SOCIETY. REGENT'S-PARK.—The exhibition which took place at these gardens on Wednesday was of the usual profuse and magnificent kind. The weather, however, was sadly unpropitious, and the thousands of gaily dressed fashionables who were present were more than once driven for shelter into the large conservatory on the termination of the esplanade, and the tents containing the flowers and fruits. Between the showers the military bands played with their accustomed spirit and grace.

THE RAGGED SCHOOL MOVEMENT AND THE DUKE OF ARGYLL.—On Monday evening the annual meeting of the supporters of the Brewer's-court Ragged Schools was held at the Freemasons' Tavern, Great Queen street; the Grace the Duke of Argyll in the chair. The report having been read by the secretary, his Grace addressed the meeting at considerable length. At the conclusion of his address the noble Duke retired from the meeting, and Sir Adam de Hay, Bart., was called to the chair, and moved a vote of thanks to his Grace, which was carried by acclamation. On the motion of Professor Smith the thanks were then adopted; and the meeting, having been addressed by the Rev. Dr. Cumming, Mr. Payne, and other gentlemen, concluded with a vote of thanks to the chairman.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

In nearly all national securities only a moderate business has been transacted this week. Prices, however, have been tolerably firm, with but trifling fluctuations in them. Very few *Bear* operations having been entered into, it is fair to presume that the feeling is in favour of present rates being supported. That there is no immediate prospect of any serious decline in them is evident from the continuous arrivals of bullion, the large surplus revenue, and the ease which at the above quotations now exists. The movements of gold to the Continent and all other quarters have been on a very limited scale, totalling £45,000 to the Brazils, while the imports have exceeded 1,000,000 dollars from New York, £200,000 from Australia, and about £40,000 from France, Holland, and Belgium.

Another instalment of £1,600,000 on the new loan of £18,000,000 falls due on Tuesday next. We have to announce the stoppage of the banking-house of Messrs. Strahan and Co. for £250,000; and of Messrs. Dallas and Co. for many thousands. The latter firm will, we learn, be still carried on under a new name.

There was a moderate demand for Stock on Monday, and the quotations were tolerably firm. The Three per Cents, for the Account, were 91¾ ⅞, and Three per Cents Reduced, 92½ up to 92⅝; and the New Three per Cents, 92⅞ ⅛. Bank Stock, 210½; Long Annuities, 1839, 3 11-16; India Bonds, 2½ par; Exchequer Bills, 14s. to 17s. pm.; and Exchequer Bills, 1858, 2½ pm.

On Tuesday the Three per Cents Reduced were 92⅝ ¾; the New Three per Cents, 92⅝ ¾; and the Consols for Account, 92 ⅝. Bank Stock, 210½. Exchequer Bills (for Stock), 3-16; India Bonds, 2s. to 3s.; Exchequer Bills, 6s. to 18s. prem.; Exchequer Bonds, 99¼ ½; and India Bonds, 2½ pm.

On Wednesday were declared Three per Cents Reduced, 92¾ ⅞; Three per Cents, 92¾ ⅞; New Three per Cents, 92¾ to 93; Consols for Account, 91¾ to 92. Bank Stock, 210½; Long Annuities, 1860, 3 15-16. India Bonds, 2½ to 3s.; Exchequer Bills, 10s. to 15s. prem.; Ditto, Bonds, 1858. On Thursday the Bank of England generally anticipated that it had very little business upon the Consol market, and Directors, at their weekly meeting, reduced the minimum rate of discount from 4 to 3½ per cent. This change was so generally anticipated that it had very little influence upon the Consol market, which, however, has been devoid of animation, and we have very little change to notice in their value. Mexican Three per Cents have marked 21¾; Peruvian Three per Cents, 69½; Russian Five per Cents, 109; Ditto Four-and-a-Half per Cents, 89½; Belgian Four-and-a-Half per Cents, 93; Dutch Two-and-a-Half per Cents, 64½; Dutch Four per Cents, 95½; Sardinian Five per Cents, 90½ ex div.; Spanish Three per Cents, 34½; Ditto, New Deferred, 16½; Turkish Six per Cents, 84; Chilian Six per Cents, 102½; Buenos Ayres Six per Cents, 84½; Brazilian Five per Cents, 100½; Portuguese Four per Cents, 44.

Railway shares have been in a firm as to price, but the business done in them has been extensive

Owing to the settlement of the half-monthly account, the Railway Market has ruled inactive. The rates of interest paid for carrying over have been from ¾ up to 8 and ¾ per share. The following are the official closing money prices on Thursday:

GREAT NORTHERN SHARES AND STOCKS.—Aberdeen, 25; Caledonian, 83¾; Chester and Holyhead, 13½; Eastern Counties, 12½; Edinburgh and Glasgow, 55; Great Northern, 95½; Ditto, A Stock, 77; Great Western, 69¾; Lancashire and Yorkshire, 98; London and Blackwall, 10¾; London and North-Western, 104; London and South-Western, 84¼; Manchester, Sheffield, and Lincolnshire, 27½; Midland, 75½; North British, 51¼; North-Eastern, Berwick, 78; Ditto, Leeds, 14½; North Staffordshire, 9½; South-Eastern, 93; South Wales, 29¼.

PREFERENCE SHARES. Great Northern Four-and-a-Half per Cent, 104¼; Lancashire and Yorkshire, Six per Cent, 117; Midland Consolidated, Six per Cent, 140; Ditto, Four per Cent, 103; North British, 10¼; North-Eastern Berwick, 94½; South Wales Four-and-a-Half per Cent, 98½.

FOREIGN AND RAILWAY AND EXCHEQUER BILLS. Belgian Eastern Junction, 1½; East Indian Five per Cent, 2½; Great Central of France, 1½; Great Western of Canada Shares, 20½; Paris and Rouen, 44½; West Flanders, ½; Western of France, 2½

Mining Shares have been steady. On Thursday the Copper Miners of England were 24; General, 16; Nouveau Monde, ¼; United Mexican, ¼

Friday Evening.

The Funds opened flat to-day, and prices were about ¼ per cent lower than yesterday; but they subsequently somewhat recovered, and the quotation slightly improved. The Three per Cents were 91¾ ⅞; the Three per Cents Reduced, 92½ ⅝; and the New Three per Cents, 92¾ ⅞. India Bonds, 2½; Exchequer Bills, 13s. to 18s. prem. In Foreign Bonds and Railway Shares very little change has taken place.

THE MARKETS.

CORN EXCHANGE (Friday).—During the present week there has been a decided increase in the arrivals of wheat coastwise. The week previously terminated in a similar manner, the show of samples here to-day was not to say large, the demand for all kinds ruled heavy and, in some instances, 1s per quarter less money was accepted by the holders, whereby the supply of which was tolerably good—met a very dull inquiry, and to have effected sales lower rates must have been submitted to Barley was slow in sale, but was not cheaper. Malt very dull for malt we confined to immediate wants, at late currencies. We had a moderate sale for oats, the prices of which were fairly supported. Beans, peas, and flour moved off scarcely at late rates

Arrivals this week.—English wheat, 1190; barley, 920; malt, 1845 qrs.; flour, 600 Irish oats, 1750 Foreign wheat, 14,150; oats 16,940; flour, 3750 sacks 2300 bbls.

English. Wheat, Essex and Kent red, 68s. to 73s.; ditto, white, 72s. to 78s.; Norfolk and Suffolk red, 70s. to 75s.; rye, 49s. to 53s.; grinding barley, 30s. to 33s.; distilling ditto, 33s. to 36s.; malting ditto, 39s. to 36s.; Lincoln and Norfolk malt, 60s. to 72s.; brown ditto, 52s. to 63s.; Kingston and Ware, 68s. to 70s.; Chevalier, 73s. to 75s.; Yorkshire and Lincoln malting feed oats, 22s. to 23s.; potato, 24s. to 25s.; Youghal and Cork, black, 24s. to 26s.; ditto, white, 25s. to 28s.; Irish beans, 32s. to 43s.; grey peas, 37s. to 43s.; maple, 40s. to 42s.; white, 41s. to 46s.; boilers, 42s. to 47s. per quarter. Town-made flour, 45s. to 70s.; country marks, 40s. to 42s.; Suffolk and Norfolk, 37s. to 40s. per barrel.

Seeds We have no change to notice in price and the amount of business doing is limited

Linseed, English, sowing, 74s to 76s.; Baltic, crushing, 70s. to 72s.; Mediterranean and Odessa, 68s to 69s.; Hempseed, 48s to 50s. per quarter. Coriander, 18s. to 21s. per cwt. Brown Mustard seed, 12s to 14s.; white ditto, 8s. to 10s. Tares, 9s. to 11s. per bushel English rapeseed, £33 to £35 per last of ten quarters. Linseed cakes, English, £12 to £13 10s.; ditto, foreign, £11 10s. to £12 10s. per ton cakes, £5 10s. to £6 5s. per ton. Canary, 45s. to 55s. per quarter. Red clover seed, 14 to 42s. per cwt. white ditto, 65s to 75s. per cwt.

Liverpool Hay Averages. Wheat, 7s 8d; barley, 3s. 11d.; oats, 2s. 10d.; rye, 4s. 1d.; beans, 5s. 1d.; peas, 4s.

Bankside Grain sold last week.—Wheat, 39,997, barley, 11,599; oats, 13,931; rye, 81; beans, 3305; peas 352 quarters.

Bread.—The prices of wheaten bread in the metropolis are from 10d. to 10½d.; of household ditto, 8d. to 9d. per 4lb. loaf

Tea.—The business doing in our market is very moderate, yet we have scarcely any sellers of even an ounce of congou under 1s per lb

Sugar.—There has been only a limited inquiry for most kinds of raw sugar. In prices, scarcely any change has taken place Refined has realised 53s. to 54s. 6d.; Jamaica, 52s. 6d. to 53s.; brown Muscovado, 44s. to 45s.; and yellow ditto, 43s. to 43s. 6d.; grainy, 43s. to 44s. 6d. per cwt. Refined goods nominal above at from 56s to 58s. per cwt.

Coffee.—An improved demand having sprung up, our totals may be considered firm, at full currencies. Good ordinary Ceylon, 43s 6d to 47s. per cwt.

Rice.—Scarcely business doing in our market, and interests are fairly supported.

Provisions.—The scarcity for Irish butter is very massive, and prices continue to give way. Foreign parcels have declined 2s. to 3s. per cwt; and all English qualities are very dull There is no change to be noted in bacon, the prices of which have an upward tendency Hams and lard are quite as near as last week

Tallow.—Our market is very quiet. P. Y. C., on the spot, 34s. 6d.; October to December, 34s. per cwt. Town tallow is nominal at 32s. per cwt. net cash

Oils.—Linseed oils, on the spot, are steady at 32l. 5s. to 32l. 10s.; and for forward delivery, 30l. to 31l. per ton. Most other oils are a slow sale, on former terms Turpentine is rather dull.

Spirits.—The market for rum is steady. Proof Leewards, 2s. 4d. to 2s. 5d.; East India, 2s. 5d. to 2s. 6d. per gallon. We have a fair sale for brandy at full quotations. Malt spirits are advanced 1d. to 2s. per puncheon, with a good demand for Fine Old Scotch.

Hay and Straw.—Meadow hay, 75s. to 85s.; clover ditto, 85s. to 95s.; and straw, 27s. to 31s. per load.

Wool.—There is very little inquiry for any kind of wool. In prices, however, no change has taken place.

Potatoes. Most kinds, the sup. lies of which are falling off, are inactive. Prices rule from 60s. to 90s. per ton

Hops (Friday).—The show of hops is very moderate and the demand only [illegible] extent. Prices [illegible] very little to alter. Kent—Mid and East, 4l. to 5l. 5s.; Weald ditto, 4l. to 4l. 15s.; Farnham and Kent pockets, 4l. to 5l.; Weald of Kent 4l. 5s. to 5l. 5s.; Sussex 4l. 2s. to 4l. 10s. per cwt. Yearling—Kent, 1l. 17s. 6d.; Sussex, 1l. 15s. 6d. Old—Kent, 1l. 10s. to 2l. 10s.; Sussex, 1l. 10s. to 2l. Hassett, 9l.; Duchess, [illegible] 4l.; Half, 18s. 6d.; Poles, 20s. per ton

Intoxicating Liquor Market (Friday). The market was opened to-day for business, and there was a fair attendance of visitors attending, whilst the arrangements generally gave much [illegible] As to supply of bottles we were informed the contracts for corking purposes had been taken in advance of the [illegible] The demand for [illegible] was not large, but 21 per 8 lbs. The top figure was 4s. 10d. per 8 lbs. Sherry—the show of which was by no means [illegible] was in fair quantity, and prices were [illegible] Lower. Loaves were in [illegible] at full prices. We had a good demand for calves, at full quotations In pigs, very little [illegible] was sold at from 5.4 to 5.8 per 8lb. each, including state money. Pork—To suit the offals—coarse and inferior beasts, 3s. 6d. to 3s. 8d.; second quality 3s. 10d. to 4s.; prime large ditto, 4s. 2d. to 4s. 4d.; prime small ditto, 4s. 4d. to 4s. 6d.; coarse and inferior sheep, 3s. 6d. to 3s. 8d.; second quality 3s. 10d. to 4s.; prime ditto, 4s. 2d. to 4s. 4d.; prime small ditto, 4s. 4d. to 4s. 6d.; large oxen, calves 3s. 10d. to 4s. 6d.; prime small ditto, 4s. 8d. to 5s. [illegible]

In preparation, a Second Edition of 3000, with many additional Cuts,
THE MICROSCOPE. Its History, Construction, and App lications. Illustrated by 300 Drawings of Objects. By JABEZ HOGG, M.R.C.S., Assistant-Surgeon to the Royal Ophthalmic Hospital, Charing-cross
"There was much need of a book which should explain the construction of the microscope, the mode of using it, and give an account of some of the wonderful discoveries made by its aid. . . . In this Mr. Hogg has done and done well . . . The illustrations of the structure of the instrument, of the mode of using it, and of the things subjected to examination, are what they ought to be—real illustrations, helps to the understanding which will ensure the book attention and popularity."—Examiner
London: H. INGHAM AND Co., 198, Strand

Royal 4to. Price 21s.,
THE POETICAL WORKS of the LATE CATHERINE GRACE GODWIN. Edited, with a Memoir, by A. C. WIGAN. With Forty Illustrations by Birket Foster, John Gilbert, &c.
"There are many striking and pleasing pieces in Mrs. Godwin's collection of poems, and we think that Mr. Wigan has rendered a fair and faithful account of the writer's general merit when he said, 'Her poetry was the World's poetry.' . . . Her style, &c.) throughout is with much pleasure. Whenever it is read, such poetry cannot but do you honour. It is neither sentimental or dolling, nor in that most fatal guise which is the soul of poetry, imagination. There is great command of language and fine versification."—Literary Gazette
BLACKIE AND SON, 44, Paternoster-row, and 195, Fleet-street.

CONSTABLE'S MISCELLANY OF FOREIGN LITERATURE
Cloth, price 3s. 6d.,

Cash. Carriage free to all railway stations in England. Price-lists and Testimonials forwarded (post free) on application. Orders executed and forwarded (post free) on applicat on.—FOSTER and INGLE, Manufacturers, Mile-end, London.

BY HER MAJESTY'S ROYAL LETTERS PATENT for a valuable and extraordinary improvement in the most powerful and brilliant TELESCOPES, Gamp, Race-course, Opera, and Perspective Glasses, to have the distance, at Messrs. S and S. SOLOMONS', opticians, 39, Albemarle-street, Piccadilly, opposite the Royal Academy. They possess such extraordinary power that some, from 2½ to 6 inches, with an extra eye-piece will show distinctly the Satellites of Jupiter, with the assistance. Jupiter's moons, Saturn's ring, and the double stars With the same Telescopes can be seen a person's countenance at the same and a half to six miles distant, and at a greater from sixteen to twenty-five miles, for the waistcoat pocket, and are of large size, with the most increasing power. The Royal Exhibition, 1851.—Valuable very small powerful waistcoat pocket glass, the size of a walnut, by which a person can be seen and known one mile and a half distant; country scenery and ships are clear at from twelve to fourteen miles. They are invaluable for shooting, determining the bearings of persons, gentlemen, gamekeepers, and tourists Newly-invented spectacle lenses of the greatest transparent power. The valuable advantages derived from these lenses in the art while becoming impaired is preserved and strengthened, and very aged persons are enabled to employ their sight at the most minute occupation—can see with those lenses of a much less magnifying power—and to read the smallest print without the least fatigue to the eyes. Caution is necessary, as there are many spurious imitations offered.
Perhaps the above caution is even more strictly necessary when the celebrated Local Pebbles are purchased for refining the smell-cases. Unless those have been most accurately ranged to the exact size of the pupil they will be found utterly useless.
Each box of genuine lead points is stamped "Warranted. S. Mordan and Co."
CEDAR PENCILS made from the Cumberland Lead, purified by Mr. Brockedon's patent Process S. Mordan and Co. have no hesitation in asserting that such excellent pencils in every respect as only to be obtained from the Black Lead from the Borrodale Mines in consequence of the Government having taken possession of the whole of their stock of crude black lead to the patentee, S. Mordan and Co. are unable to offer their Cedar Pencils, made from the only pure lead extant, with confidence that their superiority will be readily appreciated. Each pencil will be found strictly conformable to those pencils by painters, engravers, architects, engineers, and draughtsmen, of the greatest eminence in their several professions, and whose testimonials have been published in detail. The following are a few:—

Sir Charles Barry, Esq., R.A.	Copley Fielding, Esq., P.W.C.S.
C. L. Eastlake, Esq., P.R.A.	W. Mulready, Esq., R.A.
A. Bond, Esq., R.H.S.	David Roberts, Esq., R.A.
Clarkson Stanfield, Esq., R.A.	J. T. Wilmore, Esq., A.R.A.
R. Woodington, Jun., Esq., F.R.S.	Prof. C. Wheatstone, Inventor of reversible Stereoscope
S. Prout, Esq., F.S.A.	
Philip Hardwick, Esq., R.A.	

Each Pencil is stamped "Warranted Pure Cumberland Lead. Mordan and Co., London."

NEW MUSIC, &c.

THE ILLUSTRATED LONDON NEWS

No. 749.—VOL. XXVI.] SATURDAY, JUNE 23, 1855. [WITH A SUPPLEMENT, SIXPENCE.

THE ADMINISTRATIVE REFORM DEBATES.

'ADMINISTRATIVE REFORM" has many friends, Indeed, it would seem to have no enemies. Mr. Disraeli claims the paternity of the name. Mr. Gladstone asserts, not simply his adherence to its principle, but informs the world that the Government of which he was a member, and "all Governments for some time past," including that immediately preceding, "had been directed to effecting some improvement in this respect." Sir Edward Bulwer Lytton agrees, not in the terms by which he seeks to elicit the approval of the Commons, but in adherence to the principle involved or supposed to be involved in the phrase. Lord Palmerston supports Sir Bulwer Lytton; and there is such a general chorus of assent, that, were it not for the grotesque and discordant croak of Mr. Drummond, there would be complete harmony and unanimity on all sides of the House. Even this modern "Rabelais," as Mr. Disraeli calls him, might have no particular objection to "Administrative Reform" if he knew what was meant by it, and if "ship-brokers, stock-brokers, railway directors, railway contractors, and God knows who," were not to be put into the Government instead of the Lords and Lords' brothers and cousins who have hitherto had the lion's share in the Administrative spoil of the nation. Mr. Drummond excludes his own craft from his sneer; and would doubtless like the world to believe that bankers share with Lords the right divine to govern such ignoble people as ship-brokers and other snobs who make their fortunes by their energy and their enterprise.

But Mr. Drummond—the privileged joker, the man who has made it his business to utter wisdom in the garb of folly, like the ancient jesters in the Courts of our mediæval Kings—often tells the truth that other men lack the courage to enunciate. He hits the right nail on the head when he asserts that the cry for Administrative Reform has no generally-recognised meaning. Almost every speaker has his own private interpretation of the phrase. Mr. Layard means one thing, and Mr. Disraeli another. Mr. Gladstone seems to be as much and no more o. an Administrative Reformer than that presumptuous Baronet who was not ashamed to criticise the excellent appointment of Mr. Albany Fonblanque to the secretaryship of the Board of Trade. Lord Palmerston, agreeing neither with Mr. Layard nor Mr. Disraeli, nor with any other speaker, has notions of his own, which appear to be far more in accordance with those o. Mr. Drummond and Sir Stafford Northcote than with those of any other person. As for the Administrative Reform Association, his Lordship does not even think it worth while to be angry with it, as he was with Mr. Layard, but speaks of "the private theatricals at Drury-Lane" with undisguised contempt. At the same time he "does not hesitate to say that any improvements which we (the Government) can make in the administrative reform of the different departments it will be our pride, as well as our pleasure, to adopt."

All these speechifications have the taint of evident insincerity. Neither Parliament as a body, nor the Government, nor even a majority of individual members of the Legislature, have any real desire for such a system of Administrative Reform as the country requires. When Mr. Layard attempts to prove, by individual examples, that general case which is too notoriously true to admit of dispute, he raises a hornets' nest about his ears. The country knows full well that favouritism is the rule in every department—fom the Ministry itself, through such great substrata as the Horse Guards and the Admiralty, down to the lowest grades of the Post-office, the Customs, or the Excise. It knows that promotion by merit is considered an affront not only by all existing but by all those expectant functionaries who rely upon the good offices of obliging borough and county members, and the all-potent influence of Mr. Hayter. If not, why should Red Tape, personified by Sir Stafford Northcote, dare to rebuke genius in the person of one so immeasurably his superior in mental gifts and in public services as Mr. Albany Fonblanque? Though the higher grades of the Army are—as hundreds and thousands of gallant men can prove to their sorrow—the hotbeds of favouritism and nepotism, yet Mr. Frederick Peel—who, like the rest of them, is an

THE MASSACRE AT HANGO-HEAD.—THE "COSSACK'S" BOAT LEAVING WITH A FLAG OF TRUCE.—FROM A SKETCH BY J. W. [illegible].—(SEE PAGE [illegible])

Administrative Reformer—attempts to prove, by "Cocker," by chapter and verse,—by names and dates, and by a whole array of seemingly unanswerable authorities—that the system acted upon at the Horse Guards is, if not quite perfect, as nearly so as it is possible for any human system to be. So with every other branch of the public service. Diplomacy, of which the object is, or ought to be, the assertion of the national honour and dignity, and the protection of national interests in foreign States is not a profession, in which a man may hope to rise by merely qualifying himself for its onerous and delicate duties. Everybody knows and feels this; every Attaché knows it; whether he have or have not a powerful peer, or a minister, to back his claims and to bear his merits or high birth in remembrance. But when Mr. Layard proves the case—which did not need the proof—Lord Palmerston, whose "pride and pleasure" it will be to act as an Administrative Reformer, if he can see how, amuses the House by his dexterity in making it [illegible] to the meanest capacity that in the diplomatic service everything is as it ought to be. He asserts, what nobody denies, that Lord Stratford de Redcliffe was not made an Ambassador because he was a Peer, but that he was made a Peer because he was an Ambassador, and that the Peerage which adorns his brow is the reward of long and distinguished services. He speaks with equally high, and we must say with almost equally well-deserved, eulogium of the services of Lord Cowley; and because he has done this seems to think that he has disposed of Mr. Layard and all other remonstrants, and rescued the diplomatic branch of the public service from the unmannerly assaults of Drury-lane and the City.

The truth is, that there is not sufficient earnestness in the country on the subject of Administrative Reform to beget a corresponding earnestness in Parliament. Were our arms disgraced in the Crimea by mismanagement either in London or in Balaclava—were any great calamity to befal us in the war there would arise a cry throughout the land which would not be trifled with. But there is no such danger. Victory seems almost within our grasp. Much mismanagement has already been rectified; and the capture of Sebastopol, on which Lord Palmerston and the large majority of the House of Commons seem to calculate as the salvation of the old citadel of nepotism and favouritism, will in all probability dissipate into thin air the agitation commenced by the Drury-lane reformers. But those who uphold administrative abuses need not flatter themselves with the delusion that the question will be thus summarily disposed of. It will rise again in a new shape. The earnest and practical men who have taken hold of it, will not let it drop; but, profiting by experience, will manage their agitation with a deeper insight into the real causes of the evil. They will then admit, what they ought to admit now, if they wish to see the cause they have taken in hand make the progress which it ought, that Administrative Reform is a one-sided and imperfect thing, when it merely attacks the present or any other Government for giving places to its friends and dependents, and when it does not attack the meanness and corruption of the people themselves. How can the constituencies complain of mismanagement of the national affairs, if voters for small if not large boroughs and counties, beg places for themselves or their sons; and the more earnestly in proportion to the hopeless incapacity of the applicants for success in other walks of life; and if when begging fails, they resort to bullying their hapless and sorely-victimised representatives? Lord Goderich says he will "never again darken the doors of Mr. Hayter" to ask for an appointment. If three hundred other members of this or any other House of Commons will take and keep the same pledge, Administrative Reform will make a real progress; and the easy wit of Lord Palmerston, and the Rabelaisian humour of Mr. Drummond, and all attacks whatsoever, will fall harmlessly against the defenders of the sound principle of the first Napoleon, and of all men of common sense, that in public as well as in private life talent and merit ought to meet with a free field and an adequate reward. No one wishes to disqualify Lords for the public service. No one has any quarrel with the aristocracy. Its only foes are those ultra exclusives who act upon the principle, both in and out of power, that no genius, no talent,—no skull,—no virtue whatsoever, can exist beyond the narrow palings of the aristocratic preserve. But at the same time the people are not blameless. They have sold their votes, and ought not to be very greatly surprised if they have been sold in return.

THE MASSACRE AT HANGO-HEAD.

RECENT letters from the Baltic, with more complete information, show that the telegraphic message of last Saturday regarding the massacre at Hango-head was no exaggeration. The narrative will awaken strong feelings in the heart of every Englishman, and excite universal and just indignation against those who are concerned in the commission of such a wholesale and cold-blooded assassination. Actuated by motives of humanity, Admiral Dundas directed Captain Fanshawe to land the poor inoffensive prisoners taken by the *Cossack*—in other words give them liberty, and show that it is not with wretched fishermen that England makes war. To effect this, Captain Fanshawe was compelled to have recourse to a flag of truce—that sacred signal which all honourable nations treat with respect. The prisoners were put on shore, and their baggage was landed, the white flag flying conspicuously all the time. At this stage some three hundred brigands made their appearance. The person who headed this band could speak English, but in reply to the statements of the officer in command of our countrymen, and of the prisoners who had been landed, the chief brigand said that he did "not care in the least for a flag of truce, but would show how Russians can fight." In exemplifying the Russian mode of fighting, he immediately gave his men orders to massacre, not only the British sailors on the jetty, but the Finns they had landed; and to complete the bloody work, he dragged the wounded from the boat, and bayoneted them on the jetty. One man, wounded in two places, alone survived to tell the tale.

The following are copies of letters from Rear-Admiral the Hon. R. S Dundas, reporting the proceedings of her Majesty's ship *Cossack*, and the loss of officers and men at Hango:—

Duke of Wellington, at anchor, Tolboukin Lighthouse
E.S.E. three miles, June 9, 1855.

SIR,—I had the honour to transmit to you the 2nd instant, with my letter, No. 130, a report of proceedings received from Captain Fanshawe, of her Majesty's ship *Cossack*, who, in compliance with my directions, had satisfactorily examined the anchorages and channels in the vicinity of Hango-head; but it has now become my most painful duty to forward, for the information of the Lords Commissioners of the Admiralty, a report which I have received from that officer, detailing occurrences in the same locality which have led, in the most distressing manner, to the sacrifice of the lives apparently of not less than sixteen officers and men, though I am still disposed to indulge the faintest hope that some few may yet be alive.

In explanation of this report, it may be proper for me to inform their Lordships, that, in the destruction of coasting vessels in the course of hostilities within the Gulf of Finland, I have considered that I am carrying out the views of her Majesty's Government, in endeavouring to visit with as little severity as possible the evils of war upon the poorer classes of the inhabitants, who are in the habit of earning a living in the smaller vessels upon the coast, and it may be useful that I should transmit upon this occasion a copy of a general memorandum which I had issued upon the subject. It was in accordance with the spirit of this instruction that I had given permission to Captain Fanshawe to take a favourable opportunity to release two persons who had been detained by him on suspicion in one of the vessels captured on a former report of the 8th May, and who had expressed a wish to be released near Hango; and it is my anxiety to consider that, consequent on the act of humanity, no opportunity has been afforded to the enemy to inflict upon us a heavy loss, under circumstances of extreme cruelty, from a perfect violation of the ordinary usages of war.

I transmit, however, for their Lordships' further information, a copy of a letter which I have forwarded to Captain Fanshawe, ordering him forthwith to rejoin my flag, and calling for further explanations upon the subject.

Their Lordships will gather from the questions I have addressed to him, the views which I am at present disposed to adopt in reference to this melancholy loss; but I abstain for the present from communication with the military authorities of the district in the absence of further information.

(Signed) R. S. DUNDAS,
Rear-Admiral and Commander-in-Chief.

The Secretary of the Admiralty, &c.

H.M. Steam-ship *Cossack*, Nargen Islands, 6th June, 1855.

SIR,—It is with the deepest concern that I have to report to you the destruction of a cutter a crew and the officers who went into Hango with a flag of truce yesterday, the 5th inst., in order to land the three prisoners who had been taken with some merchant vessels by her Majesty's ships *Cossack* and *Esk*, and also four others to whom I gave a passage to Nargen, they having received their liberty from the prize officers of the vessels captured by her Majesty's steamship *Magicienne*.

The ship having arrived off Hango Island yesterday afternoon, the boat was despatched at eleven a.m., in charge of Lieut. Gennete, with orders to land the above persons, and to return without delay, taking care that no one straggled from the boat. The officers' stewards were allowed to go in the boat on the same conditions, as was also, at his request, Mr. Easton, surgeon of the ship.

The enclosed statement of what occurred on the beach [illegible] shore is that of the only man who has returned alive and I have every reason to believe it correct.

Finding that the boat did not duly return, I sent the First Lieutenant, about half past four p.m., in the gig, also with a flag of truce, to ascertain the cause of the delay; and, as neither had returned at the close of the day, I manned with the ship and the [illegible] in the inner roads.

The gig returned about half past eight, after a long search, having discovered the cutter hauled within a small jetty, and containing the dead bodies of two or three of her crew.

It being then late, I made arrangements that the ships should weigh at half past two o'clock a.m., and take positions as close to the inner village and telegraph station as possible; and, as I then supposed that the rest of the crew and officers had been made prisoners, I proposed to send in a letter to the nearest military authority, demanding that they and the boat should be given up.

But whilst getting under way the cutter was observed to leave the shore with one man at the stern, who was endeavouring to scull her out. [illegible] one immediately sent a boat to her assistance, when [illegible] was found to contain the dead bodies of four of her crew, all of whom [illegible] with musket balls.

The man who came off in the boat made the accompanying statement of the details of this atrocious massacre; he is very dangerously wounded in the right arm and shoulder, and was left for dead in the boat; but the account he gives of what he saw before he was struck down is clear and consistent.—I am, that, on the boat reaching the jetty, Lieutenant Genette, Mr. Easton, surgeon, Mr. Sullivan, master's assistant, and the Russian prisoners, stepped on shore, and were met by a party of Russian soldiers, who were waving a flag of truce. On their landing, a large party of soldiers surrounded us officer, who spoke English, appeared suddenly, and advanced in a threatening manner. The officers then landed with the flag of truce, and demanded protection, and also endeavoured to explain the reason of their coming, but of no avail. A volley of musketry was immediately fired at them, which killed them, and also some or all of the Russian prisoners; volleys were then fired into the boat, by which all were struck down, and the assailants then rushed into the boat and threw most of the bodies overboard, and then removed the arms and ammunition which were stowed underneath.

Neither before nor during this inhuman mate slaughter was any resistance made, nor hostile intention shown, by the boat's crew with the flag of truce—the muskets that were in the boat not having been loaded, and being in the bottom of the boat, and therefore there appeared to be nothing to justify the barbarous infringement of the usages of war

I therefore opened fire with the gun upon the place, at about 600 yards distance; but it was not returned, either with rifles or artillery; and I took for having come on shortly afterwards. I ceased firing, and withdrew the ships, the position which they were in not being one in which they could with safety remain all night.

I enclose herewith the names of the officers and men who have met their deaths on this occasion. I have, &c., (Signed) E. G. FANSHAWE
Rear-Admiral Hon. R. S. Dundas, C.B., &c.

List of officers and cutter's crew who were killed at Hango on the 5th June, 1855:—

Louis Genette, Lieutenant
R. T. Easton, surgeon
Charles Sullivan, master's assistant
Samuel Hodgson, leading seaman
Benjamin Smith, able seaman
James Cornwall, ordinary seaman
John Giddon, able seaman
George Boyle, ordinary seaman
William Rosdelly, ordinary seaman
Thomas Sweeney, [illegible] able seaman
Thomas Grey, stoker
[illegible] Jones, ordinary seaman
Owen Francis, able seaman
William Linn, captain's steward
William Banks, gun-room steward
John Lotton, subordinate officer's steward

(Signed) E. G. FANSHAWE, Captain.

H.M.S. *Cossack*, Hango, June 6, 1855.

About a quarter to four o'clock, John Brown, ordinary seaman, after being taken to the Sick Bay, stated, that on the cutter, with a flag of truce flying, getting alongside the small jetty at the village, the officers and liberated Russian prisoners jumped out on shore, and Lieutenant Genette held up the flag of truce, and told the Russians (who had assembled close to the water line on the jetty, to the number of about 500, dressed as riflemen, and armed with muskets, swords, and bayonets) what it meant, and why they had come!

The old Fin (meaning the Captain of the prize *Admiral*) also explained to them; but they said they did not care for flags of truce there, and would show them how to fight the Russians, or words to that effect. A volley was immediately fired at the officers and liberated prisoners, and then into the boat.

When all were supposed to be killed, the Russians jumped into the boat; and, after throwing the bodies of the men lying on the arms in the bottom of the boat overboard, took away all the arms, magazine, &c. Brown, though dangerously wounded (having received two shots through the right fore-arm, and one in the shoulder, where the bullet lodged), managed in the morning to get up and scull the cutter out. He states that, when about 200 yards from the jetty, about 200 men came running down from the telegraph.

To Mr. Wise: I am positive that the officers were shot down at once, and before they fired into the boat.

To Mr. M'Kenna: The Russian prisoners were also shot down with the officers on the jetty.

To Messrs. M'Kenna and Wise: The boat went straight in to the landing-place. The Russians spoke English; and the person who led them, from his dress and appearance, seemed to be an officer.

Dr. Easton was the first officer who fell. The old Finn-ish captain took the flag of truce from Mr. Genette, and waved it, shouting, "Flag of truce. Truce." But the Russians yelled, and fired upon them. Before the men could do anything they were fired upon, and the Russians with cutlasses jumped into the boat. The Russians do not use their cutlasses.

(Signed) R. L. WISE, Engineer.
ARTHUR M'KENNA, Assistant Surgeon.

Hon. R. S. Dundas, Rear-Admiral and Commander-in-Chief.

GENERAL MEMORANDUM

Duke of Wellington, at anchor, Tolboukin Lighthouse East 1½ miles.
May 31, 1855.

It is my direction that all coasting vessels, undoubtedly Russian property, which may be met with, passing and repassing, within the Gulf of Finland, and not of sufficient value to be detained as prizes, are to be destroyed, but no injury is to be done to boats or small craft which may be found empty at anchor, and not trafficking.

This order, however, is not intended to preclude the exercise of [illegible] discretion of officers in special cases, where the owners of vessels may be [illegible] poor and harmless; but the rule above ordered is to be generally observed and made known, as far as possible, to all the owners of coasting vessels, it being the object to prevent, generally, all traffic along the coast.

(Signed) R. S. DUNDAS.
Rear-Admiral and Commander-in-Chief.

To the respective Flag Officers, Captains, Commanders, [illegible]
Commanding Officers of her Majesty's Ships and Vessels under my orders

Duke of Wellington, at anchor, Tolbouk[illegible] Lighthouse
E.S.E. [illegible] miles, June 8, 1855

SIR,—I have to acknowledge the receipt of your letter of the 6th instant, No. 4, with its enclosures, reporting the painful circumstances under which a serious loss of officers and men has been sustained, in consequence of a boat belonging to the ship you command having been detached for the purpose of landing and releasing prisoners upon the coast of the enemy, but much as I must regret the losses which have occurred, and sensible as I am of the distress which such occurrences are calculated to excite in the mind of any officer entrusted with command, it has never the less, become my duty to call your attention to some important omissions in your report, and to several explanations which are necessary, not only to enable me to form a correct judgment upon the conduct of yourself and the officer who has been unfortunately sacrificed on the occasion; but which are due also to the character of an enemy who is charged with the grave crimes of having violated the good faith of a flag of truce, and the indiscriminate massacre of prisoners about to be released and the unarmed and defenceless crew of a boat employed upon such a service. I have, therefore, to direct that you will furnish me with full and explicit reports upon the following questions:—

1st. What were the circumstances which rendered it necessary to select an opportunity for landing the prisoners in question when the boat was manned by the immediate presence of the ship you command, and when the [illegible] of a flag of truce from her own mastheed would have obviated all misconception as to her object.

2nd. What were the particular instructions given to the officer in charge of the boat; and what opportunities were afforded to the enemy to grant or to reject conditions of truce before the party had actually landed upon the coast?

3rd. What was the distance of the boat from the ship when last seen previous to her landing, and what at that time was her distance from shore?

4th. When and at what distance from the shore was a flag of truce first displayed, and were any blank guns or muskets fired at the moment by any officer in charge of the boat supposed to have had any reason for [illegible] to have been acknowledged by the enemy on shore?

5th. At what distance from the shore were the riflemen of the enemy first seen on the "jetty" by the crew of the *Cossack*'s cutter?

6th. Was any assent, implied or understood, supposed to have been granted by the Russian officer on shore to the landing of the prisoners or crew?

In directing your attention to the importance of accurate replies to these foregoing queries, I have to remind you that the spot at which these melancholy losses have been sustained had been recently visited by the ship you command, and at the time at which they had been committed in total security. It was therefore good reason to consider that the [illegible] of the enemy might be come good to its protection, and every proper precaution should have been taken to [illegible] not be required; therefore, that persons whose services were not necessary on the occasion were permitted to proceed in the *Cossack*'s boat; and I have to remark that such permission was not calculated to impress upon others the importance of proper vigilance and of due attention to forms in communicating by flag of truce.

On the receipt of this letter you will repair immediately to this anchorage to rejoin my flag.

I am, &c., (Signed) R. S. DUNDAS,
Rear-Admiral and Commander-in-Chief.

Captain E. G. Fanshawe, H.M.S. *Cossack*

Duke of Wellington, at anchor, Tolbouk[illegible] Lighthouse
E.S.E. three miles, June 11, 1855.

SIR,—I have to report, for the information of the Lords Commissioners of the Admiralty, that her Majesty's ship *Cossack* rejoined me this morning, and I have [illegible] to transmit, for their Lordships' information, further reports, which I have received from Captain Fanshawe, in reply to the queries contained in my letter of the 8th instant, No. 162.

After full consideration of the explanations afforded, and after personal communication with the officer on the subject, I am entirely at a loss to discover any circumstances which can serve to excuse or to palliate the conduct of the enemy, by whom the cruel and unnecessary slaughter of the *Cossack*'s boat's crew had been perpetrated

No precaution appears to have been [illegible] by the officer in charge of the boat to make known the object of his mission, and, if their Lordships should see reason to regret that she was detached beyond the reach of protection from the ship, I feel assured that they will do full justice to the explanation of Captain Fanshawe

I regret to add that he has informed me little or no hope can be entertained that any of the officers or crew have survived, and that repeated wounds were inflicted upon several of them with the most reckless cruelty; but it is my intent on to take the earliest opportunity to endeavour to communicate with the authorities of Helsingfors

I have, &c., (Signed) R. S. DUNDAS,
Rear-Admiral and Commander-in-Chief

The Secretary of the Admiralty, &c., &c., &c.

H.M. Steam-ship *Cossack*, at Sea, off Sskar, June 11, 1855.

SIR,—In replying to the points connected with the assault upon the boat of this ship, upon which you desire additional explanations, I would premise that I sent the flag of truce in a boat with a flag of truce flying, detached from a ship stationed off the enemy's coast, was entitled to be warned off before approaching the shore, or to be ordered off on reaching the shore before the communication was received, or to have an opportunity of making that communication to a person appointed by the enemy, and I was persuaded that a boat complying with these conditions was perfectly safe from molestation, and that while she did so no misunderstanding could arise.

I shall now proceed to answer your queries.

1st. The opportunity was the first that had presented itself, and, as it appeared a favourable one, I sent a flag of truce in immediately on my arriving at Hango. It was in respect of what I believed to be the proper form of sending a boat with a flag of truce, and to take the ship into the inner roads, for I believed that it was in accordance with usage that the ship should stay out of gun-shot on such an occasion. I stood into the mouth of Rus. on, about two and a quarter miles from the village of Hango, and thence sent the boat, and I then stood off and on to the [illegible] same spot. Remaining for this reason on the ordinary station for a blockading ship, I believed that I complied with custom in not hoisting a flag of truce on board my own ship, but only in the boat detached

2nd. The instructions given by me to the officer in charge of the boat were to proceed with the flag of truce to the landing-place at the village of Hango; if any troops were there, to ask to communicate with the officer in command, to explain the reason of the boat coming in—namely, to land the liberated Russian prisoners—and to ask leave to do so. If no troops were there, he was to land the liberated prisoners at the landing-place, with all their baggage, and to return on board without delay. He was at liberty, in the latter case, to allow the officers stewards to purchase any article offered at the boat by the villagers, provided that no detention of the boat was occasioned thereby. I also directed him, should he be questioned as to the manner in which the blockade would be enforced with reference to coasters, to explain the intentions set forth in your memorandum on the subject as clearly as possible.

He was charged not to allow any one to stray from the boat, and also to be careful that no injury was done to property at the landing-place, and none of it removed. The position of the ship, and the course of the boat from the ship to the landing-place, was in full view of the telegraphic station which overhangs the village; and the boat took about three-quarters of an hour to reach the shore. It was therefore open to the enemy either to have warned her off by firing with blank cartridge, or to order her off on her approaching within gun-shot.

3rd. The boat was about two miles from the ship when last seen previous to her landing, and less than half a mile from the landing-place, there being a small rocky islet which then shut her in from the ship.

4th. The flag of truce was first displayed at about half-way from the ship to the shore, or rather more than a mile from the shore. No blank guns or muskets were fired, but the flag, which was on a boarding-pike, was, by Lieut. Genette's orders, kept clear in a good position to be seen.

The officer in charge could have no reason to suppose either that it was acknowledged or rejected by the enemy, as they were not to be seen, and the place appeared deserted.

5th. But one man, and he not a soldier (who ran away as the boat approached), was seen from the cutter before she reached the jetty.

The officers and prisoners had landed, and the baggage was removed from the boat to the wharf before the troops were seen. They came out suddenly from behind the cover of some houses or rock, and rushed down firing their muskets. Before stepping on the wharf, Lieutenant Genette gave the crew strict orders to remain in the boat, and to be careful not to touch anything on the wharf. When the Russians first appeared, he was on the wharf with the other officers, about four or five paces from the boat, with the flag of truce in his hand, which he immediately waved, and called out "Flag of truce!" The person who headed the soldiers replied, that "they did not care about flags of truce there." The Finnish Captain took the flag from Lieutenant Genette, and waved and shouted in his own language and in English, "Flag of truce!"

6th. No assent could be implied, or otherwise, as no one on the part of the enemy appeared till after the prisoners were landed, when they rushed out, as described in answer No. 5.

In reference to the flag to state that I was fully aware, from some vessels having been lately captured in the neighbourhood, that there was a likelihood that troops might have been since sent down to the coast: but at the same time I was under the full conviction that the course pursued was such as was usual, and should have secured to the boat the protection due to the flag of truce, whether the enemy, in exercise of his discretion, thought proper to order it to return without communicating or not

On again interrogating the witness, Mr. Wise, [illegible] the person who led on the enemy, and who spoke English, was an officer, [illegible] the coast, and was probably, therefore, not a common soldier.

(Signed) [illegible]

To Rear-Admiral the Hon. R. S. Dundas, C.B., Commander-in-Chief

H.M.S. *Cossack*, Tolbouk[illegible], June 11, 1855.

SIR,—In addition to the circumstances detailed in my letter to you of this day's date, I have to report that, on again interrogating John Brown, the sur-

vivor of the boat's crew, he states that, immediately on the sole ers appearing they commenced firing on the officers and in general persons who were with them on the wharf. These first fire did but little injury; but as they approached he saw, first, Mr. Easton, surgeon, and then Lieut. Gerrets fall dead. He also saw the Finnish Captain (who spoke English) fall; and feels perfectly certain the rest were all shot, as he saw them leaning and severally. He is confident that all fell. By the time the soldiers, having unloaded within ten or fifteen yards of the boat, were firing into her also, and the whole of the men were very soon struck down. They then rushed into the boat, and threw overboard several of the bodies; but finding James Gliddon was wounded, was not dead, they hauled him on the wharf and disrobed him. He states that he was wounded early, that, though faint, he had a perfect perception of what was going on around him, and a sense of his own danger, which induced him to feign dead, and also that he was twice dragged from one part of the boat to the other in the search for arms, but fortunately, not pitched overboard. Gliddon was close to him when he was dragged on the wharf. He conceives that the whole affair, from the time the soldiers first rushed out until they finally retired, might have occupied about fifteen minutes. He distinctly heard everything that was said on the wharf by Lieutenant Gerrets and the Russians.

I may here mention that the body of one of the men found dead in the boat had two shots through the leg, which he had tied up with a handkerchief before he received two other fatal wounds, in the abdomen and head.

I omitted to state in my letter of yesterday's occurrence that the following morning, when sculling the boat over, I observed a number of men in the same dresses as those who fired upon them coming down the telegraph hill. They stopped several times, turning round and pointing to the cutter and the gig which was approaching.—I have, &c., (Signed) E. G. FANSHAWE.

Rear-Admiral the Hon. E. S. Dundas, Commander-in-Chief, &c.

The following letter, from our own Correspondent, gives some particulars of the outrage; which, if correct, render the case still more black than it was represented at first.—

Within 15 miles of Cronstadt, June 7, 1855, five p.m.

We arrived at Nargen last evening, at half-past twelve o'clock. There were only two sail of the line—one of them the Duke of Edinburgh. Some of the officers of the latter vessel brought us some very melancholy news this morning early. On Tuesday, about eleven o'clock a.m., a boat was got ready, with a crew of thirteen men and three officers in her ship, to convey eight Russians on shore at Barge. When they approached the shore, a Russian officer, who spoke English well, invited them to land. They had no sooner done so, than the seven men, with the Russian officer, were mercilessly murdered with the English and their own people, although the Cossacks had carried a flag of truce, which they totally disregarded in the other saying. We went and dug all of these here." One black man in the boat was badly wounded, he fell and was covered over with the dead bodies of the gallant fellows. They therefore supposed him dead, and consequently left him unmolested. The boat was picked up the next morning by the Cossack's gig, and he was the only one left to tell the melancholy tale.

DESPATCHES FROM LORD RAGLAN.

War Department, June 14.

Lord Panmure has this day received the following despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.

Before Sebastopol, June 7.

My Lord,—I am deeply concerned to have to inform your Lordship that Rear-Admiral Boxer died on board the *Jason* last night, outside the harbour of Balaclava, after a very short illness.

He was removed to that ship in the hope that the pure sea air might prove beneficial to him; but this expectation was not fulfilled. His malady made rapid progress, and early in the afternoon of yesterday it was intimated to me that he was despaired of.

His nephew died of cholera last week, and this melancholy event so deeply affected him that his health at once gave way, and he sank under the same disease.

It is well known that this officer devoted his whole life to the public service. Since he undertook the appointment of Admiral Superintendent of the harbour of Balaclava, he has applied himself incessantly to the discharge of his arduous duties, exposing himself in all weathers; and he has rendered a most essential service to the army by organising the disembarkation of the stores, wharves on the west end of the port, whereby the disembarkation of troops and troops has been greatly accelerated, and communications with the shore have been rendered much easier.

I have, &c., RAGLAN.

The Lord Panmure, &c.

Before Sebastopol, June 7.

My Lord,—I have great satisfaction in informing your Lordship that I received intelligence this day before noon of the evacuation of Sujuk-kaleh by the Russian troops.

It appears that, previously to their retirement from the place, the troops destroyed the principal buildings and the armament, which consisted of about sixty heavy guns and six mortars, and it is concluded that they have rendered the garrison of Anapa, from whence many of the inhabitants have removed.

Sir Edmund Lyons has been so good as to send me the detached report of the naval operations in the sea of Azoff, which will reach England either before or at the time of this despatch. They reflect the highest credit on Captain Lyons, of the *Miranda*, and the officers and men employed under his orders, and on the remarkable, for the intelligence, promptness, and judgment with which they have been conducted; and I am much pleased to see, which will be peculiarly felt by her Majesty, how little, where fire-arms have been inflicted on the enemy in the loss of resources of every description, the most brilliant and unwonted success has been achieved in an incredibly short time, with only one casualty, and that not of a serious nature.

The gallant exploits of the navy have spread joy in our camps, and afforded vast satisfaction to every individual in the army.

A body of French troops, under the command of General Morris and General Camrobert, and a column of the Sardinian corps under General La Marmora, made a reconnaissance on Baidar, on the morning of the 3rd.

The former proceeded along the Woronzow road and pushed their cavalry several miles beyond Baidar; the latter operated on the left through a mountainous district, and advanced into Baidar, after a fatiguing march, only a small number of Cossacks showed themselves.

Nothing has occurred in front of the town.

I enclose the return of casualties to the 3rd instant inclusive.

The Lord Panmure, &c. I have, &c., RAGLAN.

RETURN OF OFFICERS, NON-COMMISSIONED OFFICERS, AND PRIVATES KILLED AND WOUNDED FROM THE 1ST TO THE 3RD JUNE INCLUSIVE.

KILLED.

Sergeant Rifle Brigade: George Slade.
Privates 1st Foot: James Sadler. 33rd: James M'Carrey. 33rd: William King. 49th: Owen White. 50th: Michael Sherlock. 77th: Michael Connor. Royal Sappers and Miners: John Wright.

WOUNDED.

Brevet Lieut.-colonel Commanding 33rd Foot: Charles Walsh, slightly.
Lieutenants. 24th Regt: Morgan Lewis, severely. 33rd: Thompson, slightly.

CASUALTIES IN THE ROYAL NAVAL BRIGADE BEFORE SEBASTOPOL ON THE 3RD JUNE.

KILLED Stephen Webb, A.B., John Hewitt, ord. Queen.

Before Sebastopol, June 5

My Lord,—I have the honour to enclose a letter from the Inspector-General of Hospitals, forwarding the weekly state of the sick of the army.

The cholera has sensibly diminished in the Camps before Sebastopol, but it has attacked the Guards and the 31st Regiment, near Balaclava, and some of the new batteries, as well as the followers of the army in that town. It is hoped that the disease will pass from them as it has from the stations where it first appeared.

I am grieved to have to say that it has fallen heavily on the Sardinian Contingent, and that General La Marmora is in great anxiety about it. I am rendering him all the assistance in my power. Whilst writing to your Lordship an officer has brought me a letter from him, announcing that his brother, General La Marmora, who commands his Second Division, has been severely attacked. He has been accommodated with a quarter at Kadikoi, and every attention shall be paid him.

I have, &c., RAGLAN.

The Lord Panmure, &c.

THE QUEEN'S VISIT TO ALDERSHOTT.—Her Majesty, accompanied by Prince Albert and the Duke of Cambridge, paid a visit of inspection to the newly-formed camp at Aldershott, on Saturday last. The Royal party left Buckingham Palace shortly before three o'clock, and, after a pleasant run over the South-Western Railway to Farnborough, drove thence to the Camp, which, from the wild beauty of its situation, will, no doubt, speedily become a highly attractive place for London sightseers. The two battalions of Foot Guards, which have recently arrived in the Camp, together with the five regiments of Militia, including the 5th West Lancashire, the 1st Surrey (Royals), the Royal Middlesex, and the West Kent, received her Majesty with the usual military honours. The troops presented a soldier-like appearance. The visit of her Majesty being perfectly unexpected, there were none of those outward demonstrations which, on the occasion of some of the Royal visits to Chobham, marked her Majesty's progress.

In order to establish direct telegraphic communication between Austria and Russia, the Austrian line has been joined to the Russian one on the frontier between Gratnica and Sczakowa, and communications may be transmitted by it in German or French.

THE SILENT MEMBER. (No. XXII.)

THE result of the division on Mr. Layard's motion for Administrative Reform may be attributed, in the first place, perhaps to a want of sympathy on the part of the House of Commons with the feeling of the public, of which he was undoubtedly an exponent in the views he put forth. Some part of his failure must, however, in candour be set down to the fact that he had lost ground by his want of caution in making statements which he was not in a condition to prove. Though the tone of public morality is not yet very high, there is a reaction in seeing a tendency to improvement in this respect. [illegible] difficult for men of doubtful principle to carry with them the support of the country; and, though every one acquits Mr. Layard of wilful misrepresentation, he has said to his opponents from an over-zeal in endeavouring to establish great general truths by bringing forward special instances the accuracy of which he had not clearly ascertained. These checks are sometimes wholesome, for they prove that in statesmanship as well as in ordinary business matters honesty is the best policy after all.

While men of business are calling [illegible] amount of morality in the conduct of public affairs, there seems to be some reason for believing that commercial matters are not always managed in the purest manner, even by men whose "standing in the City" has long been one of high repute. The recent failure of an old-established private bank has brought to light a system of trading on fictitious means and keeping up credit on a good name while, many more enormous than those who still reverence the traditions of the "integrity of the British merchant" would suppose. The bank that has lately stopped is said to have been for some time insolvent, that is its operations might have been [illegible] if its expedients had not been exhausted, for the suspensions of customers had not been aroused. Those who have implicit faith in the universal "honour of the English tradesman," and *a fortiori* of "the British banker," may be surprised to hear a story which is current in commercial circles, and was well authenticated as it is generally believed. A highly respected London banker, on his death-bed, called his children round him, and advised them if they believed in his reputed wealth? The answered that they shared the general opinion as to his large fortune, and he then surprised them by the announcement that he had been insolvent for the last thirty years. He, however, entreated them not to be depressed by the intelligence; but recommended them to go to Doctors' Commons immediately after his decease and swear his property under half-a-million. The advice was taken. The customers of the house were agreeably edified on hearing of the enormous wealth of the late partner, and the bank was firmer than ever, in the opinion of those who trusted their money to its keeping. There is not much to be apprehended for the future from the failure of private bankers, for the Joint-Stock system is gradually but surely superseding the few that remain. The private firms that still exist are, for the most part, known to be thoroughly sound and amply solvent; but there is no question that the practice of publishing accounts, and the security afforded in the entire property of a large body of more or less wealthy shareholders, will eventually carry all the banking business of the country to the Joint-Stock concerns.

This is about the period of the Parliamentary Session when members begin to announce the abandonment of their promised measures, and to back out of the engagements they have determined to leave unfulfilled. The excuses made by the Government for the non-ratification of their pledges consist generally in the announcement that at the time of the Session has been chiefly consumed in debate, and that therefore the promises of Ministers, like the business of legislation, must end in talk. The Bill for the Reform of the Corporation of London is to be postponed till the early part of next Session, though we have heard of its having been long "in preparation," and even of its being "ready," but something has prevented Sir George Grey from bringing it in. It is difficult for one who is not a Cabinet Minister to appreciate the difficulty of bringing forward a Bill that is already prepared. One would think that if it were not too bulky it might be put in the coat pocket, and carried down to the House, or even sent by post, or Parcels Delivery, or left at the door of the Commons by the footman of the Minister, who thus would have nothing whatever to do but to "bring it in." People of common sense will naturally ask why a bill is not brought in at once when it is ready, and some will inquire whether it has been put away in a drawer and forgotten, or left in a Minister's pocket, or fallen into the waste-paper basket, or somehow or other got mislaid? Nobody can doubt that debating is a very great evil, and though, as a Silent Member, I perhaps judge partially, I cannot help feeling that if, instead of electing those who are likely to be great speakers, some constituencies were to elect those who are not likely to speak at all, a great advantage would be gained.

As prolixity is the fault of our debates, bulk is the great objection to our Statute-book; and though we have had a paid Commission to remedy the evil, it is not likely to be very soon removed. The Commissioners, who ought to have been occupied in producing harmony in the laws, did little or nothing besides quarrel; and it was hopeless to expect the consolidation of the Statutes from men who are always creating divisions among themselves. Instead of working together towards one common end, they pulled in different directions; and the Statute-book in their hands, so far from meeting with compression, appears to have been the subject of a struggle in which the leaves may be said to have been torn and scattered about on all sides. It is one of the beautiful fictions of the law of England that every one is acquainted with its provisions, and that every Act of Parliament has been accurately remembered as well as conscientiously perused. Lest any one should begin to read the Statute-book with a laudable desire to make himself acquainted with the laws of his country, it may be as well to state the fact that he will find no less than between ten and eleven thousand Acts of Parliament which are either obsolete or have been repealed. These will not by any means be "very perusal," but it is difficult to estimate to the student of the statutes "what to avoid." It might be useful to print a list of the laws which are no longer in force, under the head of *Bacon*.

It is evident that legislators do not always know the provisions of the laws they assist in making, nor is it likely that such a very numerous acquaintance could be easily kept up. There are, however, some laws which might be thought to be familiar, even to legislators; and the Police Act, which provides against obstructions in the public thoroughfares, might fairly be presumed to be one of these. Nevertheless, it appears from the newspapers that the Bishops of London and Winchester have been giving their encouragement to street-preaching by ministers of the Established Church. It may be said that the Police Act applies to the metropolis only; but causing an obstruction in a public thoroughfare is none the less an offence against the local act in every large town. The subject has been illustrated in the course of this week by the appearance before the magistrate of Mr. Boatswain Smith, who was brought up to the Thames Police-court for the act of street-preaching, which the Bishops of London and Winchester encourage—but which the law forbids. It is not very judicious to recommend a practice which the police authorities are bound to suppress if it should lead to an obstruction of a thoroughfare; and, indeed, the fault is one which encourages the vanity of ignorant fanatics, who generally do a great deal more harm than good. We have already rather too much cant to contend against, and street-preaching is likely to produce a great deal more of the same obnoxious article. Considering the exposure of religious impostors which one sometimes sees in the police reports, it is not unreasonable to expect that, as a fight is often got up to favour a street robbery, a sermon may sometimes be commenced in order that, while the preacher is calling on them to get rid of the burden of their sins, his accomplices may be relieving them of the contents of their pockets.

A wholesome decision was lately given by a jury on the trial of an action by a servant against a master who had stated in writing the reason why the servant had been discharged. It would have formed an unfortunate precedent if the jury had declared the master guilty of libel, for there is already too much mischief done to society by the laxity with which good characters are given—out of what is called good nature, but what is in reality a want of moral firmness, when bad characters have been deserved. In these matters of minor morals there is not half enough strictness exercised, and, though it may seem hard to deprive a servant of a place for some trifling fault, the fact is that, if faults were fairly stated, those who take servants would know the extent of their responsibility, instead of feeling, as they now do, that errors are generally concealed; and, consequently, when any are admitted, they are, perhaps, believed to be greater than they really are. The proper method to pursue is to give a character with truth on the one hand, and on the other to be ready to take a servant without looking for that faultlessness which a culpable good nature often bears testimony to without sufficient cause. After all there is no little amount of selfishness in these matters, for it is thought likely to save a great deal of trouble to give a discharged servant an excellent character at once, and leave the new master or mistress to find out at leisure the defects that exist.

With reference to some remarks in his last week's article, the Silent Member has been assured, on very good authority, that the attorney engaged in support of an application against another member of the profession, with reference to the alleged improper use of a bill, was "altogether and always opposed to any compromise." The Silent Member did not say otherwise; but he seems to have been mistaken in a belief that a full update one time come over the feelings of the attorney; a belief which the Silent Member is most happy to renounce, and to give the attorney every credit for having throughout consistently discharged his duty. His own client admits having agreed to a settlement against the consent and contrary to the advice of his attorney. Though a client is bound by the act of his attorney, the attorney cannot always be answerable for the act of his client, who in this instance would certainly have done better had he followed implicitly the recommendation of his professional adviser.

TRIPLE FETE IN PALERMO.

(From our own Correspondent.)

SICILY may be called almost the brightest jewel in the crown of its Sovereign. No unimportant event, therefore, is the choice of its Viceroy, and his first entrance on the scene of his duties. Prince Castelcicala, for a long time the Sicilian Ambassador in England, is the man whom the King has deputed to honour. He succeeds General Filangieri, Prince of Satriano, who has governed the island for five or six years with great firmness, wisdom, and justice. On the 27th May, Prince Castelcicala left Naples on board the steam-frigate the *Archimedes*, and landed amidst cheers of welcome in Palermo on the 28th. It is well understood here that such cheers may be always had for a consideration; let something, however, be put down to the generous desire of giving the stranger a fair idea. Attended by the Consular Body, and the authorities, civil and military, assembled and surrounded by military, the Viceroy went first to the Cathedral to hear the "Te Deum" sung. That Cathedral, how full of architectural interest! how full of thrilling and interesting historical associations! This is the first scene in the recent festivities of Palermo. It is the 30th of May is the "Name Day" of the Majesty of the Two Sicilies. Sicily could not be without its Viceroy on such an occasion, and every effort was made, therefore, to raise the Prince from a bed of sickness, to witness and encourage the affection which the Sicilians feel for their liege Lord. It had been determined also on this same day to erect in the Foro Borbonico four colossal statues of the Bourbon dynasty, executed by the first sculptors of Naples. The pedestals on which they stood were thrown down and broken to pieces during the revolutionary disturbances of 1848. Ferdinand II. has erected them—on what some think their dangerous and doubtful elevation. On the morning of the 30th the ceremony took place. Two tents were erected—one a square, for the Viceroy, the Consular body, and the authorities; the other circular in shape, for the ecclesiastics. As soon as the benediction had been given, the Viceroy gave the word of command; and, amidst the firing of cannon and the flourish of trumpets, the draperies fell, and the statues of the Bourbons were revealed. As far, however, as the sentiments of the multitude were concerned, nothing could be colder, there was almost silence.

The scene of this ceremonial is represented in the Sketch. It is the delizia of Palermo, and nature and art seem to have combined to unite on this locality all that can fascinate the eye. The mountains in the background are in the neighborhood of Bagaria; and the road—both a walk and a drive—by the side of the sea, and full a mile in length, is the Foro Borbonico, or an extension of it. An attentive observer will discover the statues of Carlo III., Ferdinando I., Francesco I., and Ferdinando II. Beginning at the Fort of Garitta, this promenade terminates at the Casina of Cuto, and opens on the city through the Porta Felice, which was erected by the Marchese Felice Orsini, wife of the Viceroy Maresantoro Colonna. Rising above this exquisite road are other promenades, which, shaded by the trees and adorned with flowers in vases, have the appearance of hanging gardens. The palaces of Prince Butera, d'Aceto and Dangio, are on the right, whilst a bank of sulnga ornamental is the walk in the direction of the sea. On the upper walk are the walls open at the Porta del Greci, is the palace of the Marchese de Ferrella; then comes a garden, and then the Flora, a beautiful public work of the last century. During the clear bright mornings of winter there is not in the world a more delicious walk or drive than the Foro Barbonico of Palermo; and in the summer evenings and nights the scene has all the magic of Oriental life. It is the drawing-room of Palermo. here the inhabitants of all classes meet, and linger on till almost early dawn, surrounded by all the embellishments of art, and gazing, through the transparent veil of a Sicilian night, on the wondrous natural beauties around them. Those, however, who desire to see it at its season of greatest enchantment, should visit it during the Fête of Santa Rosalia.

FESTIVAL AT NAPLES.

(From our own Correspondent.)

THE scene which we here present to our readers is the interior of the Church of Sta. Chiara, in Naples. It has a twofold interest from its historical associations, and from the fact that the miracle of the liquefaction of the blood of St. Januarius takes place annually in this Church, on the first Saturday in May. It was founded in 1310 by King Robert, who dedicated it to the Host; whilst his wife stinched to it a monastery for the Sisters of Sta. Chiara. In this monastery are now educated the daughters of the first families of the kingdom. The architect of the splendid church, which was built in the Gothic style, was Masuccio; and Giotto painted it. In the four following centuries the innovations made by Vasaro, San Felice, and others, at an expense of 100,000 dol., converted what was once a venerable Gothic pile, into what may now rather be compared to a magnificent ball-room. By command of Barrionuovo, the works of Giotto were destroyed, and the actual frescoes are the productions of Cosca, Maro, Bonito, and Maio, pupils of Solimena. There yet remain, however, as proofs of the former grandeur of the building, five superb tombs, all in the Gothic style, to the memory of Princes of the House of Anjou—namely, of Robert, who died in 1343; Charles, his son; Maria; Joanna I.; and of Agnes and Clemenzia, daughters of Charles II. The Kings of the Two Sicilies are buried in this church; and the body of the first Queen of his present Majesty is not only the subject of a continued miracle, but works miracles—*Ipse dixit*. The Barons of the kingdom did homage to several of the Anglovin Princes in this church. Joanna I. was crowned here, 29th Aug., 1345. By order of Charles III., of Durazzo, Cardinal Cifoni was here despoiled, and his robes and mitre thrown into the fire, because he had been invested by the Antipope Clement; and hence he was sent prisoner to Urban VI., 1381. Thomas Sanseverino, the head of the Anglovin party, declared himself the Viceroy of Lewis II., and received homage in his name in this church 1386. In 1399 a Parliament was held here in order to grant the King a thousand lances and ten galleys; and Ladislaus, having repossessed himself of the kingdom by arms, here assembled all the Barons, to ascertain those who were contumacious. Such are the artistic and historic associations which render this church one of the most interesting in Naples. We now consider it under another aspect (the immediate object of this article), as the site where once a year is performed the noted miracle of the liquefaction of the blood of St. Januarius. I premise, however, by saying that King Robert commanded that the procession, on occasion of the grand fête of Corpus Domini, should walk from the Cathedral to this church, followed by the Sovereign and the grandees of the kingdom. That custom is still observed.

On the first Saturday in the past month we went to see the blood of St. Januarius liquefied, and took up our station near the gallery erected for musicians at the right. The body of the church on each side was crowded with curious or devout spectators; on the left of the altar, in the best reserved seats, were women of the lowest classes, who do (and have their claims, allowed) to be relatives of the Saint, who suffered martyrdom A.D. 305. Above the aisles, through the open grated and highly-ornamented windows, or openings, we could catch a view of the nuns, who were looking down on the scene below. Poor creatures! it was their great field day. The choir performed some fine sacred music, and then at intervals the relations of the Saint raised their voices in the loudest and most unearthly shriek, and some said they were praying or saying a rosary. The statue of the Saint had been brought to the church in the morning, and now reposed on the high altar. It is sure, which was presented to him by the Council of Naples in 1713, cost 20,000 scudi. It is ornamented with

TRIPLE FETE AT PALERMO.

3328 diamonds, 198 emeralds, and 168 rubies. The pallium is of silver, and was made by Domenico Vinaccia, at an expense of 8200 scudi. After a long suspense, a general hush announced the approach of the procession from the Cathedral. The spectacle was magnificent. One after the other, forty-seven statues of saints (who are the protectors of churches or religious bodies in Naples), followed by their respective *confreres* or devotees, were taken round the church, and then carried back to the Cathedral. As each passed the altar the relatives of St. Januarius yelled or shrieked a prayer. The wealth expended on these statues must be immense; so great, indeed, that, though made at the expense of the several parishes of Naples, they are all kept in the Cathedral, and are not permitted to leave it even for the annual *fêtes* performed in their honour at the respective churches, unless a deposit has been made to the full amount of their value. The statue of the Archangel Michael, the special protector of Ferdinand II., was surrounded by the Regal Guard. The procession closed with the ampulla containing the blood of the Saint in a golden shrine, and under a canopy of gold and crimson cloth. It was carried by the Cardinal, and immediately preceded by the Seminarist, Municipality, gentlemen of Court, and dignitaries of the Cathedral, whilst a military band followed, playing several selections from the "Traviata." Prayers were offered on the high altar by the Cardinal, who, then taking the ampulla in both hands, worked it

MISS NIGHTINGALE VISITING THE HUT HOSPITALS, AT BALACLAVA.

round and round. Immediately behind was a light, at which his Eminence, stopping every now and then, examined the blood to ascertain if it were liquefied. At each disappointment there were murmurs and shrieks, and prayers uttered. The words it was difficult to distinguish; but they generally are as follows:

Tu sei morto per la Santa Fede,
Impetra a noi la grazia della Santa Fede,
Efacci il miracolo.

If the miracle is delayed longer than usual these words are uttered:—"Faccia gialliuta, come tu sei dispettosa! Campione di Christo, tu sei un bello santo!" "You yellow-faced fellow, how spiteful you are! Champion of Christ, you are a pretty saint!" A little bell in twenty minutes announced that the miracle was wrought; and from doubt, remonstrance, and despair, everything was changed in a moment to rejoicing. There was a buzz of congratulation throughout the church. "Thankee, thankee, St. Gennarino," said a man by my side. "We shall be safe from the cholera and make plenty of wine this year," said a young priest. "Last year, Sir, it took a long time to liquefy, it became indurated again, and, and we had the cholera." We have no farther concern with this *miracle* than as a spectacle, and therefore suspend all other observations. The Neapolitan populace, who believe it most profoundly, never think of inquiring about it, and seem to have adopted the maxim of the ancient Germans—"Sanctius ac reverentius de Diis credere quam scire." The King, too, during the following week goes in state with all his Court to the Cathedral, to kiss the ampulla.

MISS NIGHTINGALE.

Among the most interesting intelligence recently received from the Crimea are the accounts of the unwearied exertions of Miss Nightingale in the cause of suffering humanity. This excellent lady has, during her stay at Balaclava, visited the Camp Hospitals, and examined the arrangements in each. Throughout her inspection she was warmly greeted by the soldiers. On one of these visits Miss Nightingale went up to the Hut Hospitals, on the Castle (or Genoese) heights, to settle three nurses, escorted by the Rev. Mr. Bracebridge, one of the Chaplains, Captain Kearne, R.E., Dr. Sutherland, a Sergeant's guard, a boy, and eight Croats carrying baggage for the hospital. The party wound up a steep path from the harbour under the old Castle—which scene an artistic Correspondent has enabled us to represent in the accompanying Illustration. One week afterwards our Correspondent saw the humane lady carried up to the same spot on a litter. The hospital huts, twelve in number, stand against the limestone cliffs. On the mountain side are the Marines, Rifles, and Turks: the harbour on one side, the steep cliff- where the *Prince* was lost on the other. The Genoese castle rises on a lofty crag in front: the site is 700 feet or more above the sea, and is very airy and healthy—admirably adapted for its purpose. Here is placed Miss Nightingale's hut, beyond a small stream, the water of which is excellent, and the banks are enamelled with gay flowers. There is room for at least 800 wounded, with the best chance of recovery. By a subsequent account we learn that on June 2 Miss Nightingale left Balaclava, Lord Ward having placed his steam-yacht at her disposal to enable her to recruit her health by excursions to sea. It is stated in the *Times*, of date May 30, that Miss Nightingale, being convalescent from her late severe attack of fever, and being recommended change of air by her medical attendant, Dr. Hadley, principal medical officer of the Castle Hospital, Balaclava, under whose care she has been throughout her illness, was carried down from the heights, accompanied by that officer and the Rev. Mr. Parker, and put on board the *Jura* for England. Miss Nightingale, however, remains at Scutari, in preference to coming home. Although extremely weak, she is out of danger, and has no remains of fever.

FIRE ON BOARD THE "MANILLA."

A Correspondent writes from Balaclava, May 31st:—"I enclose a Sketch of the Peninsular and Oriental Company's iron screw-steamer *Manilla* on fire in the fore-hold, discovered about two this morning. Around the burning ship are boats hurrying to and fro in Balaclava Roads, receiving cargo, powder, &c. In the background are the heights, which were until lately (a week) occupied by the enemy, but are now in our possession, as denoted by a British ensign on the left hand hill. About twenty large transports, both steam and sailing, were in the bay at the time, and some not very far from the *Manilla*. The Sketch only takes in the mere vessel and background. The hills are principally covered with brushwood, rock cropping out here and there."

Our Correspondent adds—"That, to quench the fire, the fore part of the vessel was filled with water, which makes her so deep forward."

We are happy to add that all the powder was safely landed, and the ship was saved.

THE IRON SCREW STEAM-SHIP "MANILLA" ON FIRE IN BALACLAVA ROADS.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS Monday.

FEES IN COUNTY COURTS.

Lord BROUGHAM called the attention of their Lordships to the County Courts. The point which he had to complain of was not the amount of the fees taken by the public officers of the court [illegible] paid by Government, amounting to £270,000 a year [illegible] held it to be utterly inconsistent with the true administration of [illegible] to make a public proportion to the amount of work done [illegible] the County Court Judges were fixed at £1200 a year at the lowest, and other [illegible] at the discretion of the Lords of the Treasury, according to the amount of work which they had to perform... It found, however, that in many instances the person who did the most work was paid the least, and the parties who had the least work and the least important work had the largest salary.

Lord GRANVILLE observed that the Lord Chancellor had recently brought the matter under the notice of the Government, and it was certainly worthy [illegible] would receive, their serious attention, although the present was not quite the proper moment to think of making any considerable addition to the [illegible] charge.

The Lord CHANCELLOR reminded the Earl [illegible] that he, when there was a considerable outcry against the amount of the Judges' salaries, Lord Denman, when [illegible] of Justice, with that honourable feeling which always characterised every one of his acts, offered to accept a [illegible] instead of £10,000. That was thought to be a very [illegible] thing at the time; but his Lordship had always the right of calling for the other £2000. He thought that the present state of County Court salaries was even more objectionable than that state of things; for it was not right that the Treasury should have the power of saying to one Judge, "You shall have £1500 a year," and to another, "You shall have but £1200."

The [illegible] Sale of Settled Estates Bill was reported, with the Amendments.

The Insurance on Lives Abatement of Income-tax Continuance Bill was read a second time, as was the Cinque Ports Bill.

The Gold Finger-Rings Bill was read a third time and passed.

HOUSE OF COMMONS.—Monday.

The Report of the Sebastopol Committee was brought up by Mr Roebuck; and, on the motion of Mr Bonnell, the document, which was of considerable length, was read by the Clerk at the table.

Sir C. Wood laid on the table a despatch explaining the circumstance under which a body of Russian troops had fired upon a boat's crew sent from H.M.S. *Porcupine* under a flag of truce and engaged in landing some prisoners at Hango, on the Gulf of Finland. Lieut. Baron Cramer, the officer in charge of the boat's crew attending the occurrence, and moved that the despatch should be printed.

The statement of the First Lord was listened to amidst much emotion by the House, and the motion was agreed to unanimously.

ADMINISTRATIVE REFORM.

The long-promised debate on Mr Layard's resolution respecting Administrative Reform then took place.

Lord GOODRICH moved that Mr Layard's motion be amended as a vote of censure upon the present Government was directed to abuses which existed long before the present Government was formed. But he could not agree to the argument of the Chancellor of the Exchequer, on Friday night, that the present Government [illegible] all they could to remedy those abuses. He traced the origin of them all to the system of making [illegible] designing for [illegible] of their personal friends, and urged that [illegible] should determine to apply for another. He objected to the [illegible] composition of the present Government, which [illegible] to the exclusion of fair proportion [illegible] class to which he belonged, for which Lords were all but [illegible] and which [illegible] expected as a necessity to fill. He complained of the practice of leaving [illegible] persons in official positions, and of the Minister would deserve well of his country who should set himself to reach [illegible] of which he complained [illegible] could not be remedied in a day, but it must be [illegible] and honestly carried out if England was to be preserved a first-rate [illegible].

Mr PEEL replied in detail to the specific charges brought against [illegible] the statement [illegible] the number of promotions on the Staff had taken place in the Council, compared with those of regimental officers. The very severe [illegible] promotions were exactly double those given to the [illegible] honourable gentleman who [illegible] all, though all the [illegible] and [illegible] Sebastopol, and [illegible] ward, giving the reasons for [illegible] promotion in each case; and said that, if the [illegible] honourable gentleman could produce, he would [illegible], in the imperfection of all human things, there was no [illegible] would not produce strong instances of individual hardship [illegible] and [illegible] in all cases essential [illegible] Mr Layard [illegible] interested motives [illegible] Lord Panmure's appointment for his own brother, who had not even held such a certificate. In conclusion, he objected to the [illegible] he suggested the national feeling, but he [illegible] himself entirely [illegible] to a vigorous reform of all our departments.

Mr DRUMMOND differed from [illegible] proposition contained in Mr Layard's resolution. He was altogether unprepared, incapable of proof, [illegible] question of Administrative Reform, and, [illegible] that [illegible] was [illegible] neglected to the resolution, and to the whole [illegible] as a delusive one, which was [illegible] certain classes of people, because they expected it to destroy the [illegible].

Mr [illegible] defended the administrative abilities of Lord Palmerston, [illegible] Sir C. Wood, and [illegible] interested [illegible] of the other Ministers. He recommended that the House should get rid of these motions, and come as quickly as possible to the real business of the country.

Colonel LINDSAY entered into some explanations with regard to promotion in the Guards.

Sir J. C. PHILLIMORE concurred in the opinion expressed by Sir L. Pilkington that Government by party was the only way by which the affairs of the country could be successfully administered.

Mr. DISRAELI declared to himself the credit of having originated the phrase "Administrative reform;" and contended in opposition to Mr Layard, that it was capable of a very clear definition. He regretted that the administrative reforms of Lord [illegible] Government had been instituted, and the still larger reforms which they contemplated and would have carried into effect had they continued in office. He [illegible] Government would have been to [illegible] Royal Commission to inquire into all the [illegible] departments of the Administration, and he still thought that was the course which [illegible] to precede all others. With regard to the question now before the House, he would express his opinion whilst he could entertain three months ago. He thought it [illegible] into the public service should be subjected to a real test of fitness. He thought the remedy for many public evils should be of a higher scale, not merely of a [illegible] nature, but that they should be educated to look up to those more spiritual rewards which [illegible] public men. He thought, lastly, that the public [illegible] expression into [illegible] which [illegible] to put [illegible] in books on other [illegible] and [illegible] be done [illegible] they [illegible] and [illegible] in the [illegible] some [illegible] which he did not believe in. The disorganisation, he attributed, not to the deficiencies of clerks in public offices, but to an incapable Government. That was the verdict of the House [illegible] and of the country, and they were let the Report of the Committee read at the table that evening had ratified and confirmed. Mr. Layard's motion he considered as a sort of [illegible] to [illegible] public digestion away [illegible] Government had instituted, and he preferred the resolution of Sir Edward Bulwer Lytton. The Government [illegible] that resolution, as he understood they meant to [illegible] [illegible] which he thought it could only do by issuing a Royal Commission. He [illegible] his suspicion that the Government were not sincere [illegible] Amendment, and he gave [illegible] to [illegible] civil departments of the War-office of men who, [illegible] were passed over the heads of men [illegible] and [illegible] Government [illegible] and [illegible] a motion were carried against them; and said that as soon as the Chancellor of the Exchequer made that announcement on Friday night the [illegible] left the House and [illegible] from voting for Mr Layard's motion, so eager were they to put the Government in a minority, even [illegible] them to resign.

Lord PALMERSTON, in the most emphatic manner, denied a charge made against him by Mr. Layard at Drury lane, that he sported with the interests of the people, and that he was never in earnest but when visiting [illegible]. There was not a word [illegible] that statement. On [illegible] he more proud than of belonging to the noble English people. He denied that he had formed his Government on aristocratic principles and he appealed to Mr Layard's own appointments as the Foreign office as a proof that merit without patronage had no difficulty in making its way. After ridiculing Mr. Disraeli's announcement of his intentions [illegible] which he could apparently have covered a large area in that place that was said to be paved with good intentions, he defended the orders recently issued by his Government, which he hoped would do much good, though he could not pretend to abandon the public offices to the chances of competition. He denied that his Government had been condemned by the House; on the contrary, the right hon. gentleman himself, who, on a late occasion, [illegible] to censure the Government, but remained to bless—had testified the feeling of the House in the most striking manner, and elicited a strong vote of confidence in the Government. He did not believe ten men would vote for Mr Layard's motion; and as to the amendment, the Government were prepared to accept it in all sincerity.

Mr. LINDSAY moved the adjournment of the debate

A division took place, when the motion was negatived by a majority of 34 to 5.

Mr. LAYARD then rose to reply, and while he said his speech at Drury Lane was not accurately reported, he appealed to the House as to the general levity of the Noble Lord's tone, which, however, had improved of late. He did not think Mr. Peel had invalidated his remarks on the Army, and complained of the want of returns, which would have strengthened his case

The House then divided on Mr. Layard's resolution, which was negatived by a majority of 289 to 66.

The debate on the amendment was a [illegible] till Thursday next

HOUSE OF LORDS.—Tuesday.

THE RELATIONS BETWEEN AUSTRIA AND THE WESTERN POWERS.

Lord LANSDOWNE wish to take this opportunity of stating that it is my intention to postpone the motion of which I have given notice in reference to the relations between Austria and the Western Powers

The Earl of MINTO: Indefinitely, I

Lord LANSDOWNE: No; I will, on a future occasion, name the day on which I will bring it forward.

FRIENDLY SOCIETIES BILL

Lord PORTMAN moved the second reading of this bill, which, he said was the measure which, under the auspices of Mr [illegible], had passed the House of Commons, and urged its [illegible] upon the House, by referring to the fact that there were [illegible] than 20,000 of these societies in the country, each averaging, according to the last quinquennial returns, 145 members, making together nearly 3,000,000 of the population directly interested in the subject. He asked their Lordships to consent to the second reading, and invited suggestions for the amendment of the bill in Committee, in order to make it effective for its purpose.

Lord MONTEAGLE said that a bill had been introduced into the previous bill for guarding against a crime which had been shown to prevail some few years ago—viz., of insuring children in benefit societies, and then murdering them for the sake of the money paid at their death by those societies, were omitted in the present bill. He thought if it was not intended to re-enact those clauses, [illegible] should be given why they were omitted.

Lord RAVENSWORTH complained of a clause which would have the effect of removing the exemption now enjoyed by members of building societies from the stamp-duties on mortgage and other deeds in connection with those societies

Lord CAMPBELL observed that the clause in question, being a money clause, could not be altered by their Lordships without interfering with the privileges of the other House.

The bill was then read a second time, and ordered to be committed

The Insurance on Lives Abatement of Income-tax Continuance Bill and the Cinque Ports Bill severally passed through Committee

The Duchy of Lancaster Lands (1850) Bill and the Militia (No. 2) Bill were severally read a second time.

HOUSE OF COMMONS Tuesday.

TENANTS' IMPROVEMENTS COMPENSATION BILL.

On the motion for going into Committee on the Tenants' Improvements Compensation (Ireland) Bill,

Lord GALWAY, in the absence of Mr. Deasy, moved that the bill be postponed, in order that the House might proceed with the Metropolis Local Management Bill.

Sir J. SHELLEY supported the motion, deeming it useless to proceed with the Compensation Bill, as no progress could be made in it at that sitting

A conversation ensued, terminating in a division, which defeated the motion of Lord Galway by a majority of 117 to 66.

Mr. PEACOCKE then moved as an amendment that the bill be committed that day three months.

Sir G. GREY hoped the House would at once divide, so as to get into Committee as soon as possible. At all events he hoped that [illegible] the bill would at least [illegible].

Sir J. WALSH supported the amendment.

After some observations [illegible] Mr. I. BUTT, Mr. GEORGE, and other Irish members,

The House divided, and the amendment was negatived by a majority of 123 to 46

The House then went into Committee, and several clauses of the bill were agreed to.

LONDON CORPORATION REFORM.

In reply to a question from [illegible] Sir G. GREY said that, owing to the accumulation of important bills, and the protracted debates upon them, he feared he should not be able to bring forward the bill for the Reform of the Corporation of the City of London during the present session.

NORTH-WEST PASSAGE EXPEDITION.

Mr. MACKINNON moved for a Select Committee to inquire into the circumstances of the expedition to the Arctic seas, commanded by Captain M'Clure of the Royal Navy, and to report to the House [illegible] what reward may be due for the services rendered on that occasion.

Lord PALMERSTON, in assenting to the motion, spoke very highly of the services of Captain M'Clure.

The motion was agreed to

LANCASTER-SHOT MANUFACTORY.

Captain L. VERNON moved for a copy of the report of Major-General Hardinge, Assistant Inspector-General of Fortifications, on the building erected for the Lancaster shot manufactory, at Woolwich, and the Report on that building forwarded to the Clerk of the Ordnance by Sir Charles Fox, of the firm of Fox and Henderson, the contractors for the erection. The hon. and gallant officer complained that the officers of the corps of Engineers had been set aside to make way for a new and expensive system of contracts.

Mr. I. BUTT [illegible] short time in which the contractors had executed the work at the request of the Board of Ordnance, and moved the addition of the words "Also of the letter from [illegible] the Board of Ordnance by Fox, Henderson, and Company, [illegible] respectively the 23rd and 24th day of April and 5th day of May [illegible] report to the Board of Ordnance of Mr. John Anderson, Inspector of Machinery, dated the 11th day of May, on the subject of the building for Lancaster shells."

After some observations from Mr. Monsell and Colonel Dunne, the returns were agreed to.

THE STATUTE LAW.

Mr. L. KING moved some resolutions relative to the report of the Statute Law Commission, declaring that it was the opinion of the House that it would greatly conduce to the improvement of the statute law of the country if the provisions of the Act 9 and 10 Vict. cap. 59, for the said special and detailed report should form the groundwork," were no longer to be delayed, and that such bill ought to be forthwith prepared, for the purpose of being laid before Parliament.

The Attorney-General remarked upon the magnitude of the task to be accomplished before an accurate digest of the statute law could be prepared. The work, he intimated, was now under investigation by Commissioners, whose labours, however, were not recently commenced to admit any practical result which could be used at present. Under these circumstances he deprecated any interference with the exertions of the commission, from which much good was anticipated.

After some brief remarks from Mr. Napier, Mr. Malins, Mr. Massey, Mr. M'Mahon, Mr. Kinglake, and Mr. Cranford, Mr. Locke King replied, and the House divided:—For the resolutions, 54; against, 26; majority, 17.

Mr. HEADLAM moved a resolution designed to result in an Address to the Crown, praying for such alterations in the rules of the military service as might secure the return of the regulation price of commissions purchased by officers in the Army who might die or be killed in action, or who die in the relations or representatives of the deceased, with an accompanying assurance that any expenditure incurred for such a purpose would be made good by the House. The repayment contemplated by his motion was advocated by the hon. member as being an act of mere justice as well as a suggestion of expediency, especially in time of war.

Mr. F. PEEL thought, if the principle were a just one, it ought to be extended to every case—to the cases of officers killed in the Baltic war, as well as the war in the Crimea. The pensions given in cases that required it were more than an equivalent for the value of the commission. He was not prepared to acquiesce in the motion, but he admitted that the hon. member had presented it to the House in a very forcible point of view, and it should certainly receive every consideration

Colonel DUNNE said, the equity of the proposition was clear, but so many officers had been killed that Government was afraid to ask Parliament for such a large sum of money as it would require to carry it into effect.

Lord A. PAGET supported the motion of Mr. Headlam. He could not see the justice of allowing one officer to sell out and retire from the service, while the one who remained in the service and was killed lost not only his life, but had no one to claim the value of his commission. He did not think the pension an equivalent for the commission. In the case of Colonel Moore, who was drowned on his passage out from [illegible] mission would have become only £70 a year, the [illegible] £1,000 for his commission

Lord PALMERSTON said the question was only part of a very difficult subject. Mr. Headlam had fallen into the mistake that the country was debtor to the officer; but this was not so, for the country received the money which he paid for his commission, and he was at a loss to know from what fund the repayment should be made. It might, perhaps, be made optional for the officer to state beforehand whether the value of his commission should be given to his personal representative in the event of his death, or allow the pension to be given as at present.

After some observations from Mr. M'Cullagh,

Mr HEADLAM expressed himself satisfied [illegible] the [illegible] of Lord Palmerston, and withdrew his motion.

HOUSE OF COMMONS. Wednesday.

MARRIAGE LAW AMENDMENT BILL.

The House having gone into Committee on the Marriage Law Amendment Bill,

Sir J. PAKINGTON said, after the discussion which he had listened to with great interest on the second reading of the bill, he should not have risen on the present occasion, except to move an amendment, to prevent the bill from having a retrospective operation. Nothing could be more mischievous and dangerous than to legalise this bad measure which has been enjoined by parties with full knowledge that they were not only illegal, but absolutely null and void. Wilful transgressors of the law were not entitled to the benefit of Parliament. The Legislature had thought proper to pass a law making such marriages null and void, and it was the duty of every [illegible] to obey the law. If the parties who had so [illegible] did so with the full knowledge that they were acting in [illegible].

Mr HEYWOOD did not agree with the hon. and learned member that there was no precedent. There was a direct precedent in the [illegible] forward by Lord Lyndhurst, which gave power to [illegible] and also legalised all the marriages of the priests who had taken place [illegible] in the law at the time they were celebrated. He was of opinion that the remedy for the [illegible] morality, and therefore he could not consent to the proposed amendment.

After a short discussion the Committee divided, when there appeared—For the amendment [illegible]; Against it [illegible].

The amendment was consequently lost, and [illegible] was agreed to.

Sir J. PAKINGTON (after being defeated twice by a large majority) said that [illegible] to their object to prevent the retrospective operation of the bill [illegible] and two occasions, on the divisions of the Committee, he wished to defeat [illegible] measure, but his legitimate means [illegible] which he had given notice of, and which he had already proposed, he should [illegible] with them (Hear, hear).

On the motion of the Attorney-General, the Chairman reported progress, and obtained leave to sit again on Tuesday, July 3rd.

BOYLE V. CARDINAL WISEMAN. The case, which, it will be remembered, [illegible] action, brought by [illegible] Mr. Boyle against Cardinal Wiseman for a libel, contained in the [illegible] of the *Times* and the *Catholic Standard*, [illegible] was tried before Mr. [illegible] and a special jury, at the Middlesex Sessions House, Clerkenwell, on Saturday last. A rule was obtained by Serjeant Shee, on the part of the [illegible] for a new trial, on the ground that the learned Judge [illegible] had misdirected the jury, and that the damages were excessive. The rule came on for argument in the Court of Queen's Bench, on Monday last, before Mr. Justice [illegible], Q.C., and Mr. Justice Wightman, when [illegible] the case, and Mr. [illegible] Mr. Hawkins, Q.C., and Mr. [illegible] supported the rule, which was made absolute for a new trial.

A HINT TO ARTISANS AND MECHANICS. The Commissioners of Patents have issued a [illegible] of Specifications of Patents [illegible] indexes of names of [illegible] other works printed by them (embracing [illegible] time), to the Midsummer Day, 27, Gloucester [illegible] them that they will be [illegible] grounds and situation, and [illegible] of notes or sketches, every [illegible] week, from ten in the morning [illegible] Day inclusive.

RIOT AMONG THE "NAVVIES" AT CRYSTAL PALACE. On Wednesday evening a very serious disturbance took place [illegible] Crystal Palace [illegible] and [illegible] one of the [illegible] died from injuries received in the [illegible] legs broken, [illegible] navvies were about to fight in the railway, when one of the constables on duty came up to [illegible] and ordered them away. [illegible] navvies [illegible] work, and about a quarter [illegible] [illegible] navvies [illegible] [illegible] [illegible] navvies [illegible] [illegible] [illegible] and threatened [illegible] [illegible] navvies [illegible] [illegible] [illegible]

RICHARD COBDEN AND CHARLES JAMES FOX.

THE honourable member for the West Riding, while complaining that he has been stigmatised as the enemy of his country for opposing the war with Russia, consoles himself with the reflection that Chatham, Burke, and Fox were equally abused, in former days, for denouncing a war supported by popular clamour. In making this comparison between himself and the great statesmen of the last century, Mr. Cobden ought to have confined the parallel to Mr. Fox, whose factious conduct in opposing Mr. Pitt's anti-Russian policy bore a very striking resemblance to that which the honourable member for the West Riding has lately pursued in support of Russia.

The nominal ground of dispute between Pitt and Fox on that occasion was, whether the Navy Estimates should be increased. The real question was whether we should not interfere by a decided demonstration in favour of Turkey, and in opposition to Russian encroachment. On the 20th of March a Message from the King informed the House of Commons that the efforts which he had made to effect a pacification between Russia and the Porte having failed, and the consequences which might result from the future progress of the war being highly important to this country and to Europe in general, it was deemed requisite, in order to add weight to our representations, to make some addition to the naval force. In moving the answer to the Royal Message, Mr. Pitt stated the serious dangers which threatened the balance of power in Europe from the encroachments of Russia, and urged the necessity of throwing our weight into the opposite scale. "By uncommon strides of power, and of achievements, the Russian empire was not only spreading its vast boundaries throughout half of Europe, but was actually endeavouring to extirpate a whole nation, and extend its conquests over the richest and most fertile country of Asia . . . Unlimited sway appeared to be the only object of its all conquering force and all-subduing machinations." At that period the Empress Catherine, flushed with victory, and relying upon English connivance, made no secret of her determination to take possession of the Ottoman Empire as soon as her plans were matured. She had baptised her grandson, the present Grand Duke, by the name of Constantine, and openly declared that she would yet crown him in Constantinople. The point on which the negotiations turned between Russia and the Porte was the retention of the fortress of Oczakow. Great stress was laid by Mr. Pitt upon the importance of that place, as commanding the road into the Turkish provinces. Fox, on the other hand, in much the same tone as Mr. Cobden assumed last week, ridiculed the notion of going to war for so paltry a matter. According to him, the sole point in dispute was whether Russia should retain possession of a barren tract of country and a useless fortress, or give them back to Turkey at the solicitation of England.

The Peace party in Parliament mustered much more strongly in those days than it does now. In the House of Lords, the Earl of Carlisle and the Marquis of Lansdowne opposed the Address, on the ground that "Russia was the natural ally of this country;" that no sufficient explanation had been given by Government, and that Russia was "totally unconquerable and independent." "Her armies of Cossacks and Tartars," said the Marquis of Lansdowne, "could not be exhausted; her territories could not be ruined; her cities could not be attacked. She had no occasion for allies; and when she united herself with them, it might be rather considered as a grant of protection than as a stipulation for mutual succour upon terms of equality." The enormous expense of a war with Russia was another reason for refusing to comply with the proposal to increase our naval forces. "Where was the money to carry on such a war to be procured? The lately-imposed taxes proved that the money was not to be had. The poor and laborious order of the people were starving alive."

In the House of Commons the question was debated over and over again. After being defeated on the amendment to the Address, the Whigs fought the battle of the Empress in a new form. On the 12th of April Mr. Grey, father of the present Earl Grey, moved a series of resolutions in favour of peace, on the grounds that "this House has hitherto considered the interests of Great Britain as not likely to be affected by the progress of the Russian arms on the borders of the Black Sea;" "that the expense of an armament must be burthensome to the country;"—"that this country is not bound by treaty to interfere in the matter;" and for various other reasons of a less important character. He contended that "the only three causes for going to war were—to redeem a right, to provide against danger, and to repel an attack." "These were the only just causes of war, on the established principles of the law of nations," and none of these causes could be urged in defence of the course proposed by Government. They were told that the balance of power was in danger; and he admitted that that was a serious consideration. "But, before he consented to plunge this country into all the horrors of war, he must be convinced that the danger was suited to the case. It must be shown to him that the possession of the town of Oczakow was such as would materially affect the interest of this country, and would endanger the balance of power in Europe." The resolutions, though warmly supported by Sheridan, Whitbread, and the Whigs generally, were rejected by a large majority. The division list showed only 173 votes in favour of and 203 against them.

But the Peace party of 1791, although not strong enough to turn out Ministers, succeeded in doing the work of the Empress of Russia quite as effectually by their ill-advised speeches in favour of that Power. In the face of such an opposition as Mr. Fox and his followers had manifested, Mr. Pitt found himself unable to make any impression upon the Court of St. Petersburg, and, therefore, the Porte had to give way, as on many other occasions. Confident in the hold which he had upon the people of England at that period, Mr. Fox even adopted the unwarrantable course of sending a representative to St. Petersburg, with secret instructions to encourage the Empress in resisting the remonstrances of England. This was going rather farther than the Peace party of the present day would venture; but no one will be astonished at such a step on the part of Mr. Fox, after reading his speech in favour of Russian aggrandisement, on the 29th of March, 1791. On that occasion, after showing that England had never felt any jealousy on account of Russia, he made the following remarkable statement, which has a very special interest at the present moment:—

> After the independence of the Crimea had been established by the peace of Kainardji, the Empress informed the Porte and other Powers, that she found it impossible to secure her old dominions, if she was not complete mistress of Cuban Tartary and the Crimea; and by a kind of Royal sylogism, she said, "and therefore I must have them." This syllogism, which was made soon after the Peace of 1783, greatly alarmed the Court of Versailles, and Count de Vergennes immediately applied to the King of Great Britain, proposing that he should join in remonstrances against the acquisition of these provinces by Russia. "I" (said Mr. Fox) "was one of his Majesty's Ministers at that time, and the answer which I advised was that his Majesty would not make any remonstrances on the subject, or throw any difficulty in the way of the Empress. Upon this the Court of Versailles boasted, not thinking it prudent to attack Russia single-handed; the consequence was that the Porte ceded by a solemn treaty the sovereignty of the Crimea to Russia, who for some time was suffered to enjoy it undisturbed." It might be said that the former conduct of Ministers towards Russia was wrong; and that the present Ministers acted on another system. But was Russia obliged to know this? Was it her business to inquire what were the opinions of this Lord of the Treasury, and that Secretary of State?—or to look to the general policy and conduct of the country? In all these remonstrances it did not appear that England apprehended anything from Russia; on the contrary, she countenanced her in her plans for raising her aggrandisement upon the ruin of the Turkish empire." *Hansard's Parliamentary History*, vol. 28, pp. 1 to 10.

What a change in public opinion since that period! The leader of the great Whig party, in 1791, backed by the ignorant and self-interested clamour of the manufacturers of Lancashire and the West Riding, openly declared that "England countenanced Russia in her plans for raising her aggrandisement upon the ruin of the Turkish empire." Where is the statesman of any party who would dare to utter such an opinion now? Twenty years ago Mr. Cobden, in his pamphlet on Russia, expressed his conviction that the cause of freedom, of progress, and civilisation would be promoted by making Russia master of Constantinople; but even he would shrink from the open avowal of such a doctrine at the present day.

PETER DICK.—A DIALOGUE.

(A new version of an old song to be sung in all Government offices between the hours of ten and four, whilst duty.)

DEDICATED TO W. S. LINDSAY, ESQUIRE.

PETER DICK, Peter Dick! how seedy and how sad you look—
We fellows in the Treasury have nothing sure to fear;
Your hair, I declare, makes you wild as a Bashi-bozouk:
Your collar, too, is wrinkled, and, my gracious! what—a tear?

Cecil FOX, Cecil FOX! you've a father and you're fortunate,
The howl of the Reforming pack falls harmlessly on you;
Your Pater,* Mr. Hayter, yields not to the importunate—
Who has no friend in Parliament I've none, what shall I do?

Peter Dick, Peter Dick! you are better off than most of us—
You write, you spell, and reckon well—how few of us that can!
If at Pool you're a fool, and precious green at Pitch-and-toss,
You're safe in your arithmetic—a hero with your pen!

Cecil Fox, Cecil Fox! I know my own deficiency:
How seldom men are equal to the work they undertake;
How few of our crew would show a high proficiency,
Were knowledge indispensable—examiners awake.

Peter Dick, Peter Dick! your words are dreadful ominous:
By Jove! I do believe you're a Reformer in disguise.
What! work like a Turk, have Trevelyan to examine us?
You know that a lot the *gents* born would office then despise.

Cecil Fox, Cecil Fox! our duty's clear and definite;
We cannot the ebb the flood of light with hands bef re our eyes:
Merit is the spirit of the age, and I have faith in it,
'Tis "down with incapacity—ability arise!" F. B.

* Political father.

PERSECUTION OF RUSSIAN DISSENTERS. There is a large sect in Russia, called the Raskols "of the old faith" (*Staroverzi*), who are to be found chiefly in Courland and Lithuania. The late Emperor had at different times ordered very severe measures to be taken against that sect, which is considered pre-eminent in the State. They were consequently deprived of the privileges of which they must be rendered incapable of filling any public offices, or of carrying on any trade or calling, or possessing landed property; they were not to be considered in the enjoyment of anything higher than the rights of peasants. The intentions of the late Emperor in this respect were, however, never fully carried out. The present one seems desirous of attaining a "final pre-eminence" over the "most-to-be-forgotten" hatred, and is striving to work out Peter's measures in their fullest extent. The causes on the subject have been brought to the recollection of various Deputies of this denomination in Riga: in consequence of the shops and houses being closed of a number of them have been closed, and the *staro-vertzi* are in despair. Some have been admitted to the full enjoyment of their civil and political rights by being baptised into the Orthodox Church; but the heads of two ecclesiastical bodies of Staroveri, rather than renounce their "old faith," have given up their business and reduced their standard of living to that of peasants; they have, however, had their children educated in the Greek Church.

THE BALTIC FLEET. THE FIRST GUN FIRED FROM CRONSTADT.—RUSSIAN INFERNAL MACHINES.

(From our Special Correspondent.)

OUR Artist writes, June 11, on board H.M. gun-boat *Starling*, Baltic Fleet, off Tolbukin:—

"I arrived here in the *Royal Adelaide*, on Friday morning, and asked the Captain for the loan of two or three of his people to go in search of a ship. The fleet are spread out in a straight line across the narrow part of the gulf, with Cronstadt in sight. The line reaches about three miles: pulling across it, I hailed a gun-boat under the flag of the *Duke of Wellington*. This proved to be the *Starling*, Lieut. Shute Piers, to whom I had an introduction, and he gave me a hearty welcome. Next morning, as I was sketching the *Duke of Wellington*, the Captain of that ship came on board the *Starling*, and I was introduced to him by Captain Piers. He left, and shortly afterwards returned to offer me a passage in the *Merlin*, to accompany the French Admiral, his officers, and the chief English officers of our fleet, who were going in as near as they could to Cronstadt, to survey the town, shipping, and forts. We weighed at one p.m., accompanied by the *Firefly* and the *Dragon* (English), with a French frigate. We took the lead for about a mile, or more; as we got near, the weather turned somewhat hazy, but I distinctly saw every building by aid of the glasses which the officers lent me. Cronstadt is a most formidable place, with lots of men-of-war. We counted thirteen gun-boats, nearly twice the size of ours: their length appeared about 200 feet—breadth, 30, or more. They are very low, shallow-looking vessels, and appear to have four large guns each. After laying-to for some time, and taking a good view of the place, we proceeded towards the Lighthouse, about three o'clock, when the ship was going at the rate of about five knots an hour, we received a tremendous shock, which made the guns and the shot dance out of the lockers, and the mast shake like a conjuror's whip. The engines were immediately stopped, but the ship still kept her way through the water, which convinced every one that it was the explosion of an infernal machine under her bottom. The watch below, alarmed by the shock, came rushing to the fore ladder—some without caps, and others without frocks, all in the greatest excitement. A broadside would not have effected half so much; but this was mystery, a hidden something, which no one knew the extent of. Orders were now given to reverse the engines, when something like a pile was seen from the port paddle-box, about six or seven feet from the top of the water. The leadsman dropped his lead upon it, and said that it felt like wood, with an iron spike at the top end. At this instant we received another shock much heavier than the first: the shot were too ed out of the rack, and rolled about the deck, the guns danced, and the mast tottered with a column of water thrown up above the bow. At this moment the *Firefly* was coming up astern, and in order to prevent her get ing into danger, all hands abaft set to work—waving and shouting, to prevent her coming up. By this time the open pennant was shown, and the *Firefly* put her helm to port, and thus stopped coming near us, but it was not long before she herself got a taste. We all felt the effects of the shock on board our vessel, it lifted so much. There was a general smash in the engineers' mess-room, the effects of which will be best understood by the accompanying Sketch.

We still, however, showed the Russians that a little would not intimidate us; for we coolly went round the point, and thus got a sight of all the forts. There have been several new forts built, with lines of mud-forts, like those at Sebastopol. The place is, unquestionably, very strong; the Risbank fort has in it 400 guns. Having seen all, we steered towards the fleet. I forgot to say, that while surveying the north side, a gun-boat fired one of her heavy guns at us—but it fell short. The officers told me I was a lucky fellow, and that I had seen more that day than Napier saw all last summer. *This was the first gun fired at the British flag from Cronstadt.* Our vessel's side was a good deal bulged in, and had eight sheets of copper displaced. After the explosion, the French Admiral came to me, and said in English: "I am very glad that we now know what the power of an infernal machine is."

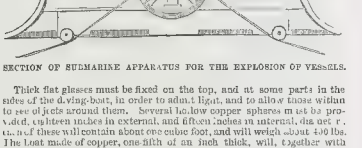
(We have received from our Artist, in addition to the scene engraved upon the next page, three other Sketches, which we shall engrave next week.)

THE DIMMOW FLETCHERS.—On the 18th July, the day appointed for the great races of Mr. W. Barr an Assheraft's prizes, all the tradesmen in the town have agreed to close their shops, and give their assistants a holiday to see the procession. Le Chevalier de Chastelain, and his wife, are accepted patrons of the time-honoured custom of Dimmow, conjointly with James Barlow and Rachael his wife, a worthy English couple.

SUBMARINE NAVIGATION.

THE vessel proposed for this object ought, for the facility of moving under water, to approach to the shape of certain fish. For the purpose of calculation it may be considered as a hollow copper prism, about twelve feet long, five feet high, and three feet wide, having two triangular prismatic ends, and entirely open at the bottom.

The lower part of each of the triangular ends is filled by a copper case half an inch thick and one foot nine inches deep. Its use is to contain water for ballast, or air, if necessary, and it forms a seat for the men; it will weigh 1900 pounds. Close to the side of the vessel, and extending longitudinally between these, are two other copper cases, not quite so one inch thick, one on each side; they will contain together about 8 to 9 cubic feet, and will weigh about 2800 pounds. A pump must be fixed in some part of the vessel, and must be capable of being connected by means of stop-cocks with any of the four cases just mentioned. At each end on the outer side must be two plates for rudders—one to act in a horizontal line, the other in a vertical plane; these must admit of being fixed at any given angle by the persons on the inside.



SECTION OF SUBMARINE APPARATUS FOR THE EXPLOSION OF VESSELS.

Thick flat glasses must be fixed on the top, and at some parts in the sides of the diving-boat, in order to admit light, and to allow those within to see objects around them. Several hollow copper spheres must be provided, eighteen inches in external, and fifteen inches in internal, diameter, the former of which will contain about one cubic foot, and will weigh about 400 lbs. The boat made of copper, one fifth of an inch thick, will, together with the apparatus, weigh about 3400 lbs., and will displace in quantity of seawater equal to nearly 8650 lbs. If four men navigate it, we shall have for the weight of the whole equipment—

	lbs.
Boat and apparatus	3400
Air-cases	1900
Oxygen cases	2800
Three spheres	1200
Four men	600
Triangular surfaces filled with water	1000
	8700

In this state, as the boat is fifty pounds heavier than an equal bulk of water, it will, of course, sink; but as any part of the 1000 pound weight of water may be pumped out, the whole apparatus may be reduced to such a specific gravity as just to sink. Some mechanism must be adapted to the vessel, by which the men within may be able to propel her through the water. Probably the most advantageous system would be to have a long metal bar passing out of the boat through a stuffing-box, to the outer end of which two planes may be attached by joints, in such a manner as to extend themselves completely when pushed from the boat by the men within, and nearly to close themselves when drawn in the contrary direction or towards the boat. Thus, in the first case, they would present a wide surface when making the stroke, and a very small one on the returning stroke; another advantage would be, that the act of propelling this vessel would be very similar to that of rowing. When the boat is reduced to such a specific gravity as just to sink, the two rudders, the axes of which are parallel to the horizon, must be fixed at such an angle, that that part of the propelling force which is thus converted into a vertical one, may just counteract the gravitation of the machine. The most important point in the employment of such a vessel, is the securing a supply of air, to enable the men to remain under water a sufficient time. The quantity of oxygen usually consumed by an individual is, according to the experiments of Messrs. Allen and Pepys, 20·25 cubic inches per minute, which agrees very nearly with the quantity assigned by Sir H. Davy; an allowance of 30 cubic inches per minute will, therefore, be ample. Every cubic foot of oxygen which can be carried in the vessel will supply one man during $\frac{1728}{30}$ = 57·6 minutes, or about one hour. The two air-vessels at the sides, as also the three spheres, may be filled with oxygen, condensed into thirty atmospheres. Oxygen is easily prepared from the black oxide of manganese; and the condensation of gases to the density mentioned, is practised every day by one of the London Gas Companies. The quantity of oxygen would stand thus:—

	Cubic Feet.
Two air-cases	9·16
Three spheres	5·63
	14·8
Atmospheres	30
Number of hours' supply for one person . . .	271·80

Supposing four persons in the vessel, they would take down with them sufficient oxygen to last them above sixty-eight hours, or more than two days and a half.

In order to get rid of the carbonic acid which would be produced, it would be necessary to employ acream of lime just slaked, or a strong solution of ammonia; either of which would absorb it almost as quickly as it would be produced.

Another method of procuring a fresh supply of air might in some cases be had recourse to, particularly when the vessel is near the surface; a

THE ENGINEERS' MESS-ROOM, H.M.S. "MERLIN," AFTER THE EXPLOSION OF TWO INFERNAL MACHINES UNDER THE SHIP.—FROM A SKETCH BY J. W. CARMICHAEL.

leathern hose, connected at one end with the pump, and having a light substance to enable the other end to float on the water, might be pushed out under the edge of the vessel, and it would instantly rise to the surface; the first few strokes of the pump would draw water, which would immediately be got rid of, and fresh air might now be pumped in, either for immediate use, or it might be condensed in one of the cases for future service. If it should be feared that the float would discover the boat to an enemy, it might easily be disguised in the form of a sea-bird. The method of supplying a vessel under water with oxygen might perhaps be applied with economy at our dockyards, where the force for condensing might be derived from the steam-engine: it would be particularly useful if the diving-bell should ever be employed at much greater depths, as the difficulty of using the air-pump then becomes considerable.

The diving-boat may be employed for two different objects, either as a moveable diving-bell, or as a mode of crossing undiscovered a considerable distance of water.

SIR,—The above plan of Submarine Navigation was published in the "Encyclopædia Metropolitana" (Art. Diving-Bell), about the year 1826. The great principles on which it is founded are:—

1st. That the vessel should be open, so as to have nearly an equal pressure within and without, as well as to enable the drivers to travel out of it, and to have easy access to any contagious objects.

2nd. That it should be supplied with condensed air, or condensed oxygen, by portable reservoirs, and also with the means of pumping down air through a tube floating on the surface of the water.

3rd. That the carbonic acid resulting from the breath of the crew should be absorbed by chemical means.

4th. That the crew should be enabled to move their vessel in any required direction.

5th. That it should have a self-acting apparatus to maintain it at any given depth.

The vessel may be moved about either by the means above described, or by a screw, or by pumping water out at one end: in this latter case it might be readily turned round on its axis by the opening or closing four apertures placed respectively at the two sides of each end.

If the object be to enter an enemy's harbour, a boat might be sent close in during a dark night, and, dropping an anchor, thus lay down a mooring connected with the ship or with some distant buoy, upon which the submarine boat might at any time haul itself up to the entrance of the harbour.

The present state of our knowledge has added little to these means, except, perhaps, that the path of the submarine vessel and the work its crew have in hand might be illuminated by electric light; and communications might be kept up with a vessel in the offing by electric telegraph, contained, if necessary, in the mooring-rope itself.

The Russian Government can scarcely be unacquainted with this plan, for no country so speedily avails itself of any discovery of science which can contribute to its advancement.

The French Government in 1847 made experiments on Submarine Navigation both in Paris and at Cherbourg. These experiments were conducted by Dr Payerne, upon plans of his own, which seem to have embodied several of the principles just stated. Many persons descended in a vessel of this kind, and remained under water during several hours. The vessel was employed in examining the bottom of the harbour of Cherbourg, and in removing obstructions. An account of it was published in the French newspaper *La Presse*, about 1847. The only difficulty seems to have arisen from the slowness of the motion communicated to it by means of its screw propeller.

The same gentleman, Dr. Payerne, was afterwards, and perhaps still is, employed with the same means in the harbour of New York.

These facts must have been unknown to the English Government in the autumn of last year: for it was stated that diving-bells, divers, and apparatus, were sent out to enable the fleet to blow up the obstructions at the entrance of the harbour of Sebastopol, as soon as the army should succeed in taking that fortress.

Yet, if these long-known means had been used for a season or two in destroying the remains of the *Royal George*, our divers would have gained experience, and have been enabled to enter with safety any harbour, at any hour, and have destroyed the obstructions at the entrance of Sebastopol, and possibly also removed some of the batteries which protected them.

I am, Sir, your obedient servant,

Dorset-street, Manchester-square, May 8, 1855. CHARLES BABBAGE.

SUBMARINE APPARATUS FOR THE EXPLOSION OF VESSELS, PROPOSED BY MR BABBAGE

"THE GEYSER" TOWING TEN PRIZES OUT OF FARO SOUND.—(SEE NEXT PAGE.)

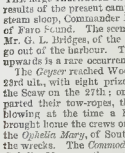
H.M.S. "GEYSER," AND RUSSIAN PRIZES.

THE large Illustration on the preceding page represents one of the early results of the present campaign in the Baltic—the *Geyser*, 6, paddle-wheel steam sloop, Commander R. Drew, taking ten Russian prizes in tow out of Faro Sound. The scene was very striking; and our Correspondent, Mr. G. L. Bridges, of the *Geyser*, has represented the vessels turning to go out of the harbour. The taking in tow of ten vessels of 300 tons and upwards is a rare occurrence.

The *Geyser* reached Woolwich on the 1st inst. She left Elsinore on the 23rd ult., with eight prizes in charge, towing six of them. She passed the Scaw on the 27th; on the 28th, during a heavy gale, five of them parted their tow-ropes, the other was cast off, about half sea over, it blowing at the time a heavy gale from east-south-east. The *Geyser* brought home the crews of the late brigs *Comandore*, of Montrose, and the *Ophelia Mary*, of South Shields, except the masters, who remained by the wrecks. The *Commodore* was wrecked on the Lesso Island, and the *Ophelia Mary* on the coast of Sweden: both crews, sixteen in number, have been landed at Sheerness.

OBITUARY OF EMINENT PERSONS.

THE EARL OF CARYSFORT



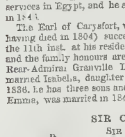
GENERAL JOHN PROBY, second Earl of Carysfort in the Peerage of Ireland, and first Baron Carysfort in that of the United Kingdom, was the second son of John Joshua, the first Earl, by his wife Elizabeth, only daughter of the Right Hon. William Osborne, Esq., of Newtown, county Tipperary. He was born in 1780, and having completed fifteen years of age entered the British army, having previously spent a portion of his juvenile course at the Military School of Angers, in France, where the Duke of Wellington

had also studied. The military career of John Proby, Earl of Carysfort, was one of long toil and brilliant repute. He first came into notice when serving with the army of the Archduke Charles; and he was a busy sharer in the various sieges, skirmishes, and encounters of that period in Italy and Germany. He was soon after in Ireland acting under Lord Cornwallis during the rebellion of 1798; where he displayed both humanity and consideration towards the wretched insurgents, so much so indeed, that many listened to his counsels, returned to their allegiance, and went to be good soldiers of the Crown abroad. Proby was with the Russian army at Zurich, and he accompanied Sir Ralph Abercromby in his celebrated Egyptian campaign. He shared in the labours of Sir John Moore, and in the glory of Corunna. He was also in the unfortunate campaign of Walcheren, and he led his old and favourite corps, the Grenadier or 1st Foot Guards, at the storming of Bergen-op-Zoom. In 1811 he went to Spain, and was present in many actions under His Grace Wellington. He was second in command at Tarifa, and rendered essential aid to Wellington at the siege of Burgos. He received a medal for his services in Egypt, and he also held an old war medal. He became a General in 1846.

The Earl of Carysfort, who (His elder brother, Captain Lord Proby, R.N., having died in 1804) succeeded his father, as second Earl, in 1828, died on the 11th inst. at his residence near Bristol. His Lordship was never married, and the family honours are therefore inherited by his only surviving brother, Rear-Admiral Granville Proby, now third Earl of Carysfort, who married Isabella, daughter of the Hon. Hugh Howard; by whom, who died in 1836, he has three sons and four daughters; of whom the second, Elizabeth-Emma, was married in 1844 to Lord Canal Hamilton, M.P.

SIR CHARLES BLOIS, BART

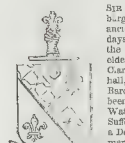
SIR CHARLES BLOIS, the seventh Baronet of Grundisburgh-hall, Suffolk, and the representative of the very ancient family of Blois, of Norman origin, died a few days since at his residence, Cockfield-hall, Suffolk, in the sixty-second year of his age. Sir Charles was the eldest son of Sir Charles, the sixth Baronet, by his wife, Clara, daughter of Jocelyn Price, Esq., of Cumbleworth-hall, Yorkshire. He succeeded his father as seventh Baronet the 20th August, 1850. He had previously been in the Army, in the Dragoons, and had served at Waterloo. He was Lieutenant-Colonel of the East Suffolk Militia from 1844 to 1853, and was appointed a Deputy-Lieutenant of Suffolk in 1852. He was never married, and is succeeded by his next brother, John Ralph, a Commander in the Royal Navy, of Halywater, co. Antrim, now the eighth Baronet, who married Eliza Knox, second daughter of the Rev. John Barrett, and has three sons and two daughters.



GEORGE NATHANIEL CURZON, ESQ.

THIS unfortunate gentleman, whose premature death was occasioned on the 17th inst., by a fall from his horse in Hyde-park the previous afternoon, was the nephew and heir-apparent of the present Lord Scarsdale, being the elder son of his Lordship's half-brother, the Hon. and Rev. Alfred Curzon, by his wife, Sophia, second daughter of R. Holden, Esq., of Nuttall Temple, Notts. He was born the 5th October, 1826. His brother, Alfred Nathaniel Holden, born the 12th July, 1831, becomes, by this untimely demise, the heir apparent of the Barony of Scarsdale; and, indeed, with the exception of the present Peer, the only male descendant of the first Baron now existing.

SIR G. H. ROSE.



THE Right Hon. Sir George Henry Rose, G.C.H., of Sandhills, Hants, Lord of the Manor of Christchurch, was the eldest son of the Right Hon. George Rose, Clerk of the Parliaments, and grandson of the Rev. David Rose, of Sethnet, a presumed descendant of the old Normanic family of Rose. Sir George Henry Rose commenced a long public career, by being elected M.P. for Southampton in 1796. He was shortly after appointed Secretary of Legation to the Court of Berlin. He was made one of the Paymasters-General of the Army in 1803, and was sent on a special mission to America in 1807. In 1814 he went as Envoy Extraordinary to Munich, and subsequently to Berlin. He was returned to Parliament in 1818, by the borough of Christchurch; and eventually succeeded his father as Clerk of the Parliaments: he retired in 1844. Sir George was made a Privy Councillor in 1813, and was knighted in 1819. He was known in literature as editing "A Selection from the Papers of the Earls of Marchmont, illustrative of Events from 1685 to 1750." Sir George married, in 1796, Miss Duncombe, but has had no issue. He died at his seat, Sandhills, near Christchurch, Hants, on the 17th inst.

LIEUT.-COLONEL SQUIRES, an old and gallant officer, for many years connected with the 13th Foot (Prince Albert's Own), died on the 10th inst. at the age of 74. He saw much hard service in the Peninsula and in the Burmah campaign. He subsequently commanded the 13th Foot during the Afghanistan war. He acted under Sir Robert Sale, and next under Lord Keane; and he received a medal for Ghuznee.

WILLS, PERSONALTY, AND BEQUESTS. The Rev. C. Milman Mount, M.A., Prebendary of Wells, £30,000 personalty.—John Alston, Esq., of Suffolk-street, Pall-mall, £50,000. William Pollard, Esq., Cornwall, £20,000. —The Rev. John Goode Foyster, M.A., Rector of St. Clements, Hastings, £14,000; and has bequeathed £500 to the Society for the Propagation of the Gospel in Foreign Parts; £200, Propagation of Christian Knowledge; £300, Clergy Aid Society; £200, Society for Enlarging, Building, and Repairing Churches and Chapels; £200, Church Pastoral Aid Society; and he bequeaths to the Hastings Infant School, St. Clements; the Hastings Literary and Scientific Society, St. Leonards Loan Fund, and £100 to the Society for Relief of Widows and Orphans of Clergymen of the Archdeaconry of Lewes.

LOUIS NAPOLEON VICE NICHOLAS.—Sir Charles G. Young, Garter Principal King at Arms, with his assistants, was engaged at the Chapel Royal of St. George, Windsor, on Monday, in rearranging the insignia of the Knights of the Garter—consisting of the helmet, surcoat, sword, and banner—which are suspended over their respective stalls; this arrangement being rendered necessary by the late election of Knights of this most noble Order. The insignia of the late Emperor of Russia, and also those of the late King of Saxony, have been removed, and the insignia of the Emperor of the French is placed opposite to that of the King of Prussia, and next to that of the King of Wurtemberg.

SEBASTOPOL COMMITTEE REPORT

THE Report of the Committee to Inquire into the Condition of the Army before Sebastopol, which was brought up by Mr. Roebuck on Monday evening, and read to the House by Sir D. Le Marchant, commences with a confession that the complicated nature of the inquiry, the variety of subjects, the number of witnesses examined, and "the frequent inconsistency and contrariety of evidence," render it difficult to present a definite and just exposition of the matters submitted to them. To add to these difficulties, the Committee has not been able to obtain the evidence of certain persons who might have furnished important information; and from the same cause some persons are left under imputation, in regard to which the Committee regret that they can pronounce no conclusive opinion. The fulness of the investigation has, moreover, been restricted by considerations of State policy, so that in the outset of their report the Committee admit that they have been compelled to end an inquiry which they have been unable satisfactorily to complete.

The opinions formed by the Committee relate to "the condition of our army before Sebastopol," and "the conduct of the departments, both at home and abroad, whose duty it has been to minister to the wants of that army." On the first of these two heads the following brief statement is given:

THE CONDITION OF OUR ARMY BEFORE SEBASTOPOL.

An army encamped in a hostile country, at a distance of 3000 miles from England, and engaged during a severe winter in [illegible] from want of numbers, it could not meet, was necessarily placed in a position where unremitting fatigue and hardship had to be endured. The Committee are, however, of opinion that this amount of unavoidable suffering has been aggravated by causes hereafter enumerated, and which are mainly to be attributed to delay and want of [illegible] The army with necessaries and comforts on its healthy and effective [illegible] In arriving at this opinion, they have made allowance for the unexpected severity of the season on the 14th of November, and they have not been unmindful of the difficulties which a long period of peace must inevitably produce at the commencement of a campaign.

In order to obtain an adequate notion of the painful condition of the army, the evidence must be perused; and your Committee will only refer to such details as may be requisite to sustain their opinion.

From the 16th of September, when the army landed in the Crimea, until the end of October, or, as witnesses state, until about the middle of November, the troops suffered from overwork and from dysentery, but were not, upon the whole, ill provided with food; even at this period there was a want of clothing for the men in health, and a painful deficiency of all appliances for the proper treatment of the sick and wounded. As the season advanced the causes of sickness increased, and the army, with its number of effective men daily diminishing, became more and more disproportioned to the amount of duty which it had to perform.

From the middle of November, this army was, during a period of many weeks, reduced to a condition which it is melancholy to contemplate, and which was endured both by officers and men with a fortitude and heroism unsurpassed in the annals of war. They were exposed under single canvas to all the severities and inconveniences of cold, rain, mud, and snow, on high ground and in the depth of winter. They suffered from overwork, exposure, want of clothing, insufficient supplies for the healthy, and imperfect accommodation for the sick.

[illegible] generally resulted from the inadequacy of the force for the task assigned to it. The British army was a portion of an allied force. The whole scheme of the siege, the extent of front to be defended, the positions to be maintained, and the works to be undertaken, depended on military considerations, and were decided upon in connection with our allies. Your Committee regard these matters as beyond the limits of their inquiry.

The second department of inquiry resolves itself into various branches. First of all, the report treats of

THE CONDUCT OF THE GOVERNMENT AT HOME.

The responsibility of the expedition to the Crimea rests upon the Home Government. On the 10th of April, 1854, Lord Raglan was directed to obtain information as to the strength of Sebastopol, and the number of Russian soldiers in the Crimea. On the 29th of June Lord Raglan was directed to concert measures for the siege of Sebastopol; and in the same despatch the Duke of Newcastle says, "There is no prospect of a safe and honourable peace until the fortress is reduced and the fleet taken or destroyed." It does not appear, however, that the Government had any very definite information as to the state of affairs in the Crimea at the time they ordered the expedition. As regards the Russian forces, for example, one account estimated them at 30,000, another at 120,000 men. Lord Raglan does not appear to have been favourable to the expedition. In a despatch of the 19th of July he states that "the descent on the Crimea is decided upon more in deference to the views of the British Government than to any information in possession of the naval and military authorities, either as to the extent of the enemy's forces, or to their state of preparation. The Cabinet, however, was confident of success: the general impression being, according to Lord Aberdeen, that "Sebastopol would fall almost immediately by a *coup-de-main*." The result of this confident opinion was the neglect of all due provision against a reverse. The order to attack Sebastopol was sent to Lord Raglan on the 29th of June; the formation of a reserve at Malta was not determined upon until early in November.

The Committee express their regret that the formation of a large reserve at home, and also in the proximity of the seat of war, was not considered at a much earlier period, and that the Government, well knowing the limited number of the British Army, the nature of the climate in the East, as well as the Power we were about to encounter, did not at the commencement of the war take means to augment the ranks of the Army by and the ordinary recruiting, and also that earlier steps were not taken to render the Militia available both for the purpose of obtaining supplies of men, and also, in case of necessity, for the relief of regiments of the Line stationed in garrisons in the Mediterranean—measures which they found themselves compelled to adopt at a later period.

THE SECRETARY OF STATE FOR WAR

The very difficult position of the Duke of Newcastle, on accepting the Secretaryship for War, is described in strong terms:—"He had no documents prescribing his new duties, no precedents for his guidance, and his under-secretaries were new to the work." Then again, as regards his colleagues:—"His interference was sought for in matters of detail, wherein his time should not have been occupied, and he was left unacquainted with transactions of which he should have received official cognisance. Feeling his large responsibilities, he took upon himself to remedy in numerable deficiencies which were brought to his notice, and, in the meantime, matters of paramount importance were postponed." The passing passage in reference to the ignorance of the Government of the state of affairs in the East is the best reply to these Ministerial statements which were made last winter regarding the injury done by faithful reports from the seat of war:

The evidence, moreover, shows that the Duke was long left in ignorance, or was misinformed, respecting the progress of affairs in the East. He was not, until a late period, made acquainted with the state of the hospitals at Scutari, and the horrible mode in which the sick and wounded were conveyed from Balaclava to the Bosphorus. Lord Aberdeen has significantly observed, that the Government were left in ignorance longer than they ought to have been of the real state of matters in the East. The Ministers, he says, were informed of the condition of the army from public papers and private sources long before they heard it officially, and, not hearing it officially, they discredited the rumours around them. Thus, while the whole country was dismayed by reports, and was eagerly looking for some gleam of official intelligence, the Cabinet, according to the statement of Ministers, was in darkness.

THE ORDNANCE DEPARTMENT.

This branch of the public service has been very grossly mismanaged. During the summer and autumn of 1854, at the very time when the pressure of business was heavier, and the expenditure of this department was larger than in any previous year, two officers were wanting—the Master-General and the Surveyor-General whose functions the most economical administration had been unable to dispense with in times of peace. The Committee charge Lord Aberdeen with having neglected his duty in regard to this department; at least they say that if Lord Aberdeen would have acted more beneficially for the public service if he had appointed another Master-General when Lord Raglan could no longer discharge the duties of the office, and they are of opinion that a vague intention of remodelling the Ordnance office affords no justification for the course pursued. If this office were deemed to be imperfect, and ill adapted for its functions, there was the more need during its continued existence of an able man to superintend its proceedings. The Ordnance-office strikingly exemplifies the disordered state into which a department may fall when there is no able hand to guide it."

TRANSPORT AND COMMISSARIAT.

As regards the management of the Transport department at home the Report speaks favourably. Within a year somewhere about 150,000 men, and above 7000 horses were conveyed, principally by steam, a large portion of them to a point 3000 miles distant from this country; besides wash, vessels had to be provided for stores to an enormous amount, for the purposes of war, for the sustenance of both army and navy, and for the effective maintenance of a steam fleet. Sudden requisitions for huts and other urgent necessaries had also to be met. The forwarding of stores, however, which falls under this head was not so well ordered. The unnecessary sufferings of the soldiers directly referable to the neglect of proper arrangements, are described as forming "one of the most painful portions of the evidence."

The Transport service in the Black Sea and in the Bosphorus was characterised by great confusion and inefficiency, owing to a want of a proper understanding as to who was responsible for the management of that department. Want of system being the rule, and no person being responsible for anything, the greatest disorder prevailed at Balaclava; but the Report does not decide as to whose shoulders the blame ought to fall upon.

The land transport appears to have been a system of blundering from the first; and, even after its deficiencies had become apparent to every one, no adequate measures were adopted for its improvement. In connection with this important branch of the service the state of the road from Balaclava to the Camp was considered.

So much of the suffering of the troops having been ascribed to the almost impassable condition of the seven miles of road, the Committee endeavoured to ascertain who was responsible for its maintenance, and what insuperable obstacles impeded its repair. After stating that the duty of making and maintaining roads for the army falls upon the department of the Quartermaster General, but that he was about the beginning of winter disabled by severe illness, the Report says:

As far as the information obtained enables your Committee to form an opinion, it appears to them that in this matter there was a want of due foresight and decision. Early in November, when the probable necessity of wintering in the Crimea was contemplated, energetic means should have been taken to provide and maintain an effective communication between the Camp and Balaclava. The road had then already been injured by the traffic, and its condition had excited the apprehensions of the Commissary-General, who had called attention to the subject. If a military force could not be spared, measures should have been taken to obtain their labour in the East, or application should have been made to the Home Government, who might have sent labourers from England. Such precautions would have saved much loss of time and many valuable lives, and would have enabled us to maintain the land transport service in an effective condition. The probable failure of the communication was not, however, brought to the notice of the Duke of Newcastle until too late to enable him to take measures in England to prevent the serious calamities which subsequently arose.

The evidence relating to the Commissariat is said to have been of a contradictory character. Until the end of October the rations were furnished with regularity, and consisted of fresh meat twice or thrice in the week. After that time the soldiers generally appear to have suffered very much from want of rations and from irregularity in their issue. The explanation given with regard to the raw coffee is not deemed satisfactory by the Committee. The more immediate comfort of the troops appears to have been overlooked, while ingenious arguments on the volatile aroma of the berry, and on the Turkish mode of packing coffee, were passing backwards and forwards between Commissary-General Filder and the Treasury.

The Medical Department in the East appears to have been very ill managed, owing to the want of a proper system. Dr. Smith, the Director-General, states that he was under the immediate authority of five different superiors—the Commander-in-Chief, the Secretary of State for War, the Secretary at War, the Master-General of the Ordnance, and the Board of Ordnance. It is easy to understand how confusion and neglect should have prevailed under these circumstances. In addition to so many masters, also, there was the fear of incurring too much expense. "The strict economy enforced during a long period of peace, by means of a rigid system of audit and account, may doubtless, at the first outbreak of war, have still fettered Dr. Smith, as well as other public servants, who dreaded to incur responsibility for any expenditure, however urgent, which was not guarded by all the forms and documents usually required. An excess of caution, in the first instance, led probably to some evils, which a lavish outlay could not afterwards repair."

In conclusion, the Committee, after stating that they have adverted to the chief points contained in the replies to above 21,000 questions, make the following remarks:

Your Committee report that the suffering of the army resulted mainly from the circumstances under which the troops sent into the Crimea was undertaken and executed. The Administration which ordered that expedition had no adequate information as to the amount of the forces in the Crimea. They were not acquainted with the strength of the fortresses to be attacked, or with the resources of the country to be invaded. They hoped and expected the expedition to be immediately successful, and, as they did not foresee the probability of a protracted struggle, they made no provision for a winter campaign.

The patience and fortitude of the army demand the admiration and gratitude of the nation on whose behalf they have fought, bled, and suffered. Their heroic valour, and equally heroic patience under sufferings and privations, have given them claims upon their country which will doubtless be gratefully acknowledged.

Your Committee will now close their Report with a hope that every British army may in future display the valour which the noble army has displayed, and that none may hereafter be exposed to such sufferings as are recorded in these pages.

STATE OF SEBASTOPOL. The official reports of the state of Sebastopol received in St. Petersburg at the beginning of this month no longer exhibit the same satisfactory picture of things as previous to the last bombardment. The south side of the town has suffered very considerably; a number of houses and churches, and others only the external walls are distinguishable; the theatre, which is endeared to the Russians by so many recollections, has ceased to exist. The northern portion of the town has by no means suffered so much, but yet there is hardly a house where the walls or roof of which have not been perforated by grenade, shell, ball, or rocket, or the window-panes and frames of which have not been destroyed by fragments of exploding shells. The inhabitants of Sebastopol have, however, by no means deserted the town; with few exceptions, they continue to occupy their houses, even though battered. In the shops and warehouses traffic is represented as being kept up with but little diminution. Even the hotels were not shut. The only promenade which is left the fashionable world in these parts is the new Boulevard in the neighbourhood of Kasarski's monument, from which there is a fine view—on the one side of the surrounding mountains, with the Allied camp, its trenches, and its fortifications; on the other side, over the sea, with the Allied fleets keeping ward and watch over the Crimea. On the northern side steamers and boats are seen all day and all night plying to and from the Catherine Harbour, laden with gabions, fascines, balas, shells, powder, and *matériel de guerre* of all sorts; while on the landing-places stores of cannon and carriages, mortars, beams, and other artillery materials, are piled up. *Letter from Berlin.*

Riza Pacha, the Turkish ex-Minister of War, does not appear to have fallen into disgrace. An Imperial decree of the 4th inst. allows him monthly pension of 60,000 piasters per month—equal to £3000 per annum.

NOTES OF THE WEEK.

PARISH vestries, boards of management of charitable institutions, club committees, all being assemblies of gentlemen who do a good deal of not very agreeable work gratis, from a sense of duty, mingled perhaps with a little love of power, sometimes do, and sometimes do not do, their work well. When they do, it will generally be found that they contain some two or three active, clear-headed men, who like business for its own sake, and who do not dislike ruling, and, to some extent, domineering, over their more indolent or less practical colleagues, who are well content to follow where the others lead. When they don't, the cause is usually that in the choice of their members social position or high respectability have been consulted, rather than practical business habits. Then you get only good intentions: all improvements are shunned as unnecessary and dangerous—the steward or the secretary becomes the manager—the common humanities—in a parish, rates increase—in a hospital, the funds diminish—in a club, members suffer under a stereotyped bill of fare, and the coffee-room never pays its expenses. The Literary Fund, certainly one of the most admirable institutions of the century, appears to have fallen into this last-described condition. Although literature, as a profession, has attained a development at this day which its professors of the last century or their Mecænases—the Tonsons, Lintots, Davies, Dodsleys could never have contemplated, yet the fund for the relief of indigent literature by no means flourishes in the same proportion. At the annual dinner we were told that the Literary Fund flourished, that it had done much good in the past year; yet somehow we felt that the good it did do was not as much as could be expected from an institution with such high claims, and that its flourishing was rather like that of the tropical plant than that of the young bay-tree. A few clear-headed, practical men—one of the most clear-headed, most practical, Mr. Charles Dickens, in the van—took the feeling to heart. They examined and discovered many things that should not have been, especially that the dispensing of £1500 worth of charity in the year cost £500. A committee was appointed, and, through the chairman (Mr. Dickens), made certain recommendations to the general meeting of the society on Saturday last. They advised—in the first place, that the administrators of the Fund should be empowered to grant revocable annuities to distressed men of letters: secondly, that they should have the power of granting relief by way of loan. It is wonderful to me how any one could object, as Lord Stanley did, to such reasonable propositions. A timid proposal was made, of a very different kind—one which, with much deference to its originators, I do not think likely, if carried out, to meet with success. This was to make the Fund a social as well as a charitable society—in fact, to use its rooms as the place for meeting of a literary club. My objection is this:—A club is a grand institution, and helps us more than almost anything to float comfortably down the stream of metropolitan life. That stream is violent and turbid enough, and the club saves us from many a grazed knee and bump on the sandbanks and rocks in its course. But this pleasant cushion, this haven of repose, what would it be if the first, the only recognised claim for admission, were not that a man should be what Doctor Johnson called clubbable? Many a man of great talent—a scholar—a thinker—is by no means clubbable. You would rather be out in the rain than read your newspaper by his side. He is disputatious, perhaps—has a theory, and will vivisimise you to its development; in short, an insufferable bore. But if this proposed Literary Club were formed, would he be kept out? There is another thing I am quite aware that literary men are the most enduring, the gentlest, the most lamblike of mankind: if they do not all love one another, their disciples are of the mildest kind—they never vilify, attack, or slander their brother penmen. Yet is it not too much to expect that the much-belaboured author shall enjoy his cup of souchong, with a perfect gusto, under the very nose of the scarifying critic? Journalists, indeed, are necessarily so much thrown into all sorts of company, that we may trust the *Herald* not to tweak the nose of the *Daily News*; but will the lion of the *Quarterly* lie down with the lamb of the *Westminster*? Finally, there would be wanting the great charm of a club, its picture of society—a quality not only agreeable, but extremely useful to authors, whose pursuits incline them too much to live in coteries.

The failure of a West-end banking-house is a fact which from its rarity must excite astonishment. In twenty years I recollect only two cases—that of Messrs. Cochburn, an exceedingly small concern, the failure of Hammersley's. The latter was a curious case. There were no partners—the "firm" was Mr. Hammersley only, who was childless. He died in a fit, entirely without warning, on a Sunday afternoon. Of course the bank could not open on the Monday; in fact, it ceased to be a bank. On examination of the books it was found that the concern was insolvent, had been so for twenty years, although the proprietor had always lived on his private fortune, and applied the profits of the business, which were large, to the redemption of its debt. It was calculated that, had he lived three years longer, all the liabilities would have been cleared off. As it was, a very large dividend was paid. The late failure of Messrs. Strahan appears to be in many ways an exceedingly bad case. The debts are said to amount to nearly three-quarters of a million, and the assets to be little or nothing. They seem to have kept open to the very last moment; for it is a fact that on Friday evening their insolvency was notorious among the City bankers, yet they went on during Saturday. On that day £24,000 was paid over the counter by them to depositors who had got a hint of the state of the case, to the direct injury of less well-informed creditors. Such a failure must necessarily be a heavy blow to the confidence reposed in private bankers in general. The worst part of the business is that, not content with the deposits of their customers, Messrs. Strahan and Paul have made away with their securities, and, consequently, warrants for their apprehension on the charge of felony have been issued; but the senior partner is not to be found. Sir John Paul, after having been actually in custody, was, by extraordinary mismanagement, allowed to escape; and only Mr. Bates, the junior partner, has as yet fallen into the clutches of the law.

If ever there was a deed calculated to make the blood of the whole nation boil, and to charge the feeling of national enmity with the most virulent elements of personal hostility, that deed is the atrocious massacre of our sailors at Bango. If the Emperor of Russia would not leave to posterity the reputation of an accomplice in an act which can hardly be paralleled by any tales of African or Malay warfare, he will visit with an awful retribution the ruffians who perpetrated it. There is, there can be, no *audi alteram partem* here. Twenty men, bearing a flag of truce, unarmed, are fired upon, dragged on shore, bayoneted, murdered to the last man (as the assassins thought), by three or four hundred. In the sack of a town taken by assault, when, if ever, men become fiends, such abominable savageness was never heard of. If the Czar and his chief officers wish to have the credit of carrying on the war as civilised nations should; we shall soon hear that the globets on which the bodies of these murderers are suspended will give the promontory of Hango an especial right to its name.

The principles of the division of labour—that which teaches that every man does best what he has been specially educated to do—is about to be further carried out in the Crimea. The sufferings of the past winter have taught us that it is desirable, as far as possible, to reserve the soldier for fighting: that to employ him in drawing waggons, sinking wells, or making roads, not only exhausts his strength, which is wanted for other purposes, but injures his discipline and general efficiency. It is bad economy, too, to use him in this way. A thousand navigators will make a better road in a week than five thousand soldiers in a fortnight, and will get far upon it. The new "Army Works Corps" will in a few days be on its way to the Crimea. It is, for the present, to be 1000 strong; and contains 500 navvies, 70 carpenters and smiths, and 65 artificers—including shoemakers, tailors, harness-makers, even barbers. By the way, as nobody shaves in the Crimea, these last will have an easy time of it. Any one who has seen an army on active service must know how useful such a corps will be. They will do the hut-building, draining, cleansing, bridge-making, grave digging; leaving the soldier to husband the plenitude of his strength for the battle-field or the assault. Nor will they be in any way a cause of weakness to the army by increasing the number of non-combatants. I will back 1000 navvies, the most powerful men in the world, with their revolvers in their pockets and their pickaxes on their shoulders, to give a good account of any Russians that may try to interfere with their "working parties."

CHESS.

TO CORRESPONDENTS.

F. Conneyelare.—The rule is, that should a player take one of his adversary's pieces or castle, he cannot afterwards say, "I calculate," or words to that effect, and attempt to escape it; but if it cannot be legally taken, he may oblige him to move the King. Should it so happen that the only option legally to be moved, then no penalty can be inflicted.

AN AMATEUR AND CONSTANT SUBSCRIBER.—1. The Problems shall be examined. 2. The fine three-move Problem, you mention, by the Rev. H. Bo—n, appeared in our Number for March 7th. 3. A Pawn can take en passing, as well in a Problem as in a Game. 4. Your Solution of Elizabeth's stratagem is correct. 5. No. 580 cannot be solved in three moves.

H. R., W. C. Stockham.—Your Solutions of the Poetical Enigma are correct.

HON. SECRETARY.—Such a publication in the hands of men of industry, experience, and competence to use, would at least deserve success. It should certainly have our cordial support.

DELTA, Paris.—A packet was despatched to you early in the week, and an acknowledgement of its safe receipt requested.

GERMANICUS.—Chess amateurs are under great obligations to Dr. Forbes for the light his Essays have thrown upon the early history of the game. He has contrived to steer away a middle course of historical lore which neither alter writer has accumulated on the subject, and presented us, for the first time, with a smooth but lucid and intelligible notion of what the most ancient form of the game resembled, and of the transmutations it underwent prior to its introduction into Europe.

CATALOGUE.—Such is, as was first pointed out by Mr. Von Heydebrandt ("Schachzeitung," 1847), the whole of the games in the work of Salmon are borrowed from Lopez. This is an open dispute of your friend's hypothesis, and requires any further inquiry needless.

UBIQUE.—"Get on" Chess player's Handbook," published by Bohn; or "Tomlinson's Amusements in Chess," published by Parker.

W. G. Walworth.—Problems fettered by any conditions beyond the ordinary ones are unsuited to our columns.

H. L. Every attempt at solution interests us.

J. A., Sheffield.—We are glad to know that, amidst the all-predominating rage of gambling, Draughts can find a place for elegant amusement still prevails. Send us a few more specimens of Cochrane's Gems.

W. G.—Your solution of the "Native's" Problem is correct. The other two are wrong.

L. L.—We probably in future the solutions shall be given with more punctuality.

M. H. B., Leamington.—Chess Magazine. The best monthly for strangers will be to make inquiries at Bell's Chess Rooms, and inquire for the Rev. W. Temple, who has kindly undertaken the Secretaryship necessary for the occasion, and who will furnish the improved rules.

J. P.—The return match between Liverpool and Manchester on and off on Monday last.

W. S. H. probably give one or two of the games next week.

ALPHA.—Despite a trifling piece of unsteadiness, during the Leamington meeting, will be the expert I. Where every advantage will be made by the Committee to ensure honour and fair play.

SOLUTIONS OF PROBLEMS.—No. 586, by M. P. J. of Hanworth, Philip, G. T. M., H. T., F. R., Norwich, Scrutator, A. B. C., Lyra, S. W. G., Newton, Sandford, G. W. J., Trevor, Jacob, Mercer, Rose Hill, W. S., L. D., Ant., Miss Sandford, G. W. J., Trevor, Jacob, H. P. W., Ivan, Mr. Pratt's, W. M. A. Wilson, C. T. F. Germanicus, Berwick, and Cecil. All others are wrong.

SOLUTIONS OF PROBLEM No. 587, by Peter, N. M., Knight, Lynx, Rex, Lacy, F. R. S., M. P., Hull, Chat, Cam, are correct. All others are wrong.

SOLUTION OF PROBLEM No. 588.

WHITE.	BLACK.
1. Kt takes Q P	B takes B (best)
2. Q to Kt 2nd	Anything
3. Kt takes P (ch); or, Kt to Kt 5th, or B 5th, according to Black's play, and then Mate follows next move

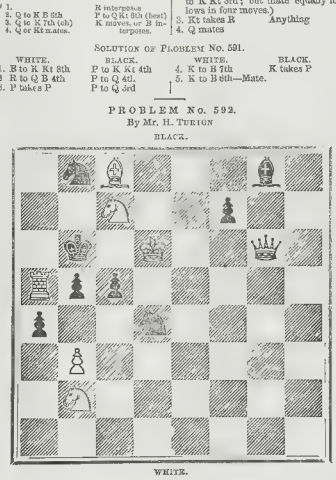
BLACK.



WHITE.

White to play, and mate in four moves.

CHESS IN PARIS.

GAMBIT in the Match between MM. LA ROCHE and DE RIVIE RE.

(Irregular opening.)

WHITE (M. La Roche).	BLACK (M. De Riviere).	WHITE (M. La Roche).	BLACK (M. de Riviere).
1. P to K B 4th	P to Q 4th	13. K B P takes Kt	Castles on Q side
2. P to Q 4th	P to Q B 4th	14. P to Q Kt 4th	P to K Kt 4th
3. P to K 3rd	P takes P	15. P to K Kt 5th	Kt to Q B 4th (b)
4. P takes P	K Kt to K B 3rd (a)	16. K R takes K B P	P to K Kt 5
5. K B to Q 3rd	Q B to K B 4th	17. P takes P (c)	K R takes P
6. K Kt to K B 3rd	P to K 3rd	18. Kt to Q Kt 3rd	Q R to K Kt sq
7. Castles	K B to K 2nd	19. Q to K Kt 3rd (d)	Kt to K B 4th
8. P to K R 3rd	Q Kt to Q B 3rd	20. Q to K B 3rd	K R to his 5th
9. P to Q B 3rd	Q B takes B	21. Kt to Q B 5th	P to K Kt 5th
10. Q takes B	K Kt to K B 4th	22. Q to K Kt 2nd	Q to Q B 3rd
11. Q Kt to Q 2nd	P to Q B 3rd	23. B to K B 4th	Q to K sq
12. K Kt to K 5th	Q Kt takes Kt	24. K R takes Kt	P takes K R P
		And White resigned.	

(a) The present, though a slow beginning, is not superficially so, has most of the other games, and forms an agreeable change.

(b) The K B Pawn was not indefensible, we believe, had Black chosen to maintain it; for example—

15. Kt to K B 3rd — 16. Kt to K B 3rd — P to K B 3rd

And if White take Pawn with Pawn, his adverse piece Q to K Kt 6th (ch), and gains a winning attack.

(c) Kt to K B 3rd would have saved him from much of the peril to which this move exposed him; but it would not have obviated the great evil of his position, which was the not having the Q Rook and Bishop in play.

(d) M. La Roche was naturally fearful of the consequences of his opponent advancing the K Kt Pawn one further, and the move in the text is apparently the most effectual way to its immediate progress. We have a notion, however, that, by pursuing his own plan of attack, regardless of the dreaded Pawn, he might have escaped from the present predicament, and have come off, if not victorious, yet without any serious damage, in the end. Suppose, for example, he had boldly played—

	19	Kt to Q B 6th	
		Black for his best would have moved	
	19	P to K Kt 6th	
	20	P takes P	

(This looks fearful, we know, and requires no ordinary amount of courage in a Match Game; still it strikes us as preferable to the timid course really adopted.)

20.	Q R takes P (ch)	26. K to K 2nd	Q takes K R
,,	K to K B 4th (best)	27. K takes Q	Q to K R 4th
22.	B to K 3rd	K to K R 6th (ch)*	Kt to K Kt 6th (ch)
23.	K to his 2nd	29. K to K 3rd	Q to K 7th (ch)
24.	B to K B 2nd	Q R takes B (ch)	Q to K R 4th
25.	K takes R	31. K to K 4th sq	
		And Black has no longer any resource.	

* 22.	Kt takes R (ch)	26. Q to K R 6th (ch)	B to Q sq
23.	Q takes Kt	K R to K R 8th (ch)	(best)
24.	K to his 2nd	27. R takes Q Kt P	K R to K R 6th (best)
25.	Q to K 2 6th	Q to Q 3rd (best)	28. P to Q Kt 5th, &c.

A tablet to the memory of Sir John Franklin and his devoted companions, of the *Erebus* and *Terror*, is to be taken by the Kane expedition, and erected on the White Cliff, at Beechey Island, by the side of that commemorating the fate of Lieutenant Belliot, of the Belcher expedition.

The *Venice Gazette* states that the cholera has broken out in that city. On the 7th inst. there were 24 cases, and 16 deaths.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

It is said that the day officially fixed for Queen Victoria's visit to Paris is August 13.

The Emperor of the French has recovered from his indisposition. He went, on Monday night, with the Empress and the King of Portugal, to the Ambigu Comique.

The Emperor of Austria arrived at Cracow on the 13th inst., from Vienna.

The Right Hon. Sidney Herbert has been advised by his medical attendant to abstain from all public business for a time, in order to recruit his health, for which purpose he is now on a tour in Scotland.

The Imperial yacht *Reine Hortense* sailed from Toulon during the night of the 17th inst., and entered the next day the port of Marseilles, where she is to remain at the disposal of the King of Portugal.

Sir W. Heathcote, M.P., has been elected a governor of the Corporation of the Sons of the Clergy, in the place of the late Sir R. H. Inglis.

The Prince and Princess Royal of Wurtemberg returned on the 12th to their villa near Stuttgardt, from St. Petersburg. The Queen is at Hamburg, with the Princess Frederica.

The French Emperor and Empress are to proceed to Biarritz next month incognito, and the Emperor will return to Paris, leaving the Empress to benefit from the change by a longer stay.

The One Hundred and First Anniversary Dinner of the Society of Arts is to be held at the Crystal Palace, on Tuesday, the 3rd of July, when the Duke of Argyll will preside.

The Duchess of Orleans, accompanied by the two Princes, her sons, arrived at Leipsic on the 8th inst., on her way to Dresden, whence she will make excursions to various places in the neighbourhood.

The Duchess of Genoa left Turin on the 11th inst. for Dresden, on a visit to her father and mother, the King and Queen of Saxony.

The château of Stolzenfels, on the Rhine, is being put in readiness for the reception of the King of Prussia.

The Hon. Millard Fillmore, late President of the United States, visited Chester, with a party of friends, a few days ago.

The King of Portugal was expected at Turin this week.

The Prince Royal, son of the Prince of Prussia, arrived at Memel on the 9th inst.

The Duke and Duchess of Brabant arrived at Malta on the 8th inst., and left the same night for Sicily.

Lieutenant Augustus C. Murray, R.N., has accepted the command of a troop of horse artillery in the Turkish contingent force.

Horace Vernet has been charged to execute, for the Palace of the Tuileries, a picture representing Napoleon I. surrounded by his principal officers who died on the field of battle during his immortal campaigns.

There has been a case of cholera in the Palace at Aranjuez. They would have removed the patient, who was a lady, but the Queen insisted on her remaining.

A proposal for a general and permanent encampment on Salisbury Plain has been addressed to Lord Panmure.

The Princess de Hohenlohe has arrived at Brussels, accompanied by her two daughters.

During the absence of the Emperor of Austria, a State courier leaves Vienna daily, in order to convey to him the State despatches.

M. Uzielli, of London, and several French and English bankers, have gone to Vienna to treat for a concession of a new railway, in which M. Rothschild will be concerned.

The Hon. Mr. Dodge, the new American Minister at Madrid, has presented to the Queen of Spain his letters of credence.

Admiral Fremantle, the successor to Admiral Boxer, being prevented by his appointment from presiding at the dinner by the Navy Club to the First Lord of the Admiralty, fixed for the 28th, Rear Admiral Spencer will take the chair.

The Countess de Lavalette, daughter of the Marquis de Beauharnais, and only surviving niece of Queen Hortense, died in Paris, on the 18th inst. She was the wife of Count de Lavalette, Postmaster-General under the first Empire, whom she saved from the scaffold, in 1815, by her energy and presence of mind.

Henry Smith, Esq., chief clerk in the cash account office of the Ordnance, has been appointed to fill the newly-created office of Accountant-General to the War Department.

Abd-el-Kader has accompanied his mother and his wife as far as Constantinople, on their way to Mecca, on a pilgrimage.

Dr. Waller Lewis, one of the Metropolitan Commissioners of Sewers, has been appointed Medical Officer to the Post-office.

The Queen Mother, at the Hague, who has been for some time residing on her estate at Soestdyck, was seized with giddiness on the 8th instant, and fell to the ground and hurt herself seriously.

Mr. Charles Saunders, of the Western Circuit, will be the successor of Mr. Phinn as the Recorders up of Devonport.

General David Khan, a native of Persia, who filled the office of Persian Ambassador at the Persian Court, is at present in Vienna. He has embraced the Christian religion, and is about to marry a Vienna lady.

A gentleman of the name of Delle Cose has just died at Verona, leaving a million of francs as a fund for the relief of poor workmen unable from sickness or other causes to maintain their families.

The Canadian Parliament has adjourned without definitely concluding a proposition to donate lands to soldiers enlisting in the Foreign Legion for the Crimea.

The Captain-General of Cuba has raised the blockade and state of siege which had been for some time in full force.

All accounts from the Highland moors concur in the assurance that there will be a full average stock of grouse this season.

The Communal Council of Liège has unanimously voted a sum of 50,000 fr. towards the erection in that city of an hospital for lunatics.

The cholera is raging as an epidemic in New Orleans, and the Board of Health of the city have made a public declaration of the melancholy fact.

An elephant 120 years old, now in Birmingham, is to be shot, in consequence of extreme age and physical weakness.

The ground left disposable by the demolition of the buildings of the Temple, in Paris, is to be transformed into a public garden in the English style, in the centre of which will be erected a monument to Louis XVI. and Marie Antoinette.

During the year 1854, 388,714 cwt. of foreign cheese was imported into the United Kingdom. Of this 349,686 cwt. came from other parts of Europe; 38,987 cwt. from the United States, and 30 cwt. from British possessions abroad.

The number of persons who visited the Paris Exhibition Palace on Sunday last was 61,819; and the Palace of the Beaux-Arts, 18,572: making a total of 80,391, 11,384 more than on the preceding Sunday.

The Germanic Diet has rejected the proposal from Prussia for the suppression of gaming carried on in most of the German watering-places.

A marriage party from Washington county, Maryland, was poisoned the other day by eating custard in which arsenic had been placed. Some twenty-five of them were not expected to live, the bride among the number.

A sea eagle, weighing 6lb. 2oz., was killed by a gamekeeper, on Berwyn mountain, in Wales, a few days ago.

The Imperial Brazilian decree for the construction of a railway in Bahia has arrived in England. The maximum capital on which a premium is at present guaranteed is £1,800,000.

Three French missionaries have arrived at Lyons from Claudiopolis, in Texas. They give a sad account of the famous Communist colony founded in that State by Cabet.

There is now in flower at Woodland Castle, near Swansea, a fine specimen of the Paulownia Imperialis. It was planted about six years ago; is now 16 feet high, with branches extending upwards of 20 feet across; and has 168 spikes of bloom.

The Financial Report of the Government of Buenos Ayres shows a present balance of receipts over expenditure of about £1,500,000.

The examinations for the Ashburton Prizes for Instruction in Common Things will be held on Monday next—that for men, at Wolvesey College, Winchester; and that for women, at the Salisbury Training Institution.

A monument to Daniel O'Connell, executed by Benzoni, at the expense of Mr. Bianconi, the well-known car proprietor in Ireland, has been completed, and is to be placed in the church of Sant' Agata della Suburra, belonging to the Irish College at Rome.

A strong shock of earthquake, which lasted four seconds, was felt at La Spezia (Piedmont) on the 11th inst.

OPENING OF THE NEW METROPOLITAN CATTLE-MARKET: THE PROCESSION TO THE TENT.—SEE PAGE 637.

OPENING OF THE METROPOLITAN CATTLE-MARKET.

In the ILLUSTRATED LONDON NEWS of last week we fully detailed the inauguration of the New Market in Copenhagen fields. We now engrave the very effective scene of the processional portion of the ceremony, with the front of the pavilion, which was fitted up with considerable taste. Upon huge pedestals flanking the entrance, the supporters of the City arms were the principal objects; and above the entrance was a tasteful arrangement of drapery, with pennons, and a group of flags, upon which was placed a medallion portrait of her Majesty; and the Royal standard floated gloriously from the roof of the booth.

It may be interesting to add a few details of the opening of the Market for business—the first day being Friday.

A fine herd of bullocks, consigned to Mr. Neve, salesman, Norfolk, was the first that entered the Cattle market, and was not long until part was purchased by Mr. William Bee, of Newgate Market, and paid for by the Messrs. Hall and Sons, bankers; and one fine bullock taken to the pay in slaughter houses, and slaughtered by Mr. W. I. Parey, of the Ram, Smithfield; so that the bullock may be said to have been the first entered for sale, the first sold, the first bought, the first paid for, the first delivered, the first removed, and the first slaughtered in the slaughter-houses of the New Market. The ox was fattened and consigned by Mr. More, Neatshead, Norwich, Norfolk.

A little before noon cows were entered at the north-east corner of the Cattle market, and then sheep, when sales were immediately commenced, and at two p.m. the Horse market commenced at the opposite or south-eastern corner.

The concourse of butchers' carts was immense: so that the relief in the neighbourhood of Smithfield must have already been great.

On Friday the market hours were not very liberally patronised; but on the evening of that day some fine lots arrived from the north for the Monday market, while fresh arrivals were swelled the sum by almost every train on Saturday, so that, considering the change of the Market site and the season of the year, and the want of experience, the Corporation, we presume, are satisfied with the part of the experiment.

All gather, the trade have expressed themselves favourably toward the first day of the New Market.

THE ROYAL LITERARY FUND SOCIETY.

THE last year has been a change in the management of the Literary Fund Society. On Saturday, at a meeting to receive the report of the special committee appointed to consider the policy of the charity. The chair was taken by Mr. B. B. CABBELL, M.P., who, in introducing the business, read a letter from the Marquis of Lansdowne, the President of the Fund (who was unable to be present from having to attend a Cabinet Council), expressing doubts as to the policy of the proposed changes in the constitution of the society.

Mr. Charles Dickens, as the chairman of the special committee, then read the report, which recommended—that henceforth the administrative body of the society should be enabled to grant re-call annuities to distressed men of letters and scientific writers, to the extent of a certain limited proportion of the income derivable from the society's real property or vested funds; and also, that they should have the power of granting relief by way of loan. The report also contained a plan for remodelling the powers and functions of the council, and comprised a project for superadding to the present objects of the society, in conformity with the alleged intentions of its founders, the holding of evening meetings and *conversaziones* in the rooms of the institution, and the establishment of a library for purposes of reference. It was also designed that the objects of the institution should be carried further developed, if the experiment met with adequate encouragement, into "a hall or college for the honour of literature, and the service of literary men." To effect these purposes, according to the opinion of counsel (Mr. Bacon and Mr. Merewether), a new charter was necessary.

Mr. Dickens moved that the report be adopted.

Mr. Forster seconded the motion.

Mr. Monckton Milnes, M.P., proposed, as an amendment, "That this meeting acknowledge with gratitude the labours of the special committee appointed to consider and report the question of a new charter for the Literary Fund, and recognise the value of some of their suggestions as subjects for future deliberation; but, considering the proposals therein contained to involve an entire alteration of the nature and intentions of the society, and that its means are inadequate to the attainment of those purposes, this meeting is not prepared to recommend the application for a new charter to carry them into effect." The first change recommended was, that, instead of granting assistance to authors when in circumstances of distress in sums sufficient to enable them to start afresh in their career, and depend upon their own exertions for their future support, they should spread the aid they now gave at one time over a period of years in the shape of annuities—was a proposition of very doubtful wisdom, and it was even questionable whether the present mode was not adapted to afford more serviceable relief to the recipient than the one suggested as a substitute; but, be that as it might, no alteration in the charter was demanded to enable them to vary their practice in this respect should a modification be thought advisable. Then, as to the granting of pecuniary loans, there would be the greatest difficulty in carrying out such a proposition. How, for instance, were they to secure their repayment? Secrecy and confidence were now of the very essence of their operations; and could they seriously mean to sue a literary man who was a defaulter in respect of a loan at the County Court?

Mr. Pollock, in seconding the amendment, cited the preamble of the original charter, obtained in 1818, which stated that the objects of the Fund were to "protect and relieve persons of genius and learning or their families, who shall be in want," and contended that they would not be justified in now introducing organic changes into that constitution.

Mr. Lake supported the adoption of the report, on the ground that the present practice of the society sanctioned the principle of revocable annuities, which only required to be extended. With regard to loans, that system had worked well in other institutions analogous in their nature.

Lord Stanley was willing to leave the matter of annuities and loans in the hands of the Executive. As to any delicacy of feeling in regard to the acceptance of gratuities, instead of loans, by distressed authors, such persons had now in their own power to convert any relief they received in the former shape into a loan by subsequently making a donation to the society, or otherwise reimbursing it.

Mr. C. Dickens regarded the complaint of the lamentable deficiency of their funds, after the astounding and unanswered statement made by Mr. Dilke of their financial resources, as about the most bitterly ironical thing which the human mind could conceive of that society. Mr. Milnes had approached the question of loans entirely in the character of a lender; but let him approach it in the character of a borrower, and then put it to them as a matter of feeling, whether they could not imagine the case of a high-spirited literary man who would come to them, not for a gift, but for a loan. The noble Lord (Stanley) said, "Oh, he can have a loan, and can pay it back again." But how? "By subscribing to the institution." But was there a man in that room, who after being relieved with—say £100, would have the audacity to put himself down as a donor of £100 to the fund? He must at once argue an amount of misconception of the honour and dignity of the literary profession which it was amazing to hear from such lips. Then they were told that there was the Athenæum, which already existed to them. So also was that respectable establishment the London Tavern (A laugh), which was about as accessible to literary men, and pretty much in the same way, as the Athenæum. All that the report suggested was that an experiment on a limited scale, and at a very small additional cost, should be tried in the present rooms of the society; and then, if unfortunately they should fail in getting among the profession an increased interest in the objects of the institution, and so did not gain an accession of subscribers, no possible harm would have been done, and the project need not be carried any further.

Mr. Forbes was in favour of extending the field of the society's operations, but regarded the report as somewhat indefinite in its recommendations.

The Bishop of Oxford considered the report as rather enigmatical, and, even after the forcible speech of Mr. Dickens, must say that his doubts of the wisdom of its main proposition were only the more confirmed. Supposing they had a comfortable club-house, and some of those *conversaziones* which he confessed that he thought would be necessary, how were they to compete with the Athenæum and other institutions of that class, which were not weighted in the heavy manner this society would be, with electric-battery burdens? If, therefore, they were to enter the field with these enormous rivals, and with a chance of success, they must incur great risk of forfeiting the first condition of their existence—viz., the application of a great portion of their funds to charitable purposes. For it seemed both impossible for them to keep the two-fold functions which they were now asked to combine entirely separate and distinct, and experience of life showing that the cultivation of the social instincts and the relief of distress were objects which ill-assorted themselves to altogether different classes of minds (Hear). With respect to the grant of loans or of revocable annuities, no alteration in the charter was necessary, requisite only on the managers of the fund to modify its distribution in the manner recommended.

Sir E. B. Lytton thought the recommendations of the report had been somewhat misrepresented, or at least misunderstood. They were not to withdraw the hard working literary man received either than Mr. Milnes seemed to suppose, and it would therefore be most [illegible] of that institution that he should receive a [illegible] annuities, without having to come knocking at their doors with [illegible] applications for relief, and exposing his wounds at each return of his distress (Hear).

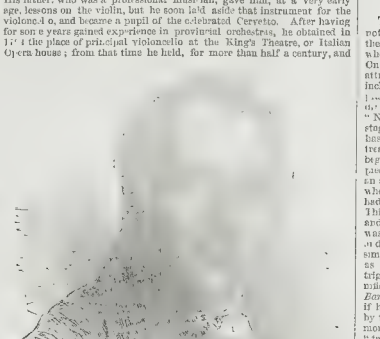
Mr. Forster appealed to the managing committee to give some assurance that they would favourably entertain the recommendations of the report as to loans and annuities.

The Chairman could assure the meeting that the governing body had no other desire but to promote the comfort and well-being of the literary profession, and that they would give the suggestions that had been made their best and most serious consideration (Hear).

The question was then put to the vote, when the amend ment was declared to be carried, and the proceedings terminated.

MR. ROBERT LINDLEY.

ROBERT LINDLEY, the great violoncellist, died on the 13th inst. at his house in Percy-street, in his eighty third year. During his long and brilliant career as an artist, his life has been very quiet, uniform, and unevenful. He was born at Rotherham, in Yorkshire, in the year 1772. His father, who was a professional musician, gave him, at a very early age, lessons on the violin, but he soon laid aside that instrument for the violoncello, and became a pupil of the celebrated Cervetto. After having for son e years gained experience in provincial orchestras, he obtained in 1[illegible] the place of principal violoncello at the King's Theatre, or Italian Opera house; from that time he held, for more than half a century, and



THE LATE MR. ROBERT LINDLEY, THE VIOLONCELLIST.

till within these few years, when his growing infirmities made him retire from the exercise of his profession, undisputed pre-eminence as the greatest master of his instrument that England had ever seen. The most celebrated performers of the Continent arrived in succession and entered the lists with him, but none of them could shake for a moment the firmness of his position, or the unanimous belief of his countrymen in his unrivalled excellence. And this belief was well founded. In the richness and volume of his tone; in his strength of hand, and boundless powers of execution; and in the unaffected manliness of his style he has never, even to this day, had a rival. During his whole career no great orchestra was considered as complete without him; and his presence at the provincial music-meetings in all parts of the kingdom was deemed as indispensable as in the orchestras of the metropolis. Lindley was a plain, unassuming man, of quiet habits and simple manners. He was of a kindly and benevolent nature; and his memory, as a worthy member of society, will long be cherished by his friends and professional brethren.

MONUMENT TO THE LATE SIR HENRY BISHOP.

Two propositions have just been made for the accomplishment of this object, which may truly be called a national one. They have originated, one in the metropolis, the other in a provincial town, and without any previous concert or communication between the parties.

The provincial proposition has the priority of time. It has its origin in a part of the country which has often been called the Germany of England from the musical character of its inhabitants and the almost universal cultivation among them of the art in its highest and purest forms. A meeting, consisting of lovers of music, was held at Huddersfield on the 5th of this month, at which it was resolved—

That it is desirable that a monument should be erected to the memory of the late Sir Henry Bishop, in such place as shall be hereafter determined upon and

That a subscription be commenced for effecting the above object; no subscription to exceed five shillings.

The following gentlemen were named a committee to collect subscriptions:—

Mr. Freemen.	Mr. Henry Hartley.
— J. D. Kelner.	— Sam. Howell.
— James Battye.	— Joseph Wrigley.
— E. Battye.	— Jos. Batley, jun.
— Joseph Wood.	— R. D. Eldridge.
— T. J. Wigney.	— Edgar Fenton.
— James Peace.	— Joseph Ryner

The London proposition emanates from the same gentlemen who set on foot the subscription for the orphan children of the lamented artist—a measure (as was announced) rendered unnecessary by a private friend, who undertook to make a provision for the children. The same gentlemen have now published an advertisement to the following effect:—"It being proposed to erect a monument to the memory of the late Sir Henry Rowley Bishop, the friends of the lamented composer and the public generally are respectfully invited to aid by their contributions the accomplishment of this object; and the Committee appointed to superintend the arrangements, consisting of Sir George Smart, Mr. Mitchell, Dr. Daniels, and Mr. Addison, earnestly hope that appeal will not fail to secure the erection of a suitable record in honour of one who, by his skill in the profession, earned extended fame, and spread deep gratification through a wide circle." It is added that subscriptions will be received at certain specified places; and that the monument is proposed to be erected at the St. Marylebone Cemetery, where Bishop lies buried.

The thanks of the public are equally due to the gentlemen who, independently of each other, have originated these propositions, for the right they have shown, and the example they have set to the rest of the kingdom. We do honour to ourselves in doing honour to the memory of our great artists; and that Bishop was one of our greatest artists—and that, too, in one of the noblest and most beautiful of the arts—is felt by all his country men, and acknowledged wherever England and her music are known. To enlarge on Bishop's merits, so fully recognised, would be idle and superfluous. It is enough to repeat what we have said before: that the whole annals of the art in England produce [illegible] greater than his: the [illegible] of a [illegible] boy, to whom he [illegible] was nearly akin the immortal Henry Purcell. They were akin in originality of mind, richness of imagination, and, above all, in the true, genuine English character of their strains, which will endear both of them to the English people long after the foreign affectations now in vogue shall have passed away.

We have no doubt that the gentlemen of Huddersfield, on being aware of the correspondent movement now begun in the metropolis, will determine to second and aid the proceedings of the London committees, instead of going on with a separate plan of their own; for we cannot suppose that they will bestow a moment's thought on their own claim of priority. One object only is in view—to erect a monument to the memory of a great artist, worthy of his country and himself; and this can be effected only by one combined effort of his admirers throughout the whole kingdom, but of which the natural centre is the metropolis—the place of his birth, the scene of his triumphs, and the resting place of his remains.

MUSIC.

THE performances at the ROYAL ITALIAN OPERA since our last notice have presented little that calls for remark. Mr. COSTA has adopted the practice invented by Mr. Lumley, of "long Thursdays"—extra nights, when non-subscribers are tempted by the profession of the entertainments. On Thursday, last week, the first act of "Norma," with Grisi for the attraction, was followed by the whole of "Robert le Diable," which included Madame Viardot, Mario, Tamburini, and Formes. This is a practice which, in an artistic point of view, is most objectionable; but it owns money, and that must be received as a sufficient answer. "Norma," a grand lyrical tragedy, with the Siddons of the musical stage as the heroine, stopped in the middle, and just as the interest has arrived at its climax! Suppose a tragedy of Shakespeare so treated, what would be said? And then a nigh but long comic opera, begun at ten o'clock, and concluded at nearly one in the morning! Both pieces were equally injured—Rossini's sparkling music being performed to an audience worn out and jaded by the heat and fatigue of a long night, who, having went home, we suppose, persuading themselves that they had been delighted, and had received ample entertainment for their money. This gayest of all comic operas has rarely, perhaps, been better performed, and seldom, perhaps, went off more flatly. Its most remarkable feature was Madame Viardot in the character of *Rosina*—a fine display of dramatic and vocal art, but too much elaborated, and less pleasing than the more simple and unpretending performance of Bosio. Tamburini's *Figaro*, as a piece of acting, was as fine as ever: he was the bustling, intriguing Spanish barber to the very life; but alas for his once magnificent voice! Mario's *Count Almaviva* was perfection; and Lablache's *Bartolo* is still the best on the stage, and would be better still if he would curb his propensity to indulge in buffoonery. In this respect, by the way, he has greater freedom in London than in Paris, where he is more cautious and circumspect. The shrewd Neapolitan knows how to "take the measure" of his audiences. Mdlle. Jenny Ney was announced to appear on Tuesday last in *Donna Anna*, said to be one of her greatest characters; but, for some unexplained reason, the "Prevaricatore" was given instead. This opera, with the help of the splendid acting and singing of Ney and Viardot, is in undiminished favour.

THE ROYAL OPERA, at DRURY-LANE, continues to be carried on with activity and success; and it appears that the low-price system, which Mr. Smith has carried further than has ever been done before in a theatre of such magnitude, is working well, for it enables him to engage a strong vocal company, and to maintain his orchestra, chorus, and other accessories, on an efficient footing. During the present week, the operas have been "Norma" and "Linda di Lammermoor," both pieces are extremely well acted and sung. M. and Mdme. Gassier have been favourites from the beginning; and Mdlle. Arga has grown in public estimation. Her *Norma* is a powerful performance; and she well supported by Armandi as *Pollio*, and Mr. Hamilton Braham as the priest *Oroveso*. The engagements of M. and Mdme. Gassier, Mdlle. Arga, and Signor Bettini, terminate this week; these performers being about to visit the United States. But the two *prime donne* are about to be replaced by two ladies of note—Mdlle. Schmuck of the Grand Opera, Frankfort, and Miss Lucy Escott, our countrywoman whose high qualities both as an actress and a singer have recently produced a great sensation in the principal theatres of Italy.

BENEDICT'S Concert, at the Royal Italian Opera, on Friday (last week), was a magnificent affair. The whole constellation of the theatre shed its lustre upon it, together with many other "bright particular stars" of scarcely less radiance. In truth, almost all the eminent vocal and instrumental performers in London gave their assistance in contributing to an entertainment at once ample, varied, and recherché. The theatre, crowded with rank and fashion, had the appearance of a brilliant opera night.

HERR DEICHMANN, a violinist of great talent and rising reputation gave a Concert at the Hanover-square Rooms on Saturday morning. He was in this country some five or six years ago, when he was regarded as a violinist of more than ordinary promise; and this promise, on his second visit, he has fully made good. On this occasion he showed his strength in Mendelssohn's celebrated violin concerto, and in a brilliant fantasia of Vieuxtemps—both of which he executed in a finished and admirable manner. An admirable quartett by Kalliwoda (a composer as yet little known in this country), played by Messrs. Schlosser, Deichmann, Vogel, and Paque, gave great pleasure to the audience. The Concert was varied by several fine vocal pieces, sung by Madame Clara Novello and Mdlle. Emilie Lutz. The audience was numerous and fashionable. The Royal box was occupied by the Duchess of Cambridge, the Princess Mary of Cambridge, and the Hereditary Grand Duchess of Mecklenburg-Strelitz.

MR. ELLA, the able director of the Musical Union, had his *matinée* at Willis's Rooms on Tuesday. There was, as usual, a fine selection of classical instrumental music, performed by Messrs. Ernst, Cooper, Hill, Piatti, Bottesini, and Hallé; with two beautiful vocal pieces—"Laura," by Rastrelli, and "O, who can guess my emotion," by Mendelssohn; sung with great taste and expression by Herr Reichardt. The room was crowded to overflowing.

THE ROYAL SOCIETY OF FEMALE MUSICIANS, a most praiseworthy and useful institution, had its annual concert at the Hanover-square Rooms on Monday evening. It was an excellent concert. There was a small but effective orchestra, conducted by Mr. Sterndale Bennett; the principal vocalists were Madame Clara Novello, Madame Bokolotti Palconi, Mdlle. Krall, Misses Birch, Taylor, Lascelles, and Dolby; Messrs. Reichardt, Benson, Herberte, Lawler, and Bodda; and instrumental solos were performed by MM. Sainton and Hallé. The room was well filled by a fashionable audience.

THE TURKISH CONTINGENT.

WE this week present our readers with an Illustration representing a group of officers who are to command what is termed the Turkish Contingent—a force intended for a reserve, in anticipation of the continuance of the war. The Legion (if we may use that term) is to consist, if possible, of about 36,000 men. The officers and leading non-commissioned officers are to be of the British or East India service; but of the general management little is known. Indeed, the officers who have reached the East know not what they are to command. The latest supposition is, that the Contingent will be manned from the Turkish troops lately on the banks of the Danube.

The officers of Cavalry will wear a long blue jacket, laced with gold, in the manner shown in the Illustration; over this will be thrown a pelisse, also laced with gold, in hussar style—by the way, a style which will soon cease in the British Army. The trousers will be blue, with leather strappings and overalls. The cap, for the present, will be of undress shape; the crescent being displayed in front. On the left arm of the inner jacket will be embroidered the crown and crescent: on the shoulders will be knots of gold. The belts and other fittings will be similar to ordinary cavalry. The arms will consist of a sword and Colt's revolver. The dress of the non-commissioned officers will be similar to the above, but the ornamental portion will consist of black braid, in lieu of gold.

The dress for the Artillery will be somewhat similar, but the Infantry will be void of the quantity of lace and the leather fittings; nevertheless both officers and non-commissioned officers in the foot corps will be mounted, and consequently will wear spurs. The dress, on the whole, which is from the design of the Queen's accoutrement-makers, Messrs. Meyer and Rogers, is simple but soldier-like. As we stated a few times before, the corps will be commanded by an able East Indian officer, Major-General Vivian—the scion of an old military house. Major Templar Graham will be the military director in England. It is intended to send out in all eighty eight non-commissioned officers, all of whom are to have the rank of Sergeant-Major. Twenty have already left for the East, and but sixteen were wanted a few days since to make up the entire number. The selections in the latter rank were made by Captain Phillips, formerly of the Hon. East India Company's Service, with the able assistance of a deserving non-commissioned officer, Sergeant C. B. Wheeler, formerly of the 10th Hussars. All are under engagements for two years.

AMUSEMENTS, &c.

THEATRE ROYAL HAYMARKET. Mon-
[illegible] MR. CHARLES MATHEWS
HELEN MATHEWS. [illegible] Mr. Buckstone's Benefit.
ONLY A HAPPY[illegible] Every Evening.

THEATRE ROYAL HAYMARKET. On
THIS DAY NEXT, June 25, Mr. BUCKSTONE'S ANNUAL
BENEFIT. Tenth BODY AND SOUL. Mr. Charles Mathews. Mrs. Stirling.
The return of the SPANISH DANCERS. Last but one Night of a New Farce, BUCKSTONE'S VOYAGE LIFE
[illegible] THINGS. Box Plan now ready.

ROYAL PRINCESS' THEATRE.—Under
the Management of Mr. Charles Kean.—On MONDAY, and during the Week, will be presented HENRY VIII., preceded by AWAY WITH MELANCHOLY.

GREAT NATIONAL STANDARD
THEATRE, ST. PAUL'S, [illegible]. The glorious Wellington
and Nelson Pieces, with Adelphi of old, including "Jane Shore."

ROYAL GALLERY of ILLUSTRATION, 14,
Regent-street.—The DIORAMA, Illustrating Events of the WAR and New Buildings, daily at Three and Eight. The Lectures by Mr. Stocqueler. Admission 1s., and 3s.

THE NEW SOCIETY of PAINTERS in
WATER COLOURS.—The First ANNUAL EXHIBITION of the Society is NOW OPEN, at their Gallery, 53, Pall-mall, near St. James's Palace, DAILY, from Nine till Dusk. Admission 1s.; season tickets, 5s. JAMES FAHEY, Secretary.

GALLERY of GERMAN ARTISTS.—The
THIRD EXHIBITION of WORKS of MODERN GERMAN ARTISTS is NOW OPEN DAILY, from till Six. Admission to catalogue 6d. Entrance from New Bond-street.

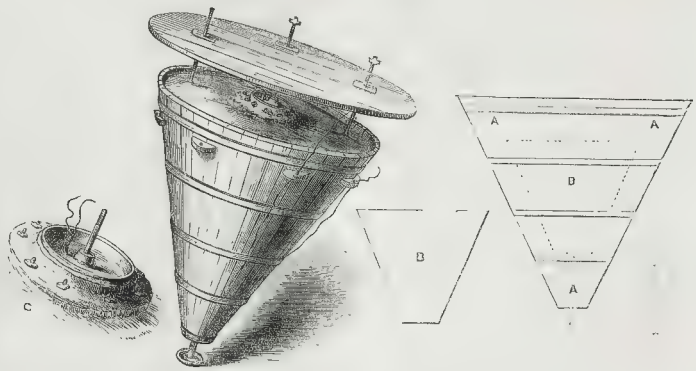
ROYAL SURREY ZOOLOGICAL GAR-
DENS.—Colossal Exhibition of Sculpture. Exclusive Morning Attraction. Open at Ten. Band from Two to Seven. Admission to Grounds, 1s. Open at Four. The Artistic Feats of the celebrated Sable Troupe of Elephants, with Adelphi of old, including "Jane Shore."

RUSSIAN INFERNAL MACHINE.

We have engraved, from the Sketch of a Correspondent, the Infernal Machine found in the dockyard at Kertch, on the Allied expedition taking possession of the town. A is the outer case of the machine; B, inner case, containing the charge of fine gunpowder; C, thick ring of gutta-percha, fitting closely to an inner iron ring above it; within are the wires for igniting the charge. In the entire Machine is shown the table-top for protecting the wires, &c. The Machine is about four feet in depth, and the circumference of the top about three feet. The whole is made with staves about three inches thick.

THE KERTCH EXPEDITION.

The importance of our bloodless victories at Kertch and Yenikale, and of the great blow which has been struck in the Sea of Azoff, appears more striking every day. It would seem that Russia, aware of her real weakness in these seas, or ignorant of the truth, allowed the most extraordinary statements to go forth respecting the completeness and magnitude of her preparations for defence. It was imagined that the channel was blocked up at Kertch, or below it; and for some time back it was sedulously stated that the passage had been obstructed by sunken ships, heaps or stones, piles of timber, and artificial banks; but our vessels got up easily in 2½ fathoms of water, at the very lowest, along a channel laid down and buoyed by the *Spitfire*. If any of these obstructions really do exist, they will no doubt be encountered in the old channel, to the eastward, and nearer to Taman, which is still marked with Russian buoys. The Allied fleet did not use that channel, but sailed close to the land from Ambalaki and Paulovskaya, and then stood across the entrance to Kertch, and got 4 fathoms to 2½ fathoms of water all the way to Yenikale.



RUSSIAN INFERNAL MACHINE.

Sir Edmund Lyons returned to the fleet on the evening of the 26th ult., and Sir George Brown went on shore, where he has taken up his quarters in a very humble house at Yenikale. It was expected that the Russians might return and attack our army in force, and that a portion of the Allies, after its excesses, would have been but little fit to repel them. Yenikale was set on fire in two places, and it required all the exertions of the authorities to prevent the flames spreading and devastating the whole place. The houses were smashed open, the furniture broken to pieces, and "looting" and plundering were the order, or disorder, of the day. The quantity of bedding, clothes, looking-glasses, coarse furniture, household chattels, and useful implements of all kinds carried off by the sailors to the ships off Yenikale was enormous. The English placed sentries over such buildings as they could protect, and the French also established order to a certain extent among their men; but our soldiers were much more amenable to discipline on such occasions than troops accustomed to African warfare and familiar with the traditions of conquest. The French have also an old grudge against the Russians, and perhaps feel a more bitter personal animosity against them than we do. Sir George Brown gave orders that any person found in the town after dark should be put in the guardhouse, and that any one in the guardhouse in the morning should be flogged.

Kertch is described by those soldiers who marched through it as a beautiful town, full of fine buildings, with clean wide streets, and excellent houses, quays, promenades, and Government institutions—worthy, in fact, of a well-ordered European State. The only injury inflicted on it was the destruction of a large granary by the Russians, and the demolition by fire of a manufactory of rifle-balls and munitions of war, belonging to an Englishman, which was found in full play by our troops. The proprietor, as well as two other countrymen of ours, who have been long settled in Kertch, was seized. All the people remained in the town. They were well-dressed and respectable, nor did they differ in appearance from the inhabitants of a Belgian or German town. As our troops marched through, the inhabitants came out to look at them, and offered them bread and salt, the tokens of submission and friendship. An English officer, who went into a chemist's shop, and asked for something to drink, was agreeably surprised at receiving a bottle of excellent soda-water, with a dash of liqueur in it. A great number of vessels fell into our hands, and all the Government stores and many guns, some of which were found loaded and shotted. The corn which the enemy failed to burn had been sprinkled by them with lime and water, to render it unfit for use; and it was feared that the poorer part of the population of Kertch, which is sufficiently numerous, would be reduced to great straits for want of food, as the public granaries have been laid waste and ruined. A small force of men was left to guard it, or rather to protect the inhabitants from marauders of the army. The Austrian Consul, whose flag is flying on the principal quay, exerted himself to procure protection for life and property. In a strategical point of view it is objected by some that we have relied too much on the ignorance and cowardice of the enemy in leaving such an important position as Kertch open to a sudden assault,

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

It is said that a magnificent entrance is projected for the Queen into Paris entirely of a military character. A double row of troops will form a line on the Boulevards, from the station of the Strasbourg Railway, by which her Majesty will pass in coming from the chemin de fer du Nord.

Last week took place a brilliant though not very numerously-attended concert at the Tuileries. The Queen Christina, the Prince Jerome, the King of Portugal and his brother, and the Princess Mathilde were among the guests. The principal vocal success of the evening was that of Mdme. Marie Cabel, which was complete. One of the performances was the chorus of the "Vêpres Siciliennes," at the first representation of which their Majesties had appeared on the previous evening. After the execution of the *morceaux*, M. Verdi was honoured by a conversation of some length with the Empress, who, as well as the Emperor, addressed various compliments in person to the different performers.

A project was entertained for the giving, by the *Monde Officiel*, a Venetian fête on the water at St Cloud. Forty young choristers, men and women, were to perform a concert in gondolas; and there was even an idea of the Venetian costume being adopted by the guests. But the badness of the weather, which, since the middle of last week, has been wretched in the extreme, has compelled the necessity of postponing, if not abandoning, the project.

The Prince Napoleon has been for some days confined to his room by a somewhat severe indisposition, which prevented his usual reception taking place on Saturday evening; he is, however, recovering, and hopes to be abroad by the end of this, or beginning of the next, week.

It is supposed that the Emperor and Empress will proceed quite privately to the Eaux-Bonnes at the end of the month. The Emperor will we believe, conduct her Majesty thither, and return at the expiration of her stay to bring her back to Paris.

It is only at present that the Exhibition is beginning to be complete in its internal arrangements. The aspect it presents is certainly most brilliant, and nothing can exceed the beauty and rarity of much of its contents; but its extremely defective organisation in various respects becomes daily more apparent. Every day that the sun condescends to make his appearance is seldom any rare event at present—the heat of the Building, also, the awnings and fountains, is intolerable; while each day that the clouds pour forth their tribute a circumstance which we would desire should be much rarer—their impartiality induces them to bestow on the interior, as well as exterior, of the edifice a watery benefit highly conducive to the beauty of the wares displayed, to the dresses of the visitors, as well as to their comfort and enjoyment. As a fresh instance of the amiable hospitality of the Administration, on the days that it rained most incessantly they closed the passage of the Panoramas, thus forcing the visitors to cross the open space between the Palace and the *annexe* under torrents of rain, and through mud and sand ankle deep. The Emperor and Empress generally visit the Exhibition on the Friday: they are observed to pay particular attention to the English produce, especially some of the Manchester goods, and the articles in caoutchouc.

A *Camp de Manœuvres* is being established near Goldlee, in the environs of Paris.

A trial which produces the utmost sensation is about to be judged at Orleans. An officer in the 78th Regiment, himself a Protestant, has a son who (his mother having been Roman Catholic) has been brought up to the age of eleven in the latter faith. The father, having since married a Protestant, wishes the boy to adopt that religion, which the mother's family oppose: hence the grounds of the present trial, which cannot fail to be highly interesting and important, in a civil as well as in a religious point of view, as testing the limit and extent of the paternal authority, and that appertaining to the family in general.

AMERICA.

The mail-steamer *America*n, which left New York on the 5th inst., arrived at Liverpool on Sunday.

A grand Know Nothing Convention was to be held at Philadelphia on the 5th inst. The Democratic party were making a great struggle to cope with the Know Nothings, and their opposition to that association is already visible. A municipal election at Washington had resulted in favour of the Know-Nothings by only a small majority. At Norwich and New Haven the Democratic candidates for city offices were chosen by handsome majorities. Only six weeks since the Know-Nothings carried Norwich by 300 majority. On the 4th inst. they were beaten by 200 votes. The Know Nothing State Convention at Bangor (Maine) had adjourned after passing strong anti-slavery resolutions, with only three dissenting votes, and appointing delegates to the National Council at Philadelphia.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

"Bungway D'Hellers," Balaclava Harbour, Crimea.
June, 185-.

Allow me, in reference to the description you gave of the opening of my Kitchen at Soutari, in your number of the 14th May, to correct an error, occasioned by the omission of a word, which entirely alters my sentiment, and, if not contradicted, would reflect discredit on the authorities of Soutari, and thereby inflict a serious injustice. The sentence to which I refer appears in your journal thus:—"That I prepared my bill of fare according to the provisions allowed, which are at all times of an inferior quality at *Constantinople*." It is due to the Soutari authorities that I should mention that they took every means in their power to provide the best food that could be obtained, and on many occasions allowed me to choose the articles myself before purchasing them. Upon discovery of the mistake in the report I immediately proceeded to head-quarters, though nearly dusk, and solicited an interview with Field-Marshal the Lord Raglan, who kindly promised to explain the matter, and exonerate me. In conclusion, I must beg the favour of your kind insertion of this communication in your next; and, in further elucidation for your readers, I would add that the best meat, bread, butter, milk, &c., in Constantinople are hardly equal in quality to the third-class provisions obtainable in the London market—a fact that occasioned the remarks with respect to the provisions in my former letter.

I am, &c.,
A SOJER.

THE testimonial to the late Lord Dudley Stuart is to be "a distinct department in one of the unendowed metropolitan general hospitals."

NEW CORN-EXCHANGE AT WATFORD.—On Monday the building of a corn-exchange, which some public-spirited individuals of the district have united in a company to raise, was formally commenced at Watford. The shareholders, to give a prestige to their undertaking, invited the Freemasons of Hertfordshire to attend the ceremony, and the call was most readily answered. Mr. William Stuart, the Provincial Grand Master of Freemasons of Hertford, summoned a special grand lodge for the occasion, and deputed Brother John Sedgwick, Grand Secretary, and Recorder of Hertford, to arrange the proceedings. The Vicar of Watford having granted the use of his church, the Brethren, at two o'clock, walked thither in order, preceded by several gentlemen connected with the undertaking. Prayers were read by Bro. the Rev. W. Brandon, the Curate of Bushey; and Bro. the Rev. O. F. Owen, Grand Chaplain of Surrey (whose services the Grand Master had solicited for the occasion), delivered a discourse, taking for his text Psalm cxxiv, verses 1, 2, 3, the point and end of which was that without God's aid what would be a people's fate in times of trouble, or rather that without a religious-minded people institutions and empires must fall, and with the decay of the virtues of a people their liberties must perish. After the service, the procession re-formed, and in the same order walked to the site of the building, where the usual Masonic ceremonies were gone through. A sealed bottle containing coins of the day and a parchment describing the event, as well as printed documents concurred thereon, were placed in a cavity of the stone. Mr. Murray, the architect, presented the trowel with which the cement was spread by the Provincial Grand Master; the upper stone was placed and rendered secure; corn, wine, and oil were scattered; and the Grand Chaplain invoked a blessing on the work. A cold collation was provided in the noble Masonic Hall, to which about eighty gentlemen sat down, the greater number being Freemasons. Brother Stuart, the Provincial Grand Master, presided, and was supported by Thomas Abel Ward, his deputy.

WAR IN THE CRIMEA.

RECOMMENCEMENT OF THE BOMBARDMENT.

By the *Euphrate* steamer, which arrived at Marseilles on Tuesday afternoon, ample accounts of the gallant actions before Sebastopol on the 7th inst. have been received. The news of the successes achieved by the fleet had raised the spirits of the Allies long before that attack was made, and the same news had no doubt had a depressing influence on the Russians. On the 8th inst. the general order (which we have given in another part of to-day's paper), announcing the victories of the fleet, was read before the brigades, and on the following night Lord Raglan and General Pelissier rode through the camps amidst the hurrahs and acclamations of both their armies.

As we stated a fortnight ago, the bombardment recommenced on the afternoon of the 6th inst. Our fire was kept up for the first three hours with extreme vivacity, the Russians answering by no means on an equal scale. On our side the predominance of shells was very manifest, and distinguished the present cannonade in some degree even from the last. The superiority of our fire over the enemy became apparent at various points before nightfall, especially in the Redan, which was under the especial attention of the Naval Brigade. The Russians displayed, however, plenty of determination and bravado. They fired frequent salvos at intervals of four or six guns, and also, by way of reprisals, threw heavy shot up to our Light Division, and on to the Post-house-hill. Shortly after sunset the Russians ceased firing from their batteries. An incessant shelling was kept up all night from our works, to prevent the enemy from repairing damages. So silent were the Russian works that it seemed probable the guns had been drawn from the embrasures and placed behind the parapets, and that the gunners themselves had also retired to places of shelter.

MUSTERING FOR THE ASSAULT.

The excitement in both Camps throughout the day was extreme. At noon a deputation of French officers, non-commissioned officers, and men of every regiment of General Bosquet's troops waited on him to state that they wished and desired to be led to the assault. Every one was on the *qui vive*, and even the artificers attached to each regiment, who generally are exempted from fighting, were under arms. In the afternoon it became known that operations were to commence in earnest in the evening. The French were to assault the Kamschatcka Redoubt on the Mamelon hill, and also the redoubts on the east side of Careening Bay. As soon as the Mamelon was secured, the English were to take the Quarry work in front of the Redan, and the Russian trenches in front of Frenchman's-hill. The French had served out to them cooked rations for forty-eight hours, and a pint of wine each. All were in high spirits, eager for the struggle, and confident of the result.

About five p.m. the French divisions marched to the attack. The Second Division, with General Camrot in front, led the way. About six or seven hundred yards from the entrance to the barrière-nain ravine the regiments were halted, and shortly afterwards General Bosquet arrived, with his staff, and addressed a few words to each regiment in turn. It, each, at the conclusion of his remarks, the General was greeted with loud cheers. The order to move forward was then given. A battalion of the Algerian troops led the way. They were followed by three battalions of the 50th Regiment of the Line. The 3rd Regiment of Zouaves came after—powerful, active, sunburnt Europeans—in their Eastern costume and agile movement seeming the twin brothers of the Algerians who had preceded them. The Chasseurs à pied, who followed, with their generally small but well-proportioned figures, formed a striking contrast with the robust, bearded, Zouaves before them, but seemed admirably adapted in size, and in their more closely fitting dark blue costume, to the service for which they are particularly trained and organised. Three battalions of the 6th and afterwards three battalions of the 7th Regiment of the Line succeeded. Altogether about 12,000 men went by in this division.

The Second Division was scarcely lost to sight in the winding valley of the ravine, when the Fifth Division came in sight. This body of troops had been brought up from the plain during the night: they had quitted it at two a.m., and arrived at their position in the Camp before Sebastopol at seven a.m. Their move could hardly have been observed by the Russian pickets about the Tchernaya. This division, under General Brunet, was arranged to form the working party, to secure the hold of the Mamelon Vert as soon as the attacking columns had taken it. It included the 4th battalion of the Chasseurs à pied, with the 11th, 25th, 10th, and 14th Regiments of the Line—altogether 10,000 men. At the same time Omer Pacha moved with a force, apparently about 15,000 strong, of Ottomans and Egyptians, and occupied the space on which was formerly encamped the Second British Division, and the brigade of Guards, near the Inkerman heights. These troops had also come up during the night from the Balaclava plain. They protected the right flank against any attack from the Russian forces encamped on the northern heights and Inkerman mountain, who might, otherwise, with impunity have come up by way of the Inkerman valley, and sought to annoy the troops engaged in the attack on the Russian left in front.

CAPTURE OF THE MAMELON.

At half-past six four incendiary rockets, the signal for the starting of the attacking columns, took their flight from the Victoria Redoubt. At the signal of the first rocket the troops were all formed, and at the third rocket were seen on the right above Careening Bay, and along the advanced trench at the foot of the Mamelon—a living wall. The fourth rocket had no sooner taken its flight than the parapets were cleared. Forward went the lines, throwing out a cloud of skirmishers. The Russian trenches on the side of the Mamelon Vert were climbed over, trench after trench, apparently without any opposition. Then the steep sides of the hill were mounted. The French were seen in three columns, one ascending towards the west face, another towards the east face of the works, while the third moved directly up towards the face fronting the Victoria Redoubt. But the whole surface of the hill was soon covered with their skirmishers. After one discharge from some of the heavy guns the Russians got into the embrasures and upon the parapets, and fired a few shots from their rifles, without, seemingly, doing any execution; but the volleys from the skirmishers, or else the consciousness of the hurtful effect, compelled them quickly to retire. Their force was evidently small. They had not expected an attack at such an hour, by daylight. Nothing could be finer than the "dash" with which the French troops ascended the steep slope—a natural glacis—towards the parapets. The Russians had their attention drawn from some of the heavy guns the Russians got into the embrasures and upon the parapets, and fired a few shots from their rifles, without, seemingly, doing any execution; but the volleys from the skirmishers, or else the consciousness of the hurtful effect, compelled them quickly to retire. Their force was evidently small. They had not expected an attack at such an hour, by daylight. Nothing could be finer than the "dash" with which the French troops ascended the steep slope—a natural glacis—towards the parapets. The Russians had their attention drawn from some of the Malakoff batteries and the Redan offered no attempt to impede the progress of the assailants. Whether the tremendous fire which was poured against them from the English batteries of both the left and right attacks restrained them, or whether they were bewildered as the moment of the assault, they scarcely fired a shot while the first columns of French mounted the hill. Presently the French were swarming into the embrasures, mounting on the parapets, and descending into the work. Shortly after the Russians were seen escaping by the way leading from the redoubt towards the hill crowned by the ruins of the Malakoff tower and the numerous batteries around it.

ATTEMPT TO TAKE THE MALAKOFF TOWER.

And now occurred the grand mistake which subsequently entailed a great loss of life among our brave allies. The arrangements had been made for taking and securing the large redoubt on the Mamelon-hill; but it was not intended to go further at that moment. Such, however, was the impetuosity of the troops, such the excitement of the officers and men at their first success, that they could not resist the pursuit of the Russians on the one hand, or the attempt to storm the Malakoff itself. Between the Malakoff and Mamelon hills is a deep saddle-like hollow. Across this saddle, dipping down towards the right of the Malakoff hill, is the ordinary way of communication between the Marine suburb and Mamelon. In this direction the Russian troops took their flight, and these and their pursuers were soon lost to sight behind the ridge. But the staggered, flying troops moved straight across the saddle and mounted the Malakoff-hill. The Russians, aware of their danger, poured down a heavy fire upon the assailants from the batteries, and apparently brought field pieces so as to take them in flank. In spite of these, the French mounted and at last were seen to reach the abattis work drawn around the hill. So short a distance was this from the lower tier of batteries that the Russians could no longer depress guns sufficiently to bear upon them, and standing upon the parapets they were seen to throw large stones, besides keeping up a heavy musketry fire, against the French. The French had evidently met with a difficulty they could not conquer; they were observed to be locking on all sides for an opportunity of advancing, but yet were unable to move on. Presently a sudden sense of their dangerous position seemed to seize them, and they retired back towards the Mamelon. The Russians by this time had assembled their reinforcements behind the Malakoff works, and, as the French were moving down the dip of the saddle towards the Mamelon, these troops were seen to come up in a dense mass, pouring a heavy flanking fire against our allies. At the same time they came within range of the guns of the works around the Malakoff Tower (the Korniloff Bastion), which, notwithstanding the shower of shell and rockets from our batteries, kept up a galling fire against the French as they retired. Some confusion followed, the Russians followed the French into the Kamtschatka Redoubt, and the latter were next compelled to evacuate it. That was a time of deep anxiety for all who were watching the engagement. But confidence was again resumed, when the French, who had descended the Mamelon-hill, were seen to be steadily re-forming in the Russian trenches which surrounded its base. Up they went again, sending a shower of balls among the Russians, who were now in crowds covering the parapets. The redoubt was fringed with smoke and flames from the fire of the Russian rifles against the French as they mounted the hill, and the hillside was covered with the fire of the assailants. It was now a few minutes before eight o'clock, a dense bank of black clouds rested on the horizon, and the sun had just sunk behind it. The Russians made for some time a gallant resistance, but in vain; as the French mounted they were seen to waver, and just as the French reached the parapets they leaped down and retired. Our allies were again masters of the Mamelon Vert.

CAPTURE OF THE REDOUBTS IN CAREENING BAY.

While all this was going on a sharp struggle had ensued between the French and Russian troops occupying the redoubts on the east side of the Careening Bay ravine. The French had been seen to rush from their advanced approach, and from the right flank of their works, towards the foremost redoubt. In front of this were two large ambuscades and a trench: one volley appeared to be fired by the riflemen in the pit, after which they hastily fell back on the redoubt. The contest at the first redoubt was speedily settled; at the second redoubt the resistance was more obstinate. Here the Russians had a deep and secure covered approach, which descended the slope of the cliff, crossed the ravine, and was connected with a like approach from the Mamelon Redoubt. A complete parallel was thus formed. The enemy in the Careening Bay Redoubts were evidently dismayed when they saw the Mamelon Vert fall into the hands of the French, for this principal communication by which supports could arrive to them was thus cut off, and they were not in strength sufficient without reinforcements to resist with effect the overpowering force of their antagonists. They retired, therefore, partly by the covered way, and partly towards the slope of the hill, as it falls upon the roadstead; and the work remained in the hands of the French. Upwards of 500 prisoners were taken in these redoubts, and 73 guns.

CAPTURE OF THE QUARRY.

As soon as the Mamelon was taken by the French, the order was given by Colonel Campbell for the small force told off for attacking the Quarry to advance. One end of the Quarry, that looking eastward in a direction towards the Malakoff Tower, was connected with three parallels which the Russians had dug in front of their most advanced works, on Frenchman's hill, to prevent our further advance. The large rifle-pit which the Russians contrived to throw up after "Egerton's pit" had been taken from them was connected with the foremost of these parallels. When the order was given for our attacking party to advance, the 88th and 7th rushed out from the right of the zigzag approach on the left of our advanced work, the men of the 47th and 49th Regiments from the left of this approach. While some rushed up the hill towards the Quarry, others took possession of the enemy's rifle-pit and advanced trench. It appeared that the Russians, on seeing the attack of the French against the Mamelon, had moved along their trenches towards the right, where they became connected with the trenches or other works on the Marine-hill, so that the left, the side against which our men advanced, was almost wholly deserted. A trifling opposition met with in the Quarry itself was quickly reduced, and our troops congratulated themselves on having gained an easy victory. Carried away by their enthusiasm, they even advanced towards the Redan, and perhaps, had they been in force, such was the confusion and alarm of the Russians, they might have carried this important work. As it was the enemy returned with comparatively powerful reinforcements, and suddenly opened a flanking fire, which compelled our men to abandon the Quarry. It was not armed as had been anticipated. A second time our men moved against this work, and took it from the enemy, who had again entered it; nor was this the last time, for still later in the evening a third contest for its possession took place, which ended, as before, in our being victors, but at a severe expense. No less than eighteen officers, and a large number of men, amounting to upwards of half the original attacking force, were placed *hors de combat*, including killed and wounded. Colonel Campbell behaved with the most determined gallantry. He was struck no less than four times, and once so severely by a musket-ball, which providentially was prevented from inflicting a more serious wound by striking the front of his sword-belt, that he fainted. Nothing but the unflinching bravery of the troops could have enabled them to retain the Quarry after they had wrested it from the enemy. The ground at the back of the Quarry was fortunately found to be loose and soft, so that the working party were enabled to throw up some cover in this direction without much difficulty.

During the night repeated attacks, six in all, were made upon our men in the Quarries, who defended their new acquisition with the utmost courage and pertinacity, and at a great sacrifice of life, against superior numbers, continually replenished. The strength of the party told off for the attack was but only 1000, of whom 600 were in support. At the commencement 200 only went in, and another 200 followed. More than once there was a fierce hand to-hand fight in the position itself, and our fellows had frequently to dash out in front and take their assailants in flank. In one of the attacks the Russians experienced some difficulty in bringing their men again to the scratch. At length one Russian officer succeeded in bringing on four men, which Corporal Quin, of the 47th, perceiving, made a dash out of the work, and with the butt end of his musket trained one, bayonetted a second, and, the other two taking to their heels, brought in the officer a prisoner, having administered to him a gentle prick by way of quickening his movements. After delivering him up he suggested to his comrades that there were plenty more to be had.

On Saturday morning, the latest date of any of the letters from the Camp, the Russians moved one of their line-of-battle ships over on the other side of the harbour, so as to command the ravine between the Redan and the Malakoff Tower. If this speaks of defence, there are other things which would suggest the idea that the Russians seem no more to consider as impossible the taking of the town by the Allies, for quantities of materials, ammunition, and bales, have been taken over to the north side.

Russian prisoners and deserters represent the loss of these battles as enormous. 25,000 men are spoken about as their loss since the reopening of the bombardment; 15,000 alone during the attack on the 7th.

Two despatches from Lord Raglan, dated June 9, have been received, in which he gives an account of the capture of the Russian works, and contains the official reports of the gallantry and high military qualities of the French and English armies, as displayed in the several engagements of the 7th and 8th inst. One of the despatches contains a list of the officers killed and wounded, but that we gave in our last Number.

THE WAR IN ASIA

The intelligence received from the seat of war in Asia, by the last steamer from Constantinople, is of a vague description. At Kars an attack of the Russians was considered inevitable. The Turks have evacuated Batoum and Chourouk-su. Nassif Pacha has advanced with his general staff to Kars. The French Consul has quitted Batoum. The Russian forces have advanced and encamped near Redout-Kale.

THE HANGO MASSACRE

FURTHER PARTICULARS.

DANTZIC, Thursday, June 21.—The *Lightning* has arrived with the mails. Lieutenant Gerstein, Dr. Easton, and Mr. Sullivan are prisoners, but wounded. The fleet was lying off Seskar Island.

RUSSIAN VERSION

The following appears in the *Journal of St. Petersburg* of the 10th:—

The Commander of the Forces in Finland, Adjutant General von Berg reports a very successful skirmish, which took place not far from Hango Udd between our volunteers of his command and the second battalion of the King of Prussia Grenadier Regiment and a part of the crew of the English frigate *Cossack*. The affair took place as follows:—On June 5th, at noon, the frigate *Cossack* appeared in the roads off Hango Udd, and sent off a boat, which came ashore in the neighbourhood of the telegraph, and landed a small party, under the command of some officers, there. Ensign Sawertschkoff, of the King of Prussia Grenadier Regiment, to whom this portion of the coast is entrusted, having been early informed of the enterprise of the enemy, concentrated some men of his detachment behind a building opposite the landing-place, and another portion, under the subaltern, Peter Pawlof, he detached along the beach to cut off the retreat of the English. The enemy, attacked on all sides, defended himself but feebly, and laid down his arms. The success of this affair must be ascribed to the coolness and the foresight of Ensign Sawertschkoff. The loss of the enemy amounts to five killed: there were taken prisoners, one officer, one surgeon, one marine (*garde marine*), and eight sailors, of which latter four were wounded. In addition to the above our troops made spoil of the flag of the boat, seven muskets, and seven cutlasses. The boat itself, with one cannon on board, was sunk. On the following morning the English frigate came in close to Hango Udd, and fired at the buildings for about an hour and a half, but without doing them any great harm.

THE RUSSIAN DIFFICULTIES.

The general tenor of the accounts from Russia show that the resources of that great empire are becoming exhausted; indeed, the evacuation of Soujak kalé and Anapa, taken in connection with the small number of troops at Kertch and Yenikalé, is enough to show that even maternal war, the Russian supplies of which were said to be inexhaustible, is falling very far short of the demand. A few weeks ago it was stated in a Berlin paper, that the number of local commissions issued for the execution of the last Imperial ukase, ordering a further levy of 12 recruits per 1000 souls in the western provinces of Russia, has been quadrupled from what it was at the beginning of this year, and that even as far back as January last General Tschodoieff had represented that the *cadres* of his reserve battalions (5th and 6th) had been so thinned by the draughts sent off to the exterior provinces that he had been obliged to draw upon the dépôts for many thousands, and that, consequently, the 7th and 8th battalions must now be made up again to their complement.

A telegraphic despatch from St. Petersburg announces that a fresh ukase has been issued for the purpose of expediting the levy of recruits lately ordered in the seventeen western governments of Russia to the extent of 12 in every 1000 registered "souls;" the tenor of which ukase is to suspend all the hitherto existing exemptions from military services as regards the populations of towns and hamlets, to extend the age at which men have hitherto been liable to serve up to that of 37 years, and to empower the military boards entrusted with the business of conscription even to set aside the exemption hitherto existing in favour of only sons.

Advices from Konigsberg state also that a recent Imperial ukase orders that baptised Jews, who have hitherto been exempted, shall furnish 30 recruits for every 1000 souls to the Russian army.

More than all, however, for the Russian Government is the threatening aspect of affairs in the Ukraine and the adjoining provinces, where the disturbances among the peasantry, so far from being suppressed, as was lately said in the St. Petersburg journals, are becoming more and more alarming. A letter from Posen, dated the 14th inst., states that the landed proprietors from Volhynia and the Ukraine continue to flock to Warsaw, in anticipation of serious disturbances in those districts. The movement, however, has not as yet been that of hostility to the proprietors; it is mainly directed against the Jews, who are regarded by the peasants as the most effective agents of the Russian Government. A detachment of from 300 to 400 recruits for the Russian army from Radom, the chief town of the Palatinate of Sandomirz, in Russian Poland, is said to have rallied, and, while on their march to the East, to have joined the malcontents.

A letter from St. Petersburg, of the 9th, in the *News* of Hamburg, says:—"The synod of St. Petersburg (the highest ecclesiastical authority in Russia) has presented an address to the Emperor, earnestly praying him to show himself more disposed towards conclusion of peace, in so far as the political interests of the State would permit. It is not known how the Emperor has received this address." The clergy are no doubt alarmed at the dangers which threaten "Holy Russia," from the foreign influences now at work.

THE RUSSIAN PEACE DOCUMENT.

The *Journal de St. Petersbourg* of the 12th inst. devotes six columns to a reply to Count Walewski's circular despatch of the 23rd May. This new Russian document is simply a repetition of the former sophistical casuistry, though more moderate in tone. It brings forward no new arguments, nor does it throw any new light upon this vexed question. It concludes by attributing the rupture of the Vienna Conferences to France and England, and expresses the hope that the negotiations may be resumed, and the blessing of peace so eagerly desired be assured to Europe. After stating that "the moment seemed to have arrived when the wisdom of the Cabinets assembled in Conference at Vienna was to put an end to this crisis," "and that Russia has the satisfaction of knowing that she did all that was in her power to contribute towards the work of peace by the plausible manifesto, which has been drawn up for the use of the Oxford-Manchester party, winds up in the following terms:—

Such are the considerations which present themselves to our mind at the moment we learn the closing of the Vienna Conferences. It was provoked by the refusal of the Plenipotentiaries of France and England to accede to the propositions of the Court of Austria, made with the object of an arrangement. On this refusal Count Buol declared the sittings closed on the 4th June.

The blame of the rupture falls then upon the Western Powers. Their will put an end to the negotiations. The Russian Cabinet is not responsible for it. If, on the one hand, it opposed to France and England the proposition of not putting up with exactions which exceed the limits laid down at the open ng of the Conferences, on the other hand it offered to the friendly Powers the proof of its sincere desire to continue loyally towards a pacification conformable to the sentiment of the dignity of Russia. Constant to these principles, it will leave the path open to an honourable reconciliation, when the desire of peace shall have made itself more generally evident in France and in England, when reflection shall have enlightened the opinion of the two countries on the mistake of a war without an object—of a war without a cause. The resumption of negotiations may then be allowed, with the hope of success, to assure to Europe the blessings so long disavowed, of general repose

NAVAL AND MILITARY INTELLIGENCE.

Two hundred of the dépôt of the 72nd Highlanders left Dublin on Monday morning for Kingstown, there to embark to join the service companies at the seat of war

A STAFF CORPS, consisting of twelve companies of 120 men each, is to be organised on a similar system to that attached to the Quartermaster-General's Department during the Peninsular War, under the command of Lieutenant-Colonel Robe, who superintended and constructed the military roads and other extensive works connecting the martello towers on the coasts of Sussex, and Hampshire. The corps will be composed of mechanics, carpenters, wheelwrights, blacksmiths, masons, bricklayers, and excavators, and will be attached to the Quartermaster-General's Department.

ALL the French gun-boats and floating-batteries destined to operate in the Baltic are to rendezvous at Cherbourg. Fourteen are completely armed and manned, and ready to put to sea—viz., the floating battery *Lave*, the steam gun boats *Eclair*, *Etincelle*, *Dragonne*, *Aigrette*, *Fulminante*, *Tempête*, and the sailing mortar-vessels *Tocsin*, *Torch*, and *Bombe*; and the steam-sloops *Pélican*, *Tonnerre*, and *Aigle*. Ten other vessels belonging to the Baltic squadron are daily expected at Cherbourg viz, the floating-batteries *Congrève*, *Foudroyante*, *Tonnante*, and *Lave*, and the steam gun-boats *Avalanche*, *Flamme*, and *Grenade*, the steam mortar-vessel *Cassini*, and the sailing mortar-vessels *Fournaise* and *Trombe*

THE Government having decided on concentrating 4000 troops in the neighbourhood of Exeter, General Eden, the Commander of the West-of-England, inspected Woodbury, Lympstone, and Blackhills, on Saturday last, for the purpose of ascertaining the best spot for the proposed Camp. He was accompanied by Captain Hanley, of the Royal Engineers.

IN addition to the immense reinforcements of cavalry, infantry, and artillery about to embark from England, the following regiments are under orders to proceed to the seat of war, immediately on being relieved by time and other regiments, viz.:—19th Light Infantry, from Gibraltar, 54th Foot, from ditto; 49th Foot, from ditto; 82nd Foot, from the Ionian Islands; 1st Battalion 91st Foot, from the Piræus; and 92nd Highlanders, from Gibraltar. The following regiments of infantry of the line are under orders to embark for foreign service, but it is believed they will proceed in the first instance to Gibraltar, Malta, or the Ionian Islands previously to joining the army in the East, viz.:—14th Foot (recently returned from Cork; 34th King's Light Infantry, from Manchester; 56th Pompadours, from Dublin; 3rd Battalion 6th Rifles (newly raised), from Dublin; 89th Foot, from Portsmouth; 98th Foot, 1300 strong, recently returned from India; 99th Foot, from Dublin, 89th Foot, from Weedon; and 3rd Battalion (newly levied) of the Rifle Brigade, from Gosport

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Rectories*: The Rev. J. S. Mulcaster to Great Salkeld, near Penrith; Rev. W. P. Goodie to Earsham, near Bungay; Rev. C. R. Harrison to Feldon, Essex; Rev. G. R. Mackharness to Honiton, Rev. T. Clarkson to Wyverstone, Suffolk. *Vicarages*, Rev. W. Cooper to Wakefield; Rev. G. C. Hodgson to Barton, Westmoreland; Rev. A. Wyman to Harlington, near Bakewell; Rev. W. W. Trumper to Clifford; Rev. A. Rogers to Avenbury; Rev. W. G. Holmes to Little Hampton, Sussex; Rev. H. Walker to Sudbarn, Norfolk. *Incumbencies*: The Rev. W. Carr to All Saints' Church, Lambeth, Rev. R. H. Davies to Old Ch. h. Clerkenwell; Rev. C. W. H. Bartholomew to Dursley, near Bristol; Rev. I. Pegge to hook St Giles, Somerset

AFTER a sermon preached on Sunday last at St. John's, Paddington, by the Bishop of Oxford, on behalf of St. Mary's Hospital, the collection amounted to £336 12s. 11½d.

THE new church of St. Margaret, at Durham Massey, in the parish of Bowden, Cheshire recently erected at the sole charge of the Earl of Stamford and Warrington, at a cost of upwards of £13,000—was consecrated by the Bishop of Chester on Wednesday week.

IMPERIAL PARLIAMENT.

(*Continued from page 632.*)

HOUSE OF LORDS.—THURSDAY.

THE MASSACRE AT HANGO.

The Earl of MALMESBURY rose to call attention to the painful case the massacre of the boat's crew of the *Conch*, on the 8th of June, Hango, in violation of the flag of truce. The noble Earl recapitulated the circumstances of this melancholy affair, which have acquired so great a notoriety, and proceeded to compare with them the Russian version of this affair, which, even if true, he (the Earl of Malmesbury) contended, did not at all justify the conduct of the Russian officer. He, therefore, inquired of her Majesty's Government what course they should think it their duty to follow with regard to this matter?

The Earl of CLARENDON could not believe that an outrage so horrible and infamous as that which his noble friend had put quite correctly before the House was done under the sanction or with the approbation of the Russian Government. He had sent instructions to her Majesty's Minister at Copenhagen to put himself in communication with the Danish Minister at St. Petersburg, of whose friendly offices he had many proofs, for the purpose of laying the matter before the Russian Government. Her Majesty's Government awaited with extreme anxiety the result of such a communication to the Court of St Petersburg, and their course of action would be in a great measure regulated by it.

The Earl of ELLENBOROUGH said that what her Majesty's Government had done in respect to this matter was no doubt, very proper; but he apprehended that Admiral Dundas, upon his own discretion, had already made a communication upon the subject to the Russian Government

The Earl of CLARENDON said that her Majesty's Ministers had of course communicated to the gallant Admiral the nature of the steps which they had taken

The Earl of MALMESBURY said that, if the Russian Government did not deal with this atrocious outrage in a proper manner, he trusted that her Majesty's Ministers would be prepared to take further steps in the matter—some way of reprisals of a similar nature, which could only bring dishonour upon us without obtaining satisfaction, but in such a way as would bring the force of public opinion throughout Europe to bear, in the shape of a general protest, against this outrage on the part of the Russians

The Measurement of Merchant Steamers Bill was thrown out on the second reading by a majority of seven.

The Leases and Sales of Settled Estates Bill was read a third time and passed.

The Stamp Duties Repeal on Matriculation and Degrees (Oxford) Bill was read a second time

The Charitable Trusts Bill passed through Committee.

The Grants of Lands Bill, and the Public Libraries and Museums (Ireland) Bill, were severally read a second time.

The Insurance on Lives Abatement of Income-tax Continuance Bill, and the Cinque Ports Bill, were severally read a third time, and passed.

The Duchy of Lancaster Lands Bill, and the Militia (No. 2) Bill, were severally passed through Committee.

The Consolidated Fund (£10,000,000) Bill, and the Spirits of Wine Bill, were severally read a second time.

HOUSE OF COMMONS.—THURSDAY

The House sat at twelve o'clock, when they went into Committee upon the Metropolis Local Management Bill. The discussion upon the clauses occupied the attention of the Committee up to a quarter before four o'clock, when the House adjourned.

The House resumed business at six o'clock.

THE CRIMEA.

Lord PALMERSTON, in reply to Captain KNOX, said that the Government had received information from the Crimea that day. The telegraphic communication had been for some days stopped, but it was now put to rights. Lord Raglan stated that up to the evening of the 7th inst. there had been a great deal of firing upon each side, but nothing of importance had occurred.

TENANTS' IMPROVEMENTS COMPENSATION (IRELAND) BILL.

The House went into Committee upon the above bill.

Almost the whole of the night was occupied by a discussion of the clause No 4, and several additions to the clause proposed by Mr Serjeant Shee were rejected by large majorities

ADMINISTRATIVE REFORM.

The order of the day for resuming the debate having been read, the amendment of Sir E. B. Lytton was agreed to without any discussion The House at the time (twenty minutes past one) was exceedingly thin, and a solitary voice, behind the Ministerial benches, which cried "No to the amendment, was greeted with much laughter.

HOUSE OF LORDS.—FRIDAY.

The following bills were passed through Committee, viz.: Union of Contagious Benefices in Cities and Towns, Weights and Measures, Stamp Duties Repeal on Matriculation and Degrees (Oxford), Grants of Lands, Public Libraries and Museums (Ireland), Consolidated Fund, and Spirits of Wine Bills.

The following bills were read a second time, viz.: Carnegie Restitution, Assizes and Sessions, and Edinburgh Lands Bills

The following bills were read a third time and passed viz.—Infants' Marriage, Duchy of Lancaster Lands, and Militia (No. 2) Bills.

The Church Patronage Transfer Bill and the Charitable Trusts Bill were reported, with amendments

The Marquis of CLANRICARDE asked the Government whether they had availed themselves of the invention of Colonel Bethune for the destruction of the forts of the enemy in the Baltic?

Lord PANMURE said that the Government were deluged with propositions of that sort when the war broke out. The invention in question had been referred to Sir C. Napier, who stated that it was a most dangerous weapon in the hands of the Russians, and consequently it was not adopted.

The Earl of ELLENBOROUGH said that the Government ought to refer all such matters to a Select Committee to examine and report on them.

Lord PANMURE said that there was a Scientific Committee at Wool which to whom all such inventions were referred, who investigated their merits and reported upon them. The Government adopted such as appeared to be of advantage to the service.

HOUSE OF COMMONS.—FRIDAY.

NOTICE OF CENSURE UPON THE GOVERNMENT.

Mr ROEBUCK gave notice of his intention, on the 3rd July, to move the following resolution—viz., "That the conduct of the Administration in the sufferings of the Army during the winter campaign in the Crimea, and coincidently with the resolution of the Committee upon the state of the Army before Sebastopol that the conduct of the Administration was the first and chief cause of the calamities which befel that Army, hereby visits with its severest reprobation every member of the Cabinet that counselled the proceedings which led to such disastrous results."

Mr. PEEL, in reply to Mr. W. O. Stanley, said, it did not appear that the superior officers of the regiment were to blame in the affair of practical joking at Canterbury, and therefore no ulterior proceedings were in contemplation

Admiral BERKELEY, in reply to General Harcourt, said that the Admiralty had received no official information relative to the massacre at Hango since the despatch of Admiral Dundas.

On the motion that the House at its rising should adjourn until Monday, Sir J. PAKINGTON expressed his regret at the delay in the way of proceeding with the Education Bills, and asked the Government when the discussion would be resumed, not that he expected any of the bills to pass in the present Session, but he thought much practical advantage would arise from their being read a second time, and sent to a Select Committee.

Mr. HADFIELD hoped that the observations of the right honourable Baronet might be regarded as his funeral oration over his own bill.

Lord J. RUSSELL said that neither the Government nor the House was responsible for the delay, which was entirely caused by the overwhelming mass of business before them. He hoped, however, that the discussion might be renewed while they could still hope for a large attendance of members.

Mr. STAFFORD called attention to the non-payment of wages to the sick and wounded troops that had returned from the Crimea with arrears due to them since last August.

Mr. PEEL said, they had no accounts as to the amount due, and were obliged to depend upon the mere statement of the men, which had been in some instances incorrect, and the public was of course defrauded.

Mr LINDSAY entered into a lengthened statement to prove that in all he had said at Drury Lane he was not guilty of uttering "virulent untruths as was stated by Admiral Berkeley. He also read in support of his statements some returns which he said were untrue and most deceptive.

Sir C. WOOD replied to the statement of Mr. Lindsay, and contended that in he spoke at Drury Lane he had so mixed up fact and fiction that anyone who knew the naked truth would find it difficult to recognise it in the guise in which it was presented by the hon. gentleman.

After a few words from General EVANS,

Admiral BERKELEY hoped that this would be a warning to the hon. gentleman who had made those charges. He had himself made use of some strong expressions under feelings of great indignation which he regretted, though he felt they were justified by the circumstances of the case

Lord PALMERSTON, in reply to Mr. Crawford, said that no other telegraphic message had been received from the Crimea since that which had been sent by the Government to the morning papers. Any further intelligence that might arrive the Government would immediately communicate

EDUCATION (SCOTLAND) BILL.

The motion for the adjournment of the House until Monday having been agreed to, they went into Committee upon the Education (Scotland) Bill, and the discussion of the clauses occupied the remainder of the night.

MESSRS. STRAHAN, PAUL, AND CO.'S BANKRUPTCY.

CRIMINAL CHARGE AGAINST THE PARTNERS.

A meeting of the creditors of Messrs. Strahan, Paul, and Bates was held at the Law Institution, on Tuesday, to consider the steps to be taken to secure a full investigation of the petition recently opened in Bankruptcy. Between fifty and sixty persons were present, nearly the whole of whom are connected with the legal profession. It was agreed to support the choice of assignees proposed—namely, Mr. Barwis, an accountant and navy agent; and Mr. Montagu Tatham, a proctor; and adding the name of Mr. Appleyard, of Lincoln's-inn. Surprise was expressed that the partners should on Saturday, the 9th inst., have continued to pay out over the counter, knowing that they were on the eve of stopping, and they closed their doors on the Saturday instead of on the Monday the general body of creditors would have participated in a sum of £20,000, instead of about £2000, which remained in the till when the officers of the Court of Bankruptcy took possession The house was kept open to the very last minute, and not opened on Monday, the 11th inst., for the simple reason that they had no funds to open with. A bankers' meeting was held on Friday, the 8th inst., to take into consideration the expediency of giving assistance to the house, and the result of their deliberations was not to grant them any aid.

Another meeting of creditors of the bankruptcy was held on Wednesday at the office of Mr. Brandon, solicitor, of 15, Essex-street, Strand, for the purpose of considering what steps should be pursued with respect to the position of creditors, and to arrange about further proceedings. Reference was made to the meeting of Tuesday, with the result of which the creditors present seemed to be satisfied. A creditor observed that he had money into the bank a few minutes before payments were stopped; another gentleman stated that money was received from him at three o'clock; and a fourth stated that at one o'clock in the morning of stopping it was known that the Committee of Bankers in the City had refused to grant them credit. A case was related of one gentleman who had deposited all the money he had in the world in the bank, and was about to be married, having given instructions for the withdrawal of the money, but the cheque was stopped. The solicitors in the locality, both themselves and clients, are heavy sufferers The great mystery seemed to be how so many persons could manage to draw out their balances whilst other cheques were delayed. One nobleman had received the hint the day before, and managed to draw out £6000.

On Wednesday afternoon Mr Robert Meakin Bute, the third partner in the above banking firm, was placed at the bar, before Mr. Jardine, at Bow-street Police-court, to answer the charge of having, in conjunction with Messrs. Strahan and Paul, unlawfully negotiated, or otherwise disposed of, certain deeds or securities of the value of £6000, which had been entrusted to them for safe keeping by Dr. Griffiths. On Tuesday afternoon warrants for the apprehension of the three defendants had been placed in the hands of Blundell and Tickner, the warrant officers attached to the court, who proceeded to execute them in private clothes. Mr. Bates was apprehended in the evening at his half-past seven, at 41, Norfolk street, Strand; after which the officers started by the Brighton Railway for Nutfield, near Reigate, the country residence of Sir John Dean Paul. They found Sir John at home, and succeeded in serving the warrant upon him; but, it being too late to return to London the same night, they allowed their prisoner to go to bed, and, sitting up all night, watched his every movement. Yesterday (Tuesday) they proposed to accompany him to London by an early train the next morning. Accordingly, they conducted the prisoner on Wednesday morning from his residence to the station at the Reigate station, arriving at the latter barely in time to save the train. Tickets were procured hurriedly for the three; and, according to the statements of the warrant officers, the train was actually in motion when Sir John took his seat in a second class carriage. The constables were in the act of following him into the same carriage when a railway porter pulled them back, exclaiming, "The train is in motion, and you can't get in!" The cheer replied, "We are police-constables; he is our prisoner, and we must accompany him. Resist us at your peril." To this the porters in reply pointed out that they were only carrying out their orders "to prevent any one entering a carriage while the train was in motion;" and having closed the carriage-door against the officers, the train went off without them. A telegraphic message was sent to the London station by one of the officers, who proceeded to town by the next up-train, which reached London-bridge only ten minutes after the one they had missed. On inquiry, however, of the station-master at the Metropolitan terminus, their prisoner had been detained, he replied he did not know Sir John Paul by sight, and had taken no steps in the matter As the officers had been equally unsuccessful in their pursuit of Mr. Strahan, Mr. Jardine agreed to postpone the case till Friday

On Thursday forenoon Mr. Strahan, the first partner in the firm, was placed at the bar at Bow-street, to answer a charge, conjointly in connection with Messrs. Paul and Bates, with unlawfully disposing of securities to the value of £6000 and upwards, the property of Dr. Griffiths, of Rochester

Mr. Humphries stated that he proposed only to go into the case sufficiently to justify his Worship in remanding the prisoner till next day, to the then learned gentleman, Mr. Bates. With this view he called

Dr. Griffiths, the prosecutor, who stated that he had an account with Messrs. Strahan and Co., the bankers, of the Strand, who were directed by him to purchase certain securities, amounting altogether to £22,000, and to keep them on his behalf, for safe custody, at the bank. From information he had received he had reason to know that these securities had been sold, pledged or sold and he was prepared to give full evidence of the particulars whenever called upon to do so.

Mr. Strahan, who had offered to surrender himself at once to meet the charge, was remanded till yesterday (Friday), when the three partners were placed in the dock, at Bow-street police-court, Sir John Dean Paul having surrendered himself on Thursday evening. In the course of the examination it transpired that Sir J. D. Paul, with the consent of his partners, had disposed of securities amounting in value to near £100,000, including the £22,000 belonging to Dr. Griffiths. The securities had been placed in the hands of Overend, Gurney, and Co., Birmingham, in the City, six weeks ago. Mr. Strahan, in a private communication made to Dr. Griffiths, on Wednesday, stated that both he and Sir John Paul would by-and-by have money sufficient to redeem his securities. The whole of the prisoners were remanded until Wednesday next

Note.—The sign ° denotes below the average.

The reading of the barometer decreased from 29.30 in. at the beginning of the week to 29.24 in. by the afternoon of the 16th; increased to 30.04 by the 18th; decreased to 29.92 in. by the afternoon of the same day; increased to 30.35 in. by the 20th; and decreased to 30.25 by the end of the week. The mean for the week, at the height of 82 feet above the level of the sea, was 29.834 in.

The mean temperature of the week was 1°0—being 7.7° below the average value.

The range of temperature during the week was 32.2°

The greatest daily range of temperature during the week was 21.1°. The greatest was 33°, on the 21st; and the least, 14°, on the 19th.

Rain fell during the week to the depth of four-tenths of an inch.

The weather has been unusually cold for the season, and but little rain has fallen.

Lewisham, June 22, 1855. JAMES GLAISHER.

HEALTH OF LONDON. Within the week ending June 16 the births of 1474 children were registered—viz., 758 were boys and 716 girls. The average number in the twenty fourth week of the year, from the records of ten years, are 684 boys and 661 girls. The deaths within the week were registered 969, viz. 520 males and 449 females. The average number in the week of the year, from the registers of ten years, was 911, and the increased in proportion to increases of population is 1036. So that the number of deaths in the week was rather less than the estimated number—a more favourable result than the bills of mortality have for some time disclosed. One person died of disease caused by intemperance; besides two who were suffocated in a state of intoxication. One person died from want.

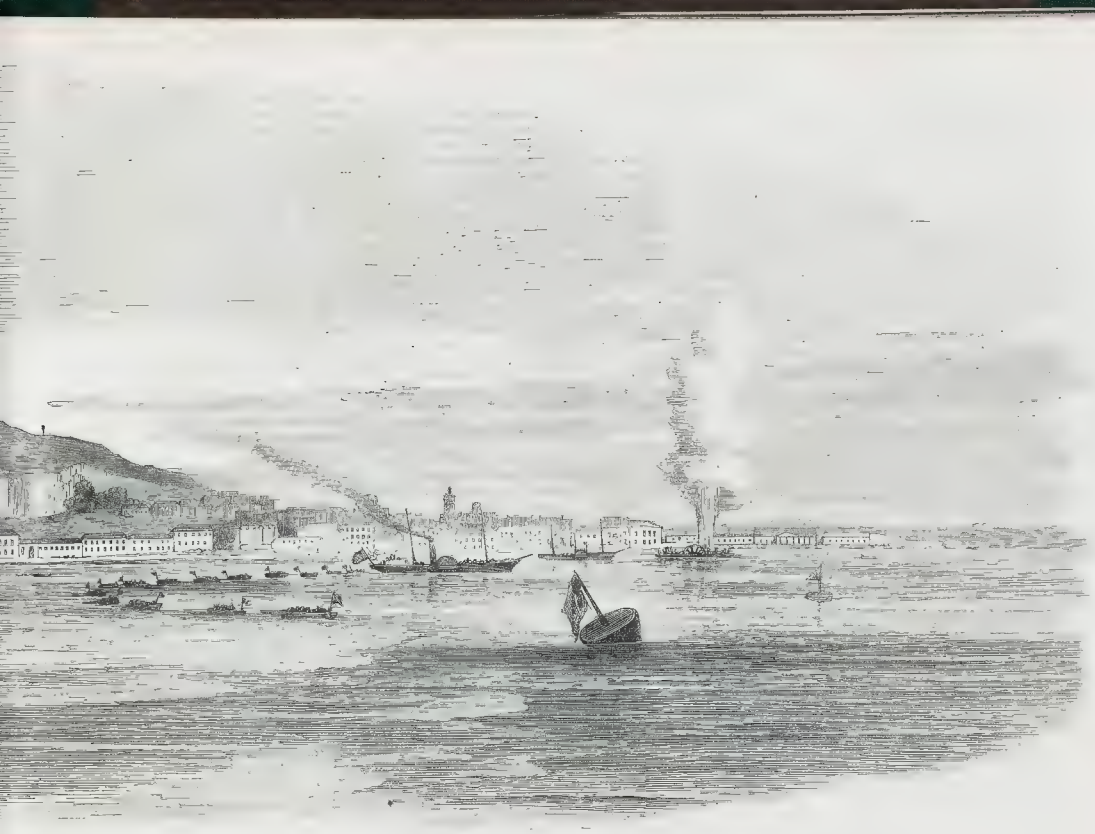
ROYAL GEOGRAPHICAL SOCIETY.—The last meeting of the session will be held on Monday evening, when a paper will be read by Captain Collinson, R.N., on the geographical results of his late researches in the Arctic Regions, in her Majesty's ship *Enterprise*. We shall give an abstract of this paper, with a series of illustrations.

THE TOWN AN

We have been avoured by a Correspondent with the accompanying View of the Town and Harbour of Kertch, made after the place was taken. The details of the expedition have been given in a previous page; but we may here state, in addition, in explanation of our Correspondent's View, the line-of-battle ships lie about nine miles from the town: several steamers are there, and the *Minerva* and *Danube* frequently go backwards and forwards, towing long strings of boats to the fleet. Our Correspondent went up to the town. The objects of most interest to him were the "Infernal Machines": five or six were lying on the jetty in the dockyard. At first sight they appear like ordinary buoys, but a nearer inspection soon shows their real character and purpose. Although only a few of these machines were found, they were numbered as high as 37; and it is supposed that the remainder of them had been laid down. Just as our Correspondent landed there was an explosion of one of the Machines which was employed by the Allies to destroy a Russian steamer; which incident is shown on the extreme right in the long View of the Town and Harbour. We have engraved the Machine above named at page 632.

The town of Kertch is finely situated in a beautiful bay. Many of the buildings which skirt the shore are built in a tasteful style of architecture. Upon the rising ground behind is the Museum; and a small curious temple crowns the hill. To the left of this temple is the so-called Tomb of Mithridates; and upon the several hills around the bay are numerous tumuli

THE TOWN OF KERTCH.



THE STEAMER "MINNA" TOWING UP BOATS FROM THE FLEET — EXPERIMENT UPON A RUSSIAN VESSEL WITH AN INFERNAL MACHINE.

BOUR OF KERTCH.

Many of these have been opened, and a variety of articles taken rom them have been placed in the Kertch Museum; and it denotes the love of the inhabitants for these antiquities to find that the most valuable articles had been removed before the place was taken. It will be recollected that last week we engraved several specimens of antique art brought from Kertch, and deposited in the British Museum.

We may here mention, by way of correction, that the coin engraved last week (p. 597, No. 5), and described as a regal coin of Kertch, is, we are informed, a *civic* coin of ancient Kertch, then called Panticapæum: obverse head of Pan, with a wreath of ivy reverse P A N, surrounding a bull's head.

This Correspondent adds:—"I may mention that the operations in the Sea of Azoff, under Captain Lyons, son of Sir Edmund Lyons, have been most successful, and are of the highest importance."

The two lower Views of the town are from Sketches taken by our own Artist, and represent a closer view of the principal buildings upon the shore, with an interior view of the Market-place. Our Artist writes:—"When our fleet first appeared off Kertch, a courier was dispatched to Sebastopol for assistance, when he was half-way on the road he was met by another messenger, from Sebastopol to the Governor of Kertch, stating that he was hard pressed, and required reinforcements. Kertch was given up to the enemy almost without their having fired a shot. After our troops had passed through the town the inhabitants were in a state of great alarm. The Tartars began to plunder, and the Turks to commit various excesses: and three of the latter were shot by the French guard. A deputation of the inhabitants having waited upon General Brown, after three days a guard was granted them."

KERTCH, NEAR THE MARKET-PLACE.

CALENDAR FOR THE WEEK.

SUNDAY, June 24.—3rd Sunday after Trinity. Midsummer day.
MONDAY, 25.—Battle of Bannockburn, 1324.
TUESDAY, 26.—Attempted Insurrection at Guadaloupe, 1849.
WEDNESDAY, 27.—Dr. Dodd executed for forgery, 1777.
THURSDAY, 28.—Queen Victoria crowned, 1838.
FRIDAY, 29.—St. Peter.
SATURDAY, 30.—Earl of Argyll beheaded, 1685.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING JUNE 30, 1855.

THE ZOOLOGICAL GARDENS, REGENT'S-PARK.—The collection of Living Animals includes a magnificent series of Lions, Lion Whelps, Cheetah or Hunting Dogs, and other Carnivora, Stands, Elephants, Rhinoceros, and a pair of Hippopotami together with an immense number of Birds, Reptiles, Fish, and other Marine Animals. The band of the 1st Life Guards will perform (by permission of Colonel Forster) every Saturday at four o'clock, commencing on Saturday, the Admission, 1s.; Monday, 6d.

ADAM and EVE. This great Original Work, by JOSEPH VAN LERIUS, is now on VIEW at 67, PALL-MALL, opposite Marlborough-house, from Eleven to Six daily.—Admission, One Shilling

LUMINOUS and CHROMATIC FOUNTAIN, 100 feet in height, at the ROYAL PANOPTICON, Leicester-square, daily at 4 35 and 9.55. The Exhibition is open Morning, 12 to 5. Evening, 7 to 10. Schools and children half-price.

MDLLE. CECILIA MARES' CONCERT. SIGNOR BOTTESINI will perform a Solo on the Double Bass at the evening Concert, which will take place at the BEETHOVEN ROOMS on WEDNESDAY Evening next, the 27th inst.

MASTER ARTHUR NAPOLEON'S (the celebrated Portuguese Pianist) GRAND EVENING CONCERT, at the HANOVER-SQUARE ROOMS, on TUESDAY, June 26, 1855, to commence at Eight o'clock precisely. Vocalists: Madame Sainton-Dolby, Madame Meerbet (of Toulouse), Signor Ronconi, Mr. Sims Reeves, and Mr. Lawler. Madame Pleyel, Mr. Benedict, Mr. Scott Gatty, Signor Bottesini, and Master Arthur Napoleon. Pianoforte: Master Arthur Napoleon. Violin, Mr. Kettenus, Violoncello, M. Lazarus (conductor), Herr Wilhelm Ganz. Master Arthur Napoleon will perform in the course of the Concert, Beethoven's Sonata Pastorale, a Grand Concertante Duet with M. Lazarus, Mendelssohn's Andante and Rondo Capriccioso, and Thalberg's "Home in Erin." Stalls, half-a-guinea; Tickets, 7s. each; may be had at all the principal Music Warehouses, and of Master Arthur Napoleon, 30, Oxford-terrace, Hyde-park.

ANERLEY POULTRY SHOW.
PRESIDENT.—The Right Hon. the Earl of Verulam
VICE-PRESIDENT.—Sir John Peter Hollest, Bart., F.R.S., Vice-President of the Zoological Society.

The First EXHIBITION of POULTRY and PIGEONS will be held in the ANERLEY GARDENS, adjoining the Anerley Station of the London and Croydon Railway, and near the Anerley entrance to the Crystal Palace grounds, on Tuesday, Wednesday, and Thursday, the 26th, 27th, and 28th inst.

The value of the Prizes will exceed 300 Guineas. A detailed list of the Prizes and certificates of entry may be had on application to the Secretaries, at the Office, Anerley, Surrey.

By special permission the Band of the Royal Artillery will attend each day during the Exhibition.

EDGAR SHALLCROSS, Hon. Secs.
HENRY F. WELLS

INDIA, CHINA, AUSTRALIA, and CAPE of GOOD HOPE.—W. O. YOUNG will dispatch the following fast-sailing A 1 Clipper SHIPS at the dates named as under:—

Ships.	Tons.	Commanders.	Destination.	Docks.	To Sail
Thomas Campbell	637	R. Clark	Bombay	London	July 10
Dolphin	586	G. Murray	Hong-Kong & Whampoa	W. India	June 20
Boleyn	357	A. Corker	Shanghae	London	July 10
Sea Witch	357	H. Pentreath	Hong-Kong & Shanghae	London	July 10
Kensington	1000	W. King	Port Phillip	London	June 30
Ashdene	504	Richard Pill	Geelong	London	June 30
Centurion	650	W. Wards	Sydney	London	June 27
Maid of Judah	662	J. Buckland	Sydney	London	July 10
Sea Queen	415	W. Awde	Algoa Bay	St. Kath	June 23
Meteor	570	J. Hall	Cape of Good Hope	London	June 27
Ocean Gem	362	F. Jamieson	Cape of Good Hope	London	July 10

These Ships have been selected specially for their high-class and fast-sailing qualities, and will be found well worth the attention of Shippers and Passengers.—W. O. YOUNG, 54, Cross-street, Manchester; 19, Dale-street, Liverpool; and Sun-court, Cornhill, London.

THE ILLUSTRATED LONDON NEWS

LONDON, SATURDAY, JUNE 23, 1855.

THE silence which the leaders of the Crimean expedition have observed for some days so far as the English and French public is aware—in regard to the progress of the siege, is held to be ominous of a decisive movement. The bombardment is understood to have recommenced; and it is stated that, though, at the moment we write, unofficially, that a brilliant attack upon the Redan, by our own men, was successful to the extent of enabling the assailants to spike all the guns. But Lord Raglan has sent nothing that the War Minister has "had pleasure" in communicating to the journals, and General Pelissier is asserted to have refused to send a despatch until he should have something important to say. Any moment, of course—even one which may occur between the reader commencing these remarks and his concluding them—may throw them out of date, but while we write the proceedings at Sebastopol are but matter of conjecture. Everything, however, unites to make it probable that the final rush of the Allies upon the robber's den and its utter destruction cannot be far off. The Russian defences gradually crumbling before us, the stronghold exposed to a withering storm of fire, the town in a state of ruin and pestilence, the *morale* of the garrison giving way under the conviction that determined enemies—never defeated either by force or by fraud—are making their way onward to victory; the food, so largely and carefully stored, all destroyed; the "nursery sea" swept by the victors—all these things seem to lead, almost by logical inference, to the conviction that the sternest conclusions of the grim logic of war are about to be tried on the felon fortress.

Meantime the Russians have been doing their best to obliterate any sentiment of admiration a chivalric foe might feel for those who have long resisted his attack. The termination of the first act of the war, like its commencement, has been marked by an act of treachery and barbarity never paralleled in a Christian country, and seldom even among savages. The murder of the boat's crew at Hango full details of which will be found in another column—has aroused the indignation of the country in a way which must make the friends of Russia eager in their hope that Sebastopol may be taken before the news can reach the army. It will be a black day for Russia if the British bayonet has not done its work before these tidings reach the Crimea. The blood of those murdered sailors will be fearfully avenged by their soldier countrymen. The hideous story is best told in the fewest words. A boat's crew of Englishmen left their ship to set on shore some Finnish prisoners, whom, from motives of humanity, they wished to release. The boat, of course, exhibited a flag of truce. A large body of Russian soldiery, under the command of a ruffian who understood English, to show the errand was explained, uttered a curse upon the flag which all but savages respect, and opened fire upon the boat, slaughtering not only the English sailors, but their own countrymen and fellow-subjects; one coloured man only escaping to tell the tale.

This cowardly and brutal massacre appears to be a crime of such foulness that we doubt whether even the most wayward and crotchetty peace-monger in Great Britain will be able to extenuate it. The leading members of the Peace party have never had a word to say against the treacherous brutality committed by the Russians at Sinope; let us hope, for the honour of Englishmen, that they will join with the rest of their countrymen in stigmatising the Hango murders as they deserve. There is not the slightest pretext for supposing that the British sailors were committing the slightest act which could deprive them of the protection of the flag of truce. It has been suggested that the unfortunate men who have been murdered might have been trying to obtain soundings; but this remote probability (for there was nothing to be gained by soundings in the locality in question) is negatived by the only evidence which can be procured. But, even if they were actually doing this, there is not the faintest justification for the massacre. They came to land this handful of men, with their prisoners—and every one of them could have been captured by the overwhelming force of the Russians. Resistance would have been madness. But the revolting circumstances of the whole case leave it but too clear that the slaughter was premeditated. The ruffian in command perfectly understood the whole affair, and, declaring that it should be seen "how the Russians could fight," proceeded to the murder of the helpless; and, in utter outrage of all the humanities of war, destroyed his own fellow-subjects, rather than that the English should escape. We do not see how even Mr. Gladstone can place this piece of Russian treachery and cruelty in a favourable light.

But the work is all of a piece. The whole history of the campaign shows that civilised nations, in dealing with a half-civilised nation as if it were one of themselves, have committed a blunder. Napoleon knew Russia better than we seem to do. "Scratch the skin from the Russian, and you find a savage," said the great Emperor. The sham refinement, the mock courtesies, the hollow bearing of the Russian, are but the assumptions of the wily "savage." Excite him, terrify him, show him blood, and you will see the mask of civilisation dropped. Both in negotiation and war Russia has been alike treacherous; and yet the Allies have dealt with her as with an honourable antagonist. Napoleon knew Russia, and Wellington knew Nicholas. We have quoted the opinion of the Emperor. Has not the Duke left *his* on most emphatic record? When cheated by the Sovereign in whose honour he had confided, the Duke simply remarked, "I could not know that the fellow was such a liar!" Yet, with the Liar of the North we diplomatised and negotiated, until every artifice of delay was exhausted, and Russia had obtained all the invaluable advantages of that delay; and then his negotiators, fulfilling the will of the dead tyrant and impostor, rudely burst the bubble with which they had been amusing Europe. As in peace, so in war. The conflict was inaugurated by a similar outrage upon the flag of truce to that at Hango; though, when the guns of the Imperial harbour at Odessa opened upon the flag, they did no murder—the white flag was not then stained with blood, though the brutality was well nigh as flagrant. The maritime Herald was equally outraged—the Herald who, whether on land or sea, has been held sacred, from the remotest ages, by all save savages. This was done at Odessa. Need we speak of the dastardly massacre at Sinope; need we speak of the hideous scenes at Inkerman, when Russian officers slunk about the field, murdering the wounded English? Hango is but a fitting climax to the series of treacherous and barbarous deeds. And this is the Russia whom we have treated as a noble enemy—this is the Russia whose "honour" has been so sedulously tended by English statesmen, at the peril of that of Britain.

The Russian is a savage, and must be treated as a savage. Our mistake has been in ever dealing with his hypocrisy and cruelty in any other fashion. But sham statesmen may now gabble at their will; the work is in other hands. Round that whole Baltic fleet, we hear, has gone a deep fierce vow that Hango shall be avenged; and, despite all the obstacles which official obstinacy or a deeper purpose has opposed between our navy and the northern fortresses, these will be reached at last. And if the news of this crowning barbarity have time to gain the Camp before Sebastopol—the wire should have delivered it ere this, and no Englishman who hears the news but will give it indignant utterance—who will keep back the bayonets when the stronghold goes down? Not Omer, with Sinope in mind—not Pelissier, "who sees little use in prisoners." If Lord Raglan can do it—well the soldiers may have forgotten Inkerman; but let him, if he can, keep the last news from the blue-jackets and marines. If the word "Hango" be heard in the trenches before the day of the storming, Sebastopol will be as Troy—pardoned only

When her last flame is quenched in her last gore.

THE Newspaper-stamp Abolition Bill, which will come into operation on the 30th inst., promises, or threatens—we hardly know which phrase is the more appropriate of the two—to create a revolution in the newspaper press of this country. The changes as yet announced in the metropolis amount to but few; but in the provinces they are many and important. Liverpool, Manchester, Edinburgh, Glasgow, and many other cities and towns far smaller and less populous than these, will, in a few days hence, share with London the privilege of a daily and—as far as present appearances indicate—an able and honest press. Whether the success of these journals will raise them to the same level of influence and power as that to which the leading daily newspapers of the metropolis have raised themselves by their long-continued exertions in the popular cause remains to be seen; or whether the diffusion of local daily papers will endanger the quasi monopoly hitherto possessed by London is a point on which it would be premature to express an opinion. But we have this confidence in the sound common sense and right feeling of the British people, that they will not encourage any low, scurrilous, and unworthy journals, but will give their best support to such as combine cheapness of price with honesty of conduct and independence of opinion. Possibly in a few years hence the cause of good government, of rational liberty, and of steady social progress, will be greatly advanced by the efforts of a well-informed provincial press; and the London daily press, too often dictatorial and tyrannical, and endowed with too much power, will share with its formidable rivals in our larger cities the privilege of directing and influencing public opinion. In such a result there will be cause for rejoicing. The more the light of sound opinions is diffused throughout the land the better for the people of all ranks and grades; and the better for the Government charged with the direction of their destinies.

There is, however, one point in connection with the recent change in the law which has not yet been brought with sufficient force under the notice of those who have it in their power to remedy the defects and supply the omissions of the Act. The principle of the change is clear and precise—that newspapers may stamp or refrain from stamping, as they please; but that, if they refrain from stamping, they shall not be entitled to the privileges of postal transmission. If the law had ended here, the public, who buy, and read, and wish to post newspapers, would have had no reason to complain. But the Lords of the Treasury, by their recent minute, have introduced a new element into the question. With the best of intentions, and as a boon to the public, they have decreed that any printed matter whatsoever—book, pamphlet, placard, circular, &c.—not weighing above four ounces, may be transmitted through the post, if labelled with a "Queen's head," or penny postage stamp; but that such matter, if weighing upwards of four and less than eight ounces, shall only be entitled to the same privilege for two postage stamps. This will operate as a serious inconvenience upon the purchasers of unstamped newspapers weighing, like the ILLUSTRATED LONDON NEWS or the *Times*, upwards of four ounces. The question resolves itself into this: If the ILLUSTRATED LONDON NEWS will take the trouble to send to Somerset-house to get its sheets stamped with the red mark of the Government—if it, like others similarly circumstanced, will compel the Government to keep up a staff of stampers, clerks, and other officials and *employés*, to do the work of stamping, at considerable expense to the nation—the impressions so stamped will be forwarded free through the Post-office, not only once or twice, but a dozen or twenty times; but that if it will give the Government and its officials no such trouble, but will allow every purchaser to be his own stamper, by affixing a "Queen's head" upon the unstamped paper, the Post-office will decline all concern with it, and refuse to take it, if it weigh more than four ounces. The Post-office will transmit a common placard, or any printed sheet, pamphlet, book, or bill, weighing less than four ounces, for a penny; and will also transmit the ILLUSTRATED LONDON NEWS, with a Somerset-house red stamp, costing a penny, as many times as purchasers may desire; but will not transmit it once for a penny, if the penny be paid by means of a postage stamp. Surely this is very absurd in itself, and only requires to be pointed out to the Lords of the Treasury to be no longer insisted upon. If the Somerset-house stamp answered any purpose not answered by the ordinary postage stamp, the managers of the Post-office might be excused for making the distinction. In seeking to induce the authorities who have it in their power to make the change to reconsider this anomaly, and remedy it by a new Order in Council, we do not seek to impose any burden upon the Post-office or the Revenue. On the contrary, we show them how they may add to the revenue of the Post-office by many millions of pence which might not otherwise accrue. If it be worth while to give facilities for the transmission of newspapers with the ordinary red mark—price one penny—causing trouble and expense to the Government, surely it will be worth while to transmit the same paper with the postage stamp—price one penny also—but causing neither trouble nor expense to any one. The Treasury minute, in fact, injures the newspaper press, while affecting to grant facilities for the transmission of other printed matter, and affixes a disability where it meant to confer a boon. We trust that the oversight will be rectified. It requires no Act of Parliament, and may be put right in five minutes by the same authorities who issued the original minute. We trust that they will not lose sight of it, but remedy at once a defect so obvious, and so calculated not only to impair the usefulness of the press, but to diminish the public revenue.

THE COURT.

The Queen and the Prince Consort continue in the enjoyment of excellent health, and with the Royal children have taken daily drives and rides in Windsor Park. Her Majesty's illustrious relatives, the Princess of Hohenlohe Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe, took leave of the Queen on the 15th instant, and left town for Dover, *en route* to Brussels.

On Saturday her Majesty paid a visit to the Camp at Aldershott.

On Monday evening the Queen went to the Princess' Theatre, and was afterwards joined by Prince Albert, who had honoured the members of the Statistical Society in St. James's square with a visit.

On Tuesday the Queen went to Chatham to inspect the invalids at the military barracks. Her Majesty and his Royal Highness Prince Albert left Buckingham Palace, with Viscount Hardinge, General Commanding in Chief, at five minutes past two o'clock. On their arrival at Chatham the Queen was received by Colonel Eden, commanding the garrison, and was conducted over the hospital at Fort Pitt, and afterwards minutely inspected a large party of invalids recently returned from the Crimea and the Colonies. Her Majesty then inspected the invalids at Brompton Barracks and the Casemates, and went over the Marine Hospital. Nearly 1000 sick and wounded men were seen by the Queen; who questioned many of those who had suffered most severely as to the actions in which they had been wounded, and the nature of their injuries. The Queen returned at half past seven o'clock to Buckingham Palace; and at a later hour honoured the Royal Italian Opera with her presence. The Princess Royal and the Princess Alice accompanied their Royal parents.

On Wednesday evening her Majesty gave a concert, at which their Royal Highnesses the Duchess of Kent, the Duchess of Cambridge, and the Princess Mary, the Hereditary Grand Duchess of Mecklenburg-Strelitz, the Duke of Cambridge, and a party of about 400, including the whole of the foreign Ministers, were present. The concert commenced in the Saloon shortly before ten o'clock and terminated at midnight.

On Thursday evening the Queen and the Prince honoured the Opera with their presence.

Colonel Sir Thomas Troubridge was presented to the Queen, on Wednesday afternoon, at Buckingham Palace, by Lord Byron, Lord in Waiting, Major-General Torrens was also presented to her Majesty, on Wednesday, by the Earl of Clarendon.

SIR E. LANDSEER'S PICTURE OF THE DUKE OF WELLINGTON AT WATERLOO.—It was a pretty idea to think of representing the veteran hero as revisiting the scene of his crowning triumphs, in company with a beloved relative (his daughter-in-law), to whom he points out all the principal spots, and records in impressive terms his reminiscences attached to them; and very pleasingly has Sir Edwin Landseer carried it out in the fine picture before us. The figure of the Duke is admirable for correctness of portraiture and poetic dignity of character. The picture is now exhibiting at Messrs. Jennings'—a fine engraving from it will shortly be published.

LATEST INTELLIGENCE.

ATTACK ON THE REDAN AND MALAKOFF TOWER.

WAR DEPARTMENT, June 22nd

Lord Panmure regrets to have to state that he has received information that the English troops attacked the Redan and the French troops the Malakoff Tower, at daybreak on the morning of the 18th inst., but without the success which has heretofore attended our efforts

Both the French and ourselves have suffered considerably.

The names of the officers who have fallen will be forwarded immediately, but it will be impossible to receive complete returns of all the casualties before the 30th inst at soonest

The *Moniteur* of yesterday (Friday) announces that on Thursday the Government received intelligence, simultaneously, two telegraphic despatches from General Pelissier. The first, date 1 June 17, is as follows

The combined movements agreed upon with our [illegible] are be ing carried out To-day the Turks and the brigade of Chasseurs made a reconnaissance towards Akhtiar. General Bosquet occupies the Tchernaya. To-morrow, at daybreak, in concert with the English, I attack the Grand Redan, the Malakoff Tower, and the bat eries connected with them

The other despatch is dated June 18, and contains the following

The attack of to-day was not successful, although our troops, who showed very great intrepidity, gained a footing in the Malakoff works. I was obliged to order a retreat into the parallels The retreat took place in order, without our being harassed. It is not possible for me to-day to state our precise loss

TWO SUNKEN MERCHANTMEN, OPPOSITE YENIKALE.

(*Continued from page 632.*)

the success of which would expose our transports, in the absence of the smaller men-of-war, to considerable risk and damage The guns in Paulovskaya, at Ak-Bournou, and in battery at Kertch, have not been destroyed -they are spiked, and that is all ; but several explosions which took place along the coast during the night, and which were at first attributed to an attack by the enemy, may have arisen from their being burst by our men, in order to prevent the enemy making use of them, in case they succeed in again establishing themselves on the coast below us ; of course, such a step on their part would lead to the destruction of Kertch, which is now intact

There were few regular troops in proportion to the numbers in and about Kertch and Yenikale, and there is said to have been a large proportion of invalids, local militiamen, and pensioners among the soldiers who made such a feeble and inglorious defence. The appearance of our armada as it approached must have been most formidable. The sky above it was rendered as dark as night with the pall of black smoke which rose from the funnels of the steamers, and the narrow straits must have seemed to the enemy as though they were bridged over by the great armament which was advancing against them They might well be excused for thinking that the Allies had 40 000 troops on board, and that resistance would be hopeless. A decent force of cavalry landed at Ambalaki would probably have enabled us to boast of several thousand prisoners, for the flight of the Russians was disorderly, and, for the first time, they were seen to retreat without discipline or creditable steadiness Their loss could not have been great One man was found dead in the battery at Yenikale, lying as he fell, with the match in his hand, close to the gun he was about to fire ; and two more Russians were found dead on the beach, but they looked as if they had been killed by the explosion of the magazine. The guns in Yenikale are new and fine. Some of them are mounted on a curious kind of swivel -the platforms are on the American principle. One brass piece, which is lying near the guardhouse, is said to have been taken from the Turks at Sinope. Our shot did comparatively little damage. One our shells smashed the carriage of a gun to pieces, and one of our round-shots knocked a gun clean over and broke the trunnions, but there is no other actual proof of the severity or accuracy of our fire.

YENIKALE, FROM THE SEA OF AZOFF, WITH RUSSIAN VESSELS ON FIRE.

As regards the operations of the Allies in the Sea of Azoff, the following "General After Order," which was read to the troops before Sebastopol on the 4th inst. gives a pretty good summary :

Head-quarters, before Sebastopol June 4

In continuation of former general orders, the Field Marshal now announces to the army the further gallant exploits of the Allies, which this time have chiefly been accomplished by the ships of the French and English navies.

Berdiansk has been destroyed, with four war steamers.

Arabat, a fortress mounting thirty guns, after resisting an hour and a half, had its magazine blown up by the fire of our ships.

Genitchi refused to capitulate, and was set fire to by shells. Ninety ships in its harbour were destroyed, with corn and stores to the amount of £100,000.

In these operations the loss to the enemy during four days has amounted to four war steamers, 246 merchant vessels, and corn and magazines to the amount of £150,000 Upwards of 100 guns have been taken. It is estimated that four months' rations for 100,000 men of the Russian army have been destroyed

On the Circassian coast the enemy evacuated Soujak-Kalé on the 28th of May, after destroying all the principal buildings and 80 guns and six mortars.

The fort on the road between Soujak-Kalé and Anapa is also evacuated.

General officers commanding divisions will be good enough to direct the above order to be read to each brigade at the first convenient opportunity.

By order, S. SIMPSON, Chief of the Staff

The accompanying Illustrations are from spirited Sketches by W S M. Wolfe, Royal Artillery.

THE ILLUSTRATED LONDON NEWS

No. 750.—VOL. XXVI.] SATURDAY, JUNE 30, 1855. [TWO SHEETS, FIVEPENCE. STAMPED (POST-FREE,) 6d.

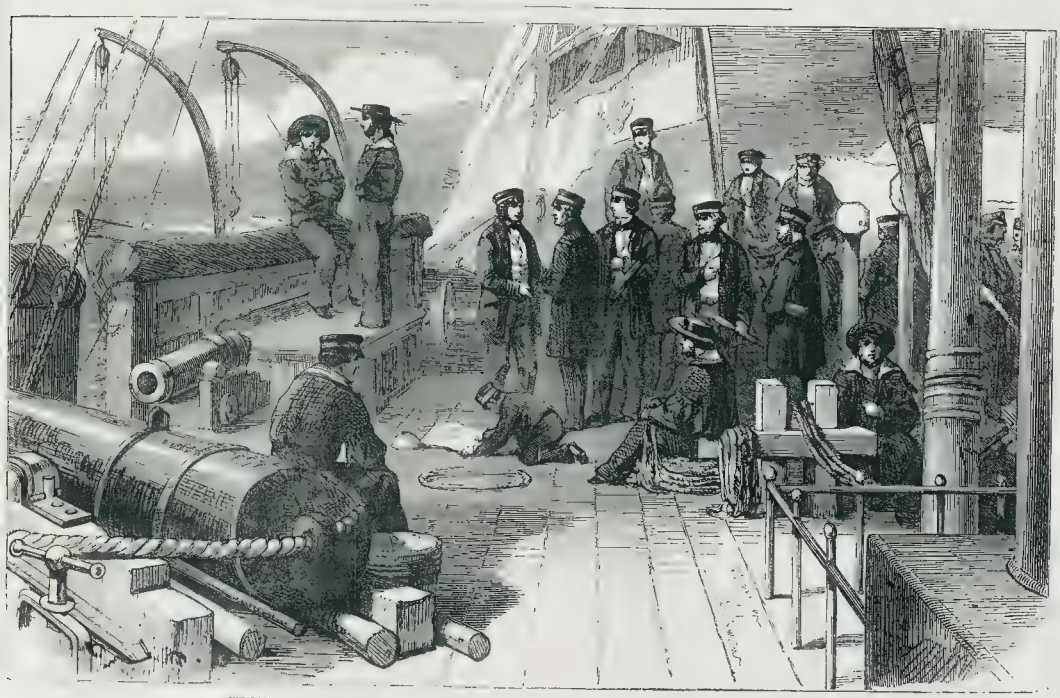
ABOLITION OF THE COMPULSORY NEWSPAPER-STAMP.

PERMANENT ENLARGEMENT OF THE "ILLUSTRATED LONDON NEWS."

THE little—or, perhaps, large—world of newspapers is in a state of revolution. The stupidity of successive Administrations, which could not define in strict legal phraseology what a newspaper meant, and the consequent neglect of Attorney-Generals to prosecute the cheap unstamped press, which boldly and systematically set the law at defiance, led, as a necessary consequence, to the abolition of the compulsory stamp. But, even when matters reached this point, the Government and the House of Commons had neither the inclination nor the capacity to consider the question in all its relations. Swayed, to some extent, by a dislike or hatred of existing newspapers, which had spoken home truths of men in office, rendered the tenure of office uncomfortable and precarious, and aided in the overthrow of Administrations and parties as well as of abuses, one portion of the House was only too happy to countenance any project of change that afforded a reasonable prospect of inflicting damage upon those too powerful and too independent leaders of public opinion. Another and larger portion of the House, not understanding the subject, mixed up as it was with a question of postage, with which, strictly speaking, it had no real connection, consented to be led by the party which hoped to swamp the respectable press by the creation of a swarm of piratical journals, and quietly acquiesced in a settlement proposed by such an authority as the Chancellor of the Exchequer, and which satisfied such a great legal personage as the Attorney-General. And thus the law which was intended to remove confusion only made confusion worse confounded. For three weeks before the measure had the force of law, before it had received the consent of the Sovereign, or even of the House of Lords, a flood of cheap newspapers—imitating the titles, style, and general appearance, and stealing the news of existing journals—was let loose upon the land, to live a short life, no doubt, but to do sensible mischief by bringing the law into contempt. And, as if to show an animus against the existing press, the very Government which tolerated breaches of the law on the part of these pirates and interlopers, actually took the trouble to make a public and official announcement to this and every other established journal in the metropolis, warning us that publication without the stamp was illegal, and would subject us to a prosecution! Surely, administrative reform is needed, if it were only to make such officials act with common sense and common justice.

But, bad as this state of things was, the confusion thus created would soon have cleared itself, if the Government, by means of its Treasury minute regulating the transmission of books, pamphlets, and all other printed matter by post, had not introduced a new complication—of which the result will, in all probability, be a great and utterly useless sacrifice of the public revenue. By the joint operation of the Newspaper Act, and of the Treasury minute, the two sheets of the ILLUSTRATED LONDON NEWS, weighing more than four ounces, may be transmitted fifteen times through the Post-office for the charge of one penny, provided the penny be paid to the Stamp-office; but, if the penny be paid by a postage-stamp, affixed on the paper itself, or on its cover, it will not be conveyed at all. Somerset-house is glad of the penny, but St. Martin's-le-Grand—if Somerset-house be ignored in the transaction—insists upon twopence, for performing once the identical service which it might be compelled to perform fifteen times, had the small but troublesome formalities of the Stamp-office been complied with. The result is that newspapers using good, thick paper, like the ILLUSTRATED LONDON NEWS and the *Times*, and weighing more than four ounces, are denied the privilege accorded to journals which use inferior paper. If the Government levied no Excise-duty upon paper, it might possibly find some justification for supporting the refusal of the Post-office to carry more than four ounces of book, pamphlet, or unstamped newspaper, for a penny. But the Government ought not to look at such a question through the spectacles of the Post-office. The Post-office is but one branch of the public revenue; and the Public Income, derived from many sources, ought to be the one object of the solicitude of a wise administrator. If, to secure for that portion of our subscribers who desire unstamped papers the privilege already accorded to all those who purchase papers weighing less than four ounces, we should feel it necessary, or desirable, to diminish the weight of the paper on which we print the ILLUSTRATED LONDON NEWS, we should inflict a loss of revenue upon the Government. The Excise-duty on paper paid by this journal, at its present weight, amounts to nearly £30,000 per annum. If we could diminish the weight of our journal to four ounces we should deprive the State of £10,000 a year, or as much as would pay the official salaries of the Prime Minister and the Chancellor of the Exchequer. We are not alone in this condition, as the proprietors of the *Times* and many other journals can prove. But is such a sacrifice of revenue what the Government desires? If not, we think we are justified in designating its recent Treasury minute as stupid; and if it be, we think the same epithet will be found equally appropriate.

But, as regards this journal, we shall do our best to accommodate ourselves to the new circumstances thus created. On a careful consideration of the whole case, and of the wishes of the great bulk of our subscribers, we have come to the determination of en-



THE BALTIC FLEET.—FRENCH AND ENGLISH OFFICERS ON THE QUARTER-DECK OF H.M.S. "MERLIN." (SEE NEXT PAGE)

larging the ILLUSTRATED LONDON NEWS to double its original size and of reducing the price of the unstamped copies to F.vepence. By this means we shall give the purchasers of unstamped copies a double advantage—that of a reduction in price to the full amount of the abolished Stamp-duty, and of increased bulk. To subscribers who desire stamped copies for postal privilege the price will remain at sixpence, as before; but the size, the copiousness, and the general efficiency of the paper will be increased To meet as far as possible the convenience of subscribers in the country, who may not always be able to obtain stamped copies, we shall hold ourselves in readiness, at any time within a week after publication, to exchange unstamped for stamped copies. By this means we shall do all that lies in our power to obviate the inconvenience caused by the joint bungling of the Post-office, the Chancellor of the Exchequer, and the Lords of the Treasury.

Were it worth while we might expatiate at greater length upon the absurdity of which the Government has been guilty. We will only add to the statement we have already made the fact that a circular of a proposed penny daily paper has been brought under our notice, which unblushingly professes to rob the London press of the day previous to its own publication of its leading articles or "spirit," and which will be printed on paper so thin and small that a packet of four copies will go free for one penny under the Treasury minute. "If, therefore," says the circular alluded to, "four readers residing in small places, where regular news agencies do not exist, will combine and order a regular daily parcel, it will be forwarded free by post, upon postage-stamps for the amount being received, the publisher charging nothing for the postage." In other words, an unstamped cheap and flimsy paper, weighing one ounce, and contributing very slightly to the revenue in the shape of Excise-duty, may be conveyed for a farthing to any part of the country; when such a paper as the *Times* stamped would be charged three-halfpence, and if unstamped twopence!

But leaving, for the present, this part of the subject, and all its anomaly and injustice, we refer our readers with pride to the present Number of the ILLUSTRATED LONDON NEWS, as a specimen of what it will be for the future. Compared, not only for quantity of paper and print, but for quality of paper, of engravings, and of literary matter—for excellence in every department, mechanical as well as intellectual we think it will be universally acknowledged that it is incomparably cheaper than any of the swarm of low-priced journals that have suddenly sprung into existence. There may be room for such journals, or there may not; and no doubt they will attain as much success as their enterprise and intelligence may deserve—and no more. At all events, the ILLUSTRATED LONDON NEWS fears no rivalry, either in price or quality. It stands upon its own grounds in the favour of the public. It is known and esteemed wherever the English language is spoken, and has its friends, correspondents, and artists in every part of the world. It will be the constant study of its proprietors, not simply to maintain, but to extend this high character and this great usefulness; to make the ILLUSTRATED LONDON NEWS a welcome guest in every family in the realm, and the most dearly prized of all newspapers in those remote dependencies and possessions where Englishmen are building up new Englands, and spreading the name and race, the literature, language, laws, manners, religion, and power of the old country. The extension of our space will give us the means of recording and illustrating more fully than we have ever done before the events of this remarkable epoch. We may add in conclusion that we have already received not alone the assurance, but the positive proof, that the public fully appreciates the efforts we have made to keep pace with its requirements; and that a largely-increased sale will tax the mechanical genius of our age to provide a weekly supply that shall keep pace with the demand upon us. Even on this point we hope to be prepared for all emergencies and contingencies that may arise.

A NEAR SURVEY OF CRONSTADT.

THE Illustration upon the preceding page, sketched by Mr. J. W. Carmichael, our Artist in the Baltic Fleet, represents a group of officers on board H.M.S. *Merlin* taking a near survey of Cronstadt. The following are the names of the officers present:—The French Admiral Peinaud (aptains Codrington, Munday, Hope, Robb, Erskine, W. H. Hall, Glasse, Warren, Ramsay, Sullivan, Nugent; Commanders Boyd and Miller; Lieutenants Piers and Gordon. Our Correspondent's letter, describing the reconnoitre, and the explosion of a Russian infernal machine under the *Merlin*, was given in our Journal of last week

A Correspondent of the *Times* describes a reconnaissance within eight miles of the point of Tolboukin —

From this spot we perfectly surveyed the fortifications on the south side of Cronstadt, and particularly the huge batteries of Risbank, entirely constructed with granite, and mounting 100 guns of the heaviest calibre. We perceived with the naked eye, lying in the harbour, six ships-of-the-line, of which four are three-deckers, with their masts down; two frigates, and seven steamers. With a spy-glass we clearly saw the spires of the churches of St. Petersburg glittering in the sun. Three ships-of-the-line and two frigates are moored at the northern entrance of the harbour, which is, besides, defended by long and strong batteries, and various other works, protecting on all sides that part of the coast. Finally, a considerable flotilla of gun-boats is anchored under the protection of the forts. These gun-boats are so close to each other that it is impossible to count them. They resemble a bridge of boats as broad as it is long. I do not exaggerate by estimating their number at 200. You cannot, accordingly, form an idea of the multiplicity of forts, batteries, redoubts, &c., which defend the place. Cronstadt is really the heart of the Russian power, and the Emperor naturally endeavours to heap Pelion upon Ossa to obstruct the entrance of his capital With a little patience we shall probably find out the weak point of these granite walls behind which those Muscovite fleets obstinately shelter themselves which, two years ago, ruled unrivalled from the bottom of the Gulf of Finland to the extremity of the Baltic.

THE LATE JOHN BLACK, ESQ.—We regret to announce the death on Tuesday last of John Black, Esq., formerly and for nearly twenty-five years editor of the *Morning Chronicle*. Mr. Black was the "father" of the Lecture press, which he adhered to less by his ability than by his manly and independent character. He had just completed his seventy-second year. We propose to engrave his portrait next week.

DEATH OF GENERAL ESTCOURT.—On Tuesday evening last Lord Panmure received intelligence per telegraph from the Crimea announcing the death of Major-General J. Bucknall Estcourt, Adjutant-General of the Forces in the Crimea, of cholera, on the 23rd inst. His Lordship immediately communicated the mournful intelligence to the deceased's eldest brother, Mr. Sotheron, M.P., of Eaton-place. The deceased went out last year with the staff of Lord Raglan, and throughout the severe winter campaign he enjoyed tolerably good health, indeed, his last letter from the Crimea, which was received in London on Monday morning, was written in the most confident and cheerful tone possible, giving the fullest assurance that, according to his judgment, Sebastopol would soon be in the hands of the Allies. Mrs. Bucknall Estcourt has been visiting at her husband, and for the last few months has been at Constantinople and Balaclava. General Estcourt served in the expedition to the river Euphrates from January, 1836, to 1837, and for his services on that occasion he was promoted to the brevet rank of Lieut.-Colonel.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, Thursday.

PARIS is still under the effect of the painful results of the late events in the Crimea. It is in vain that the public papers endeavour to present affairs in the most favourable point of view; but little faith is put in these reports, and it is with the utmost anxiety that further intelligence and more minute details are looked for. For ourselves, we doubt the wisdom of keeping back the truth in these matters, as it is now becoming the plan to do; it must declare itself at last: and the difference between the earlier statements of the facts and the ultimate revelations destroys all confidence, and, if possible, adds to the anxiety and perturbation that is generally experienced, from the idea it creates that, whatever may be related . " yet worse remains behind."

It is now currently whispered here that the Emperor seriously returns to the project of going to the Crimea; some even assert that the plan is decided upon, and that his departure will take place as soon as it is possible to arrange matters here to enable him to undertake the voyage. The Empress, previous to her departure for the Pyrenees, has appeared constantly in public, but frequently unaccompanied by the Emperor, who is said to be gravely occupied by the state of affairs. His Majesty is entirely recovered from his recent indisposition, and has appeared two or three times at the theatre

Paris is very much fuller than it was a fortnight ago; and the price of furnished lodgings, which had fallen at least a third below the average first demanded, is rising again

The Exhibition may now be considered about complete, and is very much better attended than it was, though on the five-franc days the attendance is certainly of the thinnest. Among the latest attractions added to the Exposition are the epaulettes and the *chapeau* of the Duke of Brunswick, and the boudoir of the Empress. The epaulettes in question and the *cordon de chapeau* are entirely composed of diamonds, and the cockade is formed of sapphires, surrounded by a row of splendid brilliants. The salon and boudoir of the Empress are *chefs-d'œuvre* of taste and elegance. The furniture of the former is in the style of Louis XIV., covered with an exquisite tapestry, representing figures in medallions, surrounded with rich arabesques. This tapestry was executed, under the direction of Madame de Maintenon, by the Demoiselles de St. Cyr, but never employed, and kept in the *garde meuble*. In the revolutions that succeeded, it re peatedly changed hands, and at last fell into those of M. Mégard, who has turned it into its present use. Having never been employed, it is now as fresh as when first executed, and is of singular beauty of design and workmanship. On a table, covered with one of the finest specimens of Gobelins tapestry, is the *presse-papier* habitually employed by Napoleon at St. Helena. The mirrors and ornaments of the salon are singularly beautiful. In a corner stands the little carriage presented by Prince Albert to her Imperial Majesty, in which she is wheeled about when she visits the Exhibition. The boudoir is hung with pink moiré antique; the roof, which rises in the form of a cupola, with the same material in pearl grey, and the curtains and furniture are in moiré antique, grey and pink. The carpet of both the apartments is of white damask, and, as may be supposed, visitors are required carefully to walk only on the foot-cloths placed to save them. There are special *gardiens* stationed at the door of this sanctuary, who explain the nature and origin of the different *chefs-d'œuvre* which it contains. It is surprising to observe the immense number of articles marked "sold" in the Exhibition, more especially among the specimens of British manufacture. Minton and Elkington have sold nearly the whole of their stocks of china and of bronzes, and various other English exhibitors have been almost equally fortunate Last week the Princesse Mathilde visited the Building incognita, and made a variety of important purchases, among others a set of magnificently-executed ice pails from the manufactory of Elkington. The astonishment and admiration of the country people and agriculturists at the construction and uses of some of our farm implements is not the least remarkable and flattering homage to British industry. The sight of many of these opens a new era to the minds of the intelligent farmers and peasants, and most of them are anxious to benefit by the discoveries for the first time revealed to them.

Here is a curious fact in statistics. At Elbœuf, the principal cloth-manufacturing town in France, it is computed that, taking the whole population, men, women, and children, each individual consumes at the rate of eight *petit verres* (liqueur-glasses) of brandy a day. As, however, many women and more children drink none, it is believed that the number of persons who do indulge in this beverage, which is of the most detestable quality, swallow upwards of twenty *petit verres* per diem:

The journals of the week announce the death of a woman whose name has already gloriously figured in the annals of contemporary history — Louise Emilie de Beaubarnais, Comtesse de Lavalette—whose heroic conduct through various phases of the Revolution, but more especially on the occasion when, by an act of courage and intelligence which has had but few parallels, she rescued her husband from the scaffold in 1815, has formed the theme of historian and poet. The mind that supported this noble woman through the dangers and difficulties of her position failed when the excitement was over; and from thence till the period of her death, at the age of seventy-five, her intelligence remained obscured, though her sweetness of temper and extraordinary goodness of heart never failed her to the end

Colonel Fleury, one of the favourite and most distinguished officers of the Emperor's household, is about to marry Mdlle. St. Paul, a young lady who possesses wealth, beauty, and distinction of manners and education.

THE ELECTRIC TELEGRAPH ACROSS THE ATLANTIC.—The telegraphic communication between America and Europe, precedent to its extension round the globe is too large a theme for any single hero. It is an ideal. And yet the parties engaged in its realisation regard it as already certain to be carried out. The experience of the Black Sea telegraph, for instance, is thought to be conclusive, if shorter lines previously established were not from Balaclava to Varna the wires stretch under water more than 350 miles, and not the slightest difficulty is experienced in using them. These can, then, be no difficulty in sending electricity across the Atlantic by the same means. The length of the wires from Ireland to Newfoundland will be some 1750 miles: they will lie on the sandy plain which the soundings of our Government have shown to stretch from land to land for the whole distance, with the exception of about 200 miles next to the Irish coast, where the bottom becomes irregular and the water deeper. The actual distance is some 1900 miles only, but it will be necessary to make a detour with the wires in order to carry them round the Banks, where icebergs often ground, and where the cable might be broken by their weight and friction. Of the company which has undertaken the cis-Atlantic portion of the work we have often had occasion to speak. It is composed of some eight or more wealthy gentlemen, who propose to lay the entire line from St. John's, Newfoundland, to New York with their own resources. Peter Cooper is the president, and Messrs Taylor the treasurer of this company; and Cyrus Field, one of its members, has just returned from Europe, where he went to consummate the arrangement with the European company. The American part of the line will be 1200 miles in length, 71 of which will be under the Gulf of St Lawrence, and the cost of the whole is estimated at a million and a half of dollars. The wires across Newfoundland will make 400 miles of the line, running through a country hitherto uncoccupied and unknown. In the cutting of the path, and other preparatory labours the company have had 600 men employed during the past year in that island alone They have been liberally aided with grants of land from that colony, and have obtained advantageous charters and grants elsewhere From our last English journals we learn that the cable to go under the Gulf of St. Lawrence was about to be shipped, and we may accordingly soon expect to be able to receive despatches from St. John's as easily and regularly as we now do from New Orleans. This cable contains three electric wires only, it being contemplated to lay down another of the same size when the European wires have been brought across and the business between New York and London requires it.—*New York Tribune*

THE WAR IN THE CRIMEA.

The telegraphic despatches from Sebastopol, which come down to the 27th, though brief, show plainly enough that the Allies are busily preparing for what we trust will prove to be the last deadly struggle before Sebastopol. Nor are the Russians idle. every effort is making to bring forward troops to the support of the beleaguered garrison. On our side the most energetic efforts have been made within the last eight or ten days.

Orders were transmitted on the 22nd inst. to the regiments in England and Ireland under orders for foreign service to prepare for immediate embarkation, viz., the 10th, 21st, 30th, and 34th Regiments of the Line, besides detachments from the various depôt companies, and 1200 cavalry. Orders per telegraph were also transmitted to Marseilles, to be forwarded to the Governors of Malta, Gibraltar, and the Ionian Islands, to send as many efficient men, not only of the regiments stationed in those fortresses, but of the reserve of the Household Brigade and reserve battalions, as can be conveniently spared previously to the arrival of the reliefs of regiments of the Line and the Militia. These reinforcements will augment the British force before Sebastopol by upwards of 13,000 men; and, in addition, four field batteries, a troop of Horse Artillery, and a reinforcement for the siege-train are in readiness, and only waiting for transports to embark

The fleet in the Black Sea, also, which has performed such valuable services in the Sea of Azoff, is to be greatly strengthened. The gun-boats fitting out at Portsmouth are nearly complete. Fifteen or sixteen have their rig nearly finished, and a few days will see them ready to leave for the Black Sea. They are to be conveyed out in steamers.

One of General Pelissier's last bulletins states that the works in front of the Malakoff were nearly completed. To show how little confidence the Russians had gained from the repulse of the Allies, General Pelissier, in a bulletin of the 19th, says:—"The besieged, notwithstanding our failure of yesterday, grew alarmed in the night, and for a long time they kept firing in the air from their guns." On the 20th he says:—"The besieged, closely pressed on the side of the Central Ravine, are setting fire to the little dockyard at the extremity of the southern port." Another despatch says:—"The enemy have abandoned their third five-gun battery on Mount Sepoune." Up to the 27th the preparations were going actively forward. We may expect, therefore, to hear important news before many days—perhaps before many hours.

THE REPULSE OF THE 18TH

The letters from the Camp received by the last steamer give some interesting details relating to the preparations for the attack on the Russian works which ended so unfortunately It appears that the Russians had made extraordinary preparations, in the belief that an attack would be made. On the afternoon of the 16th a considerable force of the enemy was observed to leave the north camp, to march along the heights towards the great roadstead, and afterwards cross to Sebastopol. A steamer brought over a portion of these troops, and at the same time had a barge crowded with soldiers steered to each side This vessel, after seeming barking the troops at the landing place near Cape Nicholas, returned to the north side, and subsequently again conveyed a similar number across Between thirty and forty large rowing-boats also crossed with troops. As no soldiers were observed to leave the south side, the very obvious inference was that these troops were reinforcements in anticipation of an expected attack, or for the purpose of assuming the offensive. It was calculated that five or six thousand had come across up to the time when the darkness prevented further observation of the enemy's movements. Just before midnight a very sharp musketry fire occurred near the Mamelon Redoubt. The Russians advanced against the French works from both sides of the Malakoff. Their skirmishers were, however, notwithstanding the darkness, observed, and the enemy found our allies fully prepared They were compelled to retire after about ten minutes' fighting, and must have suffered immense loss. Not only the line of musketry fire from the French advanced parallel, but also some field-pieces which had been brought forward and were kept ready loaded with canister and grape, poured a deadly fire into their ranks. The severity of their loss was best shown by the fact that they fell back after their first failure, and did not repeat the attempt during the night. The attack was made just at midnight The French casualties were very few. Both the English batteries on the right attack, and the French works on the other side of the Careening Bay ravine, opened against the enemy as they pushed forward to the attack, and kept up a fire against them as they were retiring.

The following letter shows that the intention to attack the Malakoff on the 18th was known two days previously:—

Before Sebastopol, June 16

We are still at work with renewed ardour at the armament of our batteries of the Mamelon Vert and the White Works. All will be ready for the attack on the Malakoff on the 18th. The troops that are to take part in the affair are already told off. It is hardly necessary for me speak to you of their spirit, which is, as ever, excellent. In spite of the numerous loss we sustained on the 7th, the Zouaves have not been discouraged, though their ranks have been thinned. They again reopened their theatre on the 8th, and with the same spirit: the receipts are productive, and continue to be sent to Constantinople, to alleviate the sufferings of their wounded comrades. General Pelissier still displays the greatest energy. We expect the attack of the Malakoff on Sunday or Monday, and, if we succeed, we then attack the place itself. In the meantime we are assured that the corps of the Tchernaya, composed of the divisions Camrobert, Camon, and Dulac, under the orders of General Bosquet, to whom considerable reinforcements have been sent, is to turn Liprandi's army, and to cut it in two if possible. It is also said that the fleet will be ready to take on board 30,000 men to land at Perekop, and to cut off the rear of the Russians who may have retired to the interior of the country. General Pelissier has received the means of starving up Lord Raglan. He simply said to him, "I have given such and such an order. I have indicated a certain part to your troops: if you are not decided let me know without any delay, and I shall close my time in providing for the necessary." Lord Raglan, who naturally desires that his army should take a part in all the important actions with the French, yields to the desire of the General-in-Chief When General Canrobert used to communicate a plan to Lord Raglan, the latter invariably replied, "I shall give you my answer in writing in three days." All this slowness has been exceedingly hurtful to us, and it was high time to put an end to it

EVACUATION OF ANAPA.—THE INVALIDE RUSSE

The *Invalide Russe*, that most inventive organ of the Russian Government, has found it necessary to manufacture the following account of the evacuation of Anapa, for the satisfaction of those loyal subjects of the Czar who believe that "the Russians can die, but never run away":—

As far back as March of last year, Novorossisk, defended only by artificial fortifications to procure it on all the attacks of the mountaineers, and Anapa itself, an old Turkish fortress, of irregular construction, offered none of the desired conditions for any chance of success against a double attack by land and sea made by an enemy with a powerful artillery and naval force at command, consequently, a longer occupation of those points and the defence of their lines of communication could not have had any other result than to prevent us giving to a considerable portion of our troops a destination more suitable to the moment

From these considerations, Aide-de-Camp General Chomoutoff, Ataman *hors la ligne* of the Cossacks of the Don, who holds the chief command in the territory of the Cossacks of the Black Sea, resolved on the 17th (29th) May to evacuate, first, Novorossisk as the point most distant from the Kuban, and then submitted to a council of war convoked by him the question of how far the occupation of Anapa was necessary

Conformably to the decision of that council of war, Anapa was immediately evacuated; everything connected with the hospital and offices that could be easily removed was carried off; the cannon were rendered unserviceable; the fortifications blown up, the buildings set fire to, and on the 26th May (6th of June) the garrison was finally withdrawn. Its retreat was happily effected. Simultaneously with the evacuation of Anapa, the neighbouring stanitsas of the military transkuban colonists were suppressed.

Like all the statements made by the Russian *Gazette*, when a defeat has to be explained, this bulletin is full of glaring falsehoods. The considerations offered by General Chomoutoff are evidently not of a nature to excuse the military stigma which must attach to him for abandoning, without resistance, a fortress of the strength and importance of Anapa. The Ataman of the Don Cossacks describes Anapa as an old Turkish fortress, of irregular construction, that offered none of the desired conditions for any chance of success against a double attack by land and sea, made by an enemy with a powerful artillery and naval force at command. Now the truth is, as we lately showed, that Anapa, so far from being an old Turkish fortress of irregular construction, was a solid position, fortified by every resource possessed by an active and intelligent enemy. To the batteries of stone had been added earthworks, which would have offered serious opposition to an assailing army. The shallowness of the Black Sea in the Bay of Anapa prevented the co-operation with any chance of

success of the naval resources commanded by the Allies. The Russian General, with characteristic veracity, has denied the power possessed by Anapa of being able to resist with any success the efforts of the Allied land force. Unfortunately for him, the despatches of Admiral Houston Stewart disprove this statement; and the number of cannon, and their heavy calibre, abandoned by the Russian garrison, sufficiently betray the real motive of the evacuation, which was dictated by nothing less than that prudent caution which makes a Russian General always avoid an engagement unless he has a greatly superior force. No less than 153 guns and mortars of the heaviest calibre were mounted either on the land or the sea front of Anapa; which was, moreover, garrisoned by a force of 5000 bayonets. Grain in abundance was found in the deserted fortress, so that fear of famine could not have influenced the decision of the garrison. Another reason advanced by General Clonmontoff for the evacuation of Anapa is the absence of sufficient water for a garrison of any great strength. This is no less false than is the alleged weakness of the place. The river Bukan, a tributary of the Ruban, flows close to Anapa, and afforded that fortress plentiful supplies of water. We are, therefore, justified in considering the evacuation of Anapa by the Russians as a measure betraying timidity we had not been led to expect.

The evacuation by the enemy of Anapa has permitted the return of the Allied expedition to the heights before Sebastopol. Instructions have been given by the Admirals to destroy the remains of that fortress: consequently the dominion of Russia over the Circassian shores of the Black Sea has now terminated.

FUTURE NAVAL OPERATIONS.

The Allied gun boats and smaller steamers, after destroying the fortress of Anapa, were to conclude their errand of destruction in the Sea of Azoff by annihilating Arabat, when their service will be required on more important points. The allied Admirals have determined on inspecting the mouths of the Dnieper and the Bug, which will doubtless destroy the last resources possessed by the Russians of feeding their armies in the Crimea. Kherson will be probably destroyed, and an attack directed against Nicolaieff, which is scarcely of less importance than Sebastopol itself. At Nicolaieff exist the dockyards and stocks which have launched into existence the Russian fleet of the Black Sea, and the total destruction of that place is imperative.

An Allied force, four thousand strong, has been left at Yenikale, and the remainder of the troops who took part in the capture of Kertch have returned to assist in the approaching operations against Sebastopol. From the latest information from the Allied Camp we learn that an army not less than 80,000 strong is prepared to take the field against the enemy, whilst a sufficient force will be left before the town to prosecute the siege, and repulse any attack directed by the enemy against the lines of the besiegers.

THE HANGO AFFAIR.

The *Merlin*, Captain Sulivan, which has been sent on to Helsingfors, in order to ascertain the fate of the officers and men supposed to be murdered under a flag of truce at Hango Head, returned on the night of the 17th inst., and we learn that on approaching the shore a flag of truce was hoisted at the main, and the ship was anchored between 3000 and 4000 yards off the forts. An hour elapsed ere a boat was observed to stand out towards the *Merlin*, pulled by fourteen fine-looking sailors, all dressed in picturesque red serge shirts, and armed with long knives attached to a black belt round the waist. An officer, in full dress, with a gilt helmet as a head-dress, occupied the stern; a white flag in the bows, and the Russian ensign aft. They did not pull on board, but it appears they laid on their oars a couple of hundred yards off, when Captain Sulivan and Mr. Crowe pulled in to meet them. What passed between them does not transpire, but the interview was of short duration. However, the *Merlin* lay six-and-twenty hours off the place before she obtained an answer to the despatch. The same parties met, and received a letter of very formidable dimensions in return, addressed to the Commander-in-Chief.

From this it appears that the officers, Lieutenant Geneste, Mr. Easton (surgeon), and Sulivan (master's assistant), and all but four men, are prisoners of war, most of them wounded. The four returned as killed were those that the *Gossad* found in her cutter. Nothing is said regarding the fate of the Russian prisoners; it is consequently presumed they fell. No explanation is given as to the cause of their conduct, though it is rumoured that one reason was the parties were boat were sounding the whole way in; and other accusations of the same nature are made, the correctness of which remains to be proved. The result of the flag of truce per *Merlin* is so far satisfactory that it relieves the families and friends of the officers and men of the suspense they must have been in regarding their fate.

BLOCKADE OF THE WHITE SEA.

A letter from Hammerfest, dated June 5, states that the British squadron destined for operations in the White Sea consisting of the *Meander*, 44, Captain Baillie (Commodore); *Phœnix*, 9, screw, Commander Hayes; and *Ariel*, 9, screw, Commander Lnce—passed that port to the northward on the 4th inst. The French frigate *Cleopatra* was lying in Hammerfest Road, waiting for her steamers to join her, when they would also proceed to their destination. A letter from Bergen, in Norway, dated the 12th inst., mentions that a French man-of-war steamer, bound for the White Sea, arrived there on the 11th, and after coaling proceeded on her way.

The actual blockade began on the 11th, at least a letter received at Lloyd's, from Archangel, dated the 13th inst., states that "the blockade of all ports, roads, havens, and creeks in the White Sea has been notified on the 30th May (11th June), 1855, by the Commander of her Britannic Majesty's forces in the said sea."

THREATENED ATTACK ON PETROPAULOVSKI.

A letter from an officer in the *Dido*, dated Sandwich Islands, April 13, states that the British squadron in the Pacific was about to pay another visit to Petropaulovski, where they hoped to do something grand. The intended plan of operations is said to be, that the *Dido* and *Pique*, from the Sandwich Islands, shall meet the *Encounter* and *Barracouta*, the beginning of May, in Awatska Bay; and this squadron, under the command of Captain Moorhead, is to establish a close blockade. Should the defences be not stronger than before, we may attack it, but we are not to do so unless success is certain. The Admiral, in the *Monarch*, with the *President*, *Amphitrite*, *Trincomalee*, and *Brisk*, with two French frigates and a steamer, was to follow, and then the place was to be taken. The squadron was then to go to the Sea of Okhotsk, when it would probably meet the China squadron, and attack a very strong settlement the Russians have at the mouth of the river Amor.

Later accounts from the Sandwich Islands state that the British squadron composed of the corvette *Brisk*, and the steamers *Dido*, *Alecto*, and *President*—had left Honolulu for Petropaulovski, and it was supposed that another attack on that fortress would shortly be made. They expected to reach there by the 29th May.

AMERICA.

The American mail steamer *Pacific*, which left New York on the 18th inst., arrived at Liverpool on Sunday.

The political news is exclusively of a domestic nature. The majority of Wise, the Democratic candidate for Virginia, had been considerably reduced. The returns, however, were not yet complete

A majority of the committee appointed by the Convention at Philadelphia to frame a platform of principles for the government of the Union. Nothing party in its action bearing upon national interests, had reported resolutions accepting the existing laws upon the subject of slavery as a final and exclusive settlement of that subject in spirit and in substance, and denying the power of Congress to exclude any State from admission into the Union because her constitution does or does not recognise the institution of slavery as a part of her special system. The members of the committee who voted for this platform were all from the slave-holding States—the State of New York, the district of Columbia, and the territory of Minesota. Those who dissented from it represented the six New England States, New Jersey, Pennsylvania, and Delaware, Michigan, Ohio, Indiana, Illinois, and Wisconsin. Iowa was not represented. It was predicted that the resolution would be carried in the Convention

Letters from Mexico to the 2nd of June state that Santa Anna had taken possession of Zamora, the insurrectionists leaving on his approach. The fugitives were, however, pursued, routed, and 2000 taken prisoners. Santa Anna returned to Morelia on the 21st, for Aris, where Comonfort was posted with 2500 men. Several smaller bands of the revolutionists had also been routed by the Government troops.

Intelligence has been received of an outbreak in San Louis Potosi, in consequence of the arrival of an emissary of Santa Anna with orders to arrest some of the leading citizens in the place. The whole country is in arms. An attempt had been made to take Monterey. The governor of Nueva Leon had fled. Information reached Matamoras of the pronunciamento of San Luis Potosi on the 17th ult.: troops were preparing to leave that place to quell the insurrection. Chihuahua is also reported to be on the eve of a revolution.

THE ADMINISTRATIVE REFORM MOVEMENT.

THE second great meeting of the Administrative Reform Association, which took place on Wednesday, at Drury Lane, where every speaker sought and found the applause of the meeting by denouncing the incapacity of the Government, by narrating tales of its inefficiency, and giving examples of its mode of slighting merit and bestowing undeserved rewards on the scions of great families, was for us a proof of a most important change in the relations between the Government and the people. The sentiments of the orators and audience at Drury Lane are in unison with the sentiment of the majority of the nation, and they are those of undisguised contempt and dislike of our general system of Administration. Every office, it is now said, is given to family connections, and the public service is sacrificed to private considerations. Our whole system is condemned. This sounds strange, however just, to those who remember, and to those who have read, the history of former periods. It used to be the eulogium of England that the humblest-born man in the land could rise by merit to the highest station; and in our books we were told of the cabin-boy who became the most renowned navigator of the last century; of the great Admiral who was a poor parson's son; of the great Lord Chancellor Hardwicke, who was an attorney's boy; of the great Chatham, a mere ensign, with scarcely £200 a year, who afterwards ruled both Court and people; and we were taught to believe that England was the single land of Europe where merit could fight its way to the highest place. This, too, was perfectly true to the era of the first French Revolution; but that turned all the States of Europe topsy-turvy, and opened in other countries the road—before closed in all but England for merit to preferment. If since then military and scientific skill have elevated individuals humbly born to high places in France and other countries, great civil dignities have here still rewarded men of talent, though born in the lowest ranks of life. The renowned brothers (the coal-viewer's sons) the two Scotts—one of whom became Lord Eldon, the other Lord Stowell; Lord Chief Justice Abbott, Lord Chief Justice Campbell, and Lord Chancellors Lyndhurst, Truro, and Sugden; the two Sumners, Archbishop and Bishop, are all examples—and many more might be quoted in public offices as well as in the walks of private life—of men obscure and even uneducated obtaining great eminence, renown, and wealth in England, such as they reach, whether in the service of the State or in private business, in no other country of Europe. Let us not, therefore, from the pressure of present temporary difficulties, or beguiled by the honeyed tongue of eloquence, forget our ancient honour, or doubt for one moment, even while we recognise fully the necessity for further improvements in our Administration, that the old free system of England was and is better than any of the systems of the Continent, to which some of the gentlemen even at Drury Lane would have us look for improvement. Bad as our present Administration may be, it has not been deteriorated, but much improved, since it was universally lauded, and since it really was for Britain much more beneficial, more consistent with national greatness than the Administrative systems of the Continent. Great as we must all admit our present difficulties to be, they are less the result of our free system than of the negligence of individuals, or the supineness of the public, or of the national attention being turned to other subjects which are only noticed on the Continent after England has led the way.

We are not in the slightest degree disposed to extenuate the carelessness or the neglect to which a long peace has naturally given birth in all the departments connected with war; but we must remind our readers that on this point, as on many others, our Administration has had many things on its hands which other Governments have not had to do. For example, great alterations in our fiscal and trade systems, in our criminal and civil jurisprudence, in our religious and constitutional laws, have been continuously and successively made through a number of years; and made after long and serious debates in Parliament—all these measures having been agitated for years, and having encountered great opposition. Questions of this kind have occupied the attention of our statesmen and our people, and we can with confidence assert that the sentiments promulgated in our debates, and the measures taken by our Legislature, have enlightened all Europe, and helped materially to meliorate the condition of the people. Our long debates, and the perhaps slowly-matured measures to which they led, have been for us well-timed reforms, and have saved England from those violent revolutions which—caused in part by our progress, and the neglect of statesmen abroad to imitate it—have convulsed France, Prussia, Austria, Spain, Italy, and nearly all the continent of Europe.

These statesmen have had little else to do than to keep up old systems and maintain military powar; and the very revolutions which were brought on by the want of reform only made them devote more attention to keeping their armies efficient. Whatever progress civil society may make, our Ministers and all the subordinate members of Administration have, as the rule, no means of acquiring knowledge and skill in administering national affairs and organising armies which are not possessed by the Ministers of Austria, of France, or of Russia; and it is therefore to be expected that our Administration, when required to compete with that of Russia in waging war—the single object which has ever engaged the thoughts of Russian statesmen—should be scarcely up to its duties. To give this explanation of present deficiencies is not to apologise for them or to defend them, but it suggests their origin, and may lead us to the most suitable means of supplying them. Neither of these topics was touched on at Drury Lane, where much eloquence, much delightful wit, many charming anecdotes highly gratified the audience; and we rather help to fill up the little vacancies which the eloquent men who spoke there had not time to notice than run counter to anything they said, and the Administrative Reform Association proposes to accomplish.

If the general devotion of the public and statesmen through a long period to peaceable civil reforms be one of the causes of our administrative deficiencies in war, we may hopefully expect that the mere circumstance that the attention of the public and our statesmen is now necessarily directed to provide for the emergencies of war will speedily ensure for us great administrative improvements. In fact, they are already practically in progress, as Mr. Layard showed on Wednesday evening, in relation to mentioning sub-officers in despatches; and the pressure of the public by the declaration of opinions elicited at such large assemblies as that of Drury Lane will hasten them. What the public, however, can do—except by advocating the sterling principles of bestowing honour and reward according to merit—in amending the details of Administration is not so clear. It cannot constitute itself a permanent committee to control all appointments. It must trust Ministers under their responsibility to the Commons, which we desire to see more stringently enforced, and, in accordance with what the Chairman of the meeting said, have already pointed the way in which (by a more careful organisation of departments, and the control of the public money) it may be done. The public must trust the Ministers to carry on the Administration as it trusts merchants to import the corn and wine it requires. The public necessarily has its own peculiar business to attend to, and it must not pay Ministers and do their business for them. Administrative Reform requires continual improvement. It is not one thing, like Catholic Emancipation, or the repeal of the Corn-laws, that can be done in one session of Parliament; it is a succession of many things to be continually done as society develops itself, and not an object which a league or association can otherwise promote than by expounding the principles of sound and good government, and making them the creed of the people. Not entirely distrusting the general honesty of our rulers, subjected as they continually are to the influence of the press and of public opinion; not believing that the public, or any part of the public, however wisely energetic now in seeking improvement, is wholly blameless for the faults of the Administration and the discredit into which our War Administration has fallen; not concluding, therefore, that all truth and all virtue are monopolised by one class of men, some of whom have become vigorous reformers in rather a suspiciously sudden manner; we rather regret to see the assembled companies of Drury Lane and St. Stephen's playing against each other, both wasting time and strength in rivalry which might be better employed in sustaining the national cause, and smothering the perception of our mistakes, and the means of rectifying them—in wordy, and personal, and frivolous contentions, when the public interest now comparatively demands that both companies should only be emulous in fostering patriotism, in strengthening the sentiment of self-denial, and in making us, by "holding the mirror up to nature," sensible of our true defects.

THE COURT.

The Levee on Wednesday last brought to a close the formal receptions of her Majesty for the present season.

On Monday Prince Albert went to the rooms of the Royal Society in Somerset-house to inspect the calculating machine invented by Mr. Scheutz. In the afternoon his Royal Highness, accompanied by the Prince of Wales, went to Epsom, for the purpose of opening the Royal Medical Benevolent College. In the evening the Queen had a dinner party, the company at which included the Duchess of Kent, the French Ambassador, Earl Granville, Lady Alfred Paget, Lord Churchill, the Right Hon. Sir William and Lady Molesworth, General Sir Howard Douglas, and Major-General Wetherall.

On Tuesday the Queen held a Privy Council at Buckingham Palace. Viscount Palmerston, Earl Granville, Sir Charles Wood, and Sir George Grey had audiences of her Majesty. On the same day her Majesty and the Prince Consort honoured Mr. Burford with a visit, in Leicester-square, and viewed his panoramas of Sebastopol and the Battle of the Alma. Prince Albert also honoured Baron Marochetti with a visit at his studio. In the evening her Majesty and the Prince honoured the Olympic Theatre with their presence.

On Wednesday, after the Levee, her Majesty dined with her Royal Highness the Duchess of Cambridge, at St. James's Palace.

On Thursday the Queen drove in the Parks, and in the evening honoured the Royal Italian Opera with her presence.

Lord Alfred Paget has relieved Major General the Hon. Charles Grey in his duties as the Equerry in Waiting to the Queen.

THE LEVEE

The Queen held a Levee on Wednesday afternoon in St. James's Palace. Her Majesty and his Royal Highness Prince Albert arrived from Buckingham Palace about two o'clock, and were received by the Lord Steward, the Lord Chamberlain, and the Master of the Horse. His Royal Highness the Duke of Cambridge attended the Levee, and entered the Throne-room with her Majesty, who was attended by the Duchess of Sutherland, Mistress of the Robes; Lady Churchill, Lady in Waiting; the Marquis of Breadalbane, Lord Chamberlain: and the other Lords and Ladies of the Royal household.

The Queen wore a train of lilac and silver moire antique, trimmed with Honiton lace. The petticoat was white satin, covered with tulle, and was trimmed with lilac and white fringe. Her Majesty wore a diadem of emeralds and diamonds.

The diplomatic circle were first introduced, and several foreigners of distinction were presented to her Majesty.

The following were among the more noticeable presentations in the general circle:—

Earl Stanhope, on succeeding to the title, by the Earl of Harrington.
Major-General Viscount Melville, on promotion and appointment to the staff in North Britain, and his second Hardinge.
Viscount Bury, on succeeding to the title of Earl Albemarle.
Major-General Caledon and Lady Catherine Du Pre Alexander, by Viscount Hardinge.
Lieutenant H. Wortley, on appointment as one of her Majesty's Chaplains in Ordinary, by the Lord Chamberlain.
Captain Kellett, R.N., on return from Arctic service, by Sir C. Wood.
Mr. Thomas Grahame, Master of the Mint, by the Chancellor of the Exchequer.
Mr. W. R. Ingle, President of the Parks' Islands, by Lord John Russell.

Her Royal Highness the Duchess of Gloucester gave a juvenile ball to the Queen and members of the Royal family yesterday (Friday), at Gloucester-house.

The Marchioness of Breadalbane's ball, on Thursday last, was honoured with the presence of their Royal Highnesses the Duchess of Cambridge and the Princess Mary, and the Hereditary Grand Duchess of Mecklenburg-Strelitz, the Maharajah Dhuleep Singh, &c.

The marriage of Lady Henrietta Somerset, eldest unmarried daughter of Emily Duchess of Beaufort, with Mr. John Morant, eldest son of Mr. and Lady Caroline Morant, of Brockenhurst-house, Hants, was celebrated on Tuesday, at St. George's Church, Hanover-square. The ceremony was honoured with the presence of their Royal Highnesses the Duchess of Cambridge and the Princess Mary, and the Hereditary Grand Duchess of Mecklenburg-Strelitz; and the church was crowded with members of the aristocracy.

BOGUE *v.* ROUTLEDGE AND CO. In the Vice-Chancellor's Court, on Tuesday, this case came on for trial, in the shape of a motion for an injunction to restrain the defendants from publishing or selling any further copies of "Every Boy's Book," or anything copied or colourably altered from a work called the "Boy's Own Book," the property of the plaintiff. Mr. Craig and Mr. Reilly were heard in support of the motion. The defendants denied having committed any infringement of the plaintiff's copyright, and stated that they had employed Mr. William Martin, the author or editor of many of the works published under under the name of "Peter Parley;" and the Rev. J. G. Wood, M.A., the author of the well-known work, the "Illustrated Natural History," and other gentlemen, to write and compile; and Mr. William Harvey, Mr. Harrison Weir, and Messrs. Dalziel to illustrate the same, at a cost of upwards of £1000. After the plaintiff's counsel had addressed the Court for more than three hours, Mr. Bacon rose for the defence, but was stopped by the Vice-Chancellor, who said, in delivering his judgment, "That it was impossible for the plaintiff to carried exclusive right to publish works relating to the games and amusements of boys. The case as to the plaintiff's exclusive right to the contents of his book had completely failed upon the evidence, and his Honour said that it had been proved to his complete satisfaction that the gentlemen employed by the defendants to write 'Every Boy's Book' had honestly bestowed their labour in so doing. It was impossible to say that the Court ought on any sound principle to restrain the defendants until the plaintiff had established his right at law." Mr. Bacon: The order will contain any liberty to apply in case the action is not brought. The Vice Chancellor: Of course, there will be liberty to apply in case an action is not brought. But the plaintiff is the best judge of his own interest; and I should think that, by some alteration in his title, he might secure to himself all the legal advantages which he may claim from any originality in his work.

FUNERAL OF THE LATE ADMIRAL BOXER.—REMOVAL OF THE REMAINS FROM "THE JASON," IN BALACLAVA HARBOUR.

FUNERAL OF ADMIRAL BOXER.

THE Funeral of Admiral Boxer, which took place on the afternoon of June 5, two days before the capture of the Mamelon and the Quarry, was attended by a large number of officers of both services, who were desirous to testify by their presence the respect in which they held the gallant Admiral. He was buried near the Naval Hospital above Balaclava.

The death of Admiral Boxer following so quickly after that of his nephew, who was serving in his staff, combined with the fact of both having been previously in the enjoyment of robust health, sufficiently point to local causes as the source of the fatal disease which has so rapidly carried off these two officers. To the pernicious influence of a vitiated atmosphere Admiral Boxer's decease is no doubt in a great degree attributable, for, inscrutable as is the disease of cholera in its essence, no one now who has studied the subject hesitates to receive the assertion that its development is favoured by the same circumstances that assist in diffusing typhus and other such pests.

It was the Admiral's boast that he had never taken a dose of medicine in his life; an assertion illustrative of the general vigour of his frame. Though rough in manners, and in appearance and conversation a sailor of the "old school," yet every one knew that he was as honest as he was blunt, and that under the rugged exterior lay a large amount of kindliness of disposition. At Quebec, in which port he performed the duties of Harbour-master from the time of his retirement from active service in the Mediterranean, where he so much distinguished himself under Admiral Stopford, until his own promotion to Admiral's rank, he was universally respected, both in his private and public capacity. At Constantinople and at Balaclava he met with difficulties of a complicated and peculiar kind very different in nature and degree from those of the great port, much frequented as it is, of the St. Lawrence, and requiring a very different character and temper to grapple with them. Judging from the reports of those who have most intimately mixed with Admiral Boxer of late in business, it would appear that he never spared himself any trouble; on the contrary, that one of his chief faults in administration was his trusting too much to his own personal exertion, and depending too little on that general supervision and direction which more properly belonged to his rank and position.

We are sorry to learn that the widow of Admiral Boxer is suffering from a most dire accumulation of misfortunes. The first of these was the death from cholera of her nephew, at Balaclava. This was followed by the decease, from the same cause, of her husband. The next intelligence she received was to the effect that her house in the country had been burnt to the ground. Scarcely had she been made acquainted with this fact when the failure of Messrs. Strahan's bank deprived her of an amount of not less than £30,000; and, to crown all her misery, she has now a son before Sebastopol who, it is feared, cannot long survive.

PRESENTATION OF MEDALS TO THE 80TH REGIMENT (STAFFORDSHIRE VOLUNTEERS).

THE very interesting ceremony of presenting Medals to the 80th Regiment, to which they were entitled for the campaign in Burmah, took place on Friday week, on Southsea Common, Portsmouth, before a numerous concourse of spectators, mainly composed of the *élite* of the town and neighbourhood. The different regiments in garrison were assembled in companies on the ground, to witness their comrades in arms receiving the reward of their services.

The Medals were arranged on a table placed in the centre of the troops and surrounded principally by ladies.

The Colonel of the Regiment Lieutenant-General Robbins, presented the Medals to the officers and men; addressing in terms most happy and suitable to the occasion a few words to each of the recipients, as he came to the table.

Lieutenant-General Robbins, who is a distinguished Peninsular and Waterloo hero, wore on his breast his own well-earned medals, and assured the gallant fellows, who appeared to have seen much service, and many of whose breasts were also covered with medals and clasps, "that the Medal which he then presented would add another to the many honours which decked their brows, and that an opportunity would soon be afforded them of meriting another medal."

The Medal has a clasp attached for the capture of "Pegu, where her Majesty's 80th gallantly led the assault."* Several of the *decorés* were honoured by having their medals immediately pinned on by their fair friends who graced the scene. A splendid banquet was given by the officers, and many distinguished personages invited to meet Lieutenant-General Robbins, Colonel of the 80th, at dinner, on Friday evening. Among them were General Breton and his Staff, the Mayor of Stafford, Mr. O'Malley Irwin, Mr. Phibbs, &c.

About 500 Medals were given. Among the recipients were:—Colonel Hutchinson; Majors Christie, Ormsby; Captains Hawkes, Hardinge, Smith; Lieutenants Amiel, Fraser, Nunn, Whitehead, Crawford, Batchelor, Mortimer; Paymaster Bodle; Lieutenant and Adjutant Burrowes; Assistant-Surgeon Lane.

* On the 4th of June 1852, Major Ormsby, Lieutenants Amiel and Fraser with a detachment of the regiment, carried by assault the Pagoda at Prome under the command of Major Ormsby, and assisted by the 67th Native Infantry and the sailors of H.M.S. *Fox*, under Captain Tarleton, C.B.

FUNERAL PROCESSION OF THE LATE ADMIRAL BOXER TO THE HEIGHTS ABOVE COSSACK BAY, BALACLAVA.

PRESENTATION OF BURMESE MEDALS TO THE 80TH REGIMENT (STAFFORDSHIRE VOLUNTEERS), ON SOUTHSEA COMMON.—(SEE NEXT PAGE.)

COLOSSAL CANDELABRA.

A SET of four colossal Candelabra, magnificent specimens of British manufacture in metal, as well as of tasteful design, is now in course of completion by Messrs. Charles Williams and Co., late Catchpole and Williams, 230, Oxford-street. These Candelabra were ordered by the late Viceroy of Egypt, Abbas Fuchs. They are made of white metal very strongly coated with silver. The ornamental base is composed of shells, beautifully chased in relief with Egyptian ornaments; above which rises, in three sections, a column of flat and hollow flutes—each section surmounted with acanthus leaves, shells, and other ornaments, as on the base: and the summit of pillars is surmounted with a vase, richly ornamented. Each Candelabrum is 17½ feet high, and has 24 branches, with ground glass shades for wax candles—a large supply of which is being manufactured by Messrs. Brecknell and Turner, Haymarket. The diameter space of the branches of each Candelabrum is 86 inches; circumference, 258 inches; diameter of plinth, 64 inches. The weight of each Candelabrum, including the plinth, is 3360 lb

We understand that Messrs. Charles Williams and Co. have also in progress several magnificent State Bedsteads, in silver, for the Egyptian Court.

COLOSSAL SILVER CANDELABRUM FOR THE PACHA OF EGYPT.

PARIS FASHIONS FOR JULY.

WE have been very fortunate of late in securing novelties from the private exhibitions at the principal shops of the articles intended for the Great Exhibition. First, of the laces: their depth is very remarkable, and never have toilets displayed such luxury. Simple lace no longer suffices; but the rich patterns are profusely embroidered with the needle Gugelins exhibited a superb Court Mantle of a new shape, and rounded off at the sides—a very great improvement, that renders the mantle much more convenient to wear. It is white, with white and gold silken embroidery, and trimmed with frizzled white fringe and golden ornaments

PARIS FASHIONS FOR JULY.

The price of this mantle is from fifteen to twenty thousand francs. It is said to be intended for the Empress. Debiles also made a costly display of splendid patterns and materials. The Empress is stated to have selected several of these robes. The first was of a black ground of *gros de Tours*, of a pyramidal pattern, worked in gold flowers in a pyramidal pattern. Next came a robe called "Cleopatra," of a sky-blue *gros de Tours* ground, ornamented with three white and gold silk flounces. Next, a robe *dotée du Nord*, of white silk, completely covered with Indian white silken embroidery; the robe Strasdela, *vert celadon* ground, with worked arabesques; and, lastly, the robe Fornarina, of *vert chaux*, with white pattern imitating the *point d'Alencons*.

Among the less costly novelties were the grenadines, with black, white, sky-blue, and pearl grey ground, ornamented with garlands or bouquets of the most brilliant spring flowers. Next, the barèges, *gazes de Chambery*, *mousselines de soie*, which are the stuffs most *recherchés* this year.

Bonnets are not inferior to the robes in luxurious taste: rich laces ornament the front as well as the curtain, and the flowers that encircle the face render them excessively dear. The *paille d'Italie* and *paille de Ric* are almost the only materials worn.

White muslin robes are still worn, covered with embroidery, the richest being placed upon the edges of the flounces; and, if the robes are of simpler pattern, they stream upon the front of the skirt from the corsage down to the bottom, ornamented with ribbons of transparent shades. Many of these robes are also made with two or three tunics.

Ball handkerchiefs are almost entirely of worked on Brussels point lace, with a simple muslin ornament in the middle, in place of the hand bouquet, which is no longer used.

Chapeau de paille de ris, with a tuft of wild red poppy flowers and green leaves, and white lace trimming upon the border of the front. Mantle of silk network, separated by four rows of taffetas ribbon, puffed, and long black silk fringe. This mantle may also be worn of coloured silk, to match the dress. Robe of *mousseline de soie*, printed with three flounces, edged with garlands of flowers. Parasol of light-coloured silk, either blue, rose, or pearl-grey, covered with black lace, a flounce on the edges, and ornamented in the centre with a knot of ribbons, and often with a tuft of lace of the same depth as the flounce.

Chapeau de paille d'Italie, ornamented with flowers. Scarf Mantle of Chantilly lace, with the front corners rounded off. Taffetas robe, with large bands, black and violet, without flounces; high corsage, closed up to the neck, with trimmings arranged like braces, and made with a *ruche* composed of two ribbons of the same shades as the robe.

Chapeau de tulle blanc. Robe à *volants en Chambery Gauze*. Mantle, with lace body, is very narrow; above is a silk trimming, as well as the upper part of the flounce of the deep lace, which itself alone composes all the mantle; the rich pattern of which should stand out upon a light colour

CALENDAR FOR THE WEEK.

SUNDAY, July 1.—4th Sunday after Trinity.—Battle of the Nile, 1798.
MONDAY, 2.—Hungerford Market opened, 1833.
TUESDAY, 3.—Oxford Act and Cambridge commences.
WEDNESDAY, 4.—Translation of St. Martin.
THURSDAY, 5.—Sovereigns first current, 1817.
FRIDAY, 6.—Cambridge Term ends.
SATURDAY, 7.—Fire Insurance due. Oxford Term ends.

Office, 198, Strand.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JUNE 30, 1855.

MISADVENTURE has hitherto preceded each of the successful assaults of the Allies upon Sebastopol, and the cases of the Redan and of the Malakoff Tower were to be no exception to the rule. We are reminded by a contemporary that, previously to the carrying the ambuscades before the Central Bastion, and previously to the capture of the Mamelon, of the Volhynia, and of the Selinghinsk Redoubts, efforts were made and failure was the result. Then the besiegers returned to the work, reinforced, and with better knowledge of the mode in which their force should be directed, and the defences fell. It is a deplorable thing that a sufficient reconnaissance can, apparently, be made only at the price of much gallant blood; but it may be permitted to us to accept the omen, deduced from what has gone before, and, in the check before the Redan and the Malakoff, to see the promise of certain victory. We have a still higher and better augury in the perseverance and indomitable courage of the armies who have learned to look upon a repulse as a thing to be avenged at the earliest moment.

The first statements that were made—or, it would be fairer to say, the first surmises that were generally risked—as to the extent of our losses, have, happily, been proved greatly to have exaggerated the casualties in question. These are, however, very grave, and, unless they are regarded as part of the terrible price which the nations pay for the victory about to be achieved, it is hard to say by what arguments those who already mourn, and the far larger number whom the arrival of the next despatches will place in mourning, can be brought to own that the lives of those whom they loved have not been sacrificed in vain. After the fearful experiences of the siege, and especially after the lessons which must have been taught by the series of repulses to which we have adverted, it is strange, indeed, that any attack should fail, except from incidents of some unexampled character, and for which even the Generals of France and England could scarcely be prepared. In the absence of more information it would be unjust to attribute blame; but if it should appear that the Allies have been repulsed from works presenting no other obstacles than those which have been previously surmounted, or differing from these only in degree, and if such repulses have been occasioned by the want of aught which precaution and calculation should have supplied, the epitaph on the heroes of the Redan and of the Malakoff will not lack its "one accusing line." But we must await details before its place in the history of the siege can fairly be awarded to the daring feat of those English and French who, on the anniversary of Waterloo, sought, the one noble band to emulate, the other to eclipse, the glories of that day.

It may be well to remember that the first belief was that the slaughter of the 18th June had destroyed or disabled in our own ranks four thousand men. Now we know that this number covers the loss of both armies, and that the total of the English loss, that is, killed and wounded, is 1295. Of these 19 officers and 144 non-commissioned officers and men are all that are hitherto known to have been slain; though, out of the enormous number of wounded, many to whose names are appended the significant words "dangerously" and "severely" have, too probably, already died; and, in round numbers, after deducting the loss of these glorious fellows, the British army is weakened by one thousand men. This is the price at which we have learned the real strength of the Redan. The nation is now feverishly eager to learn to what good use that dearly-bought lesson is being put. It is satisfactory, so far as it goes, to know that the tremendous onslaught of the Allies has greatly astounded the defenders, and that they could not believe themselves safe from another attack, but kept firing at random during the night of the 19th, and next day burned the little faubourg at the bottom of the southern harbour. More to the purpose, we were constructing batteries, with very heavy guns, on such of the works conquered on the 7th as directly menace the great fort. So stands the siege, up to the time of the last transmission of news of importance.

The complete story of a complete triumph—the mastery of the Sea of Azoff—is now before the country; and is, in its entirety, the most satisfactory episode of the war. "A victory is twice itself," says Leonato, when the achiever brings home full numbers." In the Azoff, in a few days, nearly 300 vessels, "an immense quantity of stores, and four months' provision for an army of 100,00 men," have been destroyed or captured; the "dignity" of Russia has received an incurable wound, the waters of the nursery sea have been lighted by all the flames of a circle of blazing cities, and the Allies have the command of the whole eastern coast of the Crimea. [*Si sic omnia.*] In this quarter the fortunes of the war are all with us.

In the third sea in which British ships are riding, and menacing a foe afraid to fight, except from behind stone walls, the cowardice of that enemy, and the clumsiness of our own vessels, combine to prevent any collision. There is an old chivalric story about a champion who, being warned that his sword was too short to enable him to cope with a better-armed antagonist, replied that it only wanted one step nearer his adversary to make up that disadvantage. The same chivalrous feeling exists on board the Baltic fleet, but it is physically impossible to bring our colossal batteries within reach of the Russians; and whether the wisdom of Government will, at any period during the war, provide Admiral Dundas with the means of doing more than Admiral Napier was permitted to do, has yet to be seen. The last reports upon the subject, and the experiment on the first floating battery that has been launched, are anything but satisfactory. There liest the noblest fleet ever sent from these shores, manned by the best officers and the boldest sailors the country can produce,

> The sea-built forts in dreadful order move.

But we have reversed the description of the Annus Mirabilis, and Britain has now the "high-raised decks," and "guns of mighty strength," and

> The "Russians" hope that with disordered haste
> Our deep-cut keels upon the sand may run.

We have only to hope that one of those happy accidents which usually occur in the presence of Nelsons and others of that kind who are ready to avail themselves of such chances may favour Dundas.

And at the least let us hope that he will find or make a way to vengeance for the Hango atrocity. Details on this subject have been received, and we now know that the murder was incomplete. Four only of our sailors and two of the Russians' fellow-subjects were slaughtered, and a similar number were wounded the remainder, supposed to have been killed, being prisoners. The Governor of Helsingfors has put forth that species of defence which might be expected from a Russian official, namely, double lying; but his pleas contradict each other, and Russia is convicted, out of her own mouth, of committing and vindicating the most brutal outrage of modern times. It is alleged that the flag of truce was not seen. This deliberate falsehood can be contradicted by the evidence of all the survivors of the massacre; but such contradiction is not necessary, for the Governor proceeds to say that the boat was fired on because the Russians had been irritated at hearing that soundings had elsewhere been taken under a flag of truce. The answer is obviously an insolent defiance by men who are contemptuously careless of the inconsistency of their statements. The rejoinder must be made by the guns of the first vessel that can manage to place itself within reach of a Russian fortress—or, better still, must be entrusted to the first body of marines and blue-jackets that can be thrown on shore. It is improbable that such a party will have any prisoners whose release may expose their merciful captors to be brutally murdered. We may add that the story of soundings having been obtained at Kertch by means of the carriage stratagem is flatly contradicted. Nothing of the kind took place; and soundings could have been obtained, without the least difficulty, by day or night. The House of Lords spoke out upon the Hango affair with an energetic indignation which did them honour; and Lord Clarendon stated that explanations had been demanded of Russia, through Denmark. Lord Brougham declared that "if the nation had ever called for blood, it was now." And, if such cry is raised, it is not the cry of frantic rage at the murder of our brothers—it is the stern demand that the claims of our common humanity shall not be slighted, even in the hour of conflict.

HYDE-PARK offered a singular spectacle on Sunday last. We expect that to-morrow will not offer a repetition of it, but that the pedestrians will have exclusive possession, not only of the green sward, but of the paths and carriage-roads. The working classes, aggrieved by the recent legislation of Lord Robert Grosvenor, Mr. Patten, and other ultra-sabbatarian successors of Sir Andrew Agnew, have given a proof of the indomitable spirit of Englishmen, by showing that there shall not, if they can help it, be one law for the rich in this matter and another for the poor. While disapproving of riotous assemblages for any purposes whatsoever, and disapproving as highly and as earnestly as Lord Robert Grosvenor, or any other man, lay or clerical, who has given utterance to his opinions on the subject, of any desecration of the Sunday by any class of the people, it yet seems to us that the attitude assumed by the working classes on the question is exceedingly natural, and in accordance with the sentiment and feeling which gave birth to the Reformation, and produced in England that great and ever-to-be-blessed amount of religious liberty which we all enjoy. If it be right, as members of Parliament assert, that the poor should not purchase necessary refreshment at all times when they may need it, and that no work whatever should be done on the Sunday, it is not right that carriages should drive in the Park on that day, or that clubhouses should be kept open. Carriage-driving necessitates the labour of cattle (forbidden by the fourth commandment) and the labour of coachmen, and possibly of footmen, also plainly forbidden by the Jewish law. If we are to attempt to make poor people pious by Act of Parliament, rich people must be taught that the Act of Parliament applies to them as well as their inferiors in worldly station. From the manner in which the toiling classes took up the question last Sunday, we should not be in the least degree surprised if they bestow upon the rich who go to their clubs in Pall-mall and St. James's-street to-morrow a taste of the opinion which they expressed to the equestrians in the Park on Sunday last. The legislation which allows one class to frequent houses of public resort (for clubs are nothing more) all day on the Sunday, and prohibits another class, who have no other day for repose and refreshment but that one, from taking, except at some particular, and it may be inconvenient, hour, the sustenance and refreshment which nature requires, or which the sense and feeling of liberty may suggest, cannot but be acknowledged even by Lord Robert Grosvenor to be one-sided and oppressive. And we should also remember that this is a question both of civil and religious liberty. This is a country where, luckily, it is free to dissent. If any body of men think it desirable to keep the Sunday in a Jewish sense, they are at liberty to do so. If Lord Robert Grosvenor thinks it right in a Christian land to adhere to the Sabbatarianism of the Jews; to eat cold victuals, to shave in cold water, to go unshaven, and to dispense with servants altogether on that day; he will do no more than exercise the common right of every Englishman to enjoy his own opinions in matters of religion, and to act upon them. But the liberty which such persons claim they must accord, or they become, instead of free Christians, the persecutors of other people for conscience sake. St. Paul says, with reference to Sabbath observance, "Let every man be fully persuaded in his *own* mind;" but nowhere says that a man must be forced to act on the subject from the persuasion of another person's mind. If it be free for Lord Robert Grosvenor to sigh on the Sunday, it should be free for any one else to smile. Besides, even the strictest Sabbatarians—supporting themselves upon the authority of the Divine Word—admit that works of necessity and mercy may be done on the Sunday. But who is to judge of the necessity and the mercy? The poor man, working for six days in the week, alleges that the country air on the seventh day is a necessity of his existence. Who shall deny it? He would be indeed a hard-hearted person who should presume to deny, not the necessity only, but the mercy of allowing the toiling slave of our modern civilisation the only chance of inhaling the fresh air (imbibing gratitude to God along with it) that his hard circumstances allow him. But, strictly speaking, all legislation upon the subject is persecution, and nothing less. It cannot be alleged that the Sunday is less decorously observed in our times than it was even ten or twenty years ago. On the contrary, there has been a marked improvement; and if our amateur lawmakers would have a little faith in the principles of freedom, and content themselves with setting a good example, the Sunday would be still better observed amongst us from year to year, as knowledge and education increased among the people. In no country in the world is the Sunday better observed than in the British Isles; and the friends of a rigid observance of the Sabbath should learn to be more Christian and more tolerant, and allow to others some portion of the right of free opinion which they enjoy and claim for themselves. The Jewish Sabbath is one thing;—the Christian Sunday or Lord's-day is another. The people of England wish to keep the Sunday with decency and piety; but not with the Mosaic strictness, which would stone a man to death for lighting a fire, or gathering a bundle of sticks within the prohibited hours. If we are to have legislation, it must be applied against all classes alike. There should be no carriage-drives in the Parks; no open clubhouses; no labour of coachmen and grooms; no cooking of dinners in sumptuous houses on the Sunday,—if there are to be no excursions to the country, or purchasing of needful sustenance and refreshment, by the poor. Let us have liberty; and the people of England, the most religious people in the world, will prove in due time that true liberty and sincere religion are not antagonistic, but the reverse, and mutually uphold and adorn each other. The present is a bad time to raise such invidious questions as these between rich and poor, and the sooner that Parliament allows them to drop into quiet oblivion the better for all parties.

LATER DEPARTURE OF THE DAY MAIL FOR FRANCE.—GENERAL POST-OFFICE, June, 1855.—On and from the 1st proximo the departure from London of the day mail to France will be postponed from 11.30. a.m. to 1.30 p.m.; by which arrangement the delay to which the correspondence for France, &c., arriving in London by the day mail from Ireland, Scotland, and the north of England, has hitherto been subjected, will be obviated. The following are the regulations under which letters and newspapers for France, or intended to be forwarded through France, may henceforth be posted in London:—At any of the ordinary receiving-houses, letters, 11.0 a.m.; newspapers, 11.0 a.m. At the branch-offices in Charing-cross, the Borough, and Old Cavendish street, letters, 11.0 a.m.; newspapers, 11.0 a.m. At the Chief Office, and at the branch-office in Lombard-street, letters, 11.45 a.m.; newspapers, 11.15 a.m. Letters and newspapers for the Mediterranean and India, intended to be sent by the Overland Mails, which are made up in London on the 10th and 25th of each month, as well as letters and newspapers for the British forces in the East, to be sent by the supplementary mail made up on the morning of every Tuesday, may be posted until the hours above mentioned.

BOARD OF TRADE RETURNS.—The Trade and Navigation Returns, published on Thursday, inform us that the articles of British produce exported during the month of May amounted in value to £8,049,216, the sum for the month ending 5th June, 1854, being £8,422,196. For the period from the 5th of January to the 31st May the exports were valued at £34,943,727; and during the five months ending June 5, 1854 (a period longer by five days), at £40,425,289

Note.—The sign — denotes below the average and the sign + above the average. The numbers in the seventh column are reckoned from the opposite to that the numerator of the fraction represented by 100

The reading of the barometer has varied but little during the week, the lowest reading being 30.01 in., on the 24th; and the highest, 30.30, on the 27th. The mean for the week, at the height of 32 feet above the level of the sea, was 30.170 inches.

The mean temperature of the week was 60·29—being 0·70 below the average.

The range of temperature during the week was 36·2°, being the difference between the lowest reading, 42·8°, on the 22nd, and the highest, 79°, on the 26th.

The mean daily range of temperature during the week was 22·9°. The greatest was 32·8°, on the 22nd; and the least, 11°, on the 23rd.

The weather throughout the week was fine, and there was no rain.

Lewisham, June 25, 1855. JAMES GLAISHER.

HEALTH OF LONDON.—Within the week ending June 23 the births of 1371 children were registered within the metropolitan districts, and the deaths of 1,009 persons; the average numbers from the returns of ten years for the twenty-fifth week are 705 boys and 677 girls—so that the children were born above the estimated average. Within the same limits of time and space 1075 persons died, numbering 548 males and 527 females The average rate of mortality, as calculated for the week, was 31·6; so that the actual number was sixty in excess. The number of deaths in the three preceding weeks were 1072, 1067, and 1041. Within the week the number of deaths by small-pox were 28; measles, 16; scarlatina, 21; hooping-cough, 41; diarrhœa, 25; and typhus, 47. So that scarlatina was the most fatal of this class of disease. diarrhœa, which only averaged 15 in the last six weeks, rose to 25

GREAT DEMONSTRATION AGAINST THE LONDON SUNDAY-TRADING BILL. A monster demonstration, such as has not occurred in or near the metropolis for some years past, took place on Sunday, in Hyde-park. A few days before, placards had been displayed throughout the metropolis inviting the working classes and others to attend in Hyde-park on Sunday afternoon, to see "how the aristocracy observed the Sabbath." In obedience to this call, several thousand persons had assembled in the Park between two and three o'clock on Sunday. A great number of policemen were distributed throughout the Park, but did not interfere with the free movement of the persons assembled, a large majority of whom appeared to be of the better class of artisans, accompanied, in numberless instances, by their wives and families. The equestrian ride in Rotten-row was totally deserted, but, soon after three o'clock, a variety of carriages began to make their appearance in the Drive running along the right bank of the Serpentine. The vast crowd at once took up a position on each side of the road, extending from the Achilles Statue to Serpentine-bridge, and as each carriage passed along indulged in loud hissing and groaning, accompanied by deafening cries of "Go to church!" "Why do you allow your servants to work on Sunday?" "Shame on you!" "Down with the Sabbatharians!" "Away with the Sunday Bill!" In one carriage a lady stood up, and held out her hand a prayer-book, but the only effect it had on the crowd was to make them shout out, "Walk, walk, and let your horses rest, and your coachman go to church!" Lord and Lady Wilton, Lady Grenville, and several others of the nobility and gentry were obliged to leave their carriages at the demand of the multitude. In the majority of instances the occupants of the carriages did not venture to return down the ride, but went home by another route. The crowd remained until nearly eight o'clock. A great number of the members of the Legislature were present, looking on. It is said that a similar demonstration will be repeated to-morrow. A correspondent of the *Times* writes:—"After all, one cannot wonder at such popular ebullitions and demonstrations—nor can we prevent this ratiocinative process of 'the million'—hasty, harsh, and unphilosophical though it may be—when we witness, on one hand, the perpetual attempts of the Legislature to force into an observance of the Sabbath, and notice, on the other hand, the unfettered enjoyments and unexceptionable comforts and liberties on the very same day. Thus, for instance, after leaving the Park I called at my club, and, at a time when not a poor wretch in the metropolis might purchase a drop of beer, I found that my only wish whatever liquid refreshment I fancied, and found other gentlemen similarly engaged and similarly privileged. Two minutes afterwards a bishop's carriage, drawn by a pair of well-groomed horses, and attended by coachman and footmen in elegant liveries, and conveying two reverend gentlemen (who might, for aught I know, have this very day preached from the text "Thou shalt keep holy the Sabbath Day"), dashed by the door of the club, and I really could not help feeling that, after all, the Park demonstration was neither unaccountable nor unconstitutional, seeing that both Sunday trading and Sunday labour are permitted with impunity by the Bishops themselves, and that Lord Robert Grosvenor's bill does not contain a clause which will, in the remotest degree, interfere with the Sabbath enjoyments of the rich."

ANNIVERSARY OF HER MAJESTY'S CORONATION.—Thursday last being the anniversary of her Majesty's coronation, the usual display of flags, ringing of bells, and other loyal demonstrations took place throughout the metropolis

CITY ORTHOPŒDIC HOSPITAL, HATTON-GARDEN. A *fête champêtre*, under most distinguished patronage, took place in the beautiful grounds of St. Margaret's, Isleworth, near Richmond, on Wednesday, in aid of the funds of the above institution, founded for the gratuitous medical and surgical treatment of poor persons afflicted with clubfoot and other deformities

VISIT OF THE ROYAL CHILDREN TO THE ROYAL PANOPTICON.—Their Royal Highnesses the Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice, the Princess Helena, and the Princess Louisa, attended by their suite, paid a visit to the Royal Panopticon, Leicester-square, on Wednesday evening, between the hours of eight and nine.

HYDE-PARK COLLEGE.—The second annual meeting of this College took place on Wednesday last, before a large and influential attendance of the neighbourhood. The report, which was read by the secretary, stated that the number of pupils had been very satisfactory, and the funds were in such a position as to warrant the repayment of a portion of the preliminary fund, and the establishment of a guarantee fund. Several admirable speeches were made by the gentlemen interested in the College.

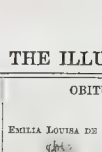
STRAHAN, PAUL, AND BATES.—The general impression seems to be that they will escape all consequences from the criminal charge against them, owing to the technicalities of the Act of Parliament under which they have been arraigned. This result, however, is not at present quite certain. Should it occur, the only authority to take cognisance of their offences will be the Court of Bankruptcy. The commissioners have power to refuse a certificate to a bankrupt who has contracted debts by fraud, and the effect of the refusal entitles any creditor to cause the bankrupt to be arrested and imprisoned. He cannot then obtain his discharge under a year except by order of the Court. The measures on the part of Strahan, Paul, and Co. are considered to have been conducted with great art, the inference being that they committed a voluntary act of bankruptcy in order to get proceedings instituted by a friendly creditor, and with the view to make the disclosure which should exempt them from the criminal penalties due to their conduct.—*The Times (City Article).*

DESTRUCTIVE FIRE IN SHOREDITCH.—Between the hours of one and two o'clock on Thursday morning a most extensive fire took place on the premises of Mr. W. O. Marchant, cabinet-maker, Curtain-road, Shoreditch, whereby property to the extent of upwards of £10,000 was destroyed. The premises in question were very commodious, and were filled with cabinet-work of a costly description. The flames were not perceived until they shot forth in a huge body, rendering the greater portion of the extensive works. The engines speedily got to work, but in spite of the exertions of the firemen the flames spread, and caught the premises of Mr. G. Newton, confectioner, which were severely damaged by fire, and six houses under repair, belonging to Mr. J. Smith, Worship-street, were considerably damaged by fire. The cause of the calamity is at present unknown.

THE CONSERVATIVE LAND SOCIETY.—A special general meeting was held at Exeter-hall, on Wednesday; Viscount Ranelagh presided. The noble chairman read the report, which stated, as evidence of onward progress, increased investments in land, and extensive of building on the allotted estates. The whole of the Old Ford, Retford, Alford, and a considerable part of the Malvern estates, had been sold. The sale of land for the quarter amounted to £6427 10s., making a total since the commencement of the society of £169,111 10s. The Hounslow and the first and second portions of the Brighton estate would be allotted under novel and advantageous circumstances, on the 19th of July. The report diverted to the approaching proceedings in the Registration Courts, which would be conducted by the society for its members as formerly, free of expense. The report was adopted by acclamation, and a vote of thanks to the noble chairman was passed

OBITUARY OF EMINENT PERSONS.

MADAME LAVALETTE.



EMILIA LOUISA DE BEAUHARNAIS, Countess de Lavalette, who, familiarly known as Madame Lavalette, established a name memorable for ever in the annals of female heroism died in Paris on the 18th inst. It is not said whether she ever recovered the mental alienation of mind consequent on the sufferings she endured for her act of devotion, but, at any rate, her glory has never been obscured, and is as brilliant now, at the time of her demise, as when what she did first won universal acclaim.

The Countess de Lavalette was a near relative of the several Emperors of the French, being the first cousin of her mother, the Queen Hortense. She was the daughter of Queen Hortense's father's elder brother Francis, Marquis de Beauharnais, who died in 1846, leaving a daughter by each of his marriages: the younger of these daughters is the Chanoinesse and Marchioness Hortense, now Madame de Lauty; and the elder was the heroine, the subject of this notice.

In accordance with the expressed wish of Napoleon, then First Consul, Emilia Louisa de Beauharnais, after receiving her education at the justly-celebrated seminary of Madame Campan, was married in 1802 to Bonaparte's favourite Aide-de-Camp, Antony Marie Chamant Lavalette. Her husband was a remarkable man. He had shared with acknowledged ability in much of the toil and trials of his great master, to whom he was warmly attached. His life, indeed, seemed a charmed one. He once was shipwrecked, and had a wonderful escape from drowning, off the coast of Egypt: he remained unscathed during the six weeks' plague in Alexandria and that passed for a miracle; but the last preservation of his life, the act of his wife, was far more marvellous still. When Napoleon became Emperor he made Lavalette a Count, and appointed him Director-General of Posts. This office he held when Napoleon abdicated in 1814, and he then gave in his adhesion to the restored dynasty of the Bourbons—most probably, it is supposed, that he might the better serve the cause of the Imperial exile. The moment the news of the return from Elba took effect in Paris, Lavalette found it necessary to absent himself in his directorship of Posts, which had been temporarily occupied by the Count de Ferrand, and his here made use of his thus-acquired power to stop the Royal proclamations, so as to secure the utter discomfiture of the King For this act Lavalette, after the second restoration, was tried and capitally convicted. He was sentenced to be guillotined, and his doom appeared inevitable. The Government was inexorable to all applications, and they were many, to spare his life. His wife threw herself at the feet of Louis XVIII.; but the Monarch, himself a man of humanity, could only regret that his advisers insisted on a severe example. The execution was fixed for the 21st December, 1815. The night before, Lavalette escaped from his dungeon in the clothes of his wife, leaving her there in his stead. The details of her almost superhuman skill, intelligence, and presence of mind, in the conduct of this affair, form a surprising narrative—too long for insertion here, but the reader may be referred for it to "Chambers' Miscellany," and for further incidents to the recent edition of "The Romance of the Aristocracy." Lavalette, once out of prison, lay concealed in a curious hiding-place, where his enemies never thought of looking for him—viz., in a chamber of the very office of the Minister of Foreign Affairs. There, through the aid of a friendly clerk, he rested secure for nearly three weeks, and baffled the police completely. He owed his final preservation to the generous gallantry of three English gentlemen—Sir Robert Wilson, Captain Hutchinson (since Earl of Donoughmore), and Mr Michael Bruce. They took him from his precarious place of refuge, and conducted him, in the disguise of an English officer, across the frontier into Belgium. For this they were tried in Paris, and sentenced to the minimum of punishment accorded to the offence—three months' imprisonment—and underwent it amid general applause. Lavalette, after an exile of six years, was pardoned by Louis XVIII., and returned to France: he died there in 1830. His heroic wife fared the worst. The cruel prosecution and the six weeks' severe imprisonment to which the Government, in its wrath, subjected her to for having foiled them, proved too much for her; the agony, bodily and mental, she endured (she was kept uncertain of her husband's safety) laid the foundation of complaints which afterwards unsettled her reason. Her daughter Josephine, named after herself, when he got back, did all that could be in human power to administer comfort and alleviation to her in her unhappy condition. Lavalette's letters on the subject display intense feeling and sorrow. When he died, the Countess continued under the devoted care of her daughter, which the Government, in a great example of a wife's attachment was not to be in this life: she now passes to her reward, leaving behind her a strange history, the saddest and yet the brightest amid all the recorded vicissitudes of the Imperial family of France

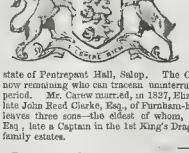
F ADDENBROOKE ADDENBROOKE, ESQ.

EDWARD ADDENBROOKE ADDENBROOKE, Esq., of Kingswinford, county Stafford, was the representative of an ancient staffordshire family formerly seated in Wollaston-hall, in that county by the late Mr. Addenbrooke, Addenbrooke Addenbrooke, Esq., of Wollaston-hall, H.gh Sheriff for Worcestershire in 1798 (whose patronymic was Homfray), by Elizabeth his wife, daughter of Michael Grazebrook, Esq., of Audnam, and grandson of John Homfray, Esq., of Wollaston-hall, by Mary his wife, daughter of the Rev. Jeremiah Addenbrooke, M.A., and heir of his uncle, the Very Rev John Addenbrooke, D.D., Dean of Lichfield. The family of Homfray descends immediately from Francis Homfray, Esq., of Acton, county York, who was supposed to have been killed in the siege of Cromwell, under Cromwell. The late Sir Jeremiah Homfray, Kt., of Llandaff-house, H.gh Sheriff for Glamorganshire in 1809, was the representative of one branch of this family

Mr. Addenbrooke, the subject of this notice, married Emma, third daughter of the late John Pidcock, Esq., of the Platts, Staffordshire, J. P. and D. L. for that county, by whom he leaves a large family to deplore his death, which occurred at his residence, Kingswinford, on the 16th ult.

THOMAS GEORGE WARRINGTON CAREW, ESQ.

THIS gentleman, a magistrate and Deputy Lieutenant for Somerset, died at his seat, Crowcombe Court, Somerset, on the 21st ult., in his 59th year. Mr. Carew succeeded to the old family estates of Carew Castle, Pembroke, and Crowcombe Court, Somerset, on the death of his mother, an heiress of the family of Carew, in the year 1832 He was the eldest son of George Henry Warrington, Esq., who assumed the name of Carew in the year 1811; and from his father he inherited the Warrington family



state of Pentrepant Hall, Salop. The Carews are one of the few families now remaining who can trace an unbroken pedigree from the Anglo-Saxon period. Mr. Carew married, in 1827, Elizabeth Hannah, only daughter of the late John Read Clarke, Esq., of Furnham-house, Somerset; and by this lady he leaves three sons—the eldest of whom, George Henry Warrington Carew, Esq., late a Captain in the 1st King's Dragoon Guards, now succeeds to all the family estates.

ERRATUM IN OBITUARY OF LAST WEEK.—Sir George Rose, it should have been stated, had issue (with several other children, most of whom died before their father), Major-General Rose, late Chargé d'Affaires at Constantinople, and now Commissioner with the French Army in the Crimea, William Rose, Esq., Deputy Clerk of the Parliaments, and the present Countess of Morton.

*** A War Obituary of the Officers who fell on the 18th will be given next week.

WILLS AND PERSONALTY.—The will of the Right Hon. George Lord Baron Keuyon has been proved in England, personalty £15,000; Lieut.-General Sir George Charles d'Aguilar, K.C.B., £18,000; Augustus Keppel Gifford, Esq., £20,000; William Devonshire Saull, wine merchant, London, £20,000; Samuel Berger, colour manufacturer, London, £160,000. The private personal property of the late Bennett Gosling, Esq., has been estimated for probate duty at £350,000 Mr Arthur Gaunless, the eminent brewer, who died recently at the age of eighty-eight, is stated to have left upwards of half a million sterling

THE Duke of Northumberland laid the foundation-stone of a new church at Isleworth on Thursday morning, with the usual ceremonies.

TESTIMONIALS.—To the Rev. George Jannings, on his retirement from the curacy of Bishop Wearmouth, a purse containing above £70. To the Rev R. F. Ralph, curate of Stretford, a silver inkstand, with a suitable inscription, by his congregation.

IMPERIAL PARLIAMENT.

(Continued from page 652.)

HOUSE OF LORDS. THURSDAY.

INCREASE OF PAY TO THE ARMY.

Lord PANMURE, in reply to the Duke of Richmond, said that in the construction of the new barracks he was fully alive to the importance of affording to the married soldier convenient and decent accommodation. He was, however, of opinion that the Army would be much improved by the absence of women altogether, and that the young soldier should be taught to do that for himself which was on ordinary occasions performed by women. He did not think that a young soldier of eighteen years of age should be permitted to marry until he had passed through his ten years' service. In respect to the subject of recruiting, instead of increasing the bounty, which was at first proposed, her Majesty's Government had it in contemplation to grant an additional shilling a day to all soldiers engaged in field operations; such shilling not to be paid them at once, but to be placed to their credit in the savings-banks, and there left to accumulate in the event of their death such money to be paid to their nearest surviving relatives. But if they survived it was to be paid to them, in addition to the pension to which, after a certain term of service, they would be entitled

The Assizes and Sessions Bill passed through Committee, as did also the Spirits (Ireland) Act Amendment Bill, the Accidents on Railways Bill, and the National Gallery, &c. (Dublin), Bill

The Woolmer Forest Bill was read a second time.

The Militia (No. 2) Bill was read a third time, and passed

The Friendly Societies Bill was reported, with amendments

HOUSE OF COMMONS.—THURSDAY.

In the morning sitting, the House in Committee disposed of several clauses in the Local Management (Metropolis) Bill.

In the evening sitting, Lord PALMERSTON, in reply to Mr. T. Chambers, said that the correspondence with the Portuguese Government on the subject of the claims of Yuille, Shortridge, and Co., for breach of treaty, had not yet been brought to a conclusion.

TENANTS' IMPROVEMENTS COMPENSATION (IRELAND) BILL.

The House having gone into Committee upon this bill, Lord SEYMOUR moved that the Chairman report the progress, with the view of discharging the order altogether, as he saw no probability of the measure being passed in the present Session

After some conversation, Serjeant SHEE said he considered the amendments of the Government so mischievous, he was of opinion that the bill was not worth having.

The Committee having divided, Lord Seymour's motion was negatived by a majority of 97 to 7

The discussion of the clauses was then proceeded with; but little progress was made in the bill

About midnight the Chairman reported progress, and obtained leave to sit again.

Several bills upon the paper were then advanced a stage

WINDSOR POULTRY SHOW.

THE first Exhibition of Poultry took place at Windsor this week under Royal and other very distinguished patronage; and, but for the incon venient manner selected for the tents, and some want of experience in the construction of the Poultry pens—errors which may be excused on a first attempt—the exhibition would have been much more attractive. It is, however, understood that another year better arrangements will be made, and the gathering will take place in the Home park.

Upwards of £150 was distributed in prizes; and a handsome silver cup, value ten guineas, was awarded to H. D. Davies, Esq., of Springgrove-house, Hounslow, the exhibitor of the best collection of adult birds, and also the most successful competitor in the adult classes. Amongst the competitors for prizes we noticed H.R.H. Prince Albert, and a long list of the nobility and gentry.

THE CAPTURE OF YENIKALE.

THE taking of this place was a very brief affair. The instant the Russians deserted Pavlovskaia, the *Snake*, in the most dashing manner, made a rush into the straits of the Russian steamer past the opening of the Bay of Kertch up to Yenikale. Captain M'Killop pushed his vessel right across bank, shoals, and narrows after his prey. A large and heavily armed schooner, sailing beautifully, came bowling down from Yenikale to aid her consort, and at the same time several merchant vessels slipped from the Bay of Kertch and tried to run up to the Sea of Azoff, but the *Snake* had her eyes wide open, and gave them a gun here and there, which soon induced them to abandon the attempt. As she went up to Yenikale she got under fire of two of the batteries on the shore and on the second sandbank, but she danced in among the Russian vessels, making very splendid use of her long guns and holding her own against ships, gun-boats, floating batteries, shore forts, and block-houses til. her consorts went to her assistance, and soon made the place too hot for the enemy. They blew up their magazines and spiked their guns at Yenikale that evening, and the next morning the batteries on the spit were abandoned by the enemy after firing a few shots. The *Snake* was only hit once; a round shot went through her, but no one was hurt. None of the other vessels received any injury. The schooner and steamer were driven on shore, and were burnt by the enemy

From Kertch to Yenikale the distance is five miles and a half. Yenikale derives its importance from its position on a promontory close to the entrance of the Sea of Azoff, at the northern extremity of the Straits of Kertch. Another of the singular banks to be found in this part of the world, shooting from the north-eastern extremity of the Taman Peninsula, runs through the sea in a southerly and westerly direction for seven miles and a half towards Yenikale, and contracts the straits to the breadth of a mile and three quarters, just ere it opens into the Sea of Azoff On this bank, which is full of salt-water marshes, and is two or three miles broad in some places, the Russians had a strong battery, commanding the ferry station, armed with long and heavy 18-pounders, and a number of Government buildings of a mean description, and there were great numbers of fishing-huts and curing-sheds also upon it. The principal battery at Yenikale crowned the cliffs on the point on the sandbank, which is called Sayernaia, and it was thought that a most resistance would have been offered to our gun-boats, but the batteries on land were abandoned and the magazines blown up by the enemy as soon as the Allied fleet made its appearance; the battery on the sandbank followed the example next morning, and Yenikale was surrendered without a blow. The town consists of two parts—one suburb of houses close to the water's edge, and commanded by a ridge of high land running gradually from the sea. The church, which is a handsome building in the Byzantine style, stands on the highest ridge, in the midst of this suburb. The other part consists of the Fort, which is formed by a quadrangular rampart, armed at the angles with bastions and small turrets. Inside the fortress are about a quarter of a mile long. The side parallel to the sea wall is on the top of the ridge into which the ground rises gradually from the sea, and the sea-wall itself has its base a broad quay by the water's edge. The ridge once gained the country lies before one in a spacious plateau, with conical mounds and tumuli, forming natural advanced posts for videttes in the distance. On the land side the ramparts are provided with embrasures, and are crenellated for musketry the walls, though very old, are of great solidity, and are tolerably well preserved. Inside the fortress are the hospital, the Government-house, the barrack, the batteries, and the stores and magazines. One of these magazines, which was blown up, completely destroyed about 200 feet of the curtain of the work on the land side. There are marks of cannon, independent outside the walls, and the moats, ditches, covered ways, &c are still well defined

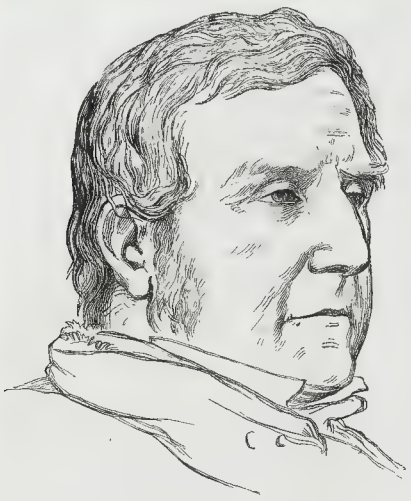
(From our own Correspondent.)

In my last I wrote that our gun-boats had done good service in the Sea of Azoff. The number of shipping and craft taken or destroyed is said now to amount to 500; and Taganrog, a strong fortress about fifteen miles from the river Don, laid in ruins. At Taganrog, in the reign of Peter the Great, and as late as Catherine II., the Russians had a fleet of flat bottomed line-of-battle ships; but since its foundation the water has diminished in depth about three feet. On the 12th inst. orders were received for the expedition to return to Balaclava

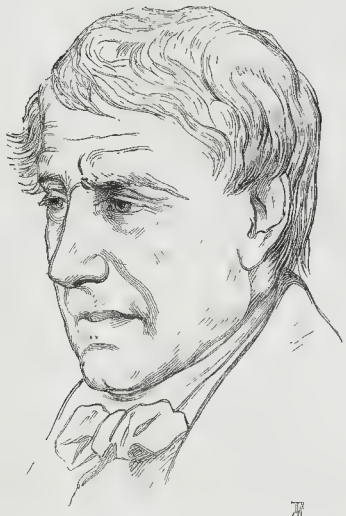
The Russians have destroyed Anapa.

On Wednesday last 1500 women from Kertch were sent across the Sea of Azoff by our Admiral, they having expressed great fear of the Turks; between 3000 or 4000 of whom, in conjunction with the 71st Highlanders, will remain to defend Yenikale. The poor inhabitants have had, I am sorry to say, good grounds for their fear; as the Turks have committed various excesses, several of whom have been punished by death.

THE LANDING OF THE TURKS AT YENIKALE. (SEE PRECEDING PAGE.)



LORD RAGLAN, COMMANDER-IN-CHIEF OF THE BRITISH ARMY IN THE CRIMEA.—FROM A DRAWING BY ARMITAGE.—(SEE NEXT PAGE.)



SIR EDMUND LYONS, ADMIRAL COMMANDING-IN-CHIEF OF THE BRITISH NAVY.—FROM A DRAWING BY ARMITAGE.—(SEE NEXT PAGE.)

BOMBARDMENT OF FORT ARABAT BY THE SEA OF AZOFF SQUADRON.—EXPLOSION OF THE MAGAZINE.—(SEE NEXT PAGE.)

BOMBARDMENT OF FORT ARABAT.

IT was on the afternoon of the 25th ult. that the squadron of light steamers entered the Sea of Azoff, and on the morning of the 28th they came in sight of Fort Arabat. The squadron consisted altogether of the following vessels:—*Miranda*, screw, 16 guns; *Viper*, screw gun-boat; *Stromboli*, paddle, 6; *Swallow*, screw, 8; *Medina*, paddle, 4; *Wrangler*, screw gun-boat, 2; *Beagle*, screw gun-boat, 2; *Recruit*, paddle, 6; *Vesuvius*, paddle, 6; *Curlew*, screw, 8; *Ardent*, paddle, 4; *Snake*, screw gun-boat, 2; *Lynx*, screw gun-boat, 2; *Arrow*, screw gun-boat, 2. The French squadron consisted of four steamers.

On the morning of the 28th, at 7.30, the *Snake* fired a gun at Fort Arabat, which was soon returned, and soon after all the ships were engaged. On our side the firing was good—shot and shell were sent into the fort, while the Russians were unable to reach the Allied vessels; most of their shots fell short, but they still kept up a good fire, and, had the fleet been within range, would have caused it considerable damage. At 8½, the magazine exploded and the fire slackened considerably. About 9, the Admiral ceased firing, and steamed out of action, having received some damage and made the enemy show his forces, without any loss on our part, save one shot which struck the *Medina*, and very slightly wounded one man. No good could have resulted from taking the ships into closer action, as the fort could not have been destroyed without the cooperation of a land force, and some of our steamers might have been crippled, for which even the destruction of the fort would have been but a poor compensation. Captain Lyons expected to have found a number of vessels at anchor near the fort, but there was not one there. There was a large store of grain on the tongue of Arabat, near the fort, but any boats going on shore would have been exposed to fire; and, as saving time conduces to success in this sea, it was left uninjured. After the action the four French steamers returned to Kertch, and the English squadron proceeded along the tongue of Arabat to Genitchi, at the entrance to the Putrid Sea.

Captain Lyons, in a despatch, announcing the capture, says

The Commanders of the vessels employed deserve every credit for the skilful manner in which they manœuvred their vessels in a very strong breeze and shoal water, without a single accident; and I may be permitted to say none were more distinguished than our gallant allies. The large garrison at Arabat rendering any attempt at landing out of the question, I now proceeded for Genitchi, parting with regret from Captain de Sédaiges and his squadron, who left at the same time for Kertch. I take this opportunity of mentioning the efficient, cordial, and hearty co-operation I received on every occasion from M. de Sédaiges and the ships under the command of his Imperial Majesty's flag in my good fortune to have him for my colleague.

PORTRAITS OF LORD RAGLAN AND SIR EDMUND LYONS.

By the courtesy of Messrs. Gambart we are enabled to present our readers with the accompanying *facsimile* Engravings from Portraits of the above distinguished Commanders, sketched by Mr Armitage during their present campaign. At home these presentments of the two masterminds who are commanding our forces, by land and sea, will be regarded with peculiar interest; these are characteristic of the firmness and energy which are indispensable to their glorious termination of the mighty struggle in which we are now engaged.

The reader will find in the ILLUSTRATED LONDON NEWS, No. 606, a Memoir of the Life and Services of Lord Raglan; and, in No. 691, of Sir Edmund Lyons.

NEWSPAPER POSTAGE IN INDIA.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

65, Cornhill, June 28, 1855.

With reference to the announcement of your intention to publish an unstamped Supplement with each number of the ILLUSTRATED LONDON NEWS, we beg to invite your attention to a circumstance connected therewith of considerable importance to your Subscribers in the interior of India.

The ILLUSTRATED LONDON NEWS, with the Supplement, will exceed twelve tolahs (about five ounces) in weight, which is the limit allowed for the transmission of newspapers by Letter Dâk, as we understand the Act for the Regulation of the Indian Post-office, which came into operation last year, consequently, until some alteration is made in these regulations, the ILLUSTRATED LONDON NEWS cannot be forwarded by Dâk Bhargy (parcel post), and thus delayed for some days of even weeks beyond the period at which newspapers of a less weight are received.

As it is impossible for us to communicate with each of our constituents in India receiving the ILLUSTRATED LONDON NEWS through our agency, and as the postal regulations of India are not generally known in this country, we would suggest that you should insert a notification on this subject in your next publication, in order to explain to your Indian Subscribers the delay which will probably occur in the transmission of the ILLUSTRATED LONDON NEWS by them.—We are, dear Sir, your faithful and obedient servants,

SMITH, ELDER, and Co.

NEWSPAPERS TO CANADA.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

Permit me to earnestly call your attention to the circular issued yesterday by the Post-office with reference to the transmission of newspapers from the United Kingdom to British Colonies and Foreign States.

Hitherto, the public have been aware, except newspapers could be transmitted free between Great Britain and her colonies, with the exception of Canada, upon each newspaper for which there has been a rate, for transit through the United States, of 1d. currency (about a fifth less than 1d. sterling), paid at destination, but by the new circular every British Colony will henceforth be subjected to a postal rate in addition to the newspaper-stamp, of 1d. for each newspaper posted in Great Britain, and in the case of Canada to a postal rate of 2d.

At present the cost per annum of receiving the *Times* in this last-named country varies, according to the arrangement made with the London newsvendor, from £4 15s. 8d. per annum to £6 15s., which latter sum would be the full price of each publication, with the usual penny currency added: but by the new circular £3 8s. must be added, or about 50 per cent on the present average price of your journal. In the case of stamped newspapers published for 4d. the Post-office is about to impose a new tax of 50 per cent upon those sent to Canada, and of 66 per cent upon those sent to all other British Colonies; and on 3d. stamped papers the proportion of the new tax will be 66 per cent for Canada, and 33⅓ for all other Colonies.

It should be understood that while British possessions are to be subjected, under the price of a postal rate, to the above new charges, the suggestion cannot be made in the printed circulars of open newspapers forwarded to foreign countries, for they can be sent to France, Belgium, Prussia, &c., free, as heretofore.

It is clear that, unless energetic steps be at once taken, the Post-office will endeavour to reduce the loss of revenue to be occasioned by the partial remission of the Newspaper-stamp Duty in this country by the imposition of a tax of which the British Post-office revenue will alone get the benefit, for the circular states that the "rate must, in all cases, be prepaid, otherwise the newspapers cannot be sent."

In fact, while, under pressure, newspaper free trade is extended in one part of her Majesty's dominions, it is counteracted by discreditable restrictions as regards all others, and thus, too, at the very time that England's most important colony has passed a law ensuring the free transmission of its unstamped newspapers throughout its entire extent.

Having some experience of colonial life, there is no difficulty in my predicting the displeasure that will be felt in every colony on the receipt of the circular, and a few weeks will certainly bring back to England indignant remonstrances from every one of them.

You will yourself, no doubt, deal with that part of the circular by which an additional annual registration fee is to be paid by each newspaper claiming the privilege of transmission abroad.

I am, Sir, your very obedient servant,

CUSACK P. RONEY.

[NOTE OF THE EDITOR.—With reference to the letter of Messrs. Smith and Elder, we hope the Indian Government will be induced to relax its postal regulations in favour of the transmission of Newspapers, and thereby set a good example to other authorities at home. The officials at St Martin-le-Grand, as is well known, have with no favour upon newspapers sent by post, and would rather not be encumbered with the duty of forwarding them. They have taken advantage of the recent changes in the law—changes which will no doubt lead to a great increase in the number of newspapers—to impose an additional postage on newspapers for Australia and several other Colonies. The Government of India is somewhat wiser, as Sir Cusack Roney informs us; for, looking at newspapers as the best instructors of the people, it has, within the last two months under taken without imposing a stamp-duty to convey the Canadian news papers free to every part of the Colony. We have yet some things to learn, even from our Colonies.]

ADMINISTRATIVE REFORM ASSOCIATION

MEETING AT DRURY-LANE THEATRE.

The second meeting of the Administrative Reform Association was held on Wednesday evening in Drury-lane Theatre. Amongst those present were—Messrs. Charles Dickens, W. Scholefield, M.P.; F. Mowatt, M.P.; Apsley Pellatt, M.P.; Sir J. Duke, M.P.; J. D. Harvey, M.P.; J. Murrough, M.P.; J. A. Wise, M.P.; Major Reed, M.P.; A. H. Layard, M.P.; W. Tite, M.P.; J. P. Gassiot, W. J. Hall, G. Bishop, jun., J. Ingram Travers, R. Ogilby, W. Lister, B. Wilson, J. S. Allan, W. Ayrton, G. Moore, F. Bennoch, Donald Nicoll, J. P. Foster, T. Pollock, W. Edgar, jun., Peter Graham, George Stagg, Forster Graham, Rev. Robert Walpole, J. C. Dutchburn, F. Ortzmann, C. George, J. A. Nicholay, (Chevers), A. Bellamy, Messrs. Nichell, Jacob Bell, Joseph Harvey, J. Fennings, R. L. Fennings, W. S. Burton, J. G. J. Greene, J. W. Marshall, John Wade; John Vaux, of Harwich, John Norton, of Lincoln; Henry Railway, M.P., of Smithegate; H. E. Hoole, of Sheffield; W. Burnley Hume, F. L. Sloss, A. S. Ayrton, Johnston Neale (of Ingbirchworth), J. Higgins, Travers Buxton, B. L. Smith, Dr Bell, Mr Proctor, &c.

Mr Monckton, the President of the Association, occupied the chair.

The Chairman, in opening the proceedings, said they could do nothing without the aid of the public press (Cheers). A different class of men was wanted in the House of Commons (Cheers). Until the country placed men there who would not care about blackballing at the clubs—men who could speak the truth to the people, and tell them plainly what it would be right anything executed. It might be [illegible] to be brought to communicate responsibility to the House of Commons [illegible] but [illegible] take up the position which he [illegible] fearlessly, and act upon it to the letter (Cheers). Unless the large constituencies sent faithful men to Parliament, it was no use to ask for Administrative Reform.

Mr. C. Dickens, on presenting himself to the meeting, was received with loud and protracted cheering. He said he could not better express his sense of the honour Layard had done him in awarding to him by that great assemblage than by promising to compress what he should address to it within the closest possible limits. It was more than eighteen hundred years since there was a set of men who thought that they could be heard for much speaking. As they had prided themselves very much since that time, and, as he observed, they flourished at the present moment to a surprising extent about Westminster, he would do his best to avoid adding to the number of that prolific race. The noble Lord at the head of the Government, when he wondered in Parliament about a week ago that Mr Layard could find time to be awarded to him by that great assemblage than by promising to compress what he should address to it within the closest possible limits. It was more than eighteen hundred years since there was a set of men who thought that they could be heard for much speaking. As they had prided themselves very much since that time, and, as he observed, they flourished at the present moment to a surprising extent about Westminster, he would do his best to avoid adding to the number of that prolific race. The noble Lord at the head of the Government, when he wondered in Parliament about a week ago that Mr Layard could find time having stated in that place what the whole country knew perfectly well he was—(Cheers)—and what no one could by possibility better know to be true than those distinguished supporters of the noble Lord who had the advantage of hearing him and cheering him night after night in the first became remarkable, namely, that he did constantly joke at a time when this country was plunged in deep distress and grave—when the noble Lord wondered so much that the man of this age who had, by his genius and adventurous spirit, done the most to distinguish himself and it, did not blush for the trumpery—as indeed it was—some "between the wind and his nobility," his Lordship finished with an airy period about the private theatricals at Drury-lane Theatre.

DOWNING-STREET THEATRICALS.

He (Mr Dickens) had some slight acquaintance with theatricals, both private and public, and he would accept the jests of the noble Lord. He would not say that it be wanted to form a company of Her Majesty's servants, he thought he should know where to lay his hand on the "comic old gentleman." Lord Daughter knew that, if he wanted to get up a genuine comic old man, he should turn to what establishment to go for tucks and changes, as also for a considerable troop of supernumeraries, to trip up one another in that contention with which many of them were familiar, on those and other boards, and in which the principal matters thrown about were loaves and fishes—(Loud laughter)—but he would endeavour to give the noble Lord some reasons for these private theatricals; and why, however ardently his Lordship might desire to "ring the curtain down," there was not the faintest chance of these performances ever coming to a conclusion (Cheers). The reason was, that the public theatricals which the noble Lord was so condescending as to manage, was so intolerably bad, the machinery was so cumbrous, the parts so ill-understood, the company so full of "walking gentlemen," the manager had such a large family who were so bent on putting that family into what was theatrically called "first business," not because of their fitness for it, but because they were his family—it was for these reasons that they felt obliged to organise an opposition (Cheers hear). They had seen the "Comedy of Errors" played so dismally like a tragedy that they could scarcely bear it, and therefore had felt themselves obliged, in their own defence, to get up "a little piece" themselves (Cheers)—hoping before the play was over to improve the noble Lord on that head. It had also occurred to them that they had no right to improve him without his licence, they ventured to claim that right in virtue of his Lordship's orchestra, consisting of a very powerful piper, whom they always paid (Laughter).

REASONS FOR JOINING THE ASSOCIATION.

As this was the first political meeting at which he (Mr. Dickens) had attended, and as his trade and calling was not associated with politics, perhaps it might be useful for him to explain why he had come here, since the reasons that had influenced him might be still balancing in the minds of other men. He wanted at all times and places sincerely to do his duty by his country, and he wanted to see that duty efficiently performed; and there was nothing disinterested or meritorious in that, for never could he sufficiently acknowledge the confidence and friendship which they had long placed in him. Upon those grounds he had felt it right to say that he should never change, nor overstep further, nor for a longer period than that night. Whoever devoted himself to literature must be content to do the public service by the means open to him, and not efficiently serve two masters. Within his sphere of action he had, however, endeavoured to understand our social grievances, and to help to set them right. When the *Times* newspaper proved its power in a terrible case, in reference to the costly absurdities of that great labyrinth of which it had on the face of the earth, and which

NOTES OF THE WEEK.

LAST Sunday a number of people—(thinking, as I do, that they did a thing which, however ill-mannered, is likely to have very good results, I will not call them a mob) hooted and groaned at the carriages in Hyde-park, and told their occupants to go to Church. The meaning of this unusual proceeding was that the aristocracy should be shown that beyond a certain point, they would not willingly submit to being dragooned into Sabbath-keeping, or made righteous by Act of Parliament. Lord Robert Grosvenor, Lord Ebrington, and their fellow-sers, have succeeded by their Sunday Trading Bill in driving the usually submissive race of London labourers into what in more excitable countries is called a "manifestation." The scene was far more laughable than dangerous—quite as comfortable as the fracas of the most good-humored set-to in the world—yet the object sought and probably to be gained by it for, at no obedience to the law, the bill is not abandoned by its introducers, there is little doubt that, though rather late in the day, the House of Commons will give it its *quietus* on the third reading. Surely no bill ever went so near to passing into law that was so tyrannical, so unequal, and so unnecessary as this. Can it be said with the least appearance of truth that the Sunday is ill observed in London? The empty streets, the crowded churches, the proverbial dullness of the day, attest the contrary. Would Lord R. Grosvenor and suite wish to model all men on the fashion of which Drunken Barnaby, in his journal (*Rh 4 Barnabee Itinerarium*), tell us he saw an example

> at Lazeham,
> Which we Lean a Pattern one
> Killing of his cat on Monday,
> For killing of a mouse on Sunday?

The suggestion of some of the really righteous, that poor men might easily avoid desecration of the sabbath in the way of purchasing meat and drink by laying in their Sunday stores on the Saturday, reminds one of the couple to whom which some gentlemen argued at the Literary Fund meeting last week that authors could not want another club, as the Athenæum was open to them; which, as Mr. Dickens said, was equally true of the London Tavern. It never occurred to these good people to consider at what time of night the poor man's wages are often paid, or in what an effete and exhausted condition he may be when that desirable operation does take place; nor yet to calculate that a single, or, perhaps, two, ill-ventilated rooms, populous with children, damp with drying linen, musty with inevitable dirt, is not exactly the most desirable larder for preserving not at first too fresh meat or vegetables. The slight pressure from without exercised in Hyde-park has had the effect of making the opposition the further progress of the bill still more with almost certain of success. This opposition is cheerful to mean well (while the bill altogether, in any that the third reading be deferred for three months—while Mr Russell prefers the *previous question*—the extension of its action to clubhouses, private houses, Stars and Garters, Crowns and Sceptres, and Trafalgars.

Simultaneously with this late-found opposition to the Sunday Trading bill, there came Mr H Berkeley's omnibus-bill on Mr W Patten's Beer Bill of last Session, that celebrated *beast sole* traveller Act which has been mum the groundwork for several good farces, and has given rise to a vast number of magisterial decisions which read like jokes in the aforesaid comic interludes. Mr. Berkeley gave an amusing list of conflicting definitions of the *bonâ fide* traveller. One of the queerest was that of a Liverpool Rhadamanthus, who laid it down that a sailor going to join his ship was a traveller, but when returned was at the end of his voyage was not. There seemed to be a pretty general feeling in the House that the Beer Bill ought to be altered even its godfather, Mr. Patten, seemed to assent to this), if not abrogated. It would be well if members of Parliament would bear in mind that, however desirable the result intended to be produced may be, it is always dangerous to make laws whose action affects only the poor, and from which the rich necessarily escape. The distinctions between wealth and poverty are already quite sufficiently marked in this country without deepening them by legislative enactment. The compelling poor men to observe the Lord's-day by law, under penalties, is extremely likely to defeat its own object, and make them take a dislike to the Church altogether, by connecting in their minds the pulpit with summary convictions, and the ministry of the Gospel with thirst, hunger, and discomfort; just as the practice of teaching children the rudiments of Latin out of Horace or Virgil has given many a man a dislike to the works of those gentlemen, from which in his maturer years he has never been able to recover.

The Administrative Reform Association held their second meeting on Wednesday at Drury lane Theatre. There was an immense attendance—in fact, there never was a better "house," except, perhaps, at the amateur pantomime. Mr. Dickens was the star of the evening; no doubt a great many people went principally, if not solely, to hear him speak. Those who did could not have been disappointed, for it would be difficult, anywhere, to find a better speaker than Mr. Dickens, and on this occasion he outdid himself. The easy command of simple and appropriate language, the perfectly balanced sentence, the pleasant mingling of humour with gravity—*serio mixta jocis*—the tact which teaches exactly where to leave off, and never endangers a strong position by one word too much, the perfect voice and pronunciation—all qualities possessed in the fullest degree by Mr. Dickens—make it a pleasure of the highest kind to listen to him. There are very few men in either House of Parliament who come up to him as a public speaker. It is impossible to doubt that the Administrative Reform movement is assuming serious proportions. Even Lord Palmerston will not like to sneer at it much longer as the "Pure Parliamentarians" yet it is not easy to imagine what practical result it can have, beyond what one speaker on Wednesday frankly confessed was all he expected from it, namely, that it would make Ministers more earnest in what they did, and more particular as to whom they appointed.

As to the appointment of merchants or manufacturers to the higher posts in the Government, it is mere nonsense to talk of it. Admit ing and that as admitting a good deal—that a man whose chief attention through life has been turned to one particular branch of commerce is likely to be well adapted to preside at the Exchequer or the India Board, or the Colonial-office, we know very well that even the second-rate men of the mercantile classes would not—indeed could not—afford to accept the offices. More than this, it must be admitted that certain recent disclosures do not place the commercial character of the country in a very favourable light. The case of Davidson and Gordon, for instance, who, bankrupt in 1849, were allowed to do business to the amount of two millions sterling in 1853, or the even more scandalous case of Strahan and Paul do not encourage the belief that it would be well to put the affairs of the nation entirely into the hands of Lombard street or Austin-friars. With regard to inferior appointments, no doubt some jobbing exists; but it argues very little knowledge of human nature to suppose that, with a popular House of Commons, this can ever cease. Public opinion has done much to diminish it, and will do more. For one milk-and water piece of jobbery that takes place now, there were a dozen barefaced ones in the days of Sir Robert Walpole. But even here little clarity lies in the constituencies—far less in the members themselves—and least of all in the [illegible] that [illegible] to get the best men into vacant places, but as a country gentleman would rather engage a clever lawyer or footman, than oblige the bishop, or send his farm could to [illegible] so [illegible] and Dukes of our country towns renouncing the privilege of using their votes at election times as an impelling power to their cousins and nephews in their careers in the Excise or Customs.

BRIGANDAGE AT SMYRNA.—The abduction of Dr. M'Craith, an English physician resident here, by a band of brigands on Sunday last, is now the engrossing topic of conversation. A band of some thirty robbers, armed to the teeth, established themselves about half a mile from Boujaabat, on the road-side, and waylaid a number of persons, whom they robbed of money, [illegible] The [illegible] Dr. M'Craith, [illegible] M. Mavrogeni, [illegible] across a plain some eight miles in width to the mountains, where they arrived at midnight, and sent M. Mavrogeni back with a letter from Dr. M'Craith and M. Mauge, saying that the robbers demanded £1000 for ransom. He fell in daylight with Colone, Starke, Hamid Bey, and a large body of armed police in pursuit of the robbers, and delivered his letters, but absolutely refused to act as a guide, or to give information as to the whereabouts of the band, under fear probably of their menaces and vengeance, and, when forced to proceed, it is said he [illegible] [illegible] [illegible]

THE RIGHT HON. THE EARL OF DERBY LAYING THE FOUNDATION-STONE OF THE UNIVERSITY MUSEUM, OXFORD.

the stone was laid, was raised about the height of five feet from the ground. Upon this were ranged two rows of seats in the form of half an octagon: these were appropriated to the various dignitaries of the University. In front of these were ranged a set of chairs for ladies with special tickets. Chairs were placed at the back of the stone for the Chancellor and Vice-Chancellor; and near to the ladies was placed a chair for the Countess of Derby.

At about three o'clock the procession arrived on the platform, the Chancellor and Vice-Chancellor taking their places, followed by the Doctors, Fellows, and dignitaries, all in full costume, presenting—from the varied colours of black, red, white, and gold, mixing with the light and elegant costume of the ladies—a really rich and striking scene. The coup-d'œil beyond the platform was scarcely less striking. The banners of the various countries in alliance with ours floated proudly in the breeze from the angles and in front of the tented scene.

The ceremony began with a chant and an appropriate prayer and service for the occasion; after which Lord Derby addressed the assembled audience in a clear voice, pointing out the advantages which he hoped would result from such a foundation, and asking for contributions—either to enrich the Museum or to decorate the building. The trowel, borne on a cushion by two interesting children (the son and daughter of Dr. Acland), was then handed to the Earl; the architects, Sir Thomas Deane, his son, and Mr. Woodward standing round. Mr. Lucas, the contractor to the works carefully adjusted the stone; after which Lord Derby, in true masonic style, spread the mortar; the plates of lead, and one with the inscription, were then placed in their resting-place in the under stone, the upper one was lowered into its place; after which his Lordship tapped it with a mallet, and used the level. The ceremony closed with the National Anthem.

The trowel, which is of silver and bronze, is highly finished, and novel in form. It is enriched by an engraved Gothic pattern on the upper, or silver, side: it was made by Skidmore, of Coventry, who has contracted for the foliated wrought-iron work which will decorate the quadrangle of the building. The trowel bears the following inscription:—

Oxford University Museum. Chief Stone laid 20th June, 1855, by the Right Hon. Edward Geoffrey Earl of Derby, Chancellor. Thomas Deane, Knt.; Thomas N. Deane, and Benjamin Woodward, Architects.

The plan of the new Museum building consists of a quadrangle 112 feet square, to be covered with an iron roof, hereafter to be described, and surrounded by a double or two-storied cloister, with open arcades, giving access to the several apartments on each floor. These apartments are lecture-rooms, professors' sitting and work rooms, and occupying the entire length of the western or principal side seen in our View. On the upper floor are the apartments devoted to the Entomological Collection, munificently presented by Mr. Hope, and the library, intended to contain the books, &c., also chiefly presented by him. These rooms are open to the roof, and are separated by an ante-chamber in the tower. On the northern side, on the same floor, opening to the cloister (upper), is a lecture-room for 500 persons. The building seen in the centre of the View, with the four chimneys, is the great laboratory, and on the extreme right is the private residence for the Curator. The quadrangle forms the Museum: and this portion of the building, it is expected, will be peculiarly beautiful and striking, as the whole of the shafts in the two arcades surrounding it are in a fair way of being executed (by the aid of private contributions) in beautiful marbles, serpentines, &c., of this country, and the capitals carved in the same way.

It is proposed to adorn the interior of the building with statues of eminent men, by means of individual donations; and Lord Derby stated, that a certain number of these had been already subscribed for by the Queen, the Bachelors of Arts, and Undergraduates.

At the annual meeting of the Oxford Architectural Society, on the 13th inst., Dr. Acland said, with reference to the new Museum, that Oxford was about to perform an experiment: it was about to try how Gothic art could deal with those railway materials—iron and glass; and he was convinced, when the interior court of this Museum was seen, with its roof of glass supported by shafts of iron, while the pillars and columns around were composed of variously-coloured marbles, illustrating different geological strata and ages of the world, and the capitals represented the several descriptions of Flora, that it would be felt that a problem had been solved of the greatest importance to architecture.

SOUTH-WEST VIEW OF THE UNIVERSITY MUSEUM, OXFORD.

TESTIMONIALS PRESENTED TO MR. ALDERMAN SPIERS, LATE MAYOR OF OXFORD.

PRESENTATION OF TESTIMONIALS TO
MR. ALDERMAN SPIERS,
LATE MAYOR OF OXFORD.

OUR readers will recollect that about twelve months since Mr. R. J. Spiers generously did his best to honour art and literature. In return, art and literature have done their best to honour Mr Spiers. On the 16th inst. there was a great gathering of artists and men of letters at Oxford, to carry out the plan of presenting to the late Mayor an Album of superb and costly character. The idea of this testimonial originated with Mr. John Leighton. It consists of a solander case of Levant morocco, splendidly hand-tooled, and illuminated in coloured leathers, and lined with Spitalfields silk of the richest manufacture. Its size is about 24 inches by 18. It is protected by an outer case of finely-grained oak, chastely ornamented and bound with brass-work. The contents number about 125 compositions, literary and artistic; and among the contributors are some of the most eminent men of the time.

In return for his eminent services the citizens of Oxford presented, on the same day, to Mr. Spiers, several pieces of Plate of the value of 300 guineas. These magnificent examples of presentation plate show an amount of taste in design and skill in execution rarely seen in such works The principal cup is made of silver, partially gilt, and in the cinque-cento style of decoration. It is thirty inches high, and covered with bulbs and arabesque ornaments of the most elaborate character. The cup itself has been copied from an exquisite example in the Print room of the British Museum, and which is attributed to Cellini. The two smaller cups are in the same style, equally elaborate and elegant, and stand eighteen inches high.

In addition to these vessels, there are two salt-cellars, standing seven inches high, of a very graceful nautilus form, presented to Mrs Spiers, as a civic compliment in consequence of her having given birth to a son during the mayoralty of her husband

To these valuable articles was added a richly chased snuff-box, bearing this inscription "This snuff-box, with five other pieces of plate, was presented, June 16, 1855, to Richard James Spiers, Esq., Alderman and late Mayor of Oxford, by his friends, as well in testimony of their personal regard and of their admiration of his public conduct, as in remembrance of the splendid and graceful hospitality which distinguished his mayoralty, A.D. 1854. The salt-cellars bear inscriptions of a similar nature. The armorial bearings of the city and of Mr. Spiers appear on the large grace-cup, and those of Mr. and Mrs. Spiers on the smaller ones.

MR. LEONE LEVI.

MR. LEONE LEVI, Lecturer on Commercial Law at King's College, London, was born at Ancona, in Italy, in the year 1820; and, being intended to follow mercantile pursuits, his education was essentially practical. For several years he was commercially occupied in his native town, an important port of the Adriatic. In 1844 he arrived in Liverpool, and by laborious study he overcame the difficulties of our language in the incredibly short period of two months. In 1847 he received his certificate of naturalisation, and became a British subject. In Liverpool, Mr. Levi entered into several contracts, and he first experienced the inconvenience resulting from the absence there of a Chamber and Tribunal of Commerce. He proposed their introduction in a pamphlet on the subject and the question soon became one of public interest, and was freely discussed in the columns of the Liverpool press. A public meeting was ultimately held, and in November, 1849, the Liverpool Chamber of Commerce was established, and Mr. Levi was appointed the Honorary

MR. LEONE LEVI.—FROM A DAGUERREOTYPE BY BEARD.

Secretary. In that capacity he issued circulars to foreign merchants requesting information on similar institutions abroad. The answers received were in various languages, and chiefly related to legal anomalies respecting mercantile matters, which suggested to Mr. Levi's mind the idea of a work on the commercial law of the world. With his usual energy he immediately began to collect the necessary information. While pursuing his researches he introduced himself to the Earl of Harrowby (formerly Lord Sandon, Member for Liverpool for sixteen years, whose influential support soon became of inestimable value. The Liverpool Chamber of Commerce being firmly established, Mr. Levi received the thanks of the merchants; and soon afterwards similar institutions were founded, and such as existed received new life, at Leeds, Bradford Bristol, and other places. The condition of our commercial code was engaging the attention of the Liverpool Chamber, and Mr. Levi addressed a letter to the President on the Law of Arbitration, with the foreign laws on the subject. The materials for his great work having

ANNIVERSARY OF THE WINDSOR ROYAL ASSOCIATION, IN THE HOME PARK.—HIS ROYAL HIGHNESS PRINCE ALBERT AWARDING THE PRIZES. (SEE NEXT PAGE.)

been collected, he removed to Edinburgh to arrange them for publication, and the first part of the "Commercial Law of the World" appeared in October, 1850. In the preface he proposed the introduction of an international code of commercial law, and suggested that a conference of deputies from all nations should be held for the consideration of the subject. This was addressed to his Royal Highness Prince Albert, and resulted in Mr. Levi being summoned to Windsor Castle to explain his views more fully. Soon afterwards the Lord Provost of Edinburgh invited him to deliver a lecture in that city, and explain his novel scheme. The lecture was repeated at Glasgow; and afterwards in London, at the rooms of the Law Amendment Society, the Earl of Harrowby in the chair. The best proof of the influence attaching the commercial laws and statistical documents of all nations, at Birmingham, Dublin, Hull, Bradford, Leeds, Belfast, Dundee, Aberdeen, and other influential towns and cities. This comparatively unknown agitation resulted in a conference held in London, at which deputies attended from every town which Mr. Levi had visited. This was designated "the first mercantile Parliament," and led to the appointment of a Royal Commission in June, 1853, to inquire into the expediency of assimilating the mercantile laws of England, Scotland, and Ireland.

In December, 1852, the Council of King's College, with exemplary forethought and liberality, appointed Mr. Levi lecturer on commercial law. The lectures, which were also addressed to mercantile men, attracted the attention of several of the leading merchants of the metropolis, and suggested the formation of a Mercantile and Maritime College in the city of London; in furtherance of which a public meeting was held at the London Tavern in April, 1853—the Earl of Harrowby in the chair—when a large and influential committee was appointed to endeavour to establish the scheme. In March, 1853, the Emperor of Austria granted to Mr. Levi the golden medal for scientific merit; and in August, 1853, the King of Prussia awarded the great gold medal reserved for works of distinguished merit to Mr. Levi's book on commercial law. At the Statistical Congress held at Brussels, last year, Mr. Levi was appointed to represent the Liverpool and Hull Chambers of Commerce, and the Edinburgh Law Reform Committee, and subsequently reported the proceedings of the Congress to the Statistical Society of London.

In June, 1851, the Council of the Society of Arts issued an advertisement announcing that the Society's Swiney prize of 100 sovereigns, in a silver goblet of like value, would, in January, 1852, be awarded to the best published Treatise on Jurisprudence, which was more especially to relate to arts and manufactures. The advertisement was circulated through out Europe and America; and on the 20th of January, 1854, the prize was awarded to Mr. Levi's book, which may be thus described. It exhibits the commercial law of the United Kingdom and Ireland reduced into the form of a code, and compared with the codes and laws of commerce of about forty mercantile countries, placed side by side something in the manner of a polyglot Bible. Most of the foreign laws are now for the first time rendered into English. It also contains a statistical chart in which appears at a glance the area, population, revenue, expenditure, public debt, produce, manufactures, imports, exports, shipping, currency, money, weights, measures, and railways, of all countries. The long list of works studied occupies a space sufficient to spread the smallest Lear, and may the head ache with wonder at the indomitable courage required and exerted to carry a man through so many dry details, written in almost every European language. The wonder is increased when we know that nearly all have been translated by Levi's own hand.

Undismayed by difficulty, and encouraged by past success, he has recently published a popular exposition in a "Manual of the Mercantile Law of the United Kingdom;" a work much needed, and which cannot fail to be of great advantage to the thoroughly mercantile community.

Mr. Levi was recently elected a fellow of the Society of Antiquaries, as he is of the Statistical Society of London, and member of many other scientific societies, and honorary life member of the Liverpool Chamber of Commerce.

The gentleman whose career we have thus slightly sketched is another instance of what may be accomplished by a man steadily pursuing the course he has chosen, and suppresses the importance of men devoting their powers to the fulfilment of one work, rather than spreading their energies over a large number of studies—becoming really great in none.

THE WINDSOR ROYAL ASSOCIATION.

THE sixth anniversary of the Royal Association for Improving the Condition of Labourers and the Working Classes living at Windsor, Eton, Clewer, Holy Trinity, Old Windsor, Sunninghill, Sunningdale, Winkfield, Datchet, and Egham, was held on Friday week, in the Guildhall of the former borough. The founder and patron of the association, arrived at the Windsor station of the South Western Railway, from Buckingham Palace, at four o'clock, attended by Colonel Hood, Colonel Biddulph, and Captain the Hon. D. de Ross, and proceeded in a pony phaeton to the Guildhall in Windsor, where he was received by the committee of management, amidst the cheers of a large assembly of the nobility and gentry, and the happy exhibitors and candidates. The Prince took his station on a dais in front of the centre tent, surrounded by his commander and a brilliant company. The report of the society for the past year was then read by the hon. secretary: and the presentation of prizes to each successful candidate immediately commenced—the Prince presenting them with some pleasing and suitable remark, which must have been alike gratifying and encouraging to the deserving recipients. Upon the suggestion of his Royal Highness Prince Albert, Thomas Arthur Moore, Esq., and Mr. Wright, the honorary secretary and actuary of the Windsor and Eton Savings-bank, attended on the ground, having prepared about 100 pass or depositors' books, in which the amounts of all prizes of 10s. and upwards were entered as so much money deposited in the bank; the Prince wisely conceiving that many persons would be induces to add to their little store rather than diminish it whence once they left the establishment. Many of the successful candidates availed themselves of this opportunity, and their books were received from the Prince with evident satisfaction.

The arrangement of the tents—twelve in number—was generally the same as in former years; but the flower-tent was a new feature, and the exhibition of plants, &c., was a most very attractive addition to the cottagers' productions which constituted the exhibition of former years. This display of flowers and fruit was invited to test the capabilities of the neighbourhood, and to ascertain if a horticultural society could be successfully established. On the point both Prince and hon. secretary gave opinions after the experience of Friday. It is also well known that more *first prizes* from the great metropolitan exhibitions come to this neighbourhood than to any other district.

The specimens of handicraft and needlework included, besides plain needlework, marking, wearing apparel generally, collars, pincushions, and mats; there were crochet-work and embroidery, and a hearth-rug, a quilt, and a carpet, composed of innumerable pieces. Then, in addition to chairs, a work-table, a workbox, &c., there was a model of a cottage, a set of miniature blacksmith's tools, and a number of images well executed.

At two o'clock about 250 candidates, men and women, sat down to an excellent *al fresco* dinner, prepared for them under a commodious tent, and their requirements were well attended to by the committee; the tables were decorated with vases of flowers, and literally groaned with the good old English cheer; afterwards the scene became most interesting, when it might be said, for the first time in their lives, the rich and the poor, were mingled together, "as children of one great father," in the enjoyment of a gay and happy holiday. The exhibition of vegetables was very creditable, considering the lateness of the season; and the needlework and specimens of housewifery surpassed those of former years. At the close of the distribution of the prizes his Royal Highness Prince Albert, attended by the leading members of the committee, inspected the whole of the exhibition, and expressed himself well pleased with its general character, and as he took his departure his Royal Highness was again loudly cheered. In the evening a dinner of the patrons and friends of the society took place in the Town hall, under the able presidency of Mr. John Alves Arbuthnot, of Cowartl.-park, the venison being liberally supplied by her Majesty.

The society which is under the patronage of her Majesty, Prince Albert, and her Royal Highness the Duchess of Kent, is supported by Royal contributions, and also those of the inhabitants of Windsor, Eton, and the neighbourhood, amounting annually to about £200, which this year has been principally expended in providing the dinner, and in the prizes awarded.

The Philippine Monks of Turin have determined to proceed judicially against the Royal decree which comprises their convent among those to be suppressed.

NATIONAL SPORTS.

TURFITES had hardly ceased to talk about "Honest John's" departure from Erdcon, when it was officially announced that Lord Eglinton, out of disappointment at Dirk Hatteraik's running, had also bidden good-bye, for the present at least, to the Turf, on which his "tartan" has been so conspicuous for upwards of three-and-twenty years. He came on it at nineteen, and since 1841 his stud has been in the hands of Fobert, who has placed £75,000 to his credit: £19,426 of which was won in 1849. Doncaster was his favourite course, and three St Legers have fallen to his lot, besides one Derby, two Emperor's Plates, and one Goodwood Cup. His head-roll of English winners begins with Black Diamond, and extends through Potentate, Bellona, St. Bennett, St. Martin, Aristides, Pompey, Dr. Caius, Opera, Blue Bonnet, Van Tromp, Nurisan, Eryx, Elthiron, Knight of Avenel, Vanderdecken, Flying Dutchman, &c. The latter horse won him in stakes alone £18,350, which, added to the winnings of Van Tromp, De Witt, and Vanderdecken, make a sum of no less than £32,880 from the progeny of Barbelle alone. Mr. John Stanley has "bought" his Lordship's stud, but some fancy that the change of quarters betokens a "confidence" rather than a "retirement."

Oulston's defeat of Kingstown at Stockbridge, whose jockey did not choose to make anything like a pace, has caused many to consider the St. Leger a foregone conclusion; and it is said that Mr. Popham is so confident that Oulston's starting in the Derby would not have affected Wild Dayrell's chance, that he has offered Mr. Padwick to run the horses in October for an even thousand a side over the *T. M. M.* at Newmarket.

Unless De Clare's suspensory ligament strengthens marvellously, and Hillman gets round, Oulston may be present to have very few competitors worth speaking of in the St. Leger

The fixtures for the ensuing week lie north-east and west of "the tight little island." Carlisle has wisely reduced its meeting to two days, Tuesday and Wednesday, which have six events apiece, an immense improvement on the old system. All the stakes are remarkably well filled, and sixty pounds will not fail to attract plenty of stalwart wrestlers into the ring on the Swifts, in which Irving, Weightman, Jackson, Gordon, and Chapman have earned no many champion-belts, by the strength of their sinews and the neatness of their "chips." Worcester has also two days' sport on Thursday and Friday, which will be far beyond an average character; while the Newmarketers (whose Second Spring has been very wisely established in spite of their petition to the Jockey Club) hold their July meeting on Tuesday, Wednesday, and Thursday. The July Stakes is the great feature of Tuesday, but, with the exception of Alastor and Cerva, it does not contain the name of a winner of note among its twenty-seven. Tumbler's Arcot brush down seems to have left the Midsummer Stakes on Wednesday, to Treachery and Pugnator, who carry even weights. The race of the week will be the Chesterfield Stakes on Thursday. Among its thirty six are Bird in Hand, Sister to Exact, Flyaway, Maid of Masham colt, Sister to Orphon, Katherine Logie, and Victoria—in short, crosses of the very choicest blood we have in the kingdom Unfortunately, Lord Chesterfield has nothing in it, not even Peter Wilkins, for a proof of whose alleged wings we must wait till the Glasgow Stakes in the Autumn. Prices were a little more brisk at Tattersall's last Monday, when a most extraordinary hollow-backed colt—brother to the Ban—fell into Lord Maidstone's hands for ten guineas; and next Monday Sir R. Pigott's stud comes to the hammer there. Lord Orford's horses, ten in number, will also be sold at Newmarket on Wednesday, as well as several of Captain Lane's. It is rumoured that this gentleman, as well as Mr. Mare, who has built the best stables in Newmarket, both think of retiring.

The "sky-blue" of Cambridge has at last triumphed over the "Waterloo blue" of Oxford, for the first time since 1849. The average weight of the men was 11 st., and the Oxford boat carried 2 lb. the heaviest hamper. All other regattas seem to pale before that at Henley; and we have never seen more delightful ones than we did this year. Monday is devoted to the Lambeth regatta, as well as to another entitled "The City, Temple, and Strand." On Tuesday the Anglesey Yacht-club has a sailing-match, and the Thames Unity club a four-oar race and a single race, as five p.m., from Putney to Barnes. Wednesday is claimed by the Royal Harwich Yacht-club; and on Saturday the London Royal Yacht club sail their third class yachts.

Lord's will be a sort of extempore Oxford Club on Monday, as sixteen of the University Seven play the United All England eleven (the cricket *scene* will be changed to Vincent-square on Wednesday, where the Marylebone Club will play the "present gentlemen of Winchester School." Amateurs in the metropolis will have "a divided duty" on Thursday, as Surrey and Sussex play their return match at the Oval, while the Marylebone Club and ground are also occupied in playing a return match with the Oxford Undergraduates at Lord's. The Eleven of All England still continue to brave "the warmth of its July." Salisbury Plain will be their tryaling-place on Monday, and on Thursday they adjourn to Reading, whose cricket recollections have been embalmed for all time in the pages of Miss Mitford.

NEW CASTLE-ON-TYNE RACES.—TUESDAY.

Trial Stakes.—Hespocar, 1. Fanny Bingham, 2. North Derby.—Robertson, 1. Dame Judith, 2. Ayton Stakes.—Van Galen, 1. Hesp, 2. Members' Plate.—St. Alfred, 1. Castleburgh, 2. Selling Stakes.—Ostler, 1. Hazby, 2.

WEDNESDAY.

Grand Stand Stakes.—Tilly, 1. Hesp, 2. Northumberland Plate.—Whitenose, 1. Vanlex, 2. Commercial Visitors' Stakes.—Chisel, 1. Bellingham, 2. Five Handicap.—Elemure, 1. Ascot, 2. Queen's Plate.—Rainthorn, 1.

THURSDAY.

Gateshead Stakes.—Courtenay, 1. Neptolemus, 2. Tyne Stakes.—Champion, Maid, 1. William the Third, 2. Gold Cup.—King of Trumps, 1.

ANGLO-SAXON ANTIQUITIES. Mr. Hillier has terminated his successful excavation on Chessel Down, in the Isle of Wight, by the acquisition of additional objects. The articles of interest, which are really of national importance, have been transferred to the collection of Lord Londesborough, and will be deposited at Grimston.

SCOTTISH ANTIQUITIES.—The Society of Antiquaries of Scotland lately addressed the Government, through their President, the Marquis of Breadalbane, requesting that instructions should be given to mark the position of all remains of antiquity on the maps of the Ordnance Survey now in progress. A letter from Lord Panmure to the Marquis of Breadalbane announces the ready compliance of the Government with the wishes of the Society of Antiquaries.

DESTRUCTIVE FIRE AT ST. PETERSBURG.—Intelligence has been received of a severe loss by fire on the 4th inst. at the NEVA STEAMER WORKS, St. Petersburg. Insurances exist in English offices for £16,000 viz., in the Northern, £7400; Royal, £3000; Monarch, £3000, Anchor, £2000; also in three offices at St. Petersburg, and at Hamburg and Amsterdam. It is estimated that the loss will be nearly total

THE UNIVERSAL EXHIBITION OF FINE ARTS.

(From our Special Correspondent.)

THE BELGIAN CONTRIBUTORS (CONCLUDED).

WE resume our review of the Belgian artists before Hamman's picture of "Christopher Columbus, on Board the *Santa-Maria*, Discovering the First Point of American Land." This artist enjoys considerable reputation; and has been said, by a recent French critic, to have discovered "some of the sparkling secrets of Veronese." If this discovery have been made, the old master's secret is well kept in the picture before us. An artist is seriously damaged when he is injudiciously praised. Now, while we fully and cheerfully admit that in this picture there are some good passages of colour; while we cannot withhold our admiration from some careful drawing, we must make serious deductions from the measure of commendation due to a great work. We complain that M. Hamman parades his art—that he has not the strength to hide the machinery by which he produces his effects. The figures cannot remind us of the memorable 11th of October, 1492, for we are unable to forget the models. Every man appears to have been studied certainly from the life, but from model life, which is almost still life. It is here where the broad line runs that separates greatness from mediocrity in art. The man without imagination copies his model, having placed him in a certain attitude; the imaginative man uses the same model, simply as the poet uses the fields that stretch away to the horizon, from the buttercups at his feet. No, M. Hamman is not a great artist. He is a careful painter—with a pleasant palette one of the list of artists who will never offend you, but neither will be once delight or astonish you. He may rank with M. Madon. Far before the performances of these artists: far where the pretentious Scriptoral subjects of Messrs Mathieu and Co.—where the antiquated forms and established lights and shades, and reds and blues of the Italian school are preserved, and where nothing is added to the baldest imitations—are pictures like that of M. Florent Willems' "Interior of a Silk Shop in 1660," noticed in our previous article on the Belgian school. On the one hand you have all the mechanism of art: you have its spelling correctly written, but the letters fairly put together have little or no meaning. The Belgians, following the French, it must be owned, at a most respectful distance—appear inclined to forget the soul, the vital essence of art, in the correct elaboration of muscles, and the fair flow of drapery. To this correctness every other consideration gives way, till you have men, brought up in mediocre French *ateliers*, talk contemptuously of colour, as something fit to keep a child quiet. Say to French artists that the English are good colourists, and many of them will willingly concede the fact, because they have generally a contempt for colour, as their pictures too often testify. This contempt has grown beyond the French frontier, and in the Belgian pupils of French masters the vice of this feeling in art is too often most woefully apparent. You see this vice in the colossal historical picture of the Belgian collection, by M. Edouard de Biefve. It is a scene from French history. The subject is the "Compromise of the Nobles," at Brussels, on the 16th of February, 1566. To French critics it is *the* picture of the Belgian exhibition: it is of course *grandiose*; we are told that "the figures are intelligently grouped," and that "the composition is not without a certain strength." This verdict, lately pronounced by M. Chalons d'Argé, is a very safe one. You may turn it in which way you please—for or against the painter as a colorist. Let us be your pleasant friend, or the critic shall be marked out as a star rising to glorious heights in the realms of art, the critic is with you; if, on the contrary, it be your painful duty to set aside the artist as a polished mediocrity, the critic is still on your side. To trim in criticism is a proceeding to be watched with suspicion. Now it appears to us that no unprejudiced man can throw himself upon the settee opposite this extensive work and fairly examine it without having a very decided opinion on its merits. It is French in every detail—in colour or want of colour, in composition and drawing. But then M. Biefve is the pupil of M. David d'Angers, a French sculptor. You see it at a glance. There is not a figure that does not recall the fact to your mind. The performance should have been in one of the French salons—if the French Hanging Committees could have been persuaded to put it at all! For while we declare the treatment to be French, we cannot add that this treatment has all the strength which young Jérome of the French Classic school displays. The drawing is pretty correct, but neither bold nor original. The figures are all set attitudes again, as in other pictures of the Belgian collection already noticed. The contrast between the calm solemnity of the middle-aged men, and the wild gestures of the young actors in the scene, is about the only evidence of thought throughout the entire performance. This is a touch of study—something which the pupil cannot get either from the round or from the model. All the rest of the picture may be taught. We remember witnessing an interview between a well-known painter and a young fellow who had arrived with a panel in his hand, to submit a copy he had made from an old picture to the judgment of this well known man. The interview was, to the young fellow, an important one. The artist's verdict was to decide the boy's parents to give him up to, or turn him from, art. Only those men whose early dreams has been a life before an easel, can understand the agitation with which the copy was held up to the light for the critic's judgment. The boy was astonished at the coolness of his judge. He was, however, intensely excited when this judge, giving him back the panel, told him that any person of common sense might be taught to copy, and that, if he meant to give him an idea of his power, he might bring him a pocket-full of spy rough, original pen-and-ink or pencil sketches he happened to have at home. The boy went away, but never returned with the sketches. Now, I can imagine that if M. de Biefve had been presented to such a judge with his early works, he would have been similarly dismissed. He would have been told that he had a taste for art—that his eye was true—his pencil likely to become flowing. The picture before us might have been seen in a morning in the dilatory air of his early Academy studies. But taste is not strength. To have a fine appreciation of poetry is not to have the power of distilling the poetic essence! This point is too often neglected, and the result is a collection of paintings like that exhibited by the Belgians. There is Joseph Stevens, brother of the artist we have already noticed to quote another notable instance from the Belgian department! Are not his cats and dogs plain plagiarisms from Landseer? Even the title of his pictures are drawn from the Royal Academy catalogue! The "good Mother," representing a bitch with two or three pups before a wooden bowl—is an effective copy. Then again the title-deeds to regard an "Unconscious Philosopher," we turn to the number indicated, and find a dog contentedly gnawing a bone. In pictures like these, the force is in the title. Call this picture a dog gnawing a bone, and half its charm is lost. The title should be engraved upon the frame, therefore, as part of the work. Without this precaution the fable loses all its force, it becomes a bit of literal precision. We then have to notice whether there is a charm in the simple treatment of the dog. In the comparison of the bone! With the sense alway present to us, that the spirit of the performance is one which children have; viz., imitation: it is difficult, perhaps, to pay the moderate share of praise due to M. Stevens's free hand, and pleasant colour. He is a good pupil, who can never become a master

We have now rapidly reviewed the important pictures sent by Belgian artists to this first Universal Exhibition of the Fine Arts. We have seen that where Leopold's subjects have borrowed from the Dutch, the Flemish, and the Italian schools: we have watched the influence of the French Academy, with its Classic rage, upon them; we have seen where they have wandered to England for models. But we have found few really original conceptions in the list of works. Alfred Stevens, Florent Willems, and Dyckmans, although not exhibitors of pictures painted by the yard, are the men of strength who have advanced from Brussels to the universal competition in Paris. Of this trio we should be inclined, if called upon, to give the palm to Willems. The girl selecting the silks is a figure that lives in the mind, that comes back to us as the memory of mountain heights and wealth of architecture returns at intervals to charm once more. The French hardly deign to notice this picture: undoubtedly it is *mesquin* to them, and they prefer De Biefve's imposing canvas. This preference is one against which it is almost vain to do battle. The French picture-market has created, and will sustain, the cultivation of the colossal in painting. Every parish church gives a commission for an altar piece, or a church picture of some kind. And in churches small pictures would be ineffective. Thus the market has created the style. The cultivation of the Classic is one in which its professors have regard rather to their interest than to the vital principles of their art. In Belgium similar influences govern art. Pictures are painted chiefly to decorate churches. Hence the pretensions of De Biefve and Co., and the little attention paid to the really superior claims of men like Willems

I have already briefly noticed the progress accomplished in the Palace of Industry. We will now proceed, through the southern doors, round the Panorama Building through a gallery—into the wonderfully-long *annexe*, or Machinery and Raw Produce Gallery. It was only on Sunday last that the gallery was entirely thrown open to the public. It is the feature of the Exhibition undoubtedly. It is unlike any other preceding exhibition of raw produce or machinery. The visitor is wearied with the extent and variety of things exhibited: with the endless lumps of coal, the colossal cakes of soap, the thousands of labelled bottles filled with grain, the endless array of various corn mills, the flail and red agricultural implements, the colossal engines, web like spinning machinery, and the curious models. It is difficult to disentangle the wheels and cranks of one machine from those of its neighbours. In the Raw Produce Department the passages left are too narrow. In the central space is, however, prettily arranged, with a fountain playing from the cups of bronze flowers, painted to imitate nature. Of course, eagles and tricolor flags abound.

Canada has here a rich collection of raw produce. At the eastern end a Canadian timber trophy is being reared; and not far off is the great clock of Mr. Bennett, of Cheapside, hung with velvet, and adorned with showy fringe. Near the clock, Price and Co. exhibit candles; behind lies the finest trade of England in miniature; and in the galleries above, to the right and left, are samples of our colonial produce. Our woods from Jamaica are, I believe, a remarkable series. Further westward I noticed some stout cordage from Holland, an immense Austrian trophy of candles, a Russian model of a coal-mine, and an elaborate series of products from Algeria (the same, I suspect, which the public have examined months ago, in the Bureaux of the Ministry of War). It includes some fine ornamental woods, some excellent cotton and wheat, and some cheap and apparently excellent cigars.

In the collection of English machinery the Hydraulic Apparatus for Testing Chain Cables and Appold's Pump appear at present to be the favourite curiosities. (At page 661 we have engraved another fine specimen of English machinery—M'Connell's Locomotive Express Engine.)

I have omitted to mention among the colossal wonders of the Exhibi-

(Continued on page 656.)

AMUSEMENTS.

ROYAL PRINCESS' THEATRE.—Under the Management of Mr Charles Kean.—On MONDAY, and during the Week, will be presented HENRY VIII., preceded by AWAY WITH MELANCHOLY.

THEATRE ROYAL HAYMARKET.—Last Two Nights of Miss HELEN FAUCIT as PORTIA, LADY OF LYONS. Wednesday, LOVE'S MARTYRDOM. Friday, KING RENE'S DAUGHTER, being Miss Faucit's Benefit. Works by Edelinck, Gerard Audran, Bolswert, Wille, Masson, Desnoyers, Poilly, and others, while the finest of the modern school of Engraving is [illegible] by a splendid series of proofs by Sir

PARIS UNIVERSAL EXHIBITION.

THE FINE ARTS BUILDING.

(*Continued from page* 654.)

tion a huge crystal chandelier, the contribution of Messrs. Defries and Sons, of Houndsditch. This is believed to exceed in magnitude any chandelier hitherto manufactured: it is composed of very rich cut-glass; the height from the top vase to the finial knob is 24 feet, and its circumference 1850 feet.

We quote the following from the *Morning Post* of Wednesday:—

"The number of visitors is increasing daily. On the day of the gratuitous entrance accorded by the Emperor, on the last Sunday in May, the number visitors was 80,118. The crowd at the Beaux-Arts yesterday was also very considerable, amounting to 19,656. The following account of the receipts of the Universal Exhibition, including the Beaux-Arts, may prove interesting. From the 16th to the 31st of May, when the ticket was 5f., the largest sum received on any one day was 12,100f., and the smallest 5295f.; on the 1f. days—from June 2 to June 18—the largest sum received was 14,532f., and the average 13,000f., showing a very slight difference in the daily receipts. On the 20-centimes days the receipts were—June 3, 11,843f.; 10th, 14,307f.; 17th, 16,200f.; and since daily about 20,058f.

"The Emperor and the Empress visited the Exhibition Palace on Saturday. The Empress, as well as the Countess de Montebello and the Marquise de Las Marismas, were drawn through the various parts of the building in rolling chairs. That in which her Majesty was seated is a present from the Queen of England. Their Majesties in particular passed a considerable time in the interior of the Panorama. The long *avenue* was also examined by the Imperial party. M. Fould, Minister of State, was in attendance. The Fine Arts Galleries are crowded daily; and, in fact, the Universal Exhibition is at length attracting the attention it merits."

THE "ANNEXE" FROM THE RIVER.

KING ALFRED THE GREAT TEACHING THE ANGLO-SAXON YOUTH.—DRAWN BY JOHN GILBERT.—(SEE PAGE 661.)

ALFRED THE GREAT TEACHING THE ANGLO-SAXON YOUTH.

Alfred's plans for the intellectual cultivation of his country were directed, in the first instance, to the diffusion of knowledge amongst the great body of the people. Hence he earnestly recommended the translation of "useful books into the language which we all understand; so that all the youth of England, but more especially those who are of gentle kind and in easier circumstances, may be grounded in letters—for they cannot profit in any pursuit until they are well able to read English." This opinion is extracted from a document appearing to have been a circular letter addressed by Alfred to the Bishops; and the desire which it expresses is the best proof of the sincerity of his intentions, and the grasp and comprehensiveness of his mind. The general tendency of the Middle Ages was to centre all erudition in a particular caste, severed from the rest of society. Alfred's labours, on the contrary, were directed to enable every individual to have a share, according to his station and degree, in the common inheritance of wisdom.—*Sir F. Palgrave's History of England, Anglo-Saxon Period.*

THRONED midst the children of his land,
God's law within his just right hand,
Behold the sage, whose righteous rule
Made of fair England one wide school!
O, worthy he to fill a throne;
He counts their need who felt his own;
And in his light that they may bask,
He bends his great soul to the task.

"O youth, that goeth forth to fight
Life's holy battle for the right;
O man, that shall be in the day
When I must cast this crown away;
Through fair and foul—through good and ill—
Heed thou this one true maxim still:
Let God's high law and will be done,
And other law thou needest none.

"Be simple as the flowers ye press
With lowliest foot; be slow to guess
The evils that come all too soon.
Beware to harp on glory's tune:
Yet count him conqueror alone
Who points his sword to God's great throne.
Who dies for Faith is not foredone;—
Kingdoms so lost are kingdoms won.

"Take counsel of the good and sage;
Be lovers of God's glorious page
Vain are all joys in life's poor reach
If ye should lack what this doth teach.
The body's sense is dull and slow
To that fine wit the mind doth show.
Though life may perish as the grass,
Learning and wisdom shall not pass.

"Be truthful aye in deed and word;
Dumb deeds have lied, but God hath heard.
If ye be false, dread more than death
The message-winds that bear your breath:
These shall lend tongues to each low sigh—
These shall betray ye, though ye lie!
Remember still, at Jesus' nod,
The Twelve stand jury before God!"

E. L. HERVEY.

ELECTION OF SHERIFFS.—A common hall was held on Monday for the election of two fit and proper persons to act as Sheriffs of London and Middlesex for the ensuing year. The Lord Mayor, accompanied by several of the Aldermen and Sheriffs, and attended by the usual official paraphernalia of corporation, proceeded in state to the Guildhall, and commenced the proceedings at ten o'clock. The choice of the Livery fell upon Alderman Kennedy and Alderman Rose, who were accordingly declared Sheriffs for the ensuing year amidst the acclamations of their fellow-citizens. The hall was then, after the unanimous re-election of Sir John Key, Bart., as Chamberlain, and of the other officers in the employment of the Livery, dissolved.

M. MONTI'S LECTURES ON SCULPTURE.—M. Monti delivered his fourth lecture on ancient and modern sculpture on Wednesday, the 20th inst., and his fifth on Wednesday last. He commenced his fourth lecture by reverting to the sculpture of the Greeks, a nation which he had not entirely exhausted in his previous discourse; and illustrated their genius and practice by a long series of examples, offering an appropriate artistic comment upon each. The fifth lecture was confined to the rise of Christian art from the time of Constantine to the end of the fifteenth century. The lecturer commenced by remarking that ancient art had decayed before religious art had a dawning up. When the world was reborn, the mind of man had entered upon a new state of existence, and Christian art came to introduce Faith, Hope, and Charity to the knowledge of mankind. Thus, the new religion gave the final blow to the art of the ancients, by banishing mythology, which was found inconsistent with the new light, which naturally required the pure aspect of nature and symbolic expression of thought, illustrative of a future state—an idea to which the types of man turned as a plant does to the sun. The hatred of idols kept Christian art in a subordinate state, and was probably the cause of bas-reliefs being preferred to figures, also painting and mosaic being considered as ornamental. The first art of the new religion began its first step in Rome, and was in the symbolic form. The first of a series of interesting diagrams was here exhibited by M. Monti, which represented some of the sculptures from the catacombs in Rome, executed during the fourth century. It was a graceful figure of the Good Shepherd, intended to represent the Redeemer, and is found to have been repeated many hundred times. The next subjects shown were enlarged diagrams from specimens of art at this period found in the dipt vchs, the art of Rome and the other of Grecian origin. Two centuries after this the storm which had been gathering round the Roman empire burst by the incursions of the Germanic tribes. But Christian art still struggled on, and gradually assumed a character of its own. During the sixth century an immense number of artists spread over Europe. In this way the lecturer traced the progress of art down to the fifteenth century, showing the effects of these two engrafted upon the gravity of the English. In the thirteenth century, also, with the German feeling became softened and blended with that of Italy, which is found in the tomb of Children and Donaldson. M. Monti concluded his entertaining lecture by saying that his next would commence with the great name of Michael Angelo

A CHINESE ARTIST AND POET.—There is at present in this country an engraver with the American missionary, the Rev. Dr Heffer, a Chinese gentleman named Cheuk-see-Tan, a native of Canton, but whose family originally lived in the province of Soo-Chuen. He has been about thirty-five, and he speaks with fluency three of the principal dialects of the empire—the Kwantung Mandarin, the dialect of Pekin, and that of Canton. His mind has received great cultivation in the literature and accomplishments of the Celestial Empire, for he is not only a clever Chinese artist, but also a poet and calligraphist, and well acquainted with the history of these arts as developed in China. Although he has not graduated, he is devoted to literary pursuits, and is preparing a volume of poems, in the interval between his engraving and his home. He visited the South Kensington Museum last week in company with Dr Heffer, and examined the large Chinese Collection which forms part of the great library of that institution

Apartments are being arranged at St. Cloud for the reception of her Majesty and Prince Albert, who are expected in Paris early in August. The château will form a delightful residence for her Majesty. The interior is very beautifully furnished, and rich in Gobelin tapestry, Sevres china, and other exquisites which the Queen is known to appreciate so highly. The Parc de St. Cloud will afford an agreeable promenade for the Royal visitors, and the château being so near Paris ensures every convenience to be desired. Her Majesty will certainly meet with a hearty reception.

The *Piedmontese Gazette* states that the submarine cable, which is to connect Sardinia with the African coast, will arrive at Genoa at the close of July, and that its immersion will take place on the first day of August. M. Brett has signed a contract to that effect with Captain Roberts, of the British Royal Navy. The works of the telegraph, along the coast of Algeria, from La Calle to Rosa, have been undertaken by the French Government. They are conducted with the greatest activity, and will be terminated at that period

DESPATCHES FROM LORD RAGLAN.

War Department, June 25, 1855.

Lord Panmure has this day received a despatch and its enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B. His Lordship has also received from Lord Raglan a nominal list of officers wounded on the 18th June, and a numerical list of non-commissioned officers and privates killed, wounded, and miss ng the same day, copies of which are subjoined:—

Before Sebastopol, June 12, 1855

My Lord,—In my despatch of the 8th instant I informed your Lordship that the Russians had evacuated Soujak Kale on the 28th May.

I have now the satisfaction to announce you that they withdrew from Anapa on the 6th inst., and thus they have abandoned their last stronghold on the coast of Circassia.

Intelligence of this event was brought to Sir E. Lyons by Captain Hughes, who, in his zealous endeavour to give the Admiral the earliest intimation of it, went from Soujak to Kertch in an open boat, and on passing Anapa observed it was burning, it having been set on fire by the Circassians. Captain Hughes, who appears to have very ably, entertains no doubt that the enemy have retired across the Kouban. The abandonment of these Anapa is one of the fruits of the attack and capture of Kertch, and of the brilliant operations of the Allied naval forces in the Sea of Azoff, where no flag now flies but that of England and France.

Nothing material has occurred here since I had the honour of addressing your Lordship on the 9th inst. Both our allies and ourselves are taking advantage of our success to push forward our advances, and great new batteries on the ground which was gained upon that glorious occasion, and I hope I shall soon be able to report further progress.

I have had a second report from Colonel Shirley, in which he begs to draw my attention to the services of officers whom he omitted to mention in the first instance, and whose names I have now the honour to transmit for your Lordship's notice. They are the following: Major Macdonnell, Rifle Brigade, who commanded a portion of that corps, and of the 41st, 47th, 49th, 77th, and 90th Regiments, detached from the guard of the trenches; Captain Ambrose, who had charge of 200 men of the Rifle Brigade, and was unfortunately killed; and Major Dickson, of the same regiment, who was unfortunately killed upon the occasion. Both these officers are serious losses to her Majesty's service.

I enclose returns of the killed and wounded between the 8th to the 7th, and those of the casualties that have since occurred up to the 10th inst. These lists, I much lament to state, are very heavy

The *Alma* has returned from Kertch, having on board the 72nd and 63rd, whose services ceased to be required as soon as it was known that Anapa had been abandoned.

I have, &c.,
RAGLAN.

The Lord Panmure, &c

THE LOSS AT THE QUARRY

NOMINAL RETURN OF OFFICERS WHO HAVE BEEN KILLED FROM THE 4TH TO THE 7TH JUNE, 1855, INCLUSIVE.

Royal Engineers: Captain G Dawson, Lieutenant T G. Lowry. 2nd Battalion 1st Foot: Captain H. B. Mulloy. 30th: Lieutenant H. M. Lawrence. 56th: Lieutenant Richard J. T. Stone. 63rd: Major W. F. Dickson, Captain J. S. Pearse. 68th: Lieutenant Lauris Marshall. 88th: Brevet-Major Edward Bayley, Captain Edmund Corbett, Captain James Wray, Lieutenant E. H. Webb

NOMINAL RETURN OF OFFICERS WHO HAVE BEEN WOUNDED FROM THE 4TH TO THE 7TH JUNE, 1855, INCLUSIVE.

Royal Artillery: Captains Mortimer Adye, severely; A. Gordon, slightly. 2nd Battalion 1st Foot: Lieutenants W. Bellew, dangerously; A. E. Bromley, severely; M. A. Leger, slightly. 3rd: Captain G. J. Ainslie. 4th: Lieutenant Hon. A. Bredon, slightly. 7th: Major Frederick Mair, slightly; Captain W. W. Turner, slightly; Lieutenants H. J. Jones, slightly; L. J. F. Jones, slightly; C. H. Walker, slightly. 17th: Lieutenant J. B. H. Boyd, slightly. 19th: Lieutenant E. W. Evans, severely. 30th: Lieutenant and Adjutant F. Penfield, severely. 30th: Captain M. Dowell, severely. 34th: Captain J. Peel, severely; G. E. H. Weatherall, severely; Lieutenant T. H. Saunders, severely. 41st: Captain H. Dixon, slightly. 47th: Major J. S. Wilkes, severely; Lieutenant and Adjutant P. W. S. Hunter, severe contusion; Lieutenant J. J. C. Irby, dangerously. 49th: Lieutenant-Colonel T. D. Pratt, slightly. 49th: Major J. W. Hamilton, severely; Lieutenant Le Marchant, severely; Lieutenants W. Young, severely; T. F. Keatens, severely. 50th: Lieutenant James Hall, severely; Lieutenant-Colonel H. A. Dalton, severely. 68th: Lieutenant Gould Weguelin, severely. 77th: Captain B. D. Gilby, slightly; Lieutenant M. W. Bayley, slightly. 90th: Lieutenant-Colonel M. F. Campbell, severe contusion. Rifle Brigade: Captain Hon. Arthur Ambrose, slightly. 7th: Lieutenant E. R. Mackesy, severely. Royal Artillery: Lieutenant J. W. Rouse, slightly.

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM 4TH TO 7TH JUNE, 1855, INCLUSIVE.

18th Foot: Private William Ealand, 14th; Private Lawrence Malcahay, 4th: Private Michael Dawson. Royal Artillery: Gunner Joseph Gorman, Gunner Henry Thomas, Thomas Pagdrick, Private Brown

JUNE 7.—2nd Battalion 1st Foot: Lance-Sergeant William Richardson: Privates Bernard Wares, John Anthony, Alfred Lavin, John Martin, John Yiet, John Fagan. 3rd: Private Patrick Ryan. 7th: Colour-Sergeant William R. A. Dobbie, Corporal George Parker, Privates Thomas Latimer, James Kavanagh, William Cox (2), Henry Adams, Thomas Johnson, Jagger, Thomas Wilson, William Thompson, James Ward (2), John Brown, Joseph Burnside. 23rd: Private Joseph Bradford. Private Joseph Cowell, Corporal William Stewart. 31st: Privates Joseph Bradford, Harry Simpson, Peter Kelly, Thomas Mutead, John Murphy, Athanasius Neal, Thomas Hamilton, David Annandale. 34th: Lance-Sergeant John M'Morah, Corporal William Lean, Lance Corporal Robert Thompson, Privates Lawrence Brennan, Thomas Gorman, Thomas Hogan, Jonathan Bell, Thomas Cocks, Cooke Frederick Chittock, John Murphy, Patrick Key, William Brown, Charles Murray, Nathan Webb, Heath O'Neil, Edward Whitehead, Richard Hedges. 49th: Corporal Robert M'Coby, Lance Corporal James Keoghan, Privates George Kenny, Thomas Kenny, James O'Arthur, Thomas M'Carthy, Michael Leddy, John Parker, Patrick Leary, John Hoctor, Patrick O'Halloran, Michael Carney. John Kenny, Patrick Kenny, Andrew Hanlon, Patrick Jagger, Thomas Wilson, William Thompson, James Ward (2), John Brown, Joseph Burnside. 55th: Private Patrick Dempsey. Private Joseph Mc Cann, Corporal William Stewart. 88th: Privates Joseph Bradford, Harry Simpson, Peter Kelly, Thomas Mutead, John Murphy, Athanasius Neal, Thomas Hamilton, David Annandale. 90

Hayne, less slightly; Hunter, severely; John Smith, slightly; William Hudson, slightly; John Davies slightly. 33rd: Private William Woodthorpe, severely; Jane Gallagher, dangerously (since dead); William Dale, severely. 49th Corporal William Bowyer, slightly. 50th: Private John Bush, severely (dead). Private Thomas Rowlands, slightly. 77th: Private John McBarth, severely; Thomas Adcock, slightly. 90th: Sergeant Henry Hall severely; Corporal John Burton, dangerously; Privates Thomas Robbins, slightly; William Hunter slightly. 97th: Private Patrick Gilligan, severely; William Brown, severely. 2nd Battalion Rifle Brigade: Private Frederick Thomson, severely; Henry Coles, severely; Charles Bailey dangerously; Robert Muir, dangerously (since dead); Thomas Dart, severely, William Edwards, severely. Royal Sappers and Miners: Private William Lacy severely.

A RETURN OF CASUALTIES IN THE ROYAL NAVAL BRIGADE, BEFORE SEBASTOPOL, ON THE SIR AND LOST OF JUNE, 1855.

Miners.

7th Foot: Lieut. N. D. Dawson. 33rd: Lieut. Copeland.

War Department, June 28, 1855.

Lord Panmure has this day received two despatches and their enclosures, of which the following are copies, addressed to his Lordship by Field Marshal the Lord Raglan, G.C.B.: —

Before Sebastopol, June 14, 1855.

My Lord,—Your Lordship will be concerned to learn that the Army still suffers from cholera, and that it has increased since the last report.

The men in general, however, look healthy, and I hope that the duration of this sad malady will not be long.

The reports of the state of the Sardinian Army are to-day a little more satisfactory. I have, &c., RAGLAN.

The Lord Panmure, &c. &c. &c.

Before Sebastopol, June 18, 1855.

My Lord, I have the honour to acquaint your Lordship that Lieutenant-General Sir George Brown and Admiral Sir E. Lyons returned from Kertch yesterday, having fully and successfully accomplished the objects of the expedition to that part of the Crimea.

I have the highest satisfaction in drawing your Lordship's attention to the manner in which the Lieutenant-General conducted the duties I entrusted to his charge; and I entertain no doubt that, if no Lad encountered the resistance which I was led to expect he would have met with, the result would have been equally advantageous, and would have reflected the same credit upon his arrangements, what the efficiency and gallantry of the troops would have been brought into stronger light. But it is a matter of great joy that so much should have been done without the loss of a life.

He feels greatly indebted to General Dantemarre and Redschid Pacha, who commanded the French and Turkish troops respectively, for their ready concurrence and assistance.

It has afforded me the most sincere pleasure to have had opportunity of personally congratulating Sir E. Lyons on the success of the expedition, for which he was from the first so warm an advocate, and to which he always attached the highest importance, and on the destruction of the extensive depôts of enemy's possessions in the Sea of Azoff. The excellence of the arrangements for the bombardment of Taganrog does infinite honour to Captain Lyons, of H.M.S. *Miranda*, and at once testifies his ability, determination, and gallantry.

The progress of the works against Sebastopol is reported by Lieutenant-General Jones. The fire of the ships on the 12th has been perfectly satisfactory, and new batteries are completed, which will enable both the English and the French Armies to resume the offensive with the utmost vigour

I enclose returns of the casualties which have arisen to the 14th instant

I have, &c., RAGLAN.

The Lord Panmure, &c. &c. &c.

P.S. I have just received a letter from Colonel Shirley, in which he expresses his regret at having omitted the name of Capt. Peel, 34th Regiment, who was severely wounded in the successful attack of the Quarries on the 7th ult., where he highly distinguished himself. RAGLAN.

NOMINAL RETURN OF OFFICERS WHO HAVE BEEN WOUNDED FROM THE 11TH TO THE 14TH JUNE, 1855, INCLUSIVE.

3rd Foot: Lieut. A. W. Boyce, slightly

NOMINAL RETURN OF NON-COMMISSIONED OFFICERS AND PRIVATES KILLED FROM THE 11TH TO THE 14TH JUNE, 1855, INCLUSIVE.

Drivers Randall and Hugh Copeland, severely; George Longford, dangerously, Robert M'Kean, slightly. 3rd: Privates John Axarqyd, dangerously; Quealey and Duncan Mellan, slightly. Sappers and Miners: Corporal Mahoney, dangerously; Privates P. Mahoney, severely; Corporal Preston, Pooles, Daniel Buckley, and Patrick Sullivan, dangerously. Thomas Priestly, William Latham, and James M'Dermott, slightly. 97th: Sergeant William Brown, severely. Privates Richard Blake and Patrick Byrne, severely. Patrick O'Donnell and Michael Carroll, slightly. 4th: Lance Corporal William Varley, slightly. 50th: Private John Mee, severely. 97th: Corporal Denis Hagan, slightly. Lance-Corporal William Grundy, slightly. Privates Edward M'Cormick and William Dodd, dangerously; Private Thomas Hanley and Ralph Ball, severely. Private Patrick Cavanagh, severely. 2nd Battalion Rifle Brigade: Private John Bate, slightly. Royal Artillery: Gunner James Cowell, severely. Lieutenant and Robert Burnside, slightly. 3rd Foot: Corporal Cox, severely. Private Bowden, slightly. 7th: Private Geo Smith, Corporal Moore, severely. Private Bolan, Hart severely. Mr Mahoney, dangerously; Privates Patrick Leary, Patrick Kennedy, Peter Poole, Daniel Buckley, and Private James Hanlon, severely. John Logan, severely, Charles McCarthy, Richard Wright, and Thomas Cox, severely. Lance-Corporal John C. Wilson, slightly. 88th: Privates J. Murray, dangerously; Matthew Smith, severely. 7th: Private Thomas Slater, severely. 19th: Private A. Stewart slightly. 34th: Private Michael Roach, severely. John Walsh, slightly. 38th: Private Robert Dabney, severely. 49th: Private Daniel Sullivan, slightly. 47th: Privates George Hopkins, severely; John McKendrick, slightly. 50th: Private Wm. Smith, severely. 97th: Lance-Corporal Thomas Bruen, severely. Lance-Corporal John Heavy, slightly. 2nd Battalion Rifle Brigade: Private Richard Reid, severely. Lance-Corporal Harlock, severely. Henry Millville, slightly. Royal Sappers and Miners: Private John Mahoney, dangerously (since dead); John Murphy, severely.

DESPATCHES FROM ADMIRAL LYONS.

Admiralty, June 28, 1855.

Despatches, of which the following are copies or extracts, have been received from Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea: —

PROCEEDINGS AT TAGANROG.

H.M. ship *Miranda*, Taganrog Roads, June 3, 1855.

Sir,—I have the honour to inform you that I anchored in 13 feet water, with the squadron under my orders, in Taganrog inner roads, about 8½ miles from the town, on the evening of the 1st inst., without any obstacle, although the enemy had removed the light vessels and beacons. During the night an easterly wind sprung up, and the water fell three feet, with every appearance of still falling; we were, therefore, obliged to remove a mile and a half further from the town.

The 2nd was employed in reconnoitring the town, which I was enabled to do satisfactorily in the *Recruit*; Lieut. Day, commanding that vessel, having found a passage during the night

I had arranged to proceed, at three a.m. the following morning, to summon the town, and, in the event of a refusal to surrender, to endeavour to destroy the immense stores of grain and other Government property in that place

Matters were in this state when, at sunset, to my great satisfaction, the *Sulina*, *Danube*, and *Medina*, with the twelve armed launches of the line-of-battle ships, hove in sight. This most welcome and opportune reinforcement, of exactly the description of force required for the purpose in view, rendered success certain; and, not long after, the French steamers, with launches in tow, arrived.

Having concerted measures with Monsieur de Sedaiges, commanding the French steamers, I proceeded at three a.m. in the *Recruit* with the vessels and boats, and accompanied by the lightest French steamers (M. de Sedaiges on board one of them), towing their launches. Having anchored the *Recruit* at 1400 yards from the Mole Head, and collected all the boats astern, I sent Lieutenant Commander Horton with a flag of truce, accompanied by a French officer of similar orders from M. de Sedaiges, to demand the surrender of all Government property of every description whatsoever, and of all grain, flour, and provisions (which I considered as contraband of war, knowing that even in the event of its not being Government property, that it could only be intended for the supply of the Russian army in the Crimea), the whole to be delivered over to us to destroy; the troops to remove, during the necessary deduction, to a place five miles from the town, and within sight of the ships; the inhabitants to withdraw, except those appointed by the authorities to open the stores and assist us; any approach of troops, or any infraction of these terms, if accepted, to be considered as cancelling them, and to be punished with instant bombardment of the town. The Mole Head was quite undefended, and no modification of the terms to be entertained. At the expiration of the hour, Lieutenant Horton and the French officer were informed that the Governor refused the terms, and that, having come at his request, he intended to remain on the place On this, these officers came off, and the flag of truce was hauled down from the *Recruit*

Shortly afterwards the *Recruit* commenced firing, and the boats proceeded under the command of Commander Cowper P. Coles, of the *Sulina*, in a row of one another, and accompanied by the French boats, until, having arrived in the required position, the tow was cast off, the boats' heads pulled round to the beach, and so heavy a fire opened, that, although the enemy made repeated attempts to get down to the houses lining the beach, so as to save the long range of storehouses from destruction, they never succeeded in doing so in sufficient numbers. Lieutenant Mackenzie (the Senior Lieutenant of this ship) had charge of a separate division of light boats, with rockets and one gun, to cover the operations. Lieutenant Cecil Buckley, of the *Miranda*, who, in a four-oared gig, accompanied by Mr. Henry Cooper, boatswain 3rd class, and manned by volunteers, repeatedly landed and fired the different stores and Government buildings: this dangerous not to say desperate service, when carried out in a town containing upwards of 8000 troops constantly endeavouring to prevent it, and only checked by the fire of the boats' guns, was most efficiently performed. The *Recruit*, from her light draught of water, was enabled to take an effective position at 1400 yards, and so was the *Mosette*, French steamer; and the *Danube*, with 24-pounder howitzer and rockets, was very useful

By three p.m. all the along ranges of stores of grain, plank, and tar, and the vessels on the stocks, were in a blaze, as well as the Custom-house and other Government buildings, and unfortunately, but unavoidably, the town in many places; and our purpose being amply effected, the boats returned to the *Recruit*. The loss to the enemy in men must have been severe, as many were seen to fall. They deserve credit for the obstinacy with which they endeavoured to gain positions to prevent our effecting the object we had in view, but it was impossible to face the continuous and well-directed fire kept up The loss in grain of different descriptions I cannot estimate; but, as it comprises all, or very nearly all, in store at Taganrog, it must be enormous.

The only casualty in carrying out this service was one gunner, Royal Marine Artillery (G. Evans), severely wounded in the face by a musket-ball.

I must now be allowed to bring to your notice the very meritorious conduct of Commander Coles on this occasion, in command of so large a force of boats; and I cannot speak too highly of his energy, decision, and ability, which left me nothing to desire. He speaks in the highest terms of all under his orders, and particularly of Lieutenant A. T. C. Mackenzie, in charge of a separate division, who behaved with his accustomed spirit and judgment; and of Lieutenant Buckley, who so well carried out the hazardous service he had volunteered for. All the officers and men employed conducted themselves to my entire satisfaction, but, as these above mentioned were in such conspicuous situations, I trust I may be pardoned for submitting their names to your favourable consideration

I cannot refrain from bearing my testimony to the admirable conduct and cordial co-operation of our allies, under the personal direction of M. de Sedaiges, of the boats being under the immediate command of M. Luguene, captaine de frégate and first aide-de-camp to Admiral Bruat.

A Russian sergeant who deserted, and gave himself up to a French boat, states the number of troops in the town to have been 3200, of which 800 arrived last night.

A Russian war-schooner, which had been run on shore near the town and abandoned, was set fire to and burnt, and so was a large raft of timber The wreck of a large vessel (a sort of guard-ship), which we observed to be fired by the enemy and blown up on our first appearance in Taganrog Roads, was visited, but was found to be already effectually destroyed

Many large buildings had the black flag hoisted, as a sign, I presume, of their being hospitals these were most carefully respected by us, as were the churches, and, so far as possible, private houses I have, &c.,

(Signed) E. M. LYONS, Captain.

Rear-Admiral Sir Edmund Lyons, Bart., G.C.B

EVACUATION OF ARAPA

Recruit, at Anapa, June 11, 1855.

Sir,—In pursuance of your orders of yesterday's date, I have the honour to inform you that I arrived at this anchorage at 10 a.m. to-day; Rear-Admiral Charner had not arrived by about 1 p.m., Admiral Bruat having last night informed me that he would be detained, and requested me not to wait for the *Napoleon*.

I enclose a return of the guns, by far the greater part of which have been rendered useless by the Russians themselves; the remainder are being made unserviceable or thrown over the cliffs, under the direction of Lieutenant Arthur, the gunnery officer of the ship.

The Russians have exploded nearly all the powder-magazines in the place, and those remaining are empty.

The barracks were burnt by the Russians, as also a good number of buildings, and all the coal and grain, which appear to have been in considerable quantities.

The garrison is estimated by the Circassians at between seven or eight thousand, and they retired on the Kouban River, which they crossed by a bridge, destroying the latter behind them. I have, &c.,

(Signed) HOUSTON STEWART, Rear-Admiral.

Rear-Admiral Sir Edmund Lyons, G.C.B., K.C.H.,

Commander-in-Chief

For list of killed and wounded, see Lord Raglan's despatch as above

OPERATIONS IN THE SEA OF AZOFF.

Admiralty, June 28.

Despatches, of which the following are copies, have been received from Rear-Admiral Sir Edmund Lyons, Bart., G.C.B., Commander-in-Chief of her Majesty's ships and vessels in the Mediterranean and Black Sea:—

Royal Albert, Straits of Kertch, June 12, 1855.

Sir,—I have the honour to enclose, for the information of the Lords Commissioners of the Admiralty, copies of three letters from Captain Lyons, of the *Miranda*, reporting the destruction of Mariopol, Ghiesk, and Kitea, near Arabat, of immense quantities of grain, flour, and hay, destined for the supply of the enemy's army in the Crimea; so great was the quantity that in some cases the conflagration had not entirely subsided when last seen, on the eighth day.

2. Thus, in the space of a fortnight, the Sea of Azoff has been swept by the Allied squadrons under Captain Lyons' orders, and the enemy deprived, not only of the supplies which already existed in the different depôts, but also of the means of transporting the coming crops.

3. I have also the honour to enclose a copy of a letter from Captain Lyons, speaking in terms of high praise of the officers and men employed in the launches of the fleet, and in the *Danube* and *Sulina* tenders.

4. Confederable skill, vigour, and promptitude have characterised these operations, and I trust that their Lordships may consider that credit is due to all employed in them. Opportunities offered for individual distinction, which were eagerly seized by the officers whom Captain Lyons particularly mentions, and whom I beg leave to recommend to their Lordships' favourable consideration. I am, &c.,

EDMUND LYONS,

Rear-Admiral and Commander-in-Chief

To the Secretary of the Admiralty.

Her Majesty's ship *Miranda*, Mariopol, 8th June, 1855.

Sir, I have the honour to inform you that, having anchored yesterday evening off this place with the ships under my orders, and six French steamers, I sent Lieutenant-Commander Horton, of the *Ardent*, accompanied by a French officer with similar orders, at dayl ght this morning, to demand the surrender of the place, on exactly the same terms as those offered by us at Taganrog; and I desired him to express to the authorities the earnest hope of myself and of the French senior officer that they would not oblige us to resort to measures which would endanger the whole town, as our object was to destroy all contraband of war, but to respect private property

2. At the expiration of the delay granted, no authorised person appearing, I sent the line-of-battle ships' launches (lent to the squadron) and the boats of the ships under my orders, with all the armed launches of Lieutenant Mackenzie, R.M.A., the whole commanded by Lieutenant J. F. C. Mackenzie, of this ship, to effect our object by force; the French boats accompanying ours

3. On the marines and a body of French small-arm men landing, under cover of the land of some, 600 Cossacks, commanded by a colonel, evacuated the town, and the marines and the French small-arm men advanced and took possession of it; the very extensive stores of grain were fired and destroyed by parties under the directions of Captain Lejeune, of the French navy, and of Lieutenant Swinburne, of this ship, every care being taken to cause as little damage to the town as possible.

4. Thus was a considerable town on the military high-road from the provinces of the Don to the Crimea (the only one left since our occupation of this sea) held under sated possession of by a small body of British marines and French small-arm men, for five hours, while immense stores of grain were destroyed

5. The grain, plank, and other stores considered as contraband of war being effectually destroyed, the whole party re-embarked without the slightest accident

6. I arrived at Mariopol one conducted this service with excellent judgment; and he speaks in high terms of the judicious manner in which First Lieutenant Macnamara, Royal Marine Artillery, posted the Royal Marines and Royal Marine Artillery under his orders in presence of a superior force, who were thus deterred from venturing to molest them.—I have, &c.,

(Signed) E. M. LYONS, Captain

Rear-Admiral Sir Edmund Lyons, Bart., G.C.B.

Her Majesty's ship *Miranda*, off the town of Ghiesk, June 6, 1855.

Sir,—I have the honour to inform you, that on my arrival here this morning with the vessels under my orders, and the launches of the line-of-battle ships, accompanied by four French steamers, I sent Lieutenant-Commander Horton, of the *Ardent*, with whom was associated a French officer, to demand the surrender of the place on the same terms as those offered by us at Taganrog and Mariopol. These terms having been wisely acceded to by Colonel Brekoff, the Military Governor, whose small force was quite inadequate to defend the town, the marines of this ship, under First Lieutenant Macnamara, R.M.A., and a French party, landed and destroyed a vast quantity of grain, packed on the quays for conveyance to the Crimea, and several thousand quarters of wheat, &c., &c. During this time Lieutenant Horton and the French officer went through the town, and had all the storehouses and magazines thrown open for their inspection, in order to see that no evasion of the terms was attempted, and that all contraband of war was destroyed

6. On this as well as on the two former similar occasions, Lieutenant Horton conducted the interview with much judgment and firmness

I have, &c., (Signed) E. M. LYONS, Captain

Rear-Admiral Sir Edmund Lyons, Bart, G.C.B.

Captain Lyons encloses the following: —

Her Majesty's ship *Ardent*, Kiten Bay, June 10, 1855.

Sir,—I have the honour to report that, on my arrival here yesterday, having failed of setting fire to the stores of flour by means of shells and carcasses, I took advantage of a favourable state of weather in the evening to drop the *Ardent*'s bow close in shore, and to veer Mr. Roberts, the gunner, ashore in the dingy, with two men, under cover of musketry from aloft. I had previous y ascertained that no ambuscade was there, and had cleared to a distance the thirty or forty Cossacks who were watching, by firing round shot in their direction

Mr Roberts and his party very quickly and effectually fired all the stacks, and I anchored the *Ardent* off, to watch the fires

The whole stores are now consumed, estimated by the *Lynx* at 30,000 sacks

I have &c., (Signed) W. HORTON,

Capt. Lyons, H.M.S *Miranda*. Lieutenant and Commander.

H.M.S. *Miranda*, off Temuvick, June 9, 1855

Sir,—I cannot allow the launches of the line-of-battle ships to return to their ships without requesting permission to bring to your notice the zeal and intelligence of the officers in command, and the excellent conduct and good discipline of all employed in them, which has enabled them to render such important service in the sea of Azoff, and which, if I may be permitted to say so without presumption, reflects so much credit on the ships they belong to

I should also beg leave to call your notice to the merit of the commanding officers of the *Danube* and *Sulina*, and those under their command, as well as to that of the officers of Royal Marines Artillery who have been lent to this squadron during the same period.

I have, &c., (Signed) E. M. LYONS, Captain

Rear-Admiral Sir Edmund Lyons, Bart., G.C.B.

Commander-in-Chief.

THE HANGO MASSACRE

Accounts were received on Monday at the Admiralty, from which it appears that several of the boat's crew of the *Cossack*, who were supposed to have been killed, were alive, though prisoners. A complete list is subjoined of the killed and of the prisoners, both wounded and unwounded :—

KILLED.

Thompson, coxswain of the boat; Lyons, captain's steward; — Cornwall, Ben, Smith, Smith, ordinary seamen, Joseph Banks.

PRISONERS.

WOUNDED.—John Horton, George Boyle, Joseph Gibbons (right arm amputated), Thomas Stokes.

UNHURT.—Lieutenant Louis Genoese, Surgeon Robert Eastan, Mr Sullivan; Owen Francis, William Rackley, John Hockey, Francis George

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

Having heard that collections are being made at home by the "Army Bible Readers' Society," I beg leave, through your columns, to warn the benevolent public that no "Bible readers" have been or are admitted into camp or barrack. I am, your obedient servant,

C. E. HADOW, Chaplain.

The General Hospital, Scutari, June 6, 1855.

PALACE OF THE BEY OF TUNIS.

The residence of the Basha of Tunis is within the citadel of Borda, about two miles from the capital. Within the precincts of this citadel are also the residences of various Ministers of State and a number of other buildings. The Palace itself is of mixed architecture, the finest of which is decidedly the Moorish, resembling that of the Alhambra. Many apartments are in perfect keeping with the magnificent block of remains of ancient Moorish grandeur at Granada. Many of the Arabic inscriptions on the walls are likewise similar to those to be found in the apartments of Boabdil. Those who have visited the latter will readily recognise in the present spacious of the large and magnificent marble square which admits to the various halls of state, a similarity of architecture.

The following account of a visit to this Palace of a party of ladies will not be uninteresting :—

Having entered the Palace by the larger Moorish gate, and traversed various passages, they were ushered into the great saloon. It is (the fair writer says), after the Moorish fashion of such apartments, in the form of a sunken cross. The lower part, or the base, is occupied by attendants. The upper is appropriated to the ladies, and fitted up handsomely with a double row of divans, with rich damask cushions. The walls are hung with tapestry. A narrow shelf goes round this part of the room, filled with china vases and other ornaments. Guns and implements of war, inlaid with coral and precious stones, decorated the walls. There were time-pieces and mirrors, and also a piano—an uncommon piece of furniture in a Moorish house.

We were seated in this apartment engaged in lively conversation with the ladies, when suddenly, at a given signal, all the gay creatures vanished, as it appeared to us, through the walls, and left us alone to stare at each other in amazement. But their mysterious exit was soon explained, for presently the curtain before the door at the lower end of the room was drawn aside, and in marched his Highness the Bey, followed by a whole train of officers. He had come to welcome us; and, after passing through the usual ceremonious salutations, he inquired which was the wife of Mr. ——. Mrs. —— came forward, when he took her hand, and said how happy he was to see her and her friends, that Mr. —— was his particular friend, and a man of great wisdom, also a good man, and respected by all who knew him. He then inquired after the names of the ladies present, and shook hands with them, saying a few words to each. During this time his train of officers, who had learned that European ladies did not object to being looked at, took the opportunity of staring us almost out of countenance; and although we were, perhaps, not quite so bashful as our fair dressers, we did not think their conduct over polite. The Bey hoped we would pay him a further visit, and, bidding us adieu, left the room with his retinue of handsome young Mamelukes. The ladies then returned

MOHAMMED BASHA, THE NEW BEY OF TUNIS.

MOHAMMED BASHA, THE NEW SOVEREIGN OF TUNIS.

(From a Correspondent.)

THERE is much in the past history of that stretch of country on the North African Coast, claimed for so many centuries by the Moslem Conquerors who followed Abdallah, the Civil and Ecclesiastical Missionary-General of the Prophet of Mecca, which, in point of importance, is not inferior to that of any territory in the world. In it is comprised that immense coast from the Atlantic Ocean to the Bashalic of Egypt, and within its limits is the site of the ancient Phœnician colony, Carthage, which, though it may yield to Rome, is not inferior in interest to any other city or country of antiquity. Carthage! Where is the student of classic lore who, at the very mention of that "colony," does not conjure up to his mind a host whose heroic exploits in the field of battle—whose patriotism, valour, virtue, and talent, have been the theme of writers whose fame will never die? Not only Pagan but Christian Carthage has also had its illustrious worthies who, though dead, ever live. Christianity, however, as well as Paganism, had to give way to the religion of the Koran. Just before the close of the seventh century, the great city of Dido fell for the third time before the conquering hosts of Hassan, and with that fall Christianity was swept away from the land which gave birth to Augustin, Tertullian, and Cyprian.

The scenes enacted, and the devastations perpetrated, and the misery and wretchedness which, with few exceptions, successive rulers have heaped upon that magnificent country, are only partially chronicled by the historian; but these few entries exhibit in a fearful degree the dark ingredients of the human heart. It is, therefore, with unmitigated pleasure that one records the accession to the throne of a Prince like Mohammed, the eldest son of Hassein, the penultimate ruler of Tunis. On the 1st of the present month his cousin, Ahmed Basha, died, and on the same day Mohammed was proclaimed his legitimate successor.

Mohammed Basha is now bordering upon fifty, and is above the middle stature. He has a fair complexion, blue eyes, and a kind and benevolent expression of countenance.

When his uncle Mustapha died, eighteen years ago, it was commonly believed that he would assume the reins of government; and, so resigned was his cousin (the Prince who has just died) to a cruel fate, that when he entered his apartment, followed by his suite of Mamelukes, Ahmed fell upon his knees and implored for mercy. But Mohammed bade him rise. "Fear not, my Lord," said the noble Prince, "I come to do thee no harm. I deplore the demise of my Lord, but I rejoice now to render to thee what is thy right." And, taking hold of his cousin's arm, he led him into the great hall, where he placed him upon the throne, and proclaimed him the legal Sovereign of the Regency of Tunis; and the roar of artillery from the fortresses announced to the inhabitants of the capital a successor to Mustapha Basha.

The history of this Regency presents us with instances where the parties acted very differently from Prince Mohammed. The country was in his favour; but, Ahmed having been his senior, he was determined not to infringe upon a custom which has been in practice from the days of Hassan Ben Ali, the founder of the present dynasty, who was elected by the army at the commencement of the last century.

The resources of the regency of Tunis are very great; these were not only neglected by the last ruler, but his perverse mode of administration had the effect of impoverishing the country to a fearful degree. Often have I heard the people ejaculating the brief but comprehensive prayer, "Would to God Sidy Mohammed ruled over us!" A year ago I expressed my conviction in my last work, "Evenings in My Tent," to this effect:—"I have little or no hope of Ahmed Basha's ever changing his policy. The only hope this wretched country has is concentrated in his successor, Prince Mohammed Bey, who sees the absurdity of keeping up a large army. . . . . He is, moreover, passionately fond of agriculture, and has a natural taste for science, which he not only cultivates, but even now zealously encourages, whenever an opportunity offers itself." He is more fond of seeing cultivated fields, well-stocked storehouses, than thousands of useless and starving soldiers. He prefers to listen to the blessings of his subjects rather than to their curses; and is far more anxious to behold a flourishing and happy population than deserted villages, abandoned fields, neglected gardens, and multitudes of wretched and miserable creatures seeking for shelter and protection within the boundaries of French Africa.

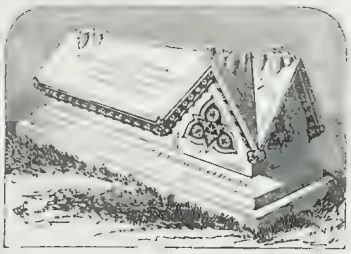
From my intimacy with this Prince—having travelled with him a good distance into the interior of Africa—I have reason to believe that by his just and mild rule he will not only do much to raise his 3,000,000 subjects from their degraded condition, but he will likewise use every effort to further commerce. The "Society for Exploring and Evangelising Central Africa by Means of Native Agency" may also look upon him as its friend; and I earnestly hope that the funds of that institution will soon enable it to send out agents to commence the noble work contemplated Carthage may also now be resuscitated, and who can estimate the amount of light its monuments may serve to throw upon the famous ruins of Nineveh with which the dauntless and persevering Layard has enriched Britain's noble Museum, and upon sacred and profane history in general. We have Roman, Grecian, Egyptian, Babylonian, and Moorish architecture represented in various public institutions in this country; and, in the Crystal Palace, many of these specimens are restored. Why should we not also now have specimens of Phœnician architecture? And what prevents us now from having a Phœnician Court within that miniature world at Sydenham? Let efforts now be made, and I have every reason to believe that they will be crowned with success.

A letter from Tunis of the 6th inst. in the *Moniteur* states:—

Mohammed Bey has inaugurated his accession to power by some administrative reforms which are [illegible] said, only the prelude to others still more important which he has [illegible] emplation. The duty levied by the Government on the corn crops has been considerably diminished, the reduction amounting to as much as 50 per cent on wheat and 69 per cent on barley. This duty is estimated before the harvest by agents who examine the crops and fix the quantity to be paid in kind by each grower. Another measure, not less advantageous, is a reduction of from 25 to 6¼ per cent of the duty on cattle, camels, mules, &c., sold in the public markets, and which is paid by the seller. Two monopolies, those of the manufacture of lime and of bricks, have also been abolished, so that any one may now make those articles. The new Bey has set at liberty a prince of his family, the only son of Sidi Othmar Bey, assassinated in the night of the 20th of December, 1814. This prince, who was at that period only five years of age, has been ever since kept in close confinement in the palace of the Bardo by the different Beys who have succeeded to the throne of Tunis since the tragical death of his father. Mohammed Bey has also reopened the courts of justice, which had remained closed for nearly three years, during the illness of his predecessor. Every day, except Friday, any one who has complaints to bring forward may be heard by the Bey himself, who immediately decides on the various cases. This measure has given the greatest satisfaction.

TOMB OF SIR M. H. HICKS BEACH, BART., OF WILLIAMSTRIP PARK.

THIS tomb has just been erected over the grave of the late Sir Michae Hicks Hicks Beach, Bart., M.P. for East Gloucestershire, in the churchyard of Coln St. Aldwyn. The effect is striking, and the design presents



MONUMENT TO SIR M. H. HICKS BEACH, BART., COLN ST. ALDWYN.

a beautiful model of a Christian tomb. The intersection of the gables forms a floriated cross. In the panels on the north-west and south sides are carved lilies and passion flowers. At the east end are the arms of the family emblazoned upon a shield, lying appropriately at the foot of the cross. A text of Scripture is inscribed on each side of the plinth.

The work has been well executed in Ancaster stone, by Mr. S. Cundy of Pimlico, from a design by Mr. George Row Clarke, architect.

The inscription is as follows:—

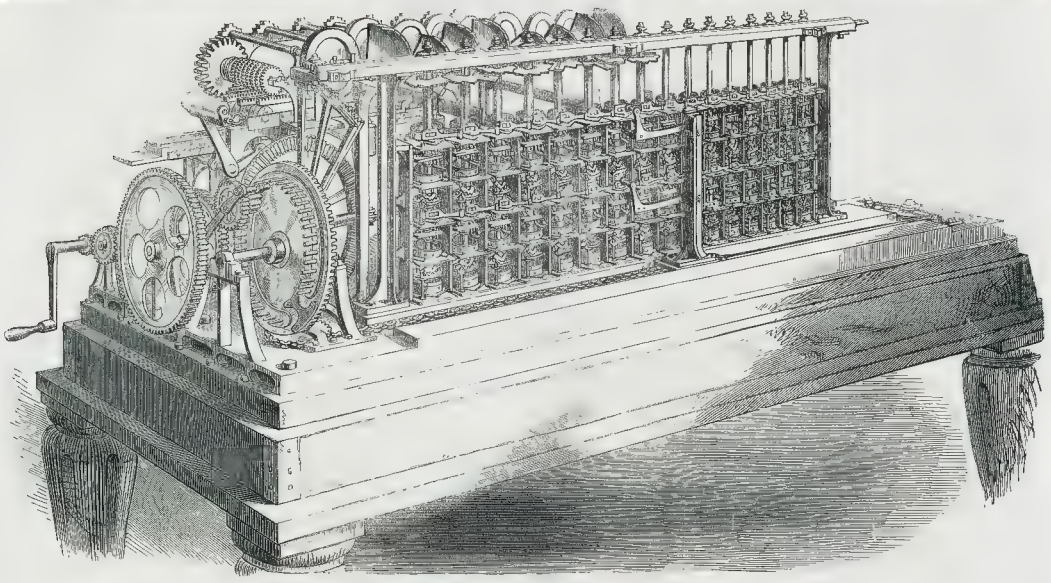
In memory of SIR MICHAEL HICKS HICKS BEACH, Bart., M.P., who died 22nd Nov., 1854, aged forty-five years.

On the plinth is inscribed:—

In thy presence, Lord, is fulness of joy; at Thy right hand there are pleasures for evermore.

Blessed are the pure in heart, for they shall see God.

PALACE OF THE BEY OF TUNIS.—(SEE PRECEDING PAGE.)



MESSRS. SCHEUTZ'S NEW CALCULATING MACHINE.

LOCOMOTIVE ENGINE FOR THE PARIS UNIVERSAL EXHIBITION.

AN Express Engine, destined for the Paris Exhibition, and appropriately entitled the Eugénie, has been constructed by Messrs. Fairbairn and Sons, of Manchester, upon the design of Mr M'Connell, of Wolverton, combining all the latest improvements of that gentleman viz., prolonged firebox, combustion-chamber, solid wrought-iron piston, hollow axle, &c. The general contour of this engine is symmetrical, suggesting the idea of stability and lightness. It has been running express and mixed passenger trains on the southern division of the London and North-Western Railway, and has amply realised all expectations as to its performance. Subjoined is an account of the experiments, which show very good results, the engine consuming a moderate quantity of fuel per mile, with a corresponding good evaporation.

In a journey of 280 miles, with express and other passenger trains, with an average load of 41.5 tons, the consumption of coke was 19.5lb. per mile, evaporating 6.3lb. of water per 1lb. of coke.

The following are the principal dimensions of this Engine:—Diameter of cylinder, 18 in.; length of stroke, 22 in.; diameter of driving-wheel, 7 ft.; ditto of boiler, 4 ft.; length of boiler, 10 ft. 6 in.; ditto of firebox proper, 3 ft. 9½ in.; ditto of combustion-chamber, 4 ft. 7½ in.; heating surface in combustion-chamber and firebox, 159 sq. ft.; ditto in tube, 731 sq. ft.; total heating surface, 890 sq. ft. The boiler contains 414 tubes, 6 ft. long, 1¾ in. outside diameter. Area of firegrate, 18 sq. ft. Weight of engine in working order, 21.18 tons.

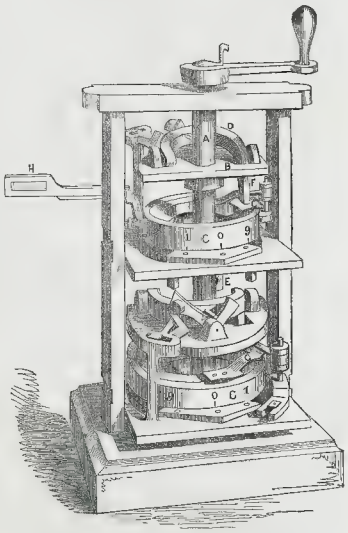
NEW CALCULATING MACHINE.

THIS Calculating Machine which has created great interest in the scientific world, is the invention of Messrs. George and Edward Scheutz, of Stockholm, and is called by them a Tabulating Machine. It calculates any table not requiring more than four orders of differences to fifteen places of figures, and stereotypes the results to eight places of figures, with proper correction for the last figure, besides five places of figures in the argument. The whole machine is about the size of a small square piano.

The calculating portion of the machine, as appears in the front of the Drawing, consists a row of fifteen upright steel axes passing down the middles of five rows (fifteen in each row) of silver-coated numbering-rings, each ring being supported by, and turning concentrically on, its own little brass shelf, which has a hole in it sufficiently large to allow the steel axis to pass through without touching. Round the face of each ring are engraved the ordinary numerals, one of which appears in front at a time; and the numbers shown in any horizontal row of rings are read as in ordinary writing. The first row shows the resulting number or answer to fifteen places of figures, eight places of which the machine stereotypes. The second row of rings expresses the first order of Differences, if necessary to fifteen places of figures; and the third, fourth, and fifth row of rings similarly show the second, third, and fourth orders of Differences. Any row can be made to show and calculate with any numbers expressed according to the decimal scale, such as the number 8765432105679 : the first eight figures of which if in the top row would be stereotyped. Or (by simply changing two perpendicular rows of rings) it can show and calculate with numbers expressed in the sexial system -degrees, minutes, seconds, and decimals of a second—such as 87 deg. 43 min. 24.6371356402 sec., which result, if it appeared in the upper row of rings, would be stereotyped 87 deg. 43 min. 24.69 sec.

The proper argument to each result is also stereotyped at the same time, and in its proper place. Nothing more is required than to set each row of figure-rings to Differences calculated from the proper formula, and place a strip of sheet lead on the slide of the printing apparatus; when, by turning the handle (to do which requires not so much power as can be exercised by a small turnspit dog), the whole table required is calculated and stereotyped in the lead. By stereotyping in the lead is meant that the strip of lead is made into a beautiful stereotype mould, from which any number of sharp stereotype plates can immediately be produced ready for the ordinary printing-presses. At the usual rate of working, 120 lines per hour of arguments and results are calculated and actually stereotyped ready for the press. The Machine which has been brought to England by Messrs. Donkin, has been kindly shown and explained on several occasions to various scientific persons at the rooms of the Royal Society, by Mr. Gravatt, F.R.S.

The following are the details of the explanatory model:—A is a shaft on which are fixed the stages or platforms B. C C are circular rings on which the indices appear; these rings are in no way attached to the shaft, but are worked by the trigger-pieces (D D), which come into gear with the cogs (E) at the time when the revolution of the shaft brings the tail-piece (F) of the trigger (D) in contact with the rising piece (G) upon the lower ring. It will be seen that, if the shaft still revolves, it will give motion to the ring, and produce the index required. The circular ring (C) has upon it a projecting piece, which, when a carrying operation is required, throws out the switch lever (H), and, by a beautiful contrivance, not shown here, produces the required carriage. It would occupy too much



MESSRS. SCHEUTZ'S NEW CALCULATING MACHINE.—EXPLANATORY MODEL.

space to give a complete idea of the Machine; but what has been given will convey to the reader a general idea of this beautiful invention. The Machine is consigned to the care of Messrs. B. Donkin and Co., engineers, London.

It will be seen by the specimen tables here given, which are from the plates produced by the Calculating Machine itself, how perfectly it does its work. Plate No. 1, represents the Arc to the Sine. Plate No 2, the No. and its Logarithm.

Sin.	Arc.	No.	Log.

239	13 49 39,10	1110	3.0453230

On Monday morning, about ten o'clock, his Royal Highness Prince Albert, attended by Captain the Honourable D. C. F. De Roos and Dr. Becker, inspected the Calculating Machine at the apartments of the Royal Society, at Somerset-house, where the Prince was received by Mr. Gravatt and Mr. Donkin, by whom the Machine was explained to his Royal Highness.

M'CONNELL'S EXPRESS LOCOMOTIVE ENGINE FOR THE PARIS UNIVERSAL EXHIBITION.

BANKRUPTCY OF STRAHAN, PAUL, AND BATES.

SINCE the forgeries of Fauntleroy and the flight of Rowland Stephenson, no banking catastrophe in the metropolis has excited so much painful interest, or roused so lively an indignation, as the failure of Strahan and Co. With the exception of the firm of Messrs. Child and Co., it was the oldest establishment of the kind in London, having been founded by Mr. Jeremiah Snow, one of the goldsmiths whose money in the Exchequer was seized by King Charles the Second to the extent of £50,780 18s. 8d. Mr. Lawson, in his "History of Banking," states that he was permitted to inspect the books of this bank kept in the year 1672, which showed that "the nobility of the land were in the habit of frequenting their shop, and borrowing money on the deposit of various gold and silver articles, such as gold and silver tankards, golden thimbles, and other valuables of a miscellaneous, and sometimes comical, description."

The head of the late firm dropped the name of Snow, and took that of Strahan, on receiving a large part of the fortune of his uncle, Mr. Strahan, who had held the patent of King's printer. The constituency of this bank was numerous and opulent, chiefly consisting of the aristocracy, clergy, and members of the legal profession; and implicit confidence was reposed in the prudence and integrity of the partners. They received large deposits in trust; and on these securities they confess to have raised £113,093 by fraudulent sales. As navy-agents they traded under the firm of Halford and Co.; and of course that establishment is involved in the ruin of the bank; though it appears from the proceedings in Basinghall-street that, could the accounts be legally separated, Halford and Co. would be solvent, with a considerable surplus. The total amount of the liabilities is £630,603. The assets are set forth at £160,000 or £170,000; and some £276,000 advanced on foreign railways may be, in part or in the whole, recovered; but on such realisation the creditors will be wise not to place much dependence.

The immense loss to individuals incurred by this failure is not the only evil by which it has been attended: it has shaken confidence in all private banks, and struck a withering blow at mercantile honour. Already many accounts have been transferred to joint-stock banks; and, to allay the panic kindled by suspicion, several of the houses of Lombard-street and its moneyed neighbourhood have invited their constituents to inspect their deposits periodically—the most convincing proof of the terror that has been inspired. This is a wise and honest procedure on the part of those persons, who, conscious of their own rectitude, challenge investigation; and it is one of which the constituents should avail themselves, in justice not only to themselves but to their bankers, whose credit may have been wrongfully impaired by the recent disclosures. It is a false delicacy that does not earnestly respond to this manly invitation. By inspection, public confidence will be restored; justice will be done to trustworthy bankers; and those among the fraternity who are addicted to speculation will be taught a lesson of prudence and restraint. The legitimate business of a banker is to receive and pay money, acting as an agent and accountant to his customers, and he never can be justified in deviating in the least degree from this rigid rule. Strahan and Co. deserve the severest condemnation for advancing cash on foreign railways, for such operations do not fall within the province of banking; and it is evident that, to extricate themselves from the difficulties in which this most culpable course involved them, they fraudulently sold or pawned the securities of their clients, deposited with them for safe custody. Had a periodical supervision or inspection been exercised, they would have been saved from the crimes they have perpetrated.

We ought not to quit this branch of the subject without referring to a fact connected with the failure of Messrs. Remington, Stephenson, and Co., who were suspected in December, 1828; and we specially allude to it that the customers of banks may be induced to make a rigid, not a nominal, inspection of their accounts. The following circumstances are narrated in Mr. Lawson's "History of Banking," p. 262:—

> The mode adopted by Stephenson to deceive his partners with respect to the various deposits of Exchequer Bills was, by having sealed packets with the name and address of the depositor, and amount of Exchequer Bills, endorsed thereon; so that the bankers who examined the state of affairs at the bank, concluding that the actual securities were enclosed in the envelopes, did not examine them further. Had they done so, they would have discovered that the Exchequer Bills had all been abstracted, and slips of paper substituted.

This trick was more base than ingenious, for men of ordinary caution would have broken at least some of the envelopes; but it appears that though five of the principal bankers in London investigated the affairs of Remington, Stephenson, and Co., all of them were completely thrown off their guard, and satisfied with the mere production of fictitious documents. Such was their confidence, or their infatuation, that each of them actually advanced £20,000 on such securities as they found the bank to possess, and made a declaration that they were fully satisfied of the solvency of the house. The consequence was that many persons who had withdrawn their accounts returned them, and ultimately fell victims to the fraud, when Stephenson absconded, and the flat of bankruptcy was issued out against the firm on the 10th January, 1829. We may add to this statement that the guilty man, and his confidential clerk Lloyd, escaped from the hands of justice, and reached Savannah on the 27th of February. The extent of his defalcations at the Bank was £200,000, besides the abstraction of Exchequer Bills to the amount of £70,000. From these facts depositors in banks who intend periodically to inspect their securities may learn a useful lesson; and if any dishonest bankers are still in existence, which we are not willing to suppose, they may be warned by this exposure, which is written in the interests of the public, that they must be prepared with realities, not with fictions.

However painful the confession, however it may wound national pride, it is not to be denied that, at the present period, mercantile honour and the integrity of retail traders are sadly compromised. The failure of Strahan and Co., frightful as it is, does not stand alone in the circle of delinquencies. The case of Davidson and Gordon assumes a character equally hideous as far as good faith is involved; and their liabilities were stated by Sir Peter Laurie, on Tuesday last, to amount to £500,000. In the last number of the *Quarterly Review*, in an article on the adulteration of food, it is shown to be a general practice to vend not only spurious, but in many cases poisonous, ingredients for genuine and wholesome commodities; and this wickedness is even carried to medical drugs, so that the prescriptions of physicians fail to cure, the medicines being too feeble to expel disease. Surely such a crime falls little short of murder. It is gratifying to state that Mr. Scholefield has obtained a Select Committee of the House of Commons to investigate this subject: the honourable member stated that, "if fraud had increased so as to outstep existing legislation, the means of destroying fraud had been still more increased by the knowledge which had been acquired of organic chemistry." All these circumstances show a state of demoralisation which it is appalling to contemplate.

The renewal of the Bank Charter Act, which expires next year, provided Government gives the Bank notice, will afford an opportunity of entering fully into a consideration of the remedial measures which are still required to give stability to our banking institutions, and inspire the public with a wise confidence. We are warned by the cases now pending to prepare for the future without delay, and ripen a sound opinion on the subject before another catastrophe takes us by surprise. It should be borne in mind that the Act of 1844 does not wholly, but only partially, provide for the convertibility of notes into gold; for it enacted, among other provisions, that an aggregate amount of notes circulating through the country during four weeks after the 10th of October, 1843, might still be circulated, without calling on the issuers to hold at command an equivalent amount of bullion—a permission which violated the principle on which the Act was found; that principle affirming that the obligation to pay a pound meant, neither more nor less, the obligation to pay a definite weight of gold of an ascertained fineness. One of the most desolating results of this laxity was the failure of Mr. Rufford's banks, which appear to have been insolvent when the law was passed. His bank at Stourbridge owed £226,000, and paid a dividend of 4s. in the pound; while his Broomsgrove bank owed £227,000, and its assets only yielded 1s. in the pound. We are quite aware that the case of Strahan is very different from that of Rufford, as the former was not a bank of issue: but at a crisis of this description it is the duty of a watchful and independent journal to encourage caution in all departments of banking, and recommend a system impregnable to fraud. As far as possible we should buoy the rock before vessels strike on it and the crews are wrecked. In this spirit, then, of premonition, we would refer to a letter addressed by the first Sir Robert Peel to both Houses of Parliament, on the 3rd of April, 1826, in consequence of the frightful panic of 1825, in which he reminded them that he had advised that all banks should give security to Government, in land, the public funds, or other tangible property, amounting at least to half the value of their bills or notes in circulation. He adds these words:—"My proposition was not favoured with any notice; yet, had it been adopted, I am of opinion that most of the panic and distress now so severely felt in the nation would have been avoided." It is very probable that in these days of routine these remarks of our own may also be disregarded; but it is a consolation to to know that we are endeavouring to fulfil our duty by placing facts before our numerous readers. How many families have been reduced to ruin, how many fair prospects have been blighted, by the frauds of Strahan? Would not these have been avoided if the press long since had advocated the practice of depositors examining their securities? Has not the advice come too late to save the criminals and their victims? The bankers themselves now invite their constituents to examine their securities, and it redounds to their honour to have promptly taken this course; and sure we are that every honest and solvent banker, issuing his own notes, would give security to Government, for such a plan would protect him against a run in all cases of panic, whether they arose from groundless alarm or reasonable apprehension.

PRESBYTERIAN ANNIVERSARY.—THE WAR AND AMERICAN SLAVERY.

On the 21st inst., the two hundred and tenth anniversary of the Provincial Meeting of Presbyterian Ministers of Lancashire and Cheshire was held in Renshaw street Chapel, Liverpool, and in the evening the several clergymen attending above meeting, with many lay-members of the congregation, dined together at the Adelphi Hotel. After the usual loyal toast, the Chairman proposed "Our country: its free institutions, and unrivalled progress; may she be moderate and just in the exercise of her power, while ever in sympathy with the modest aspirations of other lands." The sentiment was responded to by the Rev. J. Martineau in a most eloquent speech. With reference to the war he said:

> For my own part I have no hope for the future of the world from any vague trust in the Providence of God apart from the action and exertion of man (Applause). As far as I can understand, there is no Providence of God for the moral concerns of this world, except through the soul and will of men (Hear). This earth is committed to our care; we stand here stewards of God's bounty and His right; and if we suppose a state of things will be brought about by submission and fear, by consenting if we refuse to see before us, and expect that something miraculous and supernatural will bring about and restore the right we desire—I believe we shall find ourselves deceived. I am firmly persuaded not merely are our nation's destinies in our intellectual, but our physical forces—God has given us all to be held in trust for those very purposes; and as we wield that force in the case of the policeman to control the disturbers of society at home, so we are bound to wield it equally in the case of the police of all nations to preserve the law of international right (Loud applause).

The Chairman next gave "Civil and Religious Liberty all the world over; and may England and America, the first to start the problem, work together for its solution."

The Rev. W. H. Channing, from the United States, who was called upon to reply, said it was utterly impossible to do justice to so great a theme. Let them, therefore, bear in mind the old Lancashire proverb—"A maun caun do what a maun caun, but a maun caunt do what a maun caunt." After a rapid glance at English history, in which he remarked that "Great Britain had won her three great victories over oppression under the rule of Queens," and that "now when the nation was struggling with the great northern avalanche, and when bristling bayonets were directed to the preservation of European liberty and civilization, it was a bright omen that the name of the Queen of Great Britain should be Victoria." He alluded in eloquent terms to the necessity and value of England and America co-operating, in working out the problem of civil and religious liberty over all the world. The chairman had alluded to the great check upon this liberty in the United States by the institution of slavery. He (Mr. C.) would refer to it only in one word. He would honestly confess the wrong—(hear, hear)—and, having done that, would boldly assert his confidence that that great wrong was not the slaves of their own accusation, cheers). He looked not upon it with a moment's apprehension. The signs of the times were so critical that every true lover of his country might be shortly called hence to answer by his life, as sure as he was a living man, liberty would have slavery banished from the bounds of the great republic (Cheers). Let people but once acknowledge a great wrong, and then each one would be ready to make a common sacrifice for a common right, and America would give an example to the world, higher even than that of Great Britain, for the slaves emancipated by Great Britain were not the slaves of their own nation (Hear, hear). One word more. Having thus frankly confessed the evil which prevented his country from being true to the principles of civil and religious liberty, he would remind his hearers that they, as sure as he was being which was sent as a gadfly on the side of a generous but sluggish horse—he believed that the best friend of Great Britain would admit that the great wrong acting as a gadfly to arouse her was pauperism (pauperism! pauperism! (Hear, hear.) It had been said by one of the best writers that pauperism was the dry-rot in the edifice of national prosperity (Hear, hear). There was work while they were fit to do—there was work while they had the strength and the manhood to do it. He had spoken his confidence with regard to America (Hear, hear)—he would take leave to speak equally his confidence in respect to Great Britain. The time had come when the words of Sydney Smith could be no longer applied to her—"This is a land in which pauperism is infamy;" but when it could be said "This is a land famous for not having a pauper within its limits" (Loud cheers).

IMPERIAL PARLIAMENT.

HOUSE OF LORDS. MONDAY.

The following bills were severally read a third time and passed:—The Stamp-duties Repeal on Matriculation and Degrees (Oxford) Bill, the Charitable Trusts Bill, the Grants of Lands Bill, the Public Libraries and Museums (Ireland) Bill, the Consolidated Fund (£10,000,000) Bill, and the Spirit of Wine Bill.

HOUSE OF COMMONS.—MONDAY.

PUBLIC BUSINESS.

Lord PALMERSTON made a statement on the subject of public business. The Government does not intend to go on this session with the Jurors and Juries (Ireland) Bill, the Grand Jury Assessment Bill, the Testamentary Jurisdiction Bill, the Church Discipline Bill, and the Court of Session (Scotland) Bill. It is intended, should the House approve, to read the Education Bills a second time, and to refer them to a Select Committee. There are some bills coming from the Lords which it is intended to press. The more important measures would be bodies to carry are the Colonial Bills, the Tenants Compensation (Ireland) Bill, the Ordnance Board Bill, and the Limited Liability Bills.

THE BANGO AFFAIR.

In answer to Captain Duncombe, Sir CHARLES WOOD stated that he had received the gratifying intelligence from Admiral Dundas that one of the boat's crew at Bango were not killed, and some were not even wounded. The Admiral demonstrated with the Governor of Helsingfors on the subject, and received for answer an excuse for the act, stating that the flag of truce was not seen by the troops on shore, and referring to the reports about soundings having elsewhere been taken under flags of truce. On this subject Sir Charles gave a direct contradiction to the report on the authority of the Captain who was said to have taken the soundings of the Kertch Channel. That officer entirely denied having made use of a flag of truce for that purpose, which, he said, was quite unnecessary, as soundings could be taken at any time. He added that five men and the Finnish captain were killed at Bango; that four of our seamen and two Finns were wounded; in all, the three boats, four seamen, and two Finns were taken prisoners. The wounded man who escaped was doing well.

THE SUNDAY-TRADING BILL.

Mr. OTWAY asked whether the Government intended to use its influence with Lord Robert Grosvenor to induce him to withdraw his Metropolitan Sabbath Bill?

Lord PALMERSTON answered that the Government had no desire to interfere in the matter. The House would deal with the bill as it thought best.

THE ATTACK UPON THE REDAN.—LOSS OF THE ENGLISH.

Lord PANMURE, in answer to Mr. Francis Scott, was understood to say that the latest telegraphic despatch gave the number of non-commissioned officers and men killed in the recent operations at 143, the wounded at 1068; officers killed and wounded, 53: in all, killed and wounded, 1268

REPRESENTATION OF THE CITY.

Mr. L. DUNCOMBE asked whether Baron Rothschild had not forfeited his seat in that House by contracting with the Government for the late loan?

The ATTORNEY GENERAL answered that the question was one rather for the House itself than for him. Should Mr. Duncombe bring forward a motion on the subject, he would be ready to tender his advice.

The House then proceeded to consider the Victoria Government Bill in Committee, and passed all the clauses.

The New South Wales Government Bill, and the Waste Lands (Australia) Acts Repeal Bill, also passed the Committee.

After some conversation it was agreed to defer till Monday next the consideration of the course to be taken with the Education Bill.

HOUSE OF LORDS.—TUESDAY.

CONDUCT OF AUSTRIA IN RELATION TO THE ALLIED POWERS.

Lord LYNDHURST rose to call the attention of the House to the Treaty of the 2nd December, 1854, and the recent Conferences at Vienna with reference to the position of Austria in her relation to the Allied Powers. After a preliminary statement of what he had hoped from Austria (of Prussia he never had any hope), Lord Lyndhurst said—I consider the actual position of Austria to be in some degree one of humiliation. The weakness of Austria may be traced to her position—a position which I trace to that lamentable event the partition of Poland, one of the greatest crimes of modern times. By that partition the position of Russia is one of perpetual menace to Germany, and practically as much so to Austria as her position at Sebastopol is one of menace to Turkey. On this account it is clear that Austria runs great risk by taking an open part against Russia, but risks must be incurred when great interests are at stake, nor is it likely the position of Austria will be improved by delay. As regards the past conduct of Austria, I do not feel that we have derived no advantage from it. The large army which she placed in Gallicia occupied a corresponding Russian army, but there are symptoms and appearances that lead me to believe that this occupation will not be continued. With respect to Prussia, I believe we owe its support not to the will of the Government, but to the strong feeling of the people of that country (Hear, hear). With respect to Austria I believe, on the contrary, that the spirit in which the Government has acted has been sincere, earnest, and straightforward, has arisen from a deep sense of the conduct of Russia, and a strong sense of her interest in restraining the ambition of that Power. In June, last year, Austria made a demand upon Russia to evacuate the Principalities. At that time the Russians in the Principalities had suffered severely; their army had been decimated by disease, and had been defeated in several encounters by the Turks; they were pursuing at the same time, not very successfully, the siege of Silistria, while the Allied troops were concentrating at Varna; there was a large force of fresh troops at Adrianople; and it was under these circumstances that Austria ventured for the first time to make a demand. Russia refused to acquiesce. She abstained from doing anything for a period of several weeks; and at length, when the siege of Silistria was raised, when the Russian army was in retreat, and when the Russian Government had served notice that she would retire behind the Pruth, and there act on the defensive, then, and not until then, did Austria venture to cross the boundary, and take upon her present position in the Principalities. No attempt was made to cross the Pruth after the retreating Russians. The consequence was that the whole of the army of Bessarabia was set free to act against the Allies in the Crimea. Lord Lyndhurst, after considering the conduct of the Austrian soldiers in the Principalities, went on to point out that the treaty of December, as understood by the Allies, pledged Austria to concert active co-operation with the Allies in case the negotiations failed. What occurred at the close of the negotiations? Count Buol declares in precise terms his opinion upon the proposition made by the Allies, and says that it was a proper and reasonable basis of settlement. He further says that the proposals made on the others is by Russia were wholly insufficient. Nothing could be more clear and distinct than these avowals. Russia had, according to the opinion of Count Buol, refused to do that which was reasonable and proper. Austria was, therefore, bound to take active measures. The language of Austria was decisive and clear, for Turkey had already refuted it, and Russia had already refused limitation. Now, my Lords, in what position do we stand? Is the Treaty of the 2nd December binding or not? It reminds one of the sailors' "phantom ship"—this shifting and turning in sight and out of sight. I do not imagine that Austria will enter into an actual treaty of neutrality. But I do believe that Austria will have a secret understanding with Russia, and withdraw her forces from the frontier; that Russia will do the same, and thus substantially a state of neutrality will be the result. The only Power which gained any advantage in the late negotiations was Russia, for by expressing her attention of adhering to the two first points she had secured the Lesser German States. I don't intend to go into the consideration of the propositions made in the Conferences; but I will say this, that in my opinion, and according to the best of my judgment, none of those propositions were worth a sight. The proposed reduction of the power of Russia in the Black sea could never substantially be carried out; it would always be evaded, and the attempts to evade it would lead to continual disputes, which in the end would without doubt involve us in fresh wars. The independence of Turkey was the great object of the war as explained by Lord Aberdeen, yet Mr. Gladstone, Sir J. Graham, and their friends, who lately seceded from Lord Aberdeen's Cabinet, held opinions directly opposed to that independence. I rejoice that they have retired from the Government. They are not suited to the present conjuncture of events. Now, my Lords, what is my advice? It is, however, perseverance. If you had made peace on the terms proposed, not only would you not have attained the object for which the war was undertaken, but you would have disgraced yourselves in the eyes of the world. Character is power. Russia would have ascended in the scale. Among the Eastern nations she would have been considered irresistible; no one would henceforth have dared to oppose her will. In the West the influence she has acquired in Germany would have increased a hundredfold; the chains of the lesser States there would have been riveted, and a severe blow would have been struck against civilisation and freedom. I rejoice, therefore, my Lords, that the terms were not acceded to. Now, my Lords, what do I look forward to? I am as sensible as any man can be of the arduous nature of the struggle in which we are engaged, but I feel confident as to the result (Cheers)—for, my Lords, from any vain notion, but on this ground, that, having at the seat of war the command of the sea, we can maintain and support a much larger army than any which can be brought against us (Hear, hear). Under such circumstances I do not fear the result. But, my Lords, what are we to do? I will quote the words of one man of as cool intellect as was ever evinced by a member of this House,—I refer to the late Prime Minister. Those words

are material. "I humbly beg to submit, says the noble Earl, "that if there be one thing more vital than another to the safety and independence of the Turkish empire, and clearly injurious to the power of Russia, it is the destruction of the fortress of Sebastopol; and that, therefore, the next direct object of the war which every one must have had in view from its very commencement was the attack and destruction of Sebastopol." Lord Lyndhurst then referred to the sufferings of the army before Sebastopol, and condemned the rashness of the expedition—laying all the blame on the Government, who were absent from the metropolis during the most critical periods of the campaign. Can you be surprised at the indignation which was felt by the people at such conduct on the part of the Government? The noble Earl at the head of the Government, with remarkable candour, said he was not surprised at the feelings of the people. If these events had occurred in the time of the ancient Romans, the people would have looked out for a Dictator. In this instance the nation looked out for some eminent statesman—some man of powerful intellect—to retrieve their disasters, and their voice was in favour of the noble Viscount (Lord Palmerston). How far he has satisfied them I cannot say. But I must remind that noble Lord that he who relies upon popular favour rests upon unstable and often dangerous foundation. I must remind him that the people, like children, are apt, after a certain interval, to break the toys which have pleased them for a time, and that nations suffering under disappointments have been known to destroy the idols on which they rested for support and protection; and I would urge upon him that nothing but the greatest vigour and success can maintain him in his position (Hear, hear).

The Earl of CLARENDON was not aware of any practical utility in the course which his noble friend had adopted, particularly in the severe censures which he had passed upon the proceedings of Austria. At the same time he was glad to observe that his noble friend who passed those censures had adopted a very different course from that which, during the last two years, he had seen adopted both in Parliament and by the press. He was sorry to say that the course so taken had made us many enemies abroad, particularly in Germany, and had caused a good deal of embarrassment. He agreed that Austria would have better consulted her dignity and interest if she had at first adopted a firmer tone and more decided attitude; but she was a great and independent Power, and we had neither the right nor the means of controlling her policy. It was, however, of the utmost importance to secure her alliance, and he saw nothing to lament in the exertions made for this purpose. But the communications to this end had in no way interfered with or retarded our military or naval preparations. On the contrary, the Duke of Newcastle, long before the Vienna negotiations began, wrote to Lord Raglan in the first week of January, telling him not to relax his efforts, as the negotiations might be accelerated by a vigorous prosecution of the war, and nothing would so much tend to bring them to a successful conclusion as a great military success. Under these circumstances there were really no grounds for doubting the sincerity of Austria. She had made great sacrifices by increasing her army, at an expense of no less than £6,000,000 sterling. Another proof of her sincerity was to be found in the letters of congratulation from the Emperor to the Emperor of the French, on the occasion of the Allies' successes in the Crimea. But when the Conferences had ended, the Government thought the time had arrived when Austria should be called upon to fulfil her engagement under the Treaty of December. Her answer, however, was that we had not agreed to the other proposals she had made for giving effect to the third basis, and that there were other modes of settling the question. As regarded the position of France and England, they were now disengaged from the late bases of negotiation, and freed from all pretence of being pledged with them. In any future negotiations they would insist only on such precise terms as they might think most advantageous to themselves and their ally.

The Earl of ELLENBOROUGH thought the ill judged expedition to the Crimea had paralysed the natural bias of Austria towards the Allies, by withdrawing from her neighbourhood the force upon which the latter have relied in the event of a rupture with Russia. She was thus forced to adopt a temporising policy.

After some observations from the Duke of Argyll, Lord Denman, the Marquis of Clanricarde, and Earl Granville, the subject dropped.

HOUSE OF COMMONS.—TUESDAY.

The House went into Committee on the Metropolis Local Management Bill, the remaining clauses of which were agreed to with amendments.

Mr. KORBUCK postponed from the 3rd of July to the 10th his motion founded upon the report of the Sebastopol Committee.

SUNDAY TRADING.

In reply to a question from Mr. Otway, Sir G. GREY said he was not responsible for the Sunday Trading Bill, but he would state his opinion on certain amendments when the bill should again come under the consideration of the House.

In reply to a question from Mr. Massey, Lord R. GROSVENOR said he would press the Sunday Trading Bill, and it would be for the House to adopt it, or otherwise, as it might think proper.

REPRESENTATION OF THE CITY.

Mr. T. DUNCOMBE moved "that Mr. Speaker do issue his warrant to the Clerk of the Crown to make out a new writ for the electing of a citizen to serve in this present Parliament for the city of London in the room of Baron Lionel Nathan de Rothschild, who, since his election for the said city, has entered into a contract for the public service."

The ATTORNEY-GENERAL alluded to the case of Mr. J. W. Harvey, who had accepted the office of Registrar of Hackney Carriages, in which the matter was referred to a Select Committee, and advised a similar proceeding in the case of Baron Rothschild, as doubts existed whether contracts for loans were not exceptional. He therefore moved, as an amendment, that the contract entered into by the Baron be referred to a Select Committee to consider and report whether such contract did not render his seat in the House of Commons void.

Mr WALPOLE seconded the amendment.

Sir J. JERVIS saw no objection to such a Committee, for he did not think that either lawyer or layman could entertain the slightest doubt that Baron Rothschild by accepting the contract had vacated his seat.

Lord J. RUSSELL supported the amendment, and said that many hon. members of that House had contracted for loans without vacating their seats; and this proved that the point was at least doubtful.

Mr. M. GIBSON thought it likely that all the members of that House who had taken parts in the loan were similarly compromised as far as regarded their seats; and, not seeing clearly his way, he would support the amendment.

After some further discussion, Mr. T. DUNCOMBE withdrew his motion, and the amendment was put and agreed to.

THE SUNDAY BEER BILL.

Mr. H. BERKELEY, in moving for a Select Committee to inquire into the Act of last session for further Regulating the Sale of Beer and other Liquors on the Lord's-day, enlarged upon the difficulties which the bill threw in the way of those who sought recreation by leaving town on the Sunday, unless they were clothed in broadcloth and shod in pumps. It operated most unfairly against the poor, while the rich were put to no inconvenience whatever. He referred to the contrary decisions come to by police magistrates as to the meaning of the bona-fide traveller clause, which he placed in an amusing point of view; and some of those decisions, he said, justified him in saying that no Russian serfs could be worse treated than were licensed victuallers by the tyrannical decisions of the magistrates in such cases. The bill might have checked drunkenness in public-houses, though that was doubtful; but it had increased it in holes and corners, and thus created a greater amount of immorality.

Mr. CORBETT seconded the motion, contending for the necessity of an inquiry, and requesting Mr. W. Patten, who was called the father of the bill, to give a definition of the words "bona fide traveller."

Sir G. GREY, although he could not agree in all that had fallen from Mr. Berkeley, yet he would give his consent to the inquiry on the part of the Government, thinking it desirable that the conflicting opinions regarding the operation of the bill should be brought to the test, and also that some mode should be devised of setting at rest the conflicting opinions respecting the "bona-fide traveller" clause.

Mr. BRADY had last year warned Mr. W. Patten that the bill would not give satisfaction, and that he would find it impracticable to put a stop to drunkenness by legislation.

Mr. W. PATTEN was favourable to inquiry, and if it could be proved that the bill had increased instead of decreasing drunkenness he would support its repeal.

After some observations from Mr. Wilkinson, Sir J. Walsh, and other honourable members, the motion was agreed to.

EXTENSION OF THE SUFFRAGE.

Major REED moved for leave to bring in a bill for conferring the elective franchise upon persons (not being aliens) who are rated to the Income-tax, but are not upon a register of electors for any part of Great Britain and Ireland.

UNFAIR TAXATION.

General WYNDHAM brought under the consideration of the House the state of the supply of troop and artillery horses, and the effect of the duties levied on stage-carriages and omnibuses in diminishing the supply of useful and seasoned horses suitable for the Army, and in discouraging the breed of horses generally; and moved that, in the opinion of the House, the laws relating to the assessment of duties on stage-carriages in England, Scotland, and Wales should be modified. He said that the Government had, in some instances, reduced the duty from 14d. to 1d. a mile. Thus, on twenty omnibuses, this reduction was granted to Messrs. Chaplin and Horne, and also to the Messrs. Greenwood, of Manchester, while the rest of the trade were left to the ruin incident upon a hopeless competition against such an overwhelming advantage. The trade asked only to be placed on a footing with their more favoured rivals.

Sir J. SHELLEY, in seconding the motion, dwelt upon the unfair burden of taxation thrown upon stage-carriages, amounting to 15 per cent, as compared with the 2½ per cent paid by railways.

Mr. BROTHERTON said the reduction to the Manchester proprietors was advantageous to the public as well as to the revenue.

Lord R. GROSVENOR complained of the extraordinary proceeding on the part of the Chancellor of the Exchequer of reducing the duty to some parties, while maintaining it as against the trade in general.

The CHANCELLOR of the EXCHEQUER was not aware that the duty operated prejudicially to the breed of horses for the cavalry forces, and contended that the pressure on the stage-carriage trade was not to be attributed to the mileage duty, but to the high price of horses and forage, the competition of steam-boats, and the increase in the number of cabs owing to the reduction of the fares. If he were about to submit a new budget the mileage duty would be entitled to a prominent place in it. The reduction of the duty to one penny would imply a sacrifice of revenue to the extent of £50,000 per annum.

Mr. DISRAELI wanted to know why the right honourable gentleman had modified the tax in Manchester, and had refused to modify it generally?

The CHANCELLOR of the EXCHEQUER said the Board of Inland Revenue had given the abatement to the Manchester omnibuses because they had to compete with an iron railway.

Mr. WALPOLE indignantly commented upon this proceeding, and hoped upon this ground alone the motion would be agreed to.

Mr. WILSON said the Board of Inland Revenue acted in accordance with a power given them to modify the stage duties in certain cases.

Mr. E. ELLICE, jun., recommended the Chancellor of the Exchequer to agree to the motion.

Lord PALMERSTON said the modifications were made by the Board of Inland Revenue without consulting the Treasury, and, as it was plain the Government would have the assent of the House—(Shouts of laughter)—to the modification of the duty, he would not oppose the motion.

The motion was then agreed to.

Mr. SCHOLEFIELD moved for a Select Committee on the adulteration of food, drinks, and drugs.

Sir G. GREY assented to the motion, which was agreed to.

Mr. L. BUTT obtained leave to bring in a bill to regulate the employment of females and young persons under eighteen in bleaching, finishing, and dyeing works.

HOUSE OF COMMONS.—WEDNESDAY.

The Marquis of BLANDFORD moved the second reading of the Formation of Parishes Bill. A short discussion took place, and ultimately, on the suggestion of Sir G. Grey, the bill was withdrawn.

MAYNOOTH COLLEGE.

The debate, adjourned from May 1st, was resumed by Mr. MAGUIRE, who said it was not the fault of the Catholic members of that House that the debate dragged its slow length along. The hon. member for North Warwickshire had been appealed to to withdraw his motion, but he had refused to do so, and had expressed his determination to go to a division. He thought that, so far from the grant to Maynooth being withdrawn, it should be liberally extended. Inasmuch as the grant was in a miserably dilapidated condition. So surely as Parliament withdrew the grant, a tremendous agitation would spring up, and down would go the Established Church.

Captain STUART considered that, as it was wicked to propagate a religion which we believed to be idolatrous, the House should at once withdraw the grant.

Mr. J. B. STANHOPE brought many charges against the Roman Catholic clergy in reference to their interference with late elections.

Mr. F. O'BRIEN defended the Catholic body from the charge of disloyalty which had been made against it, as well as from the charge of undifference and opposition to the Scriptures. It was idle to suppose that the House would put down Popery in Ireland by withholding the grant.

While the hon. member was speaking the clock pointed to a quarter to six, when the debate was adjourned.

MUSIC.

THE eighth and last concert, for this season, of the PHILHARMONIC SOCIETY took place on Monday evening. The programme did not present a single article of novelty, every piece which it contained, vocal and instrumental, being well known to the musical world. Probably the concert (as we have occasion to observe on other occasions) was all the better on this account; for, in the present state of musical composition, no new works appear which approach in excellence the standard productions of earlier times. The symphonies were Spohr's third, in C minor, and Beethoven's fourth, in B flat; and the overtures were Mendelssohn's "Midsummer Night's Dream" and Weber's "Oberon." Hummel's Pianoforte Concerto in A flat was played with consummate excellence by Pauer. Mdlle. Emilie Krall sang, in German, the great scena from the "Freischütz," best known by its English words "Before my eyes behold him." Miss Dolby gave Haydn's pathetic "Spirit Song;" and the two ladies joined in the duet, "Della Mosa," from the "Prophète." The performance of these fine pieces was as admirable as their selection was judicious: and the whole concert was received with every mark of cordial approbation.

SIGNOR PIATTI had his annual benefit on Tuesday evening at the St. James's Theatre, when a miscellaneous concert was followed by the "Barbière di Siviglia." The concert consisted of well-known Italian and French vocal pieces, sung by Madame Clara Novello, Madame Amedei, M. Gassier, Signors Burdini, Belletti, and Ciabatta. M. Ascher played, with great execution, a brilliant duet on the pianoforte, of his own composition. The "Barbière di Siviglia" was performed as at Drury Lane Madame Gassier being *Rosina*, Signor Bettini *Count Almaviva*, and M. Gassier *Figaro*. The whole entertainments of the evening were received with great favour by a crowded audience.

AT the meeting of the MUSICAL UNION, on Tuesday morning, much interest was created by the appearance of Mrs. Joseph Robinson, a most accomplished young pianiste, who performed, with Ernst, Beethoven's beautiful Sonata in F for the Piano and Violin, and charmed everybody present by the brilliant, precise, and expressive manner in which she executed it. Mrs. Robinson, who was formerly known to the English public by her maiden name of Arthur, made her début a few seasons ago in Dublin, where she had great success, and soon afterwards became the wife of Mr. Robinson, an eminent musical professor of that city. She has established in Dublin a regular series of classical concerts similar to those of the Musical Union; and has also made herself favourably known by the publication of several very elegant compositions for the pianoforte. At this concert, Messrs. Cooper, Hill, and Piatti performed Spohr's Quartet in E flat, Op. 58, and Beethoven's Quartet in E minor, Op. 59; and Mrs. Robinson played Chopin's Scherzo in B flat minor. The whole concert was of a most refined and classical character, and every piece was warmly applauded by a crowded assemblage. Meyerbeer was present, and on being recognised was greeted with a general burst of applause. The illustrious *maestro* has arrived in London for the purpose of superintending the rehearsals of "L'Etoile du Nord," which, it is understood, will be produced the week after next.

THE THEATRES, &c.

OLYMPIC.—Mrs. Stirling returned to this theatre on Friday week, having recovered from her long and severe indisposition. She performed *Lady Teazle* in the "School for Scandal;" Mr. Wigan giving a new reading of *Joseph Surface*—thus once for all, we hope, delivering the character from the mechanical routine of stage personation, and restoring it to that place in human individualities which alike secures its originality and truth. Mr. Robson, as the Jew money-lender, characterised with an originality he can make a great part of a short one, and throw much variety into a small space. The evening was devoted to Mr. Wigan's benefit; on which occasion a large portion of the pit was converted into stalls, an arrangement that excited a violent demonstration of dissatisfaction among the audience.

HAYMARKET.—We are glad to find that Mr. Buckstone has resolved on conceding to dramatic authorship one of its ancient privileges—that of an "Author's Night." Mr. John Saunders, at Mr. Buckstone's suggestion, has most amicably taken his benefit on the author's success appears to us one the reintroduction of which is highly desirable.

PHOTOGRAPHIC EXHIBITION AT AMSTERDAM.—The science of photography is now assuming such universal dimensions that we find the large cities and towns on the Continent are following the example set by London in holding their "Expositions Photographiques." At the recent exhibition at Amsterdam we were pleased to remark that M. Claudet and Mr. Maxwell Lyte received each the first-class silver medal, only fifteen of which, and twenty-six in bronze, were awarded amongst the numerous competitors.

THE SILENT MEMBER. (No. XXIII.)

THE tendency of modern legislation to attempt to make men moral by Act of Parliament has received a check from some proceedings which took place on Sunday last in Hyde-park. A large number of persons belonging to the humbler classes met, professedly, for the purpose of noticing how the higher classes observed the Sabbath; and the assembled crowd uttered discordant yells, by way of protest, as well-dressed persons in private carriages passed along the drive. This proceeding has been praised by some of the papers, on the old principle—or no principle—that one wrong justifies another wrong; and that, if the rich won't let the poor enjoy their Sunday, the poor ought not to let the rich enjoy theirs. This system, if carried out to the utmost, would end in everybody attempting to destroy the happiness of everybody else. Besides its other inconveniences, the plan has the bad effect of punishing the innocent as well as the guilty; for the probability is that the majority of those who were hooted and annoyed on Sunday last were unfavourable to the Sunday Bill, and opposed to restricting the harmless enjoyments of the people in the least degree. The affair is wholesome as an indication of public feeling, but it is not very satisfactory as an indication of popular judgment, though it is probable that by the majority of the working classes the mode adopted for expressing a general opinion will be condemned. "Live and let live" is the maxim usually acted on by the humbler classes in this country, who look with pleasure rather than envy on the gaieties of the rich as long as they have the means of subsistence and very moderate recreation for themselves. It is right that the wealthy should reciprocate this good feeling, and not convert it into an opposite sentiment, by an undue interference with the enjoyments of the people, which are already so limited as to require to be expanded rather than contracted on almost every side.

The Sunday Trading Bill is already unpopular, and not without reason, for it is intended as a piece of class legislation, which will not do in these days. It may be true enough that in some clubs very little wine is sold on Sunday; but there is one law for the rich and another for the poor as long as the member of the club can purchase, if he pleases, what the working man is not able to procure. If the consumption of wine or spirits in clubs on Sundays is insignificant, it is because the members are prevented, by education, from intemperance; and education is the only legitimate remedy for the evil among all classes of society. It would seem, from a discussion in the House of Commons on Tuesday evening, that nobody is willing to take the responsibility of the Sunday Trading Bill, though no one with the power to put a stop to it has the courage to come forward and oppose it with such influence as would cause the bill to be thrown out or withdrawn. The Government, which might easily put a quietus on the measure, leaves the House to deal with it; and Lord Robert Grosvenor will not abandon his production, though he shows something of the spirit, or want of spirit, of Frankenstein, in looking on the monster he has made. It is evident, however, that the framers and supporters of the bill have not their hearts in the cause; and, without the moral courage to admit a failure, they have not the confidence necessary to lead to success. It may be expected, therefore, that the obnoxious measure, which is already half disowned by its parent, and repudiated by its supposed friends, will perish for want of support.

It is strange that the men who are continually engaged in making the laws are frequently found asking the meaning of the laws they have made. It is hardly fair to the Attorney-General to call upon him to tell the House of Commons what it meant by its own acts, when, on the contrary, it should be for the House to declare its own intentions when any ambiguity has arisen. Sir Alexander Cockburn was placed the other night in a rather embarrassing position by being asked to interpret a statute which prohibits a Government contractor from occupying a seat in Parliament. The Act seems clear enough; but an attempt was made to throw on the Attorney-General all the responsibility of saying whether it should be carried out. Scarcely any one denied that the meaning of the Act was obvious; but many honourable members argued that it ought not to be put in force, because it had been for some years neglected. This may or may not be a good reason for repealing it, but can be no reason for allowing it to remain on the Statute book as a dead letter, to be perused, but not used. No law should be allowed to exist in feebleness if it is not to be put in force. It is obvious that if Acts of Parliament are to remain in abeyance, instead of being repealed, they may be converted by a bad Government into instruments of injustice, by being brought suddenly into operation to serve some particular end. In addition to this objection there is the fear that the laxity manifested in reference to a bad law may be justified in reference to a good law, and it is dangerous, as well as unconstitutional, to allow the Government to have the power of selection as to the laws that are to be disregarded or carried into effect. Let the Legislature, if it pleases, suspend the operation of a law for a given period, or repeal it altogether; but nothing can be more unsatisfactory than to retain in the Statute-book an Act of Parliament that is not intended to be put in operation when the circumstances to which it is applicable happen to arise.

Everybody is talking of the failure of the banking-house whose partners have already appeared at Bow-street, for unlawfully disposing of securities entrusted to them for safe custody. As the affair is *sub judice*, it would not be proper to make the criminal charge the subject of comment, though the newspapers are freely performing the office of a jury without hearing the evidence, and pronouncing the accused guilty, of everything—and, indeed, more than everything with which they stand charged. It may, however, be allowable to suggest that of any parties have received any of the misapplied securities, under circumstances that would have naturally led to suspicion as to the honesty of the transaction, there is as much moral, if not as much legal, guilt in accepting as in transferring the property that has been misapplied. Of course, if the pawning of the securities was thought to be a fair and legitimate transaction, these remarks cannot apply to anybody; but, if a man brings me an article which I think he has no right to pawn or sell, and I either lend money on it or purchase it, I am not much better than himself. As these securities are said to have been parted with and pledged to a frightful extent, it may be worth while in the interest of public justice to inquire whether any of the various parties into whose hands they have fallen had reasonable cause for suspecting that all was not right. The law has a wholesome provision for the punishment of those who are proved to have or to have had possession of property that may be reasonably suspected to have been stolen or unlawfully obtained, and marine-store dealers are constantly being sent to prison for the possession of all sorts of articles that they might have supposed to have been unfairly come by on the part of the persons offering them for sale. Surely the sort of property dealt with by the delinquent bankers should be as much protected as old brass, old iron, or other metal of trifling value; and the marine-store dealers of the moneyed world, if any such there be, should be called upon to show the *bona fides* of their transactions when found in possession of articles of great value that have been dishonestly dealt with by the persons to whom they were confided as a sacred trust. Every calamity has its compensation, of which society gets the benefit, though individuals may suffer. The late lamentable disclosures, and the ruin that has resulted from them, will at all events have the good effect of warning the public against trusting too much to "respectable" appearances; and a still better result will be accomplished if a check is given to a system which is supposed to be rather prevalent, even among men of high standing in the mercantile world, of making advances on goods of which the parties pawning them cannot honestly dispose.

"——"—PAINTED BY A. SOLOMON.—EXHIBITION OF THE ROYAL ACADEMY

"THE LAST DAY OF HARVEST—THE ROMAN CAMPAGNA."—PAINTED BY ALFRED FRIPP.—EXHIBITION OF THE SOCIETY OF PAINTERS IN [illegible] (SEE NEXT PAGE)

"A CONTRAST." BY MR. A. SOLOMON.

FROM THE ROYAL ACADEMY EXHIBITION.

MR. SOLOMON has chosen the explanatory motto for his picture of "A Contrast," engraved in our present Number, in these words:—

Will Fortune never come with both hands full?
* * * * *
Such are the poor in health; such are the rich,
That have abundance and enjoy it not.

His picture forms No. 355 of the Middle Room of the present Royal Academy Exhibition, and, much to the discredit of the Hanging Committee, is hung, as we have already had occasion to observe) too much above the line of sight to be seen to ordinary advantage.

His motto very ill explains his picture. It is said, indeed, that he himself had considerable difficulty in determining what name he should give it, and it was not until the last moment that the present title was adopted. It would seem at first sight that a suitable name was a very easy matter. Look at the picture in our Engraving, and see (at first sight) if it is not. How admirably are the two stories told in this well-balanced picture—you see at once what the aim of the artist has been, and how completely he has carried it out. Here we have the pleasures of hope and the pleasure of health, and yet no one name that Mr. Solomon's friends have selected for his adornment suits his picture. But art speaks all languages, and the spectator feels that he does not want words to tell him the story of Mr. Solomon's single contribution to the Academy.

If Mr. Solomon failed in satisfying the Hanging Committee of the Academy that his picture possessed merits that demanded a better recognition at their hands, he has not failed in satisfying Mr. Ruskin that his picture merited a better position on the walls of the Academy. "It is difficult," writes Mr. Ruskin, "to see this picture, at the height at which it is placed; but it seems to me better than most of its class in the rooms; and the face of the invalid is very beautiful."

Mr. Solomon is a young, conscientious, and promising painter, of whom England has every reason to be proud. He does not set about a picture as if he were undertaking an easy matter, a mere holiday task. It is easy to see that he is telling a story that he has weighed well, and that every part is the result of careful consideration harmoniously adjusting itself to the whole of the composition. He has looked on nature (there is no doubt of this) with a scrutinising eye; is too honest and painstaking to trust to a retentive memory; but places himself before the very things he is anxious to represent. The distant sea of the picture is exquisitely truthful, and the very breeze that passes over the foreground seems to be adding fresh colour to the cheeks of the beautiful invalid, who looks with hope at the healthy faces and active figures of the group of fish girls that support the right of the composition. Here, in Mr. Solomon's "Contrast," is a picture that will stand the test of Mr. Curistie's hammer.

"THE LAST DAYS OF HARVEST THE ROMAN CAMPAGNA."—BY ALFRED FRIPP.

FROM THE OLD WATER-COLOUR SOCIETY.

THE Bristol people are fond (and with reason) of the Fripps. The merchant princes of the west, who neglected Savage and Chatterton, and suffered Bard of Bristol to pass from among us with very little encouragement, are properly and penitently proud of Mr. Baily, the sculptor of "Eve," and of Alfred and George Fripp, of the Old Society of Painters in Water-Colours. And Bristol has every reason to be proud of the Fripps, ornaments as they most unquestionably are to our English School of Water-Colour Art.

During the past year Mr. George Fripp has been in Essex and Argyllshire, but Mr. Alfred Fripp has extended his range of study, and sought subjects with success in Rome. It is with the latter, however, that we have this week to deal.

Mr. Alfred Fripp has sent five contributions to the Old Water-Colour Society:—1. "A Vegetable-seller's Journey;" 2. "Going Home—Woman from the Mountains of Subiaco;" 3. "The Vintage, a Sketch;" 4. "Peasants of Olevano Returning from Labour;" and 5. "The Last Day of Harvest—The Roman Campagna." The latter we have engraved for our paper of this week.

The names of these five pictures suggest at once to the many admirers of Mr. Alfred Fripp the peculiar excellences they are likely to possess All are masterly in point of conception and execution, and all provoke favourable comparison in the same line of art with the productions of Mr. P. Williams and Mr. Thomas Uwins. Mr. Fripp fully maintains his name for excellence with the two favourites with whom he must necessarily be compared. If anything, Mr. Fripp has a superiority over his predecessors in point of freedom. He is no timid artist. And it is not necessary to tell Mr. Fripp, what Vandyck was fond of insisting as absolutely necessary, "Be bold—be bold."

DEAD LARK, IN RELIEVO LEATHER-WORK.

IN the ILLUSTRATED LONDON NEWS of July 3, 1852, we drew attention to the novel and ingenious accomplishment occupying the attention of ladies in the fashionable circles, of modelling in leather; and we engraved a very elegant specimen of this elaborate fancy work, in the form of a bracket, ornamented with vine-leaves and grapes. We explained in our notice of this tasteful bracket that the relievo leather-work could be applied to picture-frames, baskets, fire-screens, vases, and, in fact, to every kind of article imitative of the most finished wood-carving; but we certainly did not anticipate that the artiste who executed this bracket could have attained the perfection she displays in a Dead Lark, now on view at Messrs. Banting and Son's, 27, St. James's-street.

This bird—the whole of which has been cut, carved, and chiselled out of leather—has won the admiration, not only of the fairer portion of the creation, but also of eminent artists, who have pronounced it to be a superior work of art. The lark is extended on the back lifeless on a mound, with wings outstretched, and the feet and legs drawn up from the last struggle. The *pose* is remarkably effective, and the artiste has evidently closely copied nature in the attitude. What particularly strikes every observer is the accuracy with which every minute feather is depicted. The mound, which is also composed of leather, equally attracts attention, by the correct and finished details in the fern leaves, ivy, &c. There is another attractive evidence of the relievo leather-work, by the same clever artiste—namely, a Bacchanalian chariot, with a group of fruit, consisting of a pine, grapes, apple, filberts, ornamented with vine-leaves, to be seen at Dalton's, in Rathbone-place, showing the variety of ways in which this most useful accomplishment can be applied. The relievo leather-work of the present day is, however, by no means a modern invention; it is simply a resuscitation of the most ancient mode in which women employed their time. The dried and died skins of animals were used in the construction of the Tabernacle, and leather modelling is referred to minutely in Holy Writ. The Egyptians were well acquainted with the art, as may be perceived at the British Museum, where figures in embossed leather, supposed to be the oldest in existence, and dating more than 800 years before Christ, will be found in the Egyptian Room. The Dead Lark is well worthy the inspection of every lady with "nimble fingers" who desires to apply leather modelling to ornamentation and decoration.

THE QUEEN OF SPAIN AND HER MINISTERS.—In the Privy Council held yesterday at Aranjuez the Duke de la Victoria spoke very seriously to the Queen respecting her wish to go to La Granja, expressing his regret that she should continue to have about her persons other than her constitutional advisers, of persons by whose machinations her throne and even her life had been endangered, and said that it was the decided opinion of her Ministers that she ought not to go to La Granja. The Queen replied to the head of her child, and declared that that alone was what she thought of, but that she knew it had been said she intended to escape from La Granja. The reply to this was, that the welfare of the nation is her first consideration before that of her Princess, that the Ministers knew very well that her Majesty had no such intention as that which she believed to have been attributed to her, but that Espartero's desire for his safety rendered him most anxious to be removed from her by so great a distance as that from La Granja to Madrid—which latter place it is, of course, out of question that he should at present leave. These are the principal points of what passed upon that subject. The result is, that the Queen is expected in Madrid this evening at six o'clock. It is not probable that she will remain here all the summer, but will probably seek refuge from the great heat (when it comes) at the Escurial, which is but two leagues off. Under present circumstances it is here generally considered that it would have been highly imprudent and improper that she should be allowed to take up her residence at a place comparatively so remote as La Granja.—*Letter from Madrid, June 18.*

The former Ministers of Russia at London and Paris, Baron Brunnow and M. de Kisseleff, are about to receive a new mission. The former, it is said, will be the accredited representative of Russia at Hesse-Darmstadt and to the Frankfort Diet; M. Kisseleff will go to Rome and Florence, replacing M. de Bouteneff, who returns to Russia as a Member of the Council of the Empire.

HOAXES ON 'CHANGE.

PERHAPS the mere fact of the construction of a line of telegraph three thousand miles long would not move a days be a subject of very great wonder; it is the circumstance of this mode of communication having become an indispensable adjunct to the prosecution of such a war as we are engaged in that excites our astonishment. Before we were six months old in the mighty struggle, we found it impossible to get on without calling to our aid the two most remarkable inventions of modern times the railway and the telegraph; and the facility with which both were constructed, the enterprise and perseverance which first planned and then carried them into execution afford a bright example of the ability of the Western world.

In a few hours we learn what is taking place at the seat of war, and we are thus placed in a position promptly to meet any difficulty, or supply a want, or take advantage of a success. But we fancy there is another good it will produce—and that is the annihilation of that system of political hoaxing so rife during the period of the last war. Looking at the slow means of communication, and the difficulty of obtaining intelligence at that time, and comparing it with the almost instantaneous flash by which it can reach us now-a-days; considering, moreover, that the Government has it in its power to verify every item of news which reaches it through the medium of a cipher known only to those in authority; looking, too, at all the precautions that have been and will be taken to prevent imposture, we may hope that the days of this species of hoaxing are fairly at an end, and that we have only now to recur to them as the curiosities of a past age. The electric telegraph, therefore, we repeat, will produce this subsidiary benefit; it will, no doubt, effectually destroy those opportunities for coining false intelligence, which, in a moment, made one man's fortune, and marred another's, and which oftentimes puzzled both the Government and the people, leading them to doubt even the truth, when the truth came.

This species of lying grew at one period into a perfect science: schemes were planned with all the dramatic sequence of a well-constructed comedy, in which the actors were often as numerous as in a stage play, and the parts they had to perform as various; and of which "men in high places" did not sometimes disdain to be the authors, dividing their *droits d'auteur*—or, more properly speaking, the spoil—with subordinates of the lowest stamp. False news was frequently concocted by members of Parliament; forged letters from abroad were handed about, or inserted in the newspapers, with a view to propagate some fiction; and every art was practised to obtain the first inkling of any news, whether true or false. The servants of men in office were said to be in the pay of the great speculators in the Funds, and even the wives of Ministers were supposed to have been the willing instruments, for "value received," of those to whom a piece of fresh intelligence was worth thousands.

The most favourite fiction was the rumour of the death of Bonaparte. In 1804 a despatch was received by the Prime Minister, Lord Grenville, giving an account of his assassination by one of the wild chiefs of the Desert, and detailing the circumstances with all the minuteness of the most perfect narrative. The chief, it was said, had professed attachment to him, until an opportunity offered, when, on a signal being given, numerous tribes had set upon Napoleon and his followers, and cut them to pieces. This flimsy story remained current for a considerable time, owing, of course, to the want of ready communication, and the impossibility, therefore, of its being speedily contradicted or confirmed—church bells were set ringing for joy; no doubts were entertained as to the authenticity of the story; and the Funds rose proportionally. The originators of the forged despatch were never publicly declared, nor does a thorough inquiry seem to have been pressed; it was merely hinted at the time that they were "two State speculators" and one or two "members of the Lower House." On one occasion (1805) Lord Moira, a member of the Cabinet during Lord Grenville's Administration, was definitely accused of using his official information for the purpose of speculating in the Funds. His accuser was a clerk in the Bank of England; but it does not appear that he was able to substantiate his allegation; and the matter dropped, after having excited considerable attention.

The frequency with which the game was played of reporting the death of Napoleon Bonaparte naturally induces an expression of wonder that so stale a trick came at last to be believed at all, or to have the slightest effect upon the Funds. Yet we find it the stock piece of intelligence up to almost the last year of the war. Early in 1814 large purchases were made in Consols and Omnium for the *Account*—that is to say, for a future settling day. The persons making these purchases were not known to the brokers as speculators, having been purposely selected for that reason. The first act of the drama having been thus performed, it only remained to proceed to the second. Accordingly, one morning, there landed at Dover from an open boat some persons wearing the uniform of "French officers" (so the story goes, though why dressed as French officers we do not clearly see), who immediately proceeded to an inn there, and ordered a post-chaise and four to be got ready, that they might proceed to London with the utmost dispatch. They *accidentally* let fall the purport of their mission, which was to communicate the death of Bonaparte. The news spread like wildfire; some persons rushed to the semaphore station, near Dover, with the intention of having the news telegraphed to London; but the day happened to be very foggy, and it was found impossible to transmit the important intelligence to the next station. This failure in the working of the telegraph was a severe blow to the schemers, who had calculated upon its conveying the story not only with celerity, but clothed with all the semi-authority of an official mode of communication. They therefore started at once in the post-chaise and four, dashing into the towns at every stage of their journey, with all the appearance of the utmost dispatch, ordering fresh horses with the greatest *empressement*, and dropping hints as they passed, of the astounding particulars they were carrying to head-quarters! In this way they reached the suburbs of London, when the drivers were ordered to stop, the pseudo French officers got out of the chaise, and, after dismissing it, walked quietly to a lodging close by to divest themselves of their masquerade. Their part in the drama had been played, and those who had originated the scheme had therefore merely to watch the effect of their plans.

In a short time the news of the death of Bonaparte reached the Stock Exchange, and, like the snowball—*vires acquirit eundo*—the story had lost nothing in detail from the distance it had travelled. Numerous particulars came to be added to the original bare *fact*, until almost every man was ready to vouch for each minor detail of his version, and to contribute his quotum of "further intelligence," and "latest news." The Funds rose, as a matter of course, but not so rapidly or so high as the plotters of the trick had reason to calculate upon, considering that, during the latter part of Bonaparte's career, prices frequently varied from 8 to 10 per cent in an hour. Some of the more prominent dealers in the market doubted the authenticity of the report, and hung back accordingly. Nevertheless, the stock which had been bought for the speculation was sold out at a good profit before the falsehood of the report was discovered. When it in the rapidity of obtaining intelligence private enterprise has always managed to outstrip the Government. One would naturally suppose that, with all the means and appliances at the beck of a department of the Administration, whatever was desired could be done more effectively than it could possibly be within the scope of an individual to achieve. Yet such has never hitherto been the case; and in the conduct of the present war we have seen instances in which both time and money might have been saved by entrusting to the enterprise of individuals what a Government failed to effect. During the last war it was surely within the power of a Ministry, by paying liberally, to acquire the earliest information; and yet, it is said, that Rothschild knew of the victory at Waterloo *some days* before it was made public, and in July, 1830, he was the first to announce the Paris Revolution to Lord Aberdeen.

The man who, perhaps the earliest, saw the advantage and profit to be derived from immediate intelligence of events, was Sir Henry Furnese, a Director of the Bank of England in the time of William III. He established a complete train of communication throughout the Continent; and, in his means of intelligence, and his modes of operating on the Money-market, he may be said to have been the pattern which Rothschild followed at a more distant period. Yet even Furnese, with all his means of correct information, very often acted on, or promulgated, false news, and, it is said, the temptation to gain not unfrequently led him into insinuating the fiction first, that he might afterwards profit by the publication of the truth when he chose to let it out.

In the reign of Anne, Medina, a Jew of great wealth, was one of those who spent immense sums in gaining intelligence from abroad. Not content with maintaining agents or correspondents in various places, he himself accompanied Marlborough in all his campaigns, and actually paid to the avaricious Duke (who was proverbially greedy of money) £6000 per annum for the permission; repaying himself by transmitting, express, the first news of any victory, or other circumstance of importance. His profits must certainly have been enormous to have sanctioned so great a cost.

In many of the hoaxes played by speculators in the Funds, there appears very great similarity; as though either the subject would not permit of great variety, or the wit of the schemers was infertile in novel expedients. During times of political excitement, and especially during a struggle between contending dynasties, or a war between nations, the rumour sought to be promulgated commonly related to the sudden capture, or death, of the chief opponent in the contest. Thus, we have already remarked what a favourite scheme was the report of the death of Bonaparte; and, in like manner, during the memorable outbreak in 1715, the news of the taking of the unfortunate Stuart was every now and then, the grand *pièce de resistance* on which the cheats of "the Alley" hoped to found their fortunes. Nor was there anything very novel, or particularly ingenious, in the mode of carrying out some of these pretences. On one occasion, a carriage containing four persons is seen proceeding at a great pace towards the seaport of Montrose; but, before reaching there, while halting for a short time in a small town, the carriage is surrounded by officers and soldiers of the king's troops, and after a slight show of resistance the travellers are arrested, and conveyed on their way towards London. Of course the news flies rapidly—as rapidly as it could fly in those times—that the Pretender, attempting to escape, after his late disasters, by embarking at Montrose, has been intercepted, and is now a prisoner, *en route* for the Tower. The originators of the trick, and the actors in the little interlude, reaped a sufficient harvest in the Stock-market delighted, of course, at the success of their stratagem

Sometimes the false intelligence promulgated would be the rumour of a peace, or a declaration of war with some State not already engaged in the then almost universal turmoil. Sometimes a Prime Minister had just died suddenly; occasionally the King was taken seriously ill, or a Cabinet had been dismissed. Some months after the hollow, and to this country ignoble, truce of Amiens, the public mind was in the greatest state of suspense as to the probability of the war again breaking out. The people in the City, therefore, were proportionately pleased when, one morning, in May, 1803, they observed the following notice posted outside the Mansion House:—"Lord Hawkesbury presents his compliments to the Lord Mayor, and has the honour to acquaint his Lordship that the negotiation between this country and the French Republic is brought to an amicable conclusion."

The notice was a fabrication; the concoctors of it, however, "took nothing by their motion," as, although they succeeded in raising the price of the Funds, and making a great (nominal) profit on their operations, yet the whole of the bargains being declared void they realised nothing.

The latest hoax played was the "Tartar hoax" of the "taking of Sebastopol," and we trust it will be the last: That men who would recoil with a becoming horror from the commission of any act of "recognised" dishonesty should nevertheless, without scruple, embark in schemes which are indefensible under any phase of the most lax code of morality, is certainly surprising. We could not, perhaps, have hoped for any amelioration or extinction of the system so long as the temptation to gain by it existed, and the difficulties against a rapid mode of communication were in full force; but now that the Government has a controlling power over the means of acquiring intelligence, and those means cannot be surpassed by private speculation, we may conclude that political HOAXES are among the category of things "that have been," or must necessarily become very, very infrequent.

THE ROYAL MEDICAL BENEVOLENT COLLEGE.—On Monday the Royal Medical Benevolent College, at Epsom, was opened by his Royal Highness Prince Albert, who was accompanied by the Prince of Wales. The nature and purposes of this institution have already been explained and an illustration of the Building given in this Journal (June, 1853). It may, therefore, suffice to repeat that it is destined for the reception of decayed medical men and their widows, and the education of their children. The building, of which only a portion is completed, is one of large dimensions, pleasantly situate on a rising ground, about a mile from the town of Epsom. At about a quarter to four his Royal Highness Prince Albert, preceded by Earl Manvers, the president of the institution, and accompanied by the Duke of Buccleuch, his suite, arrived, and was received by the company with loud cheers. His Royal Highness having entered the building, the ceremony of inauguration was gone through. The bishops of Winchester, Oxford, and St. Asaph, with Lord Ebrington and other members of Parliament, took part in the proceedings. The ceremony being brought to a close, the Prince adjourned to the large hall of the building, where the general company, passing in review before him, and the ladies, handed in their five-guinea purses. The Prince departed about a quarter-past five, amidst loud cheers, the band of the Royal Marines, which had been in attendance throughout the day, playing the National Anthem. A large portion of the company then adjourned to a very spacious marquee, where an elegant dejeûner was served by Mr. Engleheart, who did all in his power to give satisfaction, when Earl Manvers, the members of the council, and others who had been to see the Prince off the grounds, entered the tent; and the noble Earl, as president of the institution, took the chair—the Bishop of St. Asaph saying grace. At the close of the dejeûner a variety of toasts were drunk, and speeches made; after which the greater part of the company adjourned to the hall, dancing commenced, and was kept up with spirit until dusk. We ought to add, that owing to some want of proper arrangements very great dissatisfaction was expressed by many of the company at the way in which the dejeûner was managed.

THE CORN TRADE IN THE PRINCIPALITIES.—A great crisis is feared to be impending in the commercial world here. The principal trade in these Principalities is in cereals. But our grain merchants are threatened with utter ruin; for, as they are unable to export, not only do the capitals they have invested in the purchase of corn remain unproductive, but they run the risk of losing the grain itself, for there is such an accumulation of it in the ports of Braila and Galatz that the magazines cannot receive the whole, and much of it is left in the open air, and begins to be damaged. Vessels dare not enter the Danube in search of cargoes at Braila and Galatz. It is true that within the last few days they have begun to show themselves, and already about 400 may have reached these ports, almost all of them under Greek and Austrian flags; but not above 10 are taking in cargo, for they are only allowed to load for the ports from which they have sailed—viz., for Austrian or Greek ports. It is estimated that there are at present 400,000 kilos of corn at Braila, and 800,000 at Galatz. The kilo contains 400 okas—each oka being about 3lb. English. The price at present is—1st quality, 135 to 140 piasters per kilo at Bucharest, and 140 at Braila. The kilo of maize is from 70 to 75 piastres at Bucharest, and 100 to 102 at Braila. The kilo of barley sells at from 60 to 66 piasters. For 650 okas of hay 68 piasters are paid at Bucharest, and 40 in the rural districts. The Wallachian plaster is worth about 3½d. English. The quantity of hay in the Principalities is excessive, great part of the cattle having perished in consequence of the Russian and Austrian occupations.—*Letter from Bucharest, June 8.*

GOVERNMENT OFFICES.—A movement is on foot for obtaining the permission of the Government to close their offices at one o'clock on Saturday, so as to give the clerks in their service advantages similar to those which are accorded by most of the leading merchants in the city of London. The practice sought to be established has for some time past prevailed in the Audit-office, and has been found to be productive of no inconvenience or delay to public business.

TOWN AND TABLE TALK ON LITERATURE, ART, &c.

THE talk about the mob in Hyde-park on Sunday last has taken a literary and antiquarian turn. There was a mob of a somewhat similar character in St. James's-park just a century ago. The Mall was then the fashionable part of London, and walking, or rather sauntering, was then the polite amusement. Now Hyde-park is the centre of fashion, and a chariot and pair the perfection of female happiness. A young lady reminds us that there is a passage in the letters of Horace Walpole very much to the point :—"My Lady Coventry and my niece Waldegrave," he writes to his friend Montagu, June 23, 1750, "have been mobbed in the Park. I am sorry the people of England take all their liberty out in insulting pretty women." . . . "Only remember," says our fair friend to whom we are indebted for the reference, "the Countess of Coventry and the Countess of Waldegrave were the two leading beauties of that time. Who has not heard of Maria Gunning and Maria Walpole?"

Another lady (and this is a matter in which ladies have been unnecessarily mixed up) has called our attention to a second illustration of the mobbing scene in St. James's-park to which Walpole has thus cursorily referred. The beautiful Countess of Coventry was not to be stopped in her Sunday's walk upon the Mall. She must be protected from the mob, and in a most extraordinary fashion did King George II. give orders for her protection. We must suffer the story to be told in the very words of the time. It is thus Mr. Jenkinson writes to George Grenville :—

The only particular that is worth sending you is a very silly action of Lady Coventry, who, having been insulted in the Park Sunday was se'nnight, the King heard of it, and had that to prevent the same for the future he would have a guard. Upon this foundation her Ladyship ventured boldly again into the Park on Sunday evening, but she was attended by two sergeants of the Guards in front, with their Halberds, and no less than twelve followed her. The whole guard was ready to have turned out if there had been occasion, and the Colonel of the Guards in waiting kept at the proper distance. With this ridiculous parade she walked there from eight of the clock to ten; and as all this could not prevent the mob from having curiosity, some impertinent things were still uttered, though at some little further distance, and some of Fielding's men that attended took up the most troublesome.

Here is a picture for Mr. Frith, or some other artist in his pleasant line of art. We hope we shall see no Duchess driving on Sunday with a guard of honour before and behind, or a second scene enacted in Hyde-park like that which took place last Sunday.

Booksellers and printers have managed for a time to maintain the undue interest they possess in the Royal Literary Fund. The meeting (to which we called attention) was, as far as voting goes, a triumph of the Row and Albemarle-street over Bulwer and Dickens. The Committee mustered to a man, and the booksellers and printers assembled thicker than authors. As one looked round the room it was easy to see that the "whip-in" had been carefully and successfully done by the Committee, and poorly done, if not altogether neglected, by the New Charter party. The Committee (taught a lesson by the previous meeting) determined not to be caught napping; and the New Charter party went to work evidently in the belief that the day was theirs. Most grievously were they mistaken. Mr. Milnes (whose interest in the welfare of men of letters no one can doubt) moved an ingenious amendment, which the Bishop of Oxford backed up in a speech—in no other way to the point than that it caught the majority of his hearers. Pursy publishers and printers enjoyed immensely the prelate's belief that authors cared little about tea—in short, that authors could not exist otherwise than with the best of the good things of the earth before them. As the right reverend Prelate chuckled over this imaginary condition of authors, it was easy to imagine that his Lordship had little thought of the condition of his curates. The Bishop of Oxford would not build a rectory, because, forsooth, every clergyman should possess a Cuddesden. The speech to every author in the room was extremely painful.

Authors lost, but there was a kind of tacit understanding, not very gracefully surrendered by the Committee, that the Old Charter should be construed hereafter in a larger sense, and that loans and annuities would be granted in accordance with the opinion of Mr. Willes, the learned counsel of the New Charter party, who had given his opinion against the learned counsel of the Committee, Mr. Serjeant Merewether. It is particularly due to the Bishop of Oxford to state that his opinion went with that of Mr. Willes. It is more than time that the Committee should be reformed. We saw in the room, among the authors not on the Committee, Sir E. Bulwer Lytton, Mr. Dickens, Mr. Forster, Mr. Ford, Mr Sterling, Mr. Oxenford, and others of note; while on the Committee we saw hardly anybody of literary reputation. The fact is the literary composition of the Committee was admirably represented by the chairman chosen by the Committee—Mr. Benjamin Bond Cabbell—a good, well meaning subscriber to many funds; but for an author his pretensions are even less than Lord Lansdowne's, whose letters threatening that he would resign the Presidentship, if the resolution were carried, savoured too much of dictatorship.

People interested in this really interesting subject to men of letters are talking of the hint which Sir Bulwer Lytton let fall in his speech that the money of the Guild of Literature and Art (some £7000) would be handed over to the fund should the resolutions be carried. As Lord Lansdowne's letter was a threat, this half-promise of Sir Edward on behalf of his friends was a kind of bribe. The threat told; the bribe had no effect.

Mr. Gordon Cumming is about to turn lecturer in the manner of Mr. Albert Smith. For this purpose he has taken the Salle Robin at the top of the Haymarket. He is to commence immediately.

Mr. Fred's "Mitherless Bairn," to which we introduced our readers in our Journal of June 9, is about to be engraved in a style and size commensurate with its many merits. Mr. Graves has bought the copyright, and on these conditions, that it is to be rendered either in line by Mr. R. Graves, A.R.A., or in mezzotint by Mr. Atkinson.

Mr. Joseph Hunter, whose knowledge of English topography and of English biographies is in every respect so remarkable, will be the new Vice-President of the Society of Antiquaries, vacant by the death of Viscount Strangford. Mr. Hunter's steady adhesion to the Society will do much to extend its usefulness.

The Cathedral Commissioners in their Report just presented to Parliament recommend (most properly) that periodical visitations should be made to our Cathedrals by persons of high architectural knowledge, deeming it worthy of serious consideration whether some such provision may not be necessary with a view to the preservation of the Cathedrals according to the original designs of those who built them. This periodical visitation will include the approval of all monuments to be hereafter erected in any of the Cathedrals. Architects want as much looking after as sculptors or churchwardens.

The secretary to the new Civil Service Commission is Mr. James Spedding, the unsparing castigator of Lord Campbell's "Life of Lord Chancellor Bacon," and one of the editors of the forthcoming edition of Bacon's works. The selection is in every way satisfactory.

ACCOUNTS from Constantinople state that a loan is to be contracted by the Western Powers on account of Turkey, to the extent of £4,000,000. The general impression is that one half of this will be raised in London under the guarantee of the English Government, and the other half in Paris by the French Government.

THE Prussian Government is looking well to its arms. Orders have been given to convert as speedily as possible 280,000 weapons of the old system into Minié rifles. As soon as this is accomplished 600,000 others are to be altered after the same fashion. A mechanic in Zelle has taken a contract binding himself to deliver 120,000 rifle-sights within a year.

CHESS.

Our custom ary Notices to Ch ss Correspondents are unavoidably postponed.

SOLUTION OF PROBLEM No. 592

WHITE.	BLACK.	WHITE.	BLACK.
1. P to Kt 4th	P takes P (best)	3. Q takes R P (ch)	P takes Q
2. Q to Q B 2nd	K takes R (c)	4. Kt Mates	

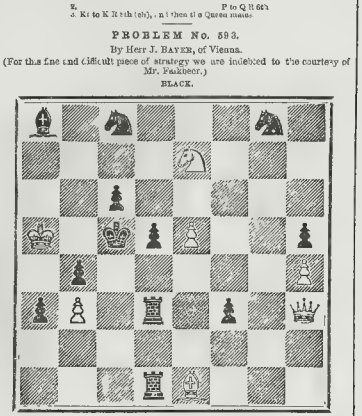
2. P to Q B 6th
3. Kt to K R 8th (ch), and then the Queen mates.

PROBLEM No. 593.

By Herr J. BAYER, of Vienna.

(For the fine and difficult piece of strategy we are indebted to the courtesy of Mr. Faulkner.)

BLACK.



WHITE.

White to play, and mate in five moves.

CHESS IN THE METROPOLIS.

The following smart little game has just been played between M. FALKBEER, the Austrian Professor, and M. DE RIVIERE, of Paris, while *en route* for the Leamington meeting. This *partie* is lively and pleasant enough in itself, but it derives additional interest from being the first played between these eminent combatants.

(Gaveco Piano.)

WHITE (Mr. F.)	BLACK (M. de R.)	WHITE (Mr. F.)	BLACK (M. de R.)
1 P to K 4th	P to K 4th	21. Q takes B	K R to K Kt 3rd
2 K Kt to K B 3rd	Q Kt to Q B 3rd	22. P to K B 4th	P takes K P
3 K B to Q B 4th	K B to Q B 4th	23. Kt takes P	Q to her 4th
4. Castles	P to Q 3rd (a)	24. P to K B 5th	B to K B 4th
5. P to Q Kt 4th (b)	B takes Q Kt P	25. Kt to K Kt 3rd	B takes K R P(h)
6. P to Q B 3rd	B to Q B 4th	26. P takes B	P to K R 5th
7. P to Q 4th	P takes P	27. K R to K 5th	Q to her 2nd
8. P takes P	K B to Q Kt 3rd	28. K R to K Kt 5th	R takes R
9. Q B to Q Kt 2nd	Q B to K Kt 5th	29. P takes R	P takes Kt
	(c)	30. Q to K 3rd	R to Q Kt sq
10. K B to Q Kt 5th (d)	P to Q R 3rd	31. R to K sq	R to Q Kt 7th
11. K B to Q R 4th	K to B sq (e)	32. Q to her 3rd	Q to Q B 3rd
12. B takes Kt	P takes B	33. R to K 2nd	B takes R
13. Q Kt to Q 2nd	P to Q 4th	34. Q takes B	Q to Q B 8th (ch)
14. Q to Q B 2nd (f)	Kt to K 2nd	35. K to Kt 2nd	Q takes Q Kt P
15. K B to K sq	K to Kt sq	36. Q to K 8th (ch)	K to B 2nd
16. K Kt to K 5th	P to K R 4th	37. Q takes K B P	P to Q B 3rd
17. Kt takes Q B P	Kt takes Kt	38. Q to K B 3rd	Q to her 4th
18. Q takes Kt	K B to Q R 4th (g)	39. Q takes Q	P takes Q
19. R to Q B 3rd	K R to his 3rd	40. K takes P	
20. Q to Q B 5th	B takes B		

And after a few more moves the game was resigned and drawn.

(a) The "Handbook" gives the subjoined variation as the consequence of B took's playing 4. K Kt to K B 3rd—

4	K Kt to K B 3rd	7. P to Q 4th	B to Q Kt 3rd
5 K R to K sq	Castles	8 Kt to Kt 5th	B to B 3rd
6. P to Q B 3rd	K R to K sq	White has the better game	

(b) This brings about the well-known Evans opening

(c) K Kt to K B 3rd is preferable. By playing the Bishop thus, Black subjected himself to considerable difficulty, if not danger

(d) A most remarkable move

(e) He was compelled to play the King or do worse, for White threatened to push forward her Q P, and with terrible effect next move

(f) We should have preferred playing B to Q B 3rd, checking, and then moving the Q to her B 2nd

(g) A very good move, gaining Black important time, and causing the attack to change hands completely

(h) Had he played the very natural move of K R to Q B 3rd, it would have cost him the Game, since White would have taken the Bishop with his Kt, winning at least a Piece.

CHESS IN PARIS.

A spirited skirmish between M. DE RIVIERE and M. SCHULTEN.

(Sicilian Opening.)

BLACK (M. S.)	WHITE (M. de R.)	BLACK (M. S.)	WHITE (M. de R.)
1 P to K 4th	P to Q B 4th	20. Q R P takes P	Q R P takes P
2. K B to Q B 4th	P to K 3rd	21. P takes Q P	P takes P
3. P to K 5th	Q Kt to Q B 3rd	22. K Kt to Q 3rd	P to K R 4th
4 K Kt to K B 3rd	K Kt to K 2nd	23. P to K 6th	Kt takes P
5. P to Q Kt 3rd	Q Kt to Q R 4th	24. K Kt to K 5th	Q to her B 2nd
6. Q B to Q Kt 2nd (a)	Kt takes K B	25. Q Kt takes K R P	P to Q 5th
7. P takes Kt	Q to her Kt 3rd	(c)	
8. Q to Q B sq (b)	Kt to K B 4th	26. K Kt to Q B 4th	K R to K B sq
9. Q Kt to Q B 3rd	Q to Q B 3rd	27. K Kt takes P (ch)	Q takes Kt
10. Kt to K 2nd	K B to K 2nd	28. K R to K sq	K to Q B 2nd
11. Castles	P to K Kt 4th	29. Kt to K 4th	K B to Q Kt sq
12. Q Kt to K Kt 3rd	Kt to K R 5th (c)	30. P to Q B 4th	Kt to K R 5th (ch)
13. K Kt to K sq (d)	P to Q K 3rd	31. Q to her Kt sq	R takes K R P (ch)
14. Q Kt to K R 5th	Q B to Q Kt 2nd	32. P to Q B 4th	Kt to K 7th (ch)
15. P to K B 3rd	Castles (Q's side)	33. K to K sq	Q to Q B 2nd
16. P to Q R 4th	K R to K Kt sq	34. P to K B 4th	R takes K B P (ch)
17. P to K R 3rd	Kt to K B 4th	35. P takes R	B takes Kt (ch)
18. P to Q R 5th	Kt to K Kt 2nd	36. K to K R 2nd	Q to K B P (ch)
19. Q Kt to K Kt 3rd	P to Q 4th	37. R takes Q	B takes R

Checkmate

(a) Q Kt to Q R 3rd would, perhaps, have been better.

(b) Was not this a needless precaution? Why not have played out the Q Kt? If White had then taken the bishop, he would have gained a loss, we fancy. For suppose—

8. Q Kt to Q B 3rd. Q takes B. 11. Q Kt to the 5th. Q to Q R 4th
9. Q R to Q Kt sq. Q to Q Kt 4th. 12. Q Kt to Q 6th (ch) K to Q sq

Black may win the K Rook, or play his K Kt to K Kt 5th, or take the Q Kt P with his Q Rook—in any case having a superior game to his antagonist

(c) An odd-looking move, but one not without purpose.

(d) A little examination of the game will show that Black could not exchange pieces safely.

(e) A fatal error.

CHESS ENIGMAS.

No. 922.—By J. STONEHOUSE

THE RUSSIAN EMPEROR.—The late arrangements of the Emperor Alexander II., relative to the succession to the Russian throne, appear to be of more importance than might have been at first supposed. It is said that they were caused by the desire of the Czar to withdraw from affairs as soon as he possibly can. The Emperor, it is said, is of the opinion of the German party, that Russia can only lose, materially and morally, by a continuation of the war. It is added that the late events in the Crimea have produced a very marked effect on his Majesty, and have led him more than ever to wish to retire.—*Letter from Pressburg.*

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Her Majesty has signified her commands that the Thames Regatta shall be under her Royal patronage, and adopt the title of the "Royal Thames National Regatta."

The King of Prussia continues to keep his room in spite of the continued improvement that the *State Anzeiger* assures us takes place daily in his health.

The new Royal yacht, *Victoria and Albert*, is about to go out to see on a trial trip as far, it is reported, as Gibraltar.

A new apartment in the Vatican is hung with tapestry presented to the Pope by the Sultan.

On the 21st inst. the Earl of Westmoreland left Vienna for Ischl, where Lady Westmoreland has been for some time. His Lordship has never before quitted the walls of Vienna since his first arrival in Vienna in 1851, excepting for a few days, when he was summoned to England to attend the funeral of the late Duke of Wellington.

From a correspondence which appears in the papers, it appears that Lord Panmure sent a message by telegraph to Lord Raglan, requesting him to give orders for the protection of the Museum and other works of art at Kertch.

The Emperor of Austria has given orders to the Academy of Art to prepare a magnificent mass-book to be sent as a present to the Pope.

The Empress of Austria arrived on the evening of the 20th inst. at Possenhofen, in Bavaria. The Duke and Duchess, her parents, went to meet her. It is expected that her Majesty will return to Vienna on the 17th July; and that the Emperor will arrive in that capital on the 9th, from his tour of inspection to Galicia.

At the demonstration in Hyde-park on Sunday, Lord and Lady Wilton and Lady Granville were obliged to leave their carriages at the demand of the multitude. Several horses bolted, and three or four difficult escapes took place.

An assurance has been given to the King of Sardinia that a representative of his Government shall be admitted to the next Conferences, which, it is suggested, may probably be held at Frankfort instead of Vienna.

The Committee of the House of Lords appointed to consider Earl Shaftesbury's bill for the limitation of the hours of labour amongst needlewomen report that it is inexpedient to proceed with the consideration of the measure.

The King of Portugal and the Duke of Oporto have determined to proceed from Marseilles to Rome, his Majesty being desirous of obtaining the blessing of the Pope on the reign he is about to commence.

On the 20th inst. the Grand Duke Nicholas reviewed the troops at Helsingfors and Abo, and inspected the fortifications of Sveaborg.

On the late anniversary of the battle of Waterloo, Lord Seaton caused a gratuity of 5s. to be given to each survivor of the memorable conflict at present residing in Kilmainham Hospital.

The mission of Count Azeglio to the Courts of Paris and London is connected with the demand of Sardinia to be allowed a voice in any future negotiations for peace.

Prince Napoleon is sufficiently recovered from his indisposition to hold his usual weekly reception.

The Attorney-General for Ireland entertained a number of his friends at dinner on Saturday at the Crown and Sceptre, Greenwich.

It is said that there will probably be a vacancy in the Professorship of Natural Philosophy in Queen's College, Cork, in October next, as it is the intention of Professor Shaw to accept a tutorship in Trinity College, Dublin, at the end of the long vacation.

The President and Fellows of the Royal College of Physicians postponed their soirée on Wednesday last, on account of a severe domestic affliction which has befallen the President.

Riza Bey, who acted as secretary to Aali Pacha at the Vienna Conference, has been appointed first secretary to the Turkish Embassy at Paris.

On Saturday morning the Roman Catholic Bishop of Galway, the Right Rev. L. O'Donnell, sat down to breakfast in apparently sound good health. Suddenly he was seized with illness, and within a very brief time ceased to exist.

The Bishop of Poitiers ordered prayers to be offered up in his diocese, last week, for the cessation of the unginial weather.

The illustrious composer, Meyerbeer, was graciously received at Buckingham Palace last week. The maestro is daily engaged presiding at the rehearsals of "L'Etoile du Nord."

Sir E. N. Buxton, Bart., late M.P., is lying dangerously ill at the residence of his father-in-law, Samuel Gurney, Esq., Ham-house, Upton-park.

Colonel A. Bundi has been definitively appointed to the command of the Anglo-Swiss Legion, with pay amounting to £800 a year.

A private reformatory for juvenile criminals whose term of punishment has expired has been established in the New Forest, by Mr. Compton, M.P. for South Hants.

Mademoiselle Rachel, it is expected, will visit this country on her way to the United States, and perform four of her principal characters at the St. James's Theatre.

The statue of Allan Ramsay is to be erected in Edinburgh, where a memorial to the portrait barber has long been a desideratum. It will stand at the end of a terrace near the head of the Mound.

Abd-el-Kader has received the permission of the French Government to reside at Constantinople, in consequence of the partial destruction of Brousse by earthquakes.

The Arctic expedition in search of Lieutenant Kane sailed from New York on the 3rd inst. The expedition will proceed up Baffin's Bay, visiting the most prominent headlands.

The price for the Bath-chairs which are to be allowed to circulate in the Paris Exhibition Palace has been fixed at 1s. 8d. the hour, including the remuneration to the man who conducts the vehicle.

As it is feared there will be a deficiency of water at Liverpool this year it has been resolved to water the streets with sea water.

A society for enabling liberated convicts to emigrate to America was formed two years ago at Drammen, in Norway, and it has already sent out thirty-two persons, all of whom are doing well.

The gambling establishment near Thonon, on the banks of the Lake of Geneva, has just been closed by order of the Sardinian Government. It is also said that a general measure will shortly be adopted for closing all the places of play in the Sardinian States.

The corn inspectors in the market towns have received orders from the Board of Trade to enforce the penalties against corn-dealers who do not furnish particulars of sales of corn as to quantity and prices.

In order to afford the public greater facility for viewing the Paris Exhibition Palace and the Beaux Arts, the doors will henceforth be opened at nine o'clock in the morning—instead of eleven, as heretofore—and remain open till six.

The British Association will meet in Glasgow on the 12th September. Trips to Arran, Ben Lomond, and Loch Lomond will be included in the programme of the week.

The *Journal de la Corse* announces the discovery of a mine of mercury in the district of Ajaccio.

A comparison of the sums insured against loss by fire, in the different assurance societies of the country, shows that property exceeding in value one thousand millions sterling is thus protected.

A proclamation has been published in Altona prohibiting enlistments for the Foreign Legion. The penalty for disobedience is eight years' imprisonment and hard labour.

The United States Post-office department has had its attention directed to the fact that vessels were preparing to carry letters across the ocean at postage rates less than those established by law.

Three Jews have been arrested at New York and committed to prison for enlisting soldiers for the British Foreign Legion.

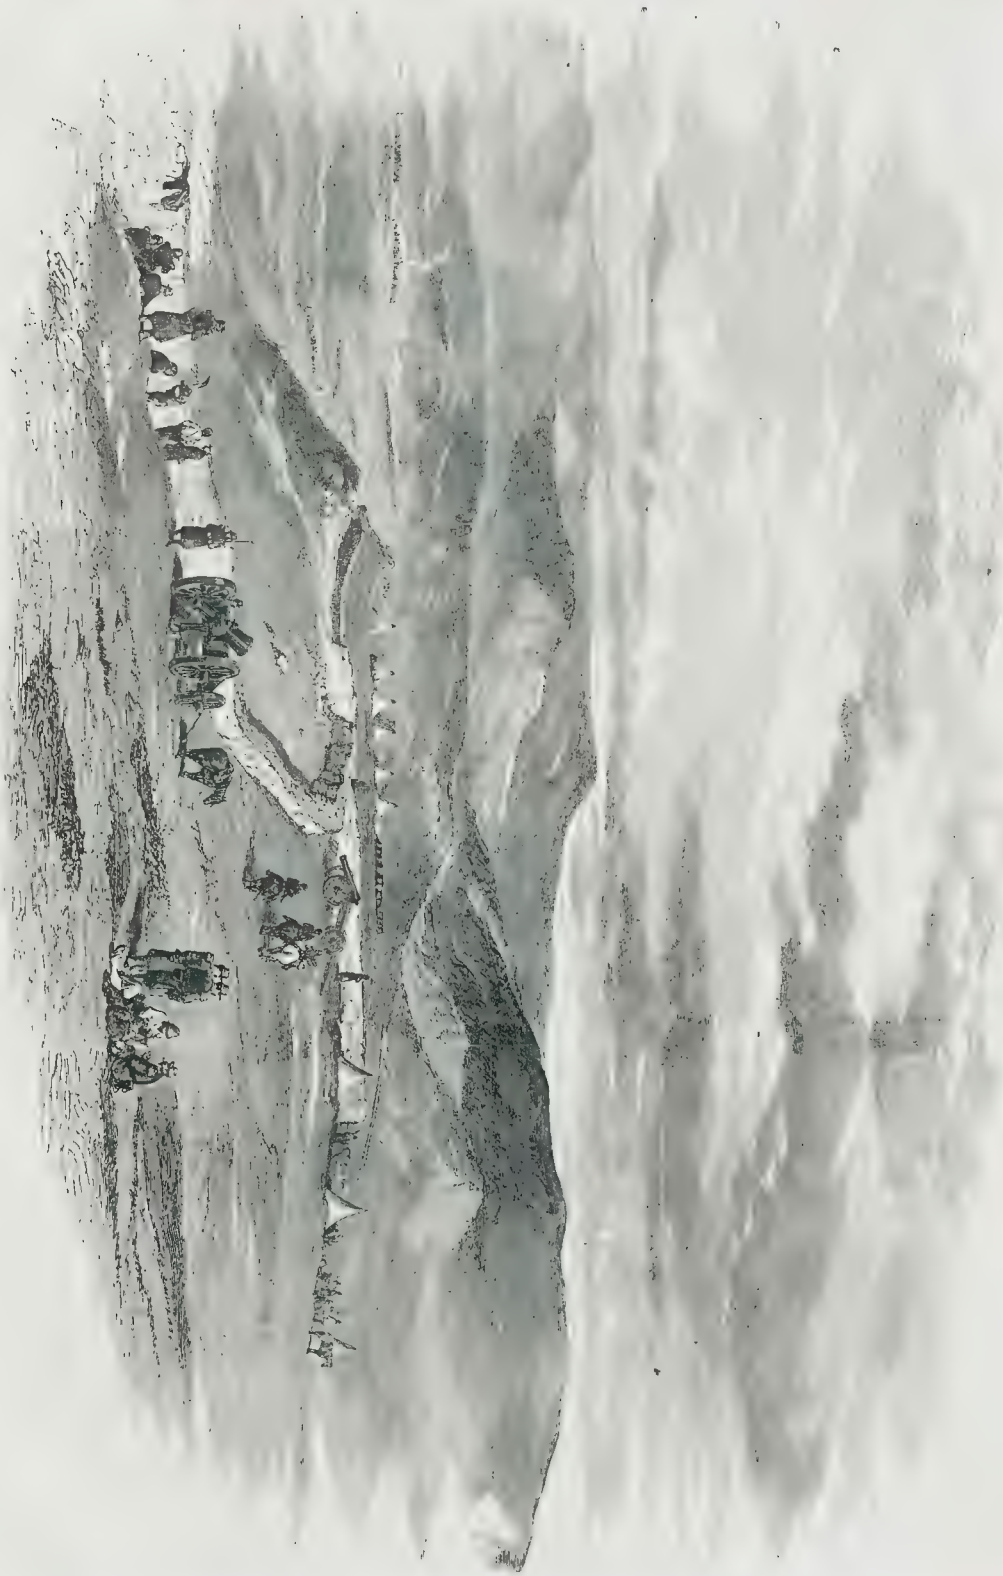
A loan is to be contracted by the Western Powers, on account of Turkey, to the extent of £4,000,000. The general impression is that one-half of this will be raised in London under the guarantee of the English Government, and the other half in Paris by the French Government.

The typhus fever is making fearful ravages amongst the Russian army in Poland.

Above two hundred eminent scientific foreigners have been invited by the local committee to attend the meeting of the British Association in September next. Among the names are those of Louis Agassiz, Princes Charles and Lucien Bonaparte, Baron Humboldt, M. Leverrier, Baron Liebig, M. Quetelet, Chevalier Bunsen, Professor Encke, Dr. Freund, &c.

The *Journal de St. Petersbourg* of the 15th prints at full length Mr. Cobden's and Sir James Graham's speeches in the sitting of the House of Commons on the 6th inst. The speech of the hon. member for the West Riding is plentifully garnished with "Bravos!" "Longs et bruyants bravos!" &c., conveying the notion that the sentiments were peculiarly palatable to the assembly.

THE VALLEY OF DEATH," BEFORE SEBASTOPOL.—(SEE PAGE 674)



THE REDOUBT CANROBERT, BEFORE SEBASTOPOL.—(SEE NEXT PAGE.)

SKETCHES BEFORE SEBASTOPOL.

THE two large Views engraved upon the preceding pages will be best described in the words of our artist:—

"I send you (he writes) a drawing, which I think interesting, not only for its extraordinary subject, but from its being a well-known spot to all going down to the trenches, and constantly referred to in private letters home. It is called "The Valley of Death," and a most appropriate name you would say it was, could you see it as I have seen it at twilight. Just as the night relief have passed, the enemy invariably blaze away; shot and shell come spinning over the right side of the ravine (as may be seen by referring to my sketch), striking the ridge, sending a cloud of dust and stones into the air, or, clearing the top, pitch into the valley, where they either ricochet or bury themselves in the middle of the ravine. The accompanying Sketch I made entirely from nature; and the number and position of the shot and pieces of shell have conscientiously been drawn from nature: of necessity a great quantity were behind the rocks, or hidden in the hollows of the ground or long grass; which accounts for a remark of some officers who knew the spot, that I had not put a sufficient number of shot into my drawing. It may, however, serve to give you some idea of the quantity of ammunition that our enemies have expended, when it is taken into consideration that nearly all in this portion of the ravine must have come from the Redan, and very few from the Flagstaff (two only of the Russian batteries); and, further, that our men have at different times collected the shot, the sizes of which suited our guns, and thus enabled them politely to return the shot to the Russians.

"I next send you a view of the Redoubt Canrobert, near the small town of Tcherguna, looking over the Tchernaya on the one side, and the plains of Balaclava on the other. The guns of the redoubt are manned by our artillerymen; but the covering party, the men for the trenches and advanced pickets, are supplied by the French. They often exchange shots with the outpost of the enemy, who are posted, and can be seen, on the opposite side of the Tchernaya.

NAVAL AND MILITARY INTELLIGENCE.

DEATH OF CAPTAIN LYONS, R.N. We deeply regret to announce, as the latest casualty of the war, the death of this gallant officer, while in command of his ship the *Miranda*, in the Sea of Azoff. The intelligence reached the Admiralty on Wednesday afternoon, and was immediately communicated by Sir Charles Wood to the Countess of Arundel, sister of the lamented officer. The precise circumstances under which Captain Lyons met his death have not yet publicly transpired, but we believe it may be correctly stated that his life has fallen a sacrifice to his devotion to the service of his country. A rifle-ball, while on the paddle-box of his ship, is stated to have been the cause of his lamented death, after a too short but glorious career.—*Post.*

THE QUEEN AND OUR WOUNDED SOLDIERS.—An official order from the Horse Guards was received at Chatham on Tuesday by the commandant of Chatham Garrison, directing that returns are to be made and forwarded to her Majesty, as soon as possible, of the names of all the wounded soldiers from the Crimea who were paraded for her Majesty's inspection on her recent visit to Chatham, on the 19th inst. Each man's corps is to be given, how he is wounded, in what battle he fought, and his age and length of service. Invalids who are for the last named were inspected on the former visit by her Majesty in March last, are to have a cross placed against each name. This order, which is so promptly to be attended to, leaves no doubt but that it is her Majesty's intention to distribute medals for service in the Crimea to all those non-commissioned officers and soldiers at the invalid depôts, from nearly every regiment engaged in the campaign in the East, as soon as everything is ready.

On Wednesday between fifty and sixty non-commissioned officers and gunners and drivers of the Royal Artillery were discharged from the service. Most of these men were wounded in the battles of the Alma and Inkerman, and in the trenches before Sebastopol. Some have lost an arm, others a leg, and one poor fellow, named Davis, lost both his arms.

On Tuesday orders were issued from the Horse Guards for a return of the entire number of effective men now attached to the Brigade of Guards, for draughts of men to be told off to proceed immediately to reinforce the battalions of the Guards now at the seat of war. The return is not to include those men who have over eighteen years' service. The number of men to go out from the Guards by this draught is—Grenadiers, 500 rank and file; Scots Fusiliers, 250 rank and file; and Coldstream Guards, 250 rank and file—making a total of 900. The draught is expected to embark early in July at Portsmouth, proceeding direct to Balaclava.

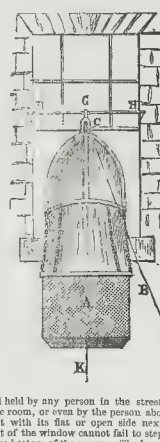
On Saturday evening the *Golden Fleece* left her moorings at Queenstown, and steamed to the man-of-war roads, where she took up her berth for the night, and on Sunday morning she took her departure for the Crimea. Her entire living freight on leaving Queenstown was, besides her crew, 450 men and 300 horses.

THE *Calcutta* has landed the guns belonging to the floating batteries *Glutton* and *Meteor*. Bedding, &c., has been sent on board for 100 supernumerary seamen, and she is under sailing orders to proceed to the Baltic with all possible dispatch. This ship has been converted into a store-ship of considerable magnitude.

NEW FIRE-ESCAPE.

A PHILANTHROPIC gentleman who has long deplored the helpless condition in which by far the great majority of persons, rich and poor alike, find themselves in the event of a sudden outbreak of fire, has just succeeded in perfecting an Escape which, from its simplicity, as well as from its cheapness, is calculated for universal adoption.

An aversion to anything conspicuous is one of the characteristics—perhaps, to a certain extent, one of the weaknesses—of the English character; and this point has not been lost sight of. The Family Fire-Escape is so contrived that it can be placed in a box, and form part of the ordinary furniture of a bed-room, where it is always at hand, and at a moment's notice ready to perform the duty of saving valuable lives.



The Escape in question possesses most important advantages over any that has ever been placed before the public. It is most moderate in price; so simply constructed as not to be able to get "out of order," and, as will clearly appear from the following description, no persons, be they ever so old, ever so weak, ever so timid, can go wrong in the use of it.

The view in the Engraving is a front one, and shows the window of a house with the Fire-Escape fitted to it.

A is a cradle of wire-work or other suitable material, consisting of a lower portion, which is closed at the sides and bottom and open at top, and connected by chains or rods to a hood or dome, which is open on the side next to the house. The cradle is lined with canvas, which has been steeped in alum, or otherwise rendered uninflammable.

An ordinary rope or wire rope (B) is attached to the top of the hood and passed round the pulley (C), which is furnished with a hook for the purpose of suspension to the eaves (H H), which bar has a loop (G). When a fire occurs the window is thrown open, and the block (C) hooked on to the loop (G).

The rope (B) is thrown out and held by any person in the street. It may also be held by a person in the room, or even by the person about to descend. The cradle is pushed out with its flat or open side next the window, and a person stepping out of the window cannot fail to step into it. A guide-rope (K) is fixed to the bottom of the escape. The beauty of the invention consists in its perfect security.

MESSRS. STRAHAN, PAUL, AND CO.'S BANKRUPTCY.
EXTRAORDINARY DISCLOSURES.

A meeting for the proof of debts and choice of assignees in the bankruptcy of William Strahan, Sir John Dean Paul, Bart., and Robert Makinson Bates, who had carried on business as bankers at 217, Strand, and also the business of navy-agents, at 41, Norfolk street, Strand, under the style of Halford and Co.; took place at the Court of Bankruptcy, Basinghall street, on Monday last, before Mr. Commissioner Evans. The petition was filed on the 11th of June. The petitioning creditor is Montague John Tetham, proctor, of 26, Great Carter-lane, who is a creditor for £1334, in respect of the balance of an account of moneys had and received by the bankrupts as bankers, in respect of which no security or satisfaction had been given. The public are aware that criminal proceedings are pending against these bankrupts under the 7th and 8th of George IV., sec. 29, by which any person convicted of unlawfully disposing of securities is liable to be transported beyond the seas for any term not exceeding fourteen nor less than seven years, or to be imprisoned for any term not exceeding three years. The case caused intense interest, and the court was crowded to excess.

The proceedings were commenced by Mr. Lawrance, the solicitor to the petition, who stated that, for the sake of convenience, sundry proofs of debt had been taken out of court and entered as proved.

His Honour then directed that the names of the respective creditors who had thus proved their debts out of court should now be read aloud in open court, so that it might be ascertained if there were any opposition to them.

Mr. Lawrance said that, in order to mitigate the pressure in this court, which was extreme, the registrar (Mr. Archbold) was taking proofs in another court. Mr. Ballantine appeared for Mr. Strahan and Sir John Dean Paul, Mr. Parry for Mr. Bates; Mr. Chidley for the Marquis of Clanricarde, Lord Galway, and other creditors, the aggregate in amount being about £350,000; and Mr. Linklater for Sir Lucius Curtis and other creditors; and Mr. Cooper for several noblemen. Mr. Lawrance said, as a great many of the creditors were present, it might be satisfactory to them to have the figures, which were an approximation at least to the correct sums, so far as he had been able to ascertain them. The following statement was then handed in by Mr. Lawrance:—

Total creditors unsecured			£702,372 3 4
Add Earl Fitzwilliam's balance of debtor and creditor account		£1454 5 0	
Sir J. D. Paul		1388 15 6

	640,998 12 2		
Liability for which no value received	12,500 0 0		
	£653,498 12 2		

Mr. Lawrance said it would appear that the gross amount of debts against the firm was £680,000; that was quite irrespective of any deficiency which might be found in the security held by creditors, and irrespective of any surplus which might come from those securities. The assets were, as nearly as possible—debtors on loans, £100,000; ditto, amount due on overdrawn account, £20,000; bad and doubtful debts not carried out, £276,446; Halford and Co., £19,009, which was not an asset; and bad debts, £31,400. These items are rather as a matter of account, for, of course, as assets, much had depended on realisation. With respect to Halford and Co., the accounts kept at the house were principally kept by a clerk who were in the habit of drawing in anticipation of their credit. They expected from Halford and Co. about £20,000 upon overdrawn accounts, instead of the debts of Halford and Co. had all to be proved against the estate; the same partners constituted both firms; the £20,000 would be in addition to the sums already given. The firm of Halford and Co., it stood alone, would be solvent with a surplus, but much as the debts proved against that estate were less than the assets by the sum of £20,000; but of course, from the fact that the same men were in both firms, it was really one common account. There were bills discounted, and supposed to be good, in the hands of the official assignee, to the amount of £9000. Sundry shares and securities at the bankinghouse were estimated at £5000. If all the separate debts of Mr. Strahan were paid in full, there would be a surplus to the joint estate of £50,000. The preceding figures were of course liable to alteration on subsequent investigation. The assets would be, speaking in round numbers, and judging from present appearances, £150,000 or £160,000, without referring to the large sums advanced on foreign railroads, and which would represent an item of £270,000.

The Official Assignee: So I have guessed; but I cannot speak positively.

Mr. Cooper said he appeared for several noblemen and gentlemen who had proved their debts against this estate, and, as the case was one of no ordinary character, he hoped the Court would direct a full and searching investigation. Several of the creditors might have larger claims than those for which they had proved, but they could not discover the exact amount until the accounts of the bankrupts had been examined, and the bankrupts themselves, to see what securities had been disposed of by them without the knowledge of their customers. He had to ask the Court, on behalf of those creditors, and for the convenience of the estate at large, to adjourn the choice of assignees to some future day, and to let the present sitting be devoted to the reception of proofs, as far as they went, and to the examination (if necessary) of the bankrupts. This step was the more necessary, as there would be a severe contest as to what gentlemen should be appointed assignees, and that contest ought not to be got rid of. Another reason for adjourning the meeting was because, on looking through the proceedings, it would be found that there were many affidavits that had been sworn at the private houses of individuals, some of whom had given proxies giving certain persons the right to vote on their behalf to-day. It might turn out right and prudent that that should have been done, or it might turn out that those persons who had made affidavits to an insufficient consideration were not aware they had the opportunity of proving and voting in person for the choice of assignees. No inconvenience could arise to this estate from an adjournment, as, practically, the duties of the assignees would be discharged by the official assignees until trade assignees were appointed, or any perishable goods in all be sold by special rule of the Court. That room and the next were crowded with creditors, and most likely many of those who proved would go away without voting. There were grave charges against the bankrupts—founded or unfounded he would not venture to say; but, at all events, there were charges which made the necessity of a full investigation. Those charges might involve some of the creditors who had now proved, and until the examination of the bankrupts it could not be said the proofs were without objection, and that the creditors were all entitled to vote for the choice.

Mr. Lawrance did not know whether he need occupy the Court in replying to the very able and unsatisfactory statement made by Mr Cooper, without mentioning the names of the creditors to whom that statement applied.

His Honour: I do not see the least reason for an adjournment.

Mr Parry said he appeared for Mr. Bates, who was very desirous, as were the other two bankrupts, to disclose for the benefit of the estate certain transactions which had taken place in reference to the securities deposited with the bankrupts by various creditors who had proved their debts to-day. The conduct of the bankrupts would, no doubt, be fully discussed before his Honour, who would have to decide upon it; but, on the part of Mr Bates, he now asked permission to examine him as to certain transactions, believing that the disclosures he would make would be beneficial to the creditors. In reference to what had been said as to some of the creditors not knowing what had become of their securities, Mr Bates had prepared the following perfect statement of every security, whether Exchequer Bills, shares, or other kind of security, and this he was anxious to lay before the Court. He was desirous to take the first opportunity of placing it before the Court, and depositing it in the hands of the official assignee.

His Honour: Has he given it to the official assignee?

Mr. Bell: No.

Mr. Parry: It now hand it in.

The following is the statement referred to:—

LIST OF PARTIES WHOSE SECURITIES ARE SOLD.

Exchequer Bills: Lady Carnarvon, 500; Admiral Aylmer (H. and Co.), 500; Captain Frederick (H. and Co.), 800; Duke of Rutland (Melish account), 100; Thomas he and Sollett, 500; Lord Manners, 300; A. D. Wigan, 5000; Strahan and Co., 2800. Brazilian Four-and-a-half per Cents: C. A. Caldwell, 12,000. Brazilian Five per Cents: Mrs. Weir, 7700; Mrs. Hare, 600; J. Tregon well, 24 0; Mrs. L. Herbert, 2500; Mrs. Yolman, 200. India Bonds: R. K. Revill, 10,400; Mrs. Strickland, 300; W. C. Morland, 3000; Sir A. Gaffard, 1000. Canada Five per Cents: Wynn, Tyler, Brown, and Kirwan, 6000. 			£113,625 0

Mr. Ballantine said the three bankrupts were prepared to swear to this.

His Honour. Are there any more proofs? If so, let them be disposed of first.

Mr. Lawrance said the following were prepared to act as trade assignees: Mr. Barwis, navy-agent, New Boswell court; Mr. Charles Appleyard, solicitor, of Lincoln's-inn; and Mr. Edmund Waller, stationer, Fleet-street.

These gentlemen were subsequently appointed. No other creditors were proposed in opposition to them.

Mr. Parry (to Mr. Lawrance): Do you wish to ask the bankrupts any questions?

Mr. Lawrance (to Mr. Bates): Have you signed that statement?

Mr Bates: I have.

Mr. Lawrance: By whom was it prepared?

Mr Parry: By the three bankrupts jointly. It was prepared by Mr. Bates, and signed by Sir J. D. Paul and Mr Strahan.

Mr. Lawrance (to the other bankrupts): You have heard that declaration read over and signed it?

The Bankrupts: Yes.

Mr. Parry renewed his application for Mr. Bates to be examined, stating that his client was anxious to disclose everything he knew as to all the transactions. Mr. Evans refused the application: he could see no reason for granting it. In reply to various questions put by Mr Lawrance, the bankrupts said the statement handed in by Mr Parry had been prepared by Mr. Bates, and signed by Sir J. D. Paul and Mr. Strahan, that it contained a full account of all the securities which have been sold, dealt in, or pledged by them, which they understood to be the property of their creditors, and finally that all the other securities in their bank were safe, except those contained in the list.

Debts to the amount of about £224,445 were proved during the day.

Messrs. Lawrance, Plews, and Boyer, are solicitors to the assignees, and Mr. Turquand, of Old Jewry-chambers is accountant to the estate.

Among the creditors are—Lord Palmerston, the Duke of Devonshire, Earl of Carnarvon, Viscountess Melbourne, Earl of Dysart, Sir Alexander, Mr C. Bruce, Sir Charles Young, Lord Lisburne, William Ellice, Lord Cavendish, Earl of Burlington; Mr. W. Spottiswoode, Queen's printer, the Duke of Rutland, Lord J. R. Manners, the Right Hon. C. C. Manners, Lord Galway, Countess Craven, Countess of Verulam, Marquis of Clanricarde, Sir Lucius Curtis, Lieutenant-General Thomson, Lord Muncaster, Lieutenant-General Buller, Sir B. Macnamara, Lady Manners, Earl of Bradford, &c.

The following particulars, from "Dod's Peerage, Baronetage, and Knightage," will be read with interest at the present moment.—

Paul, second Baronet (United Kingdom). Created 1831. Sir John Dean Paul, son of the late Rev. Sir Clement Paul, was the first of the family of Barnsley Manor, Esq., of Pennard House, Somerset (he died 1842). Born at 216, Strand, 1812, married, first, 1826, third daughter of Charles Geo Beauclerk, Esq., of St. Leonard's (she died 1847); secondly, 1848, only surviving daughter of the late John Ewens, Esq., of Brighton; succeeded his father in 1832; is a partner in the banking firm of Snow, Strahan, Paul, and Co. Is grand-nephew of Sir Clement Paul, whose title became extinct in 1820. Residences—216, Strand, London; Hall House, Strood, Gloucestershire; Pennard, Shepton Mallet, Somerset. Heir, has son by the first marriage, Arthur Dean, born in London, 1827; married, 1851, the second daughter of Sir John Lister Lister Kay, Bart.

Sir J. D. Paul, Mr. Strahan, and Mr. Bates were brought up from the House of Detention, in the custody of Lieutenant Hall, the Governor of the prison, on Wednesday, and placed at the bar before Mr. Jardine, at Bow-street, charged with fraudulently disposing of Dr. Griffith's securities, valued at £22,000. It was arranged between the Bar and the Court at the previous examination that the remand till Wednesday should be merely of a formal character, to comply with the provisions of the Act limiting all such remands to eight days, it being the intention of the learned counsel for the prosecution, Mr. Bodkin, to defer the progress of the inquiry till Wednesday next in spite of the publicity given to this understanding, there was no apparent diminution in the anxiety of the public to be present, the court being crowded to excess immediately after the doors were opened. They had scarcely, however, secured the positions respectively taken up after the struggle for admission, when the three prisoners were removed from the cells—the two latter preceding scarcely occupying the minute. Mr. Jardine said it would be understood that the prisoners were again remanded till Wednesday next, at the same hour. They were accordingly taken back to prison.

THE SIEGE OF BADAJOZ.—On more than one memorable occasion in his career in the Peninsula the Duke of Wellington not only employed similar means, but staked the fate of his army on their success, and especially on the hazard of Badajoz, in 1812. Contrary to all calculation, the Picurina, an outwork of the town somewhat resembling by its position the Mamelon or Kamtschatka Redoubt before Sebastopol, was forced with it being bastioned, and Picurina itself was carried by escalade. The counterscarp was blown in or the fire of the place silenced. No man who has ever read it can have forgotten the language in which the historian of that great contest relates the most terrible scene of the war. The ramparts, crowded with dark figures and glittering arms, just illuminated by the glare of flames from below; the red columns of the British, deep and broad, coming on like streams of living lava; the sudden spread of the Light Division and the Fourth Division on the brink of the yawning chasm, into which they dashed with incredible fury, some to be smothered in the wet ditch beneath, some to be dashed by the shot against the strong palisades, some to be torn upon the jagged range of sword blades fixed in ponderous beams which defended the top of the breach. For two hours all our men persevere with indomitable courage in the attempt to force their way through the scene of sla ghter, and t was not until hundreds of the boldest and bravest had perished that they were compelled to acknowledge that the breach of the Trinidad was impregnable. It was past midnight, and 2000 men had already fallen, when the Duke of Wellington ordered the remainder to retire and re-form for a second assault. Even that order was executed with difficulty, and the fate of Badajoz might have been undecided that night if other portions of the troops had not found means to scale the Castle and to carry a bastion, and enter the town at a point of which indeed its fiery

THE FRENCH MUSLIN COMPANY have just received a large lot of that loveliest of all muslins the CHINTZ on a white ground.—Patterns sent free. 16, Oxford-street.

PIANOFORTES, 20 guineas each.—DALMAINE and CO. 20, Soho-square. Lodge-pattern Cottage Pianofortes, 6½ octaves, rosewood or mahogany, in addition to their Royal Pianofortes, 27 guineas, they have a large assortment of new and second-hand Pianofortes, for the examination of those requiring a Pianoforte, at their ware-rooms, 20, Soho-square. Pianofortes taken in exchange, or on the three-years system. Pianofortes carefully removed by experienced workmen, and packed for the country, or for exportation. Pianofortes carefully tuned by the month, quarter, or year. Pianofortes repaired, and every description of instrument warranted. The peculiar advantages of these Pianofortes are best described in the following professional testimonial, signed by the majority of the leading musicians of the age: "We, the undersigned members of the musical profession, having carefully examined the 20-guinea Pianofortes manufactured by Messrs. Dalmaine and Co., have great pleasure in bearing testimony to their merits and capabilities. It appears to us impossible to produce instruments of the same size possessing a richer and finer tone, more elastic touch, or more equal temperament, while the elegance of their construction renders them a handsome ornament for the county, boudoir, or drawing-room." [Signed] J. L. Abel, Henry Baker, H. R. Bayley, J. Blewitt, J. Brizzi, F. P. Clapp, F. Drayton, C. L. Dulcken, F. Edwards, W. Forde, Stephen Glover, Isaac Nathan, E. Harrison, H. J. Hasse, J. L.
